BRIDGE BANCORP, INC. AND SUBSIDIARY
CONDENSED NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. BASIS OF PRESENTATION

Bridge Bancorp, Inc. (the “Company”) is incorporated under the laws of the State of New York as a single bank holding company. The Company’s business currently consists of the operations of its wholly-owned subsidiary, The Bridgehampton National Bank (the “Bank”). The Bank’s operations include its real estate investment trust subsidiary, Bridgehampton Community, Inc. (“BCI”) and a title insurance subsidiary, Bridge Abstract LLC (“Bridge Abstract”).

The accompanying Unaudited Consolidated Financial Statements, which include the accounts of the Company and its wholly-owned subsidiary, the Bank, have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. The Unaudited Consolidated Financial Statements included herein reflect all normal recurring adjustments that are, in the opinion of management, necessary for a fair presentation of the results for the interim periods presented. In preparing the interim financial statements, management has made estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reported periods. Such estimates are subject to change in the future as additional information becomes available or previously existing circumstances are modified. Actual future results could differ significantly from those estimates. The annualized results of operations for the six months ended June 30, 2008 are not necessarily indicative of the results of operations that may be expected for the entire fiscal year. Certain information and note disclosures normally included in the financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. Certain reclassifications have been made to prior year amounts, and the related discussion and analysis, to conform to the current year presentation. The Unaudited Consolidated Financial Statements should be read in conjunction with the Audited Consolidated Financial Statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2007.

2. EARNINGS PER SHARE

Basic earnings per common share is computed by dividing net income by the weighted-average number of common shares outstanding for the period. Diluted earnings per share, which reflect the potential dilution that could occur if outstanding stock options were exercised and dilutive stock awards were fully vested and resulted in the issuance of common stock that then shared in the earnings of the Company, is computed by dividing net income by the weighted average number of common shares and common stock equivalents.

Computation of Per Share Income
(in thousands, except per share data)

	Three months ended		Six months ended	
	June 30, 2008	June 30, 2007	June 30, 2008	June 30, 2007
Net Income	\$ 2,235	\$ 2,207	\$ 4,205	\$ 3,956
Common Equivalent Shares:				
	6,076	6,072	6,076	6,071

Weighted Average Common Shares Outstanding							
Weighted Average Common Equivalent Shares Outstanding							
	18		18		18		20
Weighted Average Common and Equivalent Shares Outstanding							
	6,094		6,090		6,094		6,091
Basic Earnings per Share	\$ 0.37	\$	0.36	\$	0.69	\$	0.65
Diluted Earnings per Share	\$ 0.37	\$	0.36	\$	0.69	\$	0.65

There were approximately 61,705 and 64,595 options outstanding at June 30, 2008 and June 30, 2007, that were not included in the computation of diluted earnings per share because the options' exercise prices were greater than the average market price of common stock and were, therefore, antidilutive. There were approximately 70,973 and 16,146 shares of unvested restricted stock at June 30, 2008 and June 30, 2007 with a grant price higher than the average market price of the common stock.

Table of Contents

3. REPURCHASE STOCK

The Company's Board of Directors approved a stock repurchase program on March 27, 2006 that authorized the repurchase of up to 309,000 shares or approximately 5% of its total issued and outstanding common shares. These shares can be purchased from time to time in the open market or through private purchases, depending on market conditions, availability of stock, the trading price of the stock, alternative uses for capital, and the Company's financial performance. Repurchased shares are held in the Company's treasury account and may be utilized for general corporate purposes.

For the six months ended June 30, 2008 and June 30, 2007, the Company did not repurchase any of its common shares. At June 30, 2008, 167,041 shares were available for repurchase under the Board approved program.

4. STOCK BASED COMPENSATION PLANS

Statement of Financial Accounting Standards 123R ("SFAS 123R"), "Accounting for Stock-Based Compensation, Revised," requires all public companies to record compensation cost for stock options provided to employees in return for employee service. The cost is measured at the fair value of the options when granted, and this cost is expensed over the employee service period, which is normally the vesting period of the options. The Black-Scholes option pricing model is used to determine the grant date fair value of option grants. No new grants of stock options were awarded during the six months ended June 30, 2008 and June 30, 2007. Compensation expense attributable to stock options was \$10,000 and \$18,000 for the three months and six months ended June 30, 2008, respectively, and \$13,000 and \$27,000 for the three months and six months ended June 30, 2007, respectively.

The intrinsic value for stock options is calculated based on the exercise price of the underlying awards and the market price of our common stock as of the reporting date. The intrinsic value of options exercised during the second quarter of 2008 and 2007 was \$0 and \$81,000, respectively. The intrinsic value of options outstanding and exercisable at June 30, 2008 and June 30, 2007 were \$225,000 and \$369,000, respectively.

During the six months ended June 30, 2008, the Company granted restricted stock awards of 42,470 shares. These awards vest over five years with a third vesting after three years, four years and five years from the date of grant. No shares of restricted stock were granted for the six months ended June 30, 2007. Compensation expense attributable to restricted stock awards was \$107,000 and \$177,000 for the three months and six months ended June 30, 2008, respectively, and \$43,000 and \$95,000 for the three months and six months ended June 30, 2007, respectively.

A summary of the status of the Company's stock options as of June 30, 2008 is as follows:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding, December 31, 2007	100,415	\$ 21.72		
Granted	-	-		
Exercised	-	-		
Forfeited	(5,527)	\$ 25.27

5. SECURITIES

A summary of the amortized cost and estimated fair value of securities is as follows:

(In thousands)	June 30, 2008		December 31, 2007	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Available for sale:				
U.S. Treasury and government agency securities	\$ 39,374	\$ 39,512	\$ 21,422	\$ 21,523
State and municipal obligations	44,797	44,819	47,547	47,803
Mortgage-backed securities	164,807	164,024	120,450	120,445
Total available for sale	248,978	248,355	189,419	189,771
Held to maturity:				
State and municipal obligations	4,385	4,386	5,836	5,844
Total held to maturity	4,385	4,386	5,836	5,844
Total debt and equity securities	\$ 253,363	\$ 252,741	\$ 195,255	\$ 195,615

Securities having a fair value of approximately \$232.7 million and \$176.5 million at June 30, 2008 and December 31, 2007, respectively, were pledged to secure public deposits and Federal Home Loan Bank and Federal Reserve Bank overnight borrowings. The Bank did not hold any trading securities during the six months ended June 30, 2008 or the year ended December 31, 2007.

