Report of Independent Auditors

Participants and Administrative Committee
of the Compaq Computer Corporation
401(k) Investment Plan

We have audited the accompanying statements of net assets available for benefits of Compaq Computer Corporation 401(k) Investment Plan as of December 31, 2002 and 2001, and the related statement of changes in net assets available for benefits for the year ended December 31, 2002. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Edgar Filing: HEWLETT PACKARD CO - Form 11-K

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan at December 31, 2002 and 2001, and the changes in its net assets available for benefits for the year ended December 31, 2002, in conformity with accounting principles generally accepted in the United States.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2002, is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedule is the responsibility of the Plan's management. The supplemental schedule has been subjected to the auditing procedures applied in our audits of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

Compaq Computer Corporation 401(k) Investment Plan

Notes to Financial Statements

December 31, 2002

1. Description of Plan

General

The following description of the Compaq Computer Corporation 401(k) Investment Plan (the Plan) is provided for general information only.

The Plan, established April 1, 1985, is a defined contribution plan covering all eligible employees of the premerged Company and certain of its subsidiaries. Effective May 3, 2002, Compaq Computer Corporation (the Company) became a wholly owned subsidiary of Hewlett-Packard Company (HP).

The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). Participants should refer to the *Summary Plan Description* for a more complete description of the Plan's provisions, a copy of which is available from HP.

Contributions

Participants may contribute from 1% to 19% of pretax annual compensation, as defined in the plan document. Participants may also rollover amounts representing distributions from other qualified defined benefit or defined contribution plans.

HP contributes an amount equal to the participant's contribution which does not exceed 6% of \$200,000 of base compensation for all participants except certain former employees of Digital Equipment Corporation (Digital). For those former Digital employees who had elected to earn employer pay credits in another company-sponsored benefit plan, so long as they remain eligible, HP contributes an amount equal to the lesser of (i) 33 1/3% of such participant's contributions or (ii) 2% of the participant's compensation, not to exceed \$200,000 of base compensation, to the 401(k) plan and contributes the remaining 4% as an employer credit in the other company-sponsored benefit plan.

Participants direct the investment allocation of all contributions.

4

Compaq Computer Corporation 401(k) Investment Plan

Notes to Financial Statements (continued)

1. Description of Plan (continued)

Effective May 3, 2002, any former employee (including a beneficiary or alternate payer of a former employee) with an account balance in the Plan at May 3, 2002, was prohibited from further investments in the Compaq Stock Fund (which became the Hewlett-Packard Stock Fund effective May 3, 2002), and any amended payments or loan repayment that would have been invested in the Hewlett-Packard Stock Fund was invested in the Stable Value Fund.

Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the employer contribution, and (b) Plan earnings or losses, and is charged with an allocation of administrative expenses, if any. Forfeited balances of terminated participants' nonvested accounts are used to reduce future employer contributions or pay eligible plan expenses. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account, net of any outstanding loans against those vested amounts.

Vesting

Participants are immediately vested in their deferral and rollover contributions plus actual earnings thereon. Vesting in the employer contribution portion of their accounts plus actual earnings thereon is based on years of service. Effective January 1, 1999, participants vest 20% per year in the employer contributions with 100% vesting after five years of credited service. The plan document provides the vesting provisions for a participant's interest in their employer contribution account prior to January 1, 1999.

Effective May 3, 2002, any active employee of the Company and former employee who had an account balance under the Plan at May 3, 2002, was made fully vested in any invested and unforfeited balance they may have had under the Plan as of this date.

Participant Loans

Participants may borrow from their fund accounts up to a maximum equal to the lesser of \$50,000 or 50% of their vested account balance. Loan terms range from one to five years or up to 30 years for the purchase of a primary residence. The loans are secured by the balance in the participant's account and bear interest at a fixed rate of 1% above the prime rate for the term of the loan. Principal and interest is paid ratably through payroll deductions. A participant can have no more than three loans outstanding at any given time.

5

Compaq Computer Corporation 401(k) Investment Plan

Notes to Financial Statements (continued)

1. Description of Plan (continued)

Payment of Benefits

On termination of service, retirement or death, a participant or beneficiary may elect to receive plan benefits in either a lump-sum distribution or in periodic installments. In addition, a participant who has attained age 59½ may make withdrawals of their account while employed by HP. The Plan also allows for hardship withdrawals.