As of June 30, 2008, the Bank purchased a municipal security totaling \$3.0 million that will settle during the beginning of the third quarter. This security is included in the consolidated balance sheet at June 30, 2008 as securities held to maturity with a corresponding amount reflected in other liabilities and accrued expenses.

The Bank is a member of the Federal Home Loan Bank ("FHLB") of New York. Members are required to own a particular amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. The Bank is also a member of the Federal Reserve Bank ("FRB") system and required to own FRB stock. FHLB and FRB stock is carried at cost which approximates fair value and is periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends are reported as income. The Bank owned approximately \$1.7 million in FHLB and FRB stock at June 30, 2008 and \$2.4 million at December 31, 2007, respectively and reported these as securities available for sale in the consolidated balance sheets.

In September 2006, the Financial Accounting Standards Board ("FASB") issued Statement No. 157, Fair Value Measurements. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This Statement establishes a fair value hierarchy about the assumptions

used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. The standard is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position (FSP) 157-2, Effective Date of FASB Statement No. 157. This FSP delays the effective date of FAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The impact of adoption was not material.

Statement 157 establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

7

Table of Contents

Level 1: Quoted prices (unadjusted) or identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing and asset or liability.

The fair value of securities available for sale is determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs) or matrix pricing, which is a mathematical technique widely used to in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs).

Assets and liabilities measured at fair value on a recurring basis are summarized below:

In thousands)

	June 30, 2008	Fair Value Measurements Using		
		Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Available for sale securities	\$ 248,355		\$ 248,355	

6. LOANS

The following table sets forth the major classifications of loans:

	June 30, 2008	December 31, 2007
(In thousands)		
Commercial real estate mortgage loans	\$ 182,454	\$ 175,876
Residential real estate mortgage loans	128,811	125,317
Commercial, financial, and agricultural loans	59,379	50,531
Installment/consumer loans	12,102	8,553
Real estate construction loans	16,813	14,867
Total loans	399,559	375,144
Net deferred loan cost and fees	222	92
	399,781	375,236
Allowance for loan losses	(3,324)	(2,954)
Net loans	\$ 396,457	\$ 372,282

The principal business of the Bank is lending, primarily in commercial real estate loans, construction loans, home equity loans, land loans, consumer loans, residential mortgages and commercial loans. The Bank considers its

primary lending area to be eastern Long Island in Suffolk County, New York, and a substantial portion of the Bank's loans are secured by real estate in this area. Accordingly, the ultimate collectibility of such a loan portfolio is susceptible to changes in market and economic conditions in this region.

Nonaccrual loans at June 30, 2008 and December 31, 2007 were \$0.8 million and \$0.2 million, respectively. There were no loans 90 days or more past due that were still accruing at June 30, 2008 and December 31, 2007.

As of June 30, 2008 and December 31, 2007, there were no impaired loans as defined by SFAS No. 114, "Accounting by Creditors for Impairment of a Loan – An Amendment of FASB Statement No. 5 and 15" (SFAS 114"). For a loan to be considered impaired, management determines after review whether it is probable that the Company will not be able to collect all amounts due according to the contractual terms of the loan agreement. Additionally management applies its normal loan review procedures in making these

Table of Contents

judgments. As of June 30, 2008 and December 31, 2007, there were no loans considered to be a troubled debt restructuring as defined by SFAS No. 114.

7. ALLOWANCE FOR LOAN LOSSES

Management monitors its loan portfolio on a regular basis, with consideration given to detailed analyses of classified loans, repayment patterns, delinquencies trends, probable incurred losses, past loss experience, current economic conditions, and various types of concentrations of credit. Additions to the allowance are charged to expense and realized losses, net of recoveries, are charged to the allowance. Based on the determination of management and the Classification Committee, the overall level of reserves is periodically adjusted to account for the inherent and specific risks within the entire portfolio. Based on the Classification Committee's review of the classified loans and the overall reserve levels as they relate to the entire loan portfolio at June 30, 2008, management determined the allowance for loan losses to be adequate.

The following table sets forth changes in the allowance for loan losses.

(In thousands)	For the Six Months Ended		For the Year
	June 30, 2008	June 30, 2007	Ended December 31, 2007
Beginning balance	\$ 2,954	\$ 2,512	\$ 2,512
Provision for loan loss	525	95	600
Net (charge-offs) recoveries	(155)	31	(158)
Ending balance	\$ 3,324	\$ 2,638	\$ 2,954

8. EMPLOYEE BENEFITS

The Bank maintains a noncontributory pension plan through the New York State Bankers Association Retirement System covering all eligible employees.

The Bridgehampton National Bank Supplemental Executive Retirement Plan ("SERP") provides benefits to certain employees, as recommended by the Compensation Committee of the Board of Directors and approved by the full Board of Directors, whose benefits under the Pension Plan are limited by the applicable provisions of the Internal Revenue Code. The benefit under the SERP is equal to the additional amount the employee would be entitled to under the Pension Plan and the 401(k) Plan in the absence of such Internal Revenue Code limitations. The assets of the SERP are held in a rabbi trust to maintain the tax-deferred status for the individuals in the plan. As a result, the assets of the trust are reflected on the Consolidated Balance Sheets of the Company. The effective date of the SERP was January 1, 2001.

There were no contributions made to the pension plan or SERP for the six months ended June 30, 2008. The Company does not anticipate making any additional contributions to the pension plan through the end of the year.

The Company's funding policy with respect to its benefit plans is to contribute at least the minimum amounts required by applicable laws and regulations.

The following table sets forth the components of net periodic benefit cost and other amounts recognized in Other Comprehensive Income.

(In thousands)

9. SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

Securities sold under agreements to repurchase are financing agreements that mature within seven years. The arrangements outstanding as of June 30, 2008 were entered into during February and March of 2008. The securities sold under agreements to repurchase had an average balance of \$11.3 million and an average interest rate of 2.3% during the six months ended June 30, 2008. The maximum month end balance during the six months ended June 30, 2008 was \$15.0 million. At maturity, the securities underlying the agreements are returned to the Company. There were \$15.0 million and \$25.0 million of securities sold under agreements to repurchase outstanding as of June 30, 2008 and December 31, 2007, respectively.

10. FEDERAL HOME LOAN BANK ADVANCES

There were no advances from the Federal Home Loan Bank outstanding as of June 30, 2008. As of December 31, 2007, there was one advance from the Federal Home Loan bank for \$10.0 million with a fixed interest rate of 4.3% that matured in January 2008 and was repaid upon maturity.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Private Securities Litigation Reform Act Safe Harbor Statement

This report may contain statements relating to the future results of the Company (including certain projections and business trends) that are considered "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995 (the "PSLRA"). Such forward-looking statements, in addition to historical information, which involve risk and uncertainties, are based on the beliefs, assumptions and expectations of management of the Company. Words such as "expects," "believes," "should," "plans," "anticipates," "will," "potential," "could," "intend," "may," "outlook," "predict," "would," "estimates," "assumes," "likely," and variations of such similar expressions are intended to identify such forward-looking statements. Examples of forward-looking statements include, but are not limited to, possible or assumed estimates with respect to the financial condition, expected or anticipated revenue, and results of operations and business of the Company, including earnings growth; revenue growth in retail banking, lending and other areas; origination volume in the Company's consumer, commercial and other lending businesses; current and future capital management programs; non-interest income levels, including fees from the abstract subsidiary and banking services as well as product sales; tangible capital generation; market share; expense levels; and other business operations and strategies. For this presentation, the Company claims the protection of the safe harbor for forward-looking statements contained in the PSLRA.

Factors that could cause future results to vary from current management expectations include, but are not limited to: change in economic conditions including an economic recession that could affect the value of real estate collateral and the ability for borrowers to repay their loans; legislative and regulatory changes; monetary and fiscal policies of the federal government; changes in tax policies, rates and regulations of federal, state and local tax authorities; changes in interest rates; deposit flows; the cost of funds; demand for loan products and other financial services; competition; changes in the quality and composition of the Bank's loan and investment portfolios; changes in management's business strategies; changes in accounting principles, policies or guidelines; changes in real estate values and other factors discussed elsewhere in this report, factors set forth under Item 1A., Risk Factors, in our Annual Report on Form 10-K for the year ended December 31, 2007 and in other reports filed by the Company with the Securities and Exchange Commission. The forward-looking statements are made as of the date of this report, and the Company assumes no obligation to update the forward-looking statements or to update the reasons why actual results could differ from those projected in the forward-looking statements.

Overview

Who We Are and How We Generate Income

Bridge Bancorp, Inc. (“the Company”), a New York corporation, is a single bank holding company formed in 1989. On a parent-only basis, the Company has had minimal results of operations. The Company is dependent on dividends from its wholly owned subsidiary, The Bridgehampton National Bank (“the Bank”), its own earnings, additional capital raised, and borrowings as sources of funds. The information in this report reflects principally the financial condition and results of operations of the Bank. The Bank’s results of operations are primarily dependent on its net interest income, which is mainly the difference between interest income on loans and investments and interest expense on deposits and borrowings. The Bank also generates non interest income, such as fee income on deposit accounts and merchant credit and debit card processing programs, income from its title abstract subsidiary, and net gains on sales of securities and loans. The level of its non interest expenses, such as salaries and benefits, occupancy and equipment costs, other general and administrative expenses, expenses from its title insurance subsidiary, and income tax expense, further affects

Table of Contents

the Bank's net income. Certain reclassifications have been made to prior year amounts and the related discussion and analysis to conform to the current year presentation.

Quarterly Highlights

- Net income of \$2.2 million or \$.37 per diluted share for the second quarter of 2008 as compared to net income of \$2.2 million or \$.36 per diluted share for the second quarter of 2007.
- Returns on average equity and assets of 17.13% and 1.32%, respectively for the second quarter of 2008.
- Net interest income increased to \$7.3 million for the second quarter of 2008 as compared to \$6.2 million in 2007.
- A net interest margin of 4.76% for the second quarter of 2008 as compared to 4.62% for 2007.
- Total loans at June 30, 2008 of \$399.8 million, a \$52.9 million or 15.3% increase from June 30, 2007.
- Total assets of \$710.2 million at June 30, 2008, an increase of \$119.1 million or 20.1% compared to \$591.1 million at June 30, 2007.
- Deposits of \$617.8 million at June 30, 2008, an increase of \$76.7 million or 14.2% from June 2007.
- Demand deposits of \$214.5 million at June 30, 2008, a 10.6% increase over June 30, 2007, representing 35% of total deposits.
- Continued strong credit quality with increasing reserve levels.
- The declaration of a cash dividend of \$.23 per share for the second quarter of 2008.
- Commenced trading on the NASDAQ stock market on June 9, 2008.