Administrative Expenses

HP pays certain administrative expenses of the Plan.

Plan Termination

Although it has not expressed any intent to do so, HP has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants will become 100% vested in their accounts.

2. Summary of Accounting Policies

Basis of Accounting

The financial statements have been prepared under the accrual basis of accounting in accordance with accounting principles generally accepted in the United States. Benefits are recorded when paid.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value, which represents the quoted market price on the last business day of the plan year. Shares of registered investment companies are valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end. HP stock is valued at its quoted market price. Investments in common collective trust funds are based on the quoted market value as determined by the issuer based on the fair value of the underlying investments. Money market funds are stated at cost which approximates fair value. The participant loans are valued at their outstanding balances, which approximates fair value.

6

Compaq Computer Corporation 401(k) Investment Plan

Notes to Financial Statements (continued)

2. Summary of Accounting Policies (continued)

The Stable Value Fund is stated at fair value, which approximates contract value. It is expected that each unit of the Stable Value Fund will maintain a constant net asset value of \$1. However, there is no assurance that this will be the case. Contract value represents contributions made plus interest accrued at the contract rate, less withdrawals. Insurance contracts and bank contracts are nontransferable, but provide for fully benefit-responsive withdrawals by plan participants at contract value. The Stable Value Fund invests in both guaranteed investment contracts and alternative investment contracts. These contracts are between the Plan and the various issuers of the contracts. The guaranteed investment contracts are promises by an insurance company or bank to repay principal plus accrued income at contract maturity, subject to the credit worthiness of the issuer. Alternative investment contracts consist of investments, together with contracts under which a bank or other institution, which provide for fully benefit-responsive withdrawals by plan participants at contract value. In determining fair value, the Board of Directors of the Vanguard Fiduciary Trust Company considers such factors as the fully benefit responsiveness of the investment contracts, the ability of the parties to perform in accordance with the terms of the contracts, and the likelihood that plan-directed withdrawals would cause payments to plan participants to be at amounts other than contract value. There are no limitations on liquidity guarantees and no valuation reserves are being recorded to adjust contract amounts.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan provides for investments in various investment securities, which in general, investment securities are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits and participant account balances.

7

Compaq Computer Corporation 401(k) Investment Plan

Notes to Financial Statements (continued)

3. Investments

The Plan's investments are held by Vanguard Fiduciary Trust Company, the Trustee of the Plan. Individual investments that represent 5% or more of net assets available for benefits at year-end are as follows:

	December 31,	
	2002	2001
Hewlett-Packard Company common stock	\$ 321,067,484	\$ --
Compaq Computer Corporation common stock	--	297,575,020
Stable Value Fund	115,642,265	616,237,472
Vanguard 500 Index Fund	446,361,597	600,928,759
Vanguard Primecap Fund	416,776,269	583,842,804
Vanguard Growth and Income Fund	237,308,419	324,084,769

During 2002, the Plan's investments (including investments bought, sold, and held during the year) appreciated (depreciated) in value as follows:

Mutual funds	\$ (448,693,307)
Common collective trusts	(16,839,637)
Common stock	38,809,095
	<u>\$ (426,723,849)</u>

8

Compaq Computer Corporation 401(k) Investment Plan

Notes to Financial Statements (continued)

3. Investments (continued)

The average yield of the Stable Value Fund for 2002 and 2001 was 5.51% and 6.24%, respectively. The crediting interest rates at December 31, 2002 and 2001 range from 3.48% to 7.84% and 4.50% to 7.84%, respectively. Investment contracts typically mature between two and five years after the date of initial deposit. The interest rate paid by the issuer or contract rate may be fixed over the life of the contract or adjusted periodically. Contract rates should not fall below -0-%.

4. Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service dated December 11, 2002, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan is qualified and the related trust is tax exempt.

5. Subsequent Event

Effective January 1, 2003, the limit on participant pretax contributions was increased from 19% to 50%, and the Company matching contributions were changed from 100% of the participant's contributions up to 6% of compensation to 100% of the participant's contributions up to 3% of compensation plus 50% for the next 2% of compensation contributed.