Principal Products and Services and Locations of Operations

The Bank operates fourteen branches on eastern Long Island. Federally chartered in 1910, the Bank was founded by local farmers and merchants. For nearly a century, the Bank has maintained its focus on building customer relationships in this market area. The mission of the Company is to grow through the provision of exceptional service to its customers, its employees, and the community. The Company strives to achieve excellence in financial performance and build long term shareholder value. The Bank engages in full service commercial and consumer banking business, including accepting time, savings and demand deposits from the consumers, businesses and local municipalities surrounding its branch offices. These deposits, together with funds generated from operations and borrowings, are invested primarily in: (1) commercial real estate loans; (2) home equity loans; (3) construction loans; (4) residential mortgages; (5) secured and unsecured commercial and consumer loans; (6) FHLB, FNMA, GNMA and FHLMC mortgage-backed securities and collateralized mortgage obligations; (7) New York State and local municipal obligations; and (8) U.S. Treasury and government agency securities. The Bank also offers the CDARS program, providing up to \$50,000,000 of FDIC insurance to its customers. In addition, the Bank offers merchant credit and debit card processing, automated teller machines, cash management services, online banking services, safe deposit boxes and individual retirement accounts. Through its title insurance abstract subsidiary, the Bank acts as a broker for title insurance services. The Bank's customer base is comprised principally of small businesses, municipal relationships and consumer relationships.

Opportunities and Challenges

The economic and competitive landscape has changed dramatically over the past two years. Recognizing that our market areas are generally affluent, large money center banks increasingly meet their funding needs by aggressively pricing deposits in the Bank's markets. Competition for deposits and loans is intense as various banks in the marketplace, large and small, promise excellent service and often price their products aggressively. Deposit growth is essential to the Bank's ability to increase earnings; therefore branch expansion and building share in our existing markets remain key strategic goals. Controlling funding costs yet protecting the deposit base along with focusing on profitable growth, presents a unique set of challenges in this operating environment.

During 2007, growing profits in the flat or inverted yield curve environment presented significant challenges to the Bank since, as a community bank, its income historically relies heavily on the interest rate spread between short term and long term rates. The ability of the Bank to borrow on a short term basis at a lower cost and invest on a long term basis at a higher yield was diminished. Pressure

Table of Contents

on net interest income persisted during 2007; however, improvements in both rate and volume during the second half of 2007 caused an increase in net interest income for the year ended December 31, 2007 as compared to the prior year. The yield curve remained flat or slightly inverted during much of the year. During the second half of 2007 and continuing into the second quarter of 2008, the financial markets experienced significant volatility resulting from the continued fallout of sub-prime lending and the global liquidity crises. A multitude of government initiatives along with six rate cuts by the Federal Reserve totaling 325 basis points have been designed to improve liquidity for the distressed financial markets. The ultimate objective of these efforts has been to help the beleaguered consumer, and reduce the potential surge of residential mortgage loan foreclosures. Despite these actions, many of our competitors, due to liquidity concerns, have not yet adjusted their deposit pricing. This contrasts with the impact on assets where yields on loans and securities continue to decline. The squeeze between declining asset yields and more slowly declining liability pricing could impact margins.

Growth and service strategies have potential to offset the tighter net interest margin with volume as the customer base grows through expanding the Bank's footprint, while maintaining and developing existing relationships. During 2007, the Bank opened three new branches; Southampton Village, Cutchogue and its 14th branch office which is located in Wading River. We continue to make our way through the regulatory process and expect that the opening of our new facility in the Village of East Hampton will be a 2009 event. We believe positive outcomes in the future will result from the expansion of our geographic footprint, investments in infrastructure and technology, such as BridgeNEXUS, our remote deposit capture product, and continued focus on placing our customers first.

Corporate objectives for 2008 include: leveraging our expanding branch network to build customer relationships and grow loans and deposits; focusing on opportunities and processes that continue to enhance the customer experience at the Bank; improving operational efficiencies and prudent management of non-interest expense; and maximizing non-interest income through Bridge Abstract as well as other lines of business. The ability to attract, retain, train and cultivate employees at all levels of the Company remains significant to meeting these objectives.

Comparison of Operating Results

Net Income

Net income for the three months ended June 30, 2008 totaled \$2.2 million or \$0.37 per diluted share as compared to \$2.2 million or \$0.36 per diluted share for the same period in 2007. Changes for the three months ended June 30, 2008 compared to June 30, 2007 include: (i) \$1.2 million or 18.8% increase in net interest income; (ii) \$0.1 million or 4.4% increase in total non interest income as a result of higher service charges on deposit accounts and fee income for customer services, partially offset by lower title insurance revenues; (iii) \$0.9 million or 20.7% increase in total non interest expenses, primarily due to increased salaries and employee benefits related to increased staffing and greater incentive based compensation as well as costs associated with the listing of the Company's common stock on the NASDAQ. In addition, a provision for loan losses of \$325,000 was recorded this quarter due to the continued growth of our loan portfolio as well as our assessment of risk factors considering the weakening economic environment and overall industry trends. Non interest income for the three months ended June 30, 2008 as well as the three months ended June 30, 2007 did not include any net securities losses. The effective income tax remained at 32.5% consistent with the same period last year.

Net income for the six-months ended June 30, 2008 totaled \$4.2 million or \$0.69 per diluted share as compared to \$4.0 million or \$0.65 per diluted share for the same period in 2007. Changes for the six months ended June 30, 2008 include: (i) \$2.0 million or 16.9% increase in net interest income, (ii) a provision for loan losses of \$525,000 compared to \$95,000 recorded in 2007; (iii) \$0.3 million or 10.1% increase in total non interest income as a result of growth in service charges on deposit accounts and fee income from customer services, partially offset by lower title insurance revenues; (iv) \$1.4 million or 16.0% increase in non interest expenses, over the same period in 2007,

primarily due to increased salaries and employee benefits related to increased staffing and greater incentive based compensation related to the achievement of established performance goals as well as costs associated with an expanding infrastructure related to the new branches. Non interest income for the six months ended June 30, 2007 included a net loss on the sale of securities realized of \$0.1 million during the first quarter of 2007 due to a repositioning of the available for sale investment portfolio. The Company's effective income tax rate increased to 32.4% in 2008 compared to 31.4% in 2007.

Analysis of Net Interest Income

Net interest income, the primary contributor to earnings, represents the difference between income on interest earning assets and expenses on interest bearing liabilities. Net interest income depends upon the volume of interest earning assets and interest bearing liabilities and the interest rates earned or paid on them.

The following table sets forth certain information relating to the Company's average consolidated balance sheets and its consolidated statements of income for the periods indicated and reflect the average yield on assets and average cost of liabilities for the periods

Table of Contents

indicated. Such yields and costs are derived by dividing income or expense by the average balance of assets or liabilities, respectively, for the periods shown. Average balances are derived from daily average balances and include non-performing loans. The yields and costs include fees, which are considered adjustments to yields. Interest on nonaccrual loans has been included only to the extent reflected in the consolidated statements of income. For purposes of this table, the average balances for investments in debt and equity securities exclude unrealized appreciation/depreciation due to the application of SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities."

Table of Contents

Rate/Volume Analysis

Net interest income can be analyzed in terms of the impact of changes in rates and volumes. The following table illustrates the extent to which changes in interest rates and in the volume of average interest earning assets and interest bearing liabilities have affected the Bank's interest income and interest expense during the periods indicated. Information is provided in each category with respect to (i) changes attributable to changes in volume (changes in volume multiplied by prior rate); (ii) changes attributable to changes in rates (changes in rates multiplied by prior volume); and (iii) the net changes. For purposes of this table, changes which are not due solely to volume or rate changes have been allocated to these categories based on the respective percentage changes in average volume and rate. Due to the numerous simultaneous volume and rate changes during the periods analyzed, it is not possible to precisely allocate changes between volume and rates. In addition, average earning assets include nonaccrual loans.

(In thousands)	Three months ended June 30, 2008 Over 2007 Changes Due To			Six months ended June 30, 2008 Over 2007 Changes Due To

Net interest income	\$ 1,708	\$ (785)	\$ 923	\$ 3,417	\$ (1,889)	\$ 1,528

(1) The above table is presented on a tax equivalent basis.

Net interest income was \$7.3 million for the quarter ended June 30, 2008 compared to \$6.2 million for the same period in 2007, an increase of \$1.2 million or 18.8%. Net interest margin improved to 4.76% for the quarter ended

June 30, 2008 as compared to 4.62% for the quarter ended June 30, 2007. These increases were primarily the result of an increase in interest average earnings assets of \$79.3 million and the decrease in the cost of the average total interest bearing liabilities being greater than the decrease in the yield on average total interest earning assets. The cost of interest bearing liabilities decreased approximately 90 basis points during the second quarter of 2008 compared to 2007, which was partly offset by a decrease in yields of approximately 40 basis points on interest earning assets.

Net interest income was \$14.0 million for the six months ended June 30, 2008 compared to \$11.9 million for the same period in 2007, an increase of \$2.1 million or 16.9%. Net interest margin improved to 4.72% for the six months ended June 30, 2008 as compared to 4.55% same period prior year. These increases were primarily the result of an increase in interest earnings assets of \$61.8 million and the decrease in the cost of the average total interest bearing liabilities being greater than the decrease in the yield on average total interest earning assets. The cost of interest bearing liabilities decreased approximately 73 basis points during the six months of 2008 compared to 2007, which was partly offset by a decrease in yields of approximately 26 basis points on interest earning assets.

For the quarter ended June 30, 2008, average loans grew by \$51.4 million or 15.0% to \$393.9 million as compared to \$342.5 million for the same period in 2007. Real estate mortgage loans and commercial loans primarily contributed to the growth. The Bank remains

Table of Contents

committed to growing loans with prudent underwriting, sensible pricing and limited credit and extension risk. During the six months ended June 30, 2008, average loans grew by \$50.7 million or 15.1% to \$386.1 million compared to \$335.4 million for prior year.

During the second quarter of 2008, average investments increased by \$29.1 million or 14.6% to \$228.3 million as compared to \$199.2 million in the same period of 2007. During the six months ended June 30, 2008, average investments increased by \$11.4 million or 5.5% to \$218.2 million as compared to \$206.8 million prior year. To position the balance sheet for the future and better manage liquidity and interest rate risk, a portion of the available for sale investment securities portfolio was sold during the first quarter of 2007 resulting in a net loss of \$101,000. For the six months ended June 30, 2008 average federal funds sold decreased to \$8.7 million or 4.7% compared to \$9.2 million in 2007.

Average interest bearing liabilities totaled \$424.8 million for the quarter ended June 30, 2008 compared to \$358.6 million for the same period in 2007. During the six months ended June 30, 2008, average interest bearing liabilities was \$412.2 million compared to \$359.1 million for prior year. The Bank continued to offer deposit promotions during the quarter in connection with new branch openings and to retain core deposit balances. During the second quarter of 2008, the Bank reduced interest rates on deposit products in response to the reductions in the federal funds and discount rate by the Federal Reserve. The reduction in deposit rates along with lower borrowing costs resulted in a decrease in the cost of interest bearing liabilities from 3.03% for the quarter ended June 30, 2007 to 2.13% for the quarter ended June 30, 2008. During the six months ended June 30, 2008, the cost of interest bearing liabilities declined 73 basis points to 2.34% from 3.07% for prior year. Since the Company's interest bearing liabilities generally reprice or mature more quickly than its interest earning assets, a decrease in short term interest rates initially results in an increase in net interest income. Additionally, the large percentages of deposits in money market accounts reprice at short term market rates making the balance sheet more liability sensitive.

For the quarter ended June 30, 2008, total average deposits increased by \$52.7 million or 9.7% to \$596.3 million as compared to the quarter ended June 30, 2007. Components of this increase include an increase in average demand deposits of \$11.0 million or 5.9% to \$196.9 million as compared to average demand deposits for 2007. The average balances in savings, NOW and money market accounts increased \$8.7 million or 3.0% to \$304.3 million for the quarter ended June 30, 2008, compared to the same period last year. Average balances in certificates of deposit of \$100,000 or more and other time deposits increased \$33.0 million or 53.3% to \$95.0 million for 2008 as compared to 2007. Average public fund deposits comprised 22.0% of total average deposits during the quarter ended June 30, 2008 and 23.6% for the same period in 2007. Average federal funds purchased and repurchase agreements and average Federal Home Loan Bank advances increased \$24.4 million to \$25.4 million for the quarter ended June 30, 2008 as compared to the same period in the prior year.

For the six months ended June 30, 2008, total average deposits increased by \$42.7 million or 8.0% to \$578.6 million as compared to prior year 2007. Components of this increase include an increase in average demand deposits for 2008 of \$7.0 million or 3.9% to \$186.6 million as compared to average demand deposits for 2007. The average balances in savings, NOW and money market accounts increased \$4.0 million or 1.4% to \$299.1 million for the six months ended June 30, 2008, compared to the same period last year. Average balances in certificates of deposit of \$100,000 or more and other time deposits increased \$31.7 million or 51.8% to \$92.9 million for 2008 as compared to 2007. Average public fund deposits comprised 23.2% of total average deposits during the six months of 2008 and 25.1% for the same period in 2007. Average federal funds purchased and repurchase agreements and average Federal Home Loan Bank advances increased \$17.4 million to \$20.2 million for the six months ended June 30, 2008 as compared to the same period in the prior year.

Total interest income increased \$0.7 million or 7.9% to \$9.6 million for the quarter ended June 30, 2008 from \$8.9 million for the same period in 2007. Interest income on loans increased \$0.4 million or 6.1% to \$6.9 million in 2008

compared to \$6.5 million in 2007 primarily due to growth in the loan portfolio partially offset by a decrease in yield on average loans. The yield on average loans was 7.1% for 2008 as compared to 7.6% in 2007. Interest income in mortgage-backed, taxable and tax exempt securities increased \$0.4 million to \$2.8 million for the three months ended June 30, 2008 compared to \$2.4 million for the three months ended June 30, 2007. Interest income on securities included net accretion of discounts of \$22,000 in the second quarter of 2008 compared to amortization of premiums on securities of \$17,000 for the same period in 2007. The tax adjusted average yield on total securities stayed flat at 4.8% for the three months ended June 30, 2008 and 2007 respectively. Interest income on federal funds sold decreased \$0.1 million to \$0.1 million in 2008 compared to \$0.2 million in 2007. The ratio of interest earning assets to interest bearing liabilities decreased to 149.7% for the quarter ended June 30, 2008 as compared to 155.2% in 2007.

For the six months ended June 30, 2008, total interest income increased \$1.4 million or 7.7% to \$18.8 million from \$17.4 million for the same period in 2007. Interest income on loans increased \$1.1 million or 8.3% to \$13.8 million in 2008 compared to \$12.7 million in 2007 primarily due to growth in the loan portfolio partially offset by a decrease in yield on average loans. The yield on average loans was 7.2% for 2008 as compared to 7.6% in 2007. Interest income in mortgage-backed, taxable and tax exempt securities increased \$0.4 million to \$5.3 million for the six months ended June 30, 2008 compared to \$4.9 million for the same period in 2007.

Table of Contents

Interest income on securities included net accretion of discounts of \$23,000 in the six months ended June 30, 2008 compared to net accretion of discounts on securities of \$13,000 for the same period in 2007. The tax adjusted average yield on total securities stayed flat at 4.8% for the six months ended June 30, 2008 and 2007 respectively. Interest income on federal funds sold decreased \$0.1 million to \$0.1 million in 2008 compared to \$0.2 million in 2007. The ratio of interest earning assets to interest bearing liabilities decreased to 148.8% for the six months ended June 30, 2008 as compared to 153.5% in 2007.

Interest expense decreased \$0.5 million or 17.0% to \$2.2 million for the quarter ended June 30, 2008 compared to \$2.7 million for the same period in 2007. For the six months ended June 30, 2008, interest expense decreased \$0.7 million or 12.5% to \$4.8 million from \$5.5 million for the same period in 2007. The decreases in interest expense in the quarter and six months ended June 30, 2008 compared to the same periods in 2007 resulted from reductions in interest rates on deposits and borrowings offset by the growth in average balances for deposits and borrowings.

Provision and Allowance for Loan Losses

The Bank's loan portfolio consists primarily of real estate loans secured by commercial and residential real estate properties located in the Bank's principal lending area on eastern Long Island. The interest rates charged by the Bank on loans are affected primarily by the demand for such loans, the supply of money available for lending purposes, the rates offered by its competitors, the Bank's relationship with the customer and the related credit risks of the transaction. These factors are affected by general and economic conditions including, but not limited to, monetary policies of the federal government, including the Federal Reserve Board, legislative policies and governmental budgetary matters.

The credit quality of the loan portfolio remained strong for the quarter ended June 30, 2008. Non performing assets increased at June 30, 2008 to \$0.8 million from \$0.2 million at December 31, 2007 and \$0.2 million at June 30, 2007 representing 0.19% of total loans at June 30, 2008 compared to 0.06% at December 31, 2007 and June 30, 2007, respectively. As of June 30, 2008 and December 31, 2007, the Company had no loans that were considered a troubled debt restructuring, as defined by SFAS No. 114 and no foreclosed real estate.

Loans of approximately \$13.1 million or 3.3% of total loans at June 30, 2008 were classified as potential problem loans compared to \$13.5 million or 3.5% and \$12.9 million or 3.4% at March 31, 2008 and December 31, 2007, respectively. These are loans for which management has information that indicates the borrower may not be able to comply with the present repayment terms. These loans are subject to increased management attention and their classification is reviewed on at least a quarterly basis. Due to the structure and nature of the credits, management currently believes that the likelihood of sustaining a loss on these relationships is remote.

Based on our continuing review of the overall loan portfolio, the current asset quality of the portfolio, and the growth in our loan portfolio, provisions for loan losses of \$325,000 and \$525,000 were recorded during the quarter and six months ended June 30, 2008, respectively, compared to \$50,000 and \$95,000 for the same prior year periods, respectively. The Bank recognized net charge-offs in the amount of \$155,000 for the first six months of 2008 as compared to net recoveries of \$31,000 for the same period in 2007. The allowance for loan losses increased to \$3.3 million at June 30, 2008, as compared to \$3.0 million at December 31, 2007 and \$2.6 million at June 30, 2007. As a percentage of total loans, the allowance increased to 0.83% at June 30, 2008 compared to 0.79% at December 31, 2007 and 0.76% at June 30, 2007. Management continues to carefully monitor the loan portfolio as well as real estate trends on eastern Long Island. The Bank's consistent and rigorous underwriting standards preclude sub prime lending, and management remains cautious about the potential impact on the local economy and real estate values in the future.

Non Interest Income

Total non interest income increased \$0.1 million or 4.4% to \$1.6 million for the quarter ended June 30, 2008 compared to \$1.5 million for the same period in 2007. Service charges on deposit accounts totaled \$0.8 million for the quarter ended June 30, 2008, compared to \$0.7 million, from the same period in 2007. Fees for other customer services were \$0.4 million for the quarters ended June 30, 2008 and 2007, respectively. Title fee income related to Bridge Abstract decreased \$0.1 million or 17.9% to \$0.3 million for the quarter ended June 30, 2008 compared to \$0.4 million for the same period in 2007.

Total non interest income increased \$0.3 million or 10.1 % to \$3.1 million for the six months ended June 30, 2008 compared to \$2.8 million for the same period in 2007. There were no net losses on sales of securities during the six months ended June 30, 2008, compared to \$0.1 million for the same period 2007. Excluding net securities losses, total non interest income increased \$0.2 million or 6.2% for the six months ended June 30, 2008. Service charges on deposit accounts for the six months ended June 30, 2008 totaled \$1.5 million, reflecting an increase of 23.7% over the six months ended June 30, 2007 and was primarily related to the growth in deposits. Fees for other customer services for the six months ended June 30, 2008 totaled \$0.8 million, an increase of 0.5% from the

Table of Contents

same period in 2007. Title fee income generated by Bridge Abstract decreased \$0.1 million or 10.8% to \$0.7 million for the six month ended June 30, 2008 compared to \$0.8 million for the same period in 2007 due to fewer real estate transactions.

Non Interest Expense

Total non interest expense increased \$0.9 million or 20.7% to \$5.3 million, and \$1.4 million or 16.0% to \$10.3 million during the three and six month periods ended June 30, 2008 over the same periods in 2007. The primary components of these increases were (i) salary and benefit expense related to increased staffing and greater incentive based compensation; (ii) costs associated with the listing of the Company's common stock on the NASDAQ; and (iii) expansion of the Company's infrastructure related to new branches. Salary and benefit expense increased \$0.6 million or 22.1% and \$0.9 million or 18.0% for the three and six months ended June 30, 2008, over the same periods in 2007.

Income Taxes

The provision for income taxes remained flat at \$1.1 million for the three months ended June 30, 2008 and June 30, 2007 as the effective tax rate was 32.5% for both periods. The provision for income taxes increased during the six month ended June 30, 2008 by \$0.2 million or 11.1% over the same period last year due to the increase in income before income taxes and a higher effective tax rate. The effective tax rate for the six months ended June 30, 2008 increased to 32.4% as compared to 31.4% for the same period last year primarily due to a lower percentage of interest income from tax exempt securities in 2008.

Financial Condition

Assets totaled \$710.2 million at June 30, 2008, an increase of \$102.8 million or 16.9% from \$607.4 million at December 31, 2007. This change is primarily a result of increases in total securities of \$57.1 million or 29.2 % and total loans of \$24.2 million or 6.5% and cash and cash equivalents of \$19.7 million or 137.4%. This growth in assets was funded primarily by growth in total deposits of \$108.9 million partially offset by a decrease in other borrowings of \$9.7 million. Demand deposits increased \$38.4 million or 21.8% to \$214.5 million compared to \$176.1 million at December 31, 2007. Savings, NOW and money market deposits increased \$72.3 million or 28.6% to \$325.3 million at June 30, 2008 from \$253.0 million at December 31, 2007. Certificates of deposit of \$100,000 or more and other time deposits decreased \$1.8 million or 2.2%. Federal funds purchased and repurchase agreements increased \$0.3 million to \$32.3 million at June 30, 2008 compared to \$32.0 million at December 31, 2007. There were no Federal Home Loan advances outstanding at June 30, 2008 compared to \$10 million at December 31, 2007. Other liabilities increased \$2.6 million to \$7.4 million at June 30, 2008 from \$4.8 million at December 31, 2007.

Total stockholders' equity was \$52.1 million at June 30, 2008, an increase of \$1.0 million or 1.9% from December 31, 2007, primarily due to net income of \$4.2 million and share based compensation of \$0.2 million, partially offset by a decrease in net unrealized gains on securities of \$0.6 million and by the declaration of dividends totaling \$2.8 million.

In June 2008, the Company declared a quarterly dividend of \$0.23 per share. The Company continues its long term trend of uninterrupted dividends.

Liquidity

The objective of liquidity management is to ensure the sufficiency of funds available to respond to the needs of depositors and borrowers, and to take advantage of unanticipated earnings enhancement opportunities for Company growth. Liquidity management addresses the ability of the Company to meet financial obligations that arise in the normal course of business. Liquidity is primarily needed to meet customer borrowing commitments, deposit

withdrawals either on demand or contractual maturity, to repay other borrowings as they mature, to fund current and planned expenditures and to make new loans and investments as opportunities arise.

The Company's principal source of liquidity includes cash and cash equivalents of \$4.3 million and dividends from the Bank. Due to regulatory restrictions, dividends from the Bank to the Company at June 30, 2008 were limited to \$4.2 million, which represents the Bank's 2008 retained net income. The dividends received from the Bank are used primarily for dividends to the shareholders and stock repurchases.

The Bank's most liquid assets are cash and cash equivalents, securities available for sale and securities held to maturity due within one year. The levels of these assets are dependent upon the Bank's operating, financing, lending and investing activities during any given period. Other sources of liquidity include loan and investment securities principal repayments and maturities, lines of credit with other financial institutions including the Federal Home Loan Bank, growth in core deposits and sources of wholesale funding such as brokered certificates of deposits. While scheduled loan amortization, maturing securities and short term investments are a relatively

Table of Contents

predictable source of funds, deposit flows and loan and mortgage-backed securities prepayments are greatly influenced by general interest rates, economic conditions and competition. The Bank adjusts its liquidity levels as appropriate to meet funding needs such as seasonal deposit outflows, loans, and asset and liability management objectives. Historically, the Bank has relied on its deposit base, drawn through its full-service branches that serve its market area and local municipal deposits, as its principal source of funding. The Bank seeks to retain existing deposits and loans and maintain customer relationships by offering quality service and competitive interest rates to its customers, while managing the overall cost of funds needed to finance its strategies. The Bank's Asset/Liability and Funds Management Policy allows for wholesale borrowings of up to 25% of total assets. At June 30, 2008, the Bank had aggregate lines of credit of \$75.0 million with unaffiliated correspondent banks to provide short term credit for liquidity requirements. Of these aggregate lines of credit, \$55.0 million is available on an unsecured basis. The Bank also has the ability, as a member of the Federal Home Loan Bank ("FHLB") system, to borrow against unencumbered residential mortgages owned by the Bank. The Bank also has a master repurchase agreement with the FHLB, which increases its borrowing capacity. In addition, the Bank has an approved broker relationship for the purpose of issuing brokered certificates of deposit. As of June 30, 2008, the Bank did not issue any brokered certificates of deposits. As of June 30, 2008, the Bank had \$17.3 million in overnight borrowings.

Management continually monitors the liquidity position and believes that sufficient liquidity exists to meet all of our operating requirements. Based on the objectives determined by the Asset and Liability Committee, the Bank's liquidity levels may be affected by the use of short term and wholesale borrowings, and the amount of public funds in the deposit mix. The Asset and Liability Committee is comprised of members of senior management and the Board. Excess short term liquidity is invested in overnight federal funds sold. As of June 30, 2008, the Bank had \$4.0 million in federal funds sold.

Capital Resources

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and Bank's assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification also are subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk weighted assets (as defined), and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of June 30, 2008, that the Company and the Bank meet all capital adequacy requirements with which it must comply.

The Company's only activity is the ownership of the Bank, and therefore, its capital, capital ratios, and minimum required levels of capital are substantially the same as the Bank's. At June 30, 2008 and December 31, 2007, actual capital levels and minimum required levels for the Bank were as follows:

(dollars in thousands)			For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provision	
	Actual Amount	Ratio	Amount	Ratio	Amount	Ratio

As of June 30, 2008

Total Capital (to risk weighted assets)	\$ 52,607	11.1%	\$ 38,066	8.0%	\$ 47,583	10.0%
Tier 1 Capital (to risk weighted assets)	49,164	10.3%	19,033	4.0%	28,550	6.0%
Tier 1 Capital (to average assets)	49,164	7.3%	27,124	4.0%	33,905	5.0%

As of December 31, 2007

Total Capital (to risk weighted assets)	\$ 47,860	10.8%	\$ 35,524	8.0%	\$ 44,405	10.0%
Tier 1 Capital (to risk weighted assets)	44,906	10.1%	17,762	4.0%	26,643	6.0%
Tier 1 Capital (to average assets)	44,906	7.4%	24,338	4.0%	30,423	5.0%

Impact of Inflation and Changing Prices

The Unaudited Consolidated Financial Statements and notes thereto presented herein have been prepared in accordance with U.S. generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering changes in the relative purchasing power of money over time due to inflation. The primary effect of inflation on the operations of the Company is reflected in increased operating costs. Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, changes in interest rates have a more significant effect on the performance of a financial institution than do the effects of changes in the general rate of inflation and changes in prices. Changes in interest rates could adversely affect our results of operations and financial condition. Interest rates do not necessarily move in the same direction, or in the same magnitude, as the prices of goods and services. Interest rates are highly sensitive to many factors, which are beyond the control of the Company, including the influence of domestic and foreign economic conditions and the monetary and fiscal policies of the United States government and federal agencies, particularly the Federal Reserve Bank.

Recent Regulatory and Accounting Developments

In September 2006, the FASB issued Statement No. 157, Fair Value Measurements. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This Statement establishes a fair value hierarchy about the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. The standard is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position (FSP) 157-2, Effective Date of FASB Statement No. 157. This FSP delays the effective date of FAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The impact of adoption was not material.

In February, 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" ("SFAS 159"). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective of SFAS 159 is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting principles. The new standard is effective for the Company on January 1, 2008. The Company did not elect the fair value option for any financial assets for financial liabilities as of January 1, 2008.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Asset/Liability Management

Management considers interest rate risk to be the most significant market risk for the Company. Market risk is the risk of loss from adverse changes in market prices and rates. Interest rate risk is the exposure to adverse changes in the net income of the Company as a result of changes in interest rates.

The Company's primary earnings source is net interest income, which is affected by changes in the level of interest rates, the relationship between rates, the impact of interest rate fluctuations on asset prepayments, the level and composition of deposits and liabilities, and the credit quality of earning assets. The Company's objectives in its asset and liability management are to maintain a strong, stable net interest margin, to utilize its capital effectively without taking undue risks, to maintain adequate liquidity, and to reduce vulnerability of its operations to changes in interest rates.

The Company's Asset and Liability Committee evaluates periodically, but at least four times a year, the impact of changes in market interest rates on assets and liabilities, net interest margin, capital and liquidity. Risk assessments are governed by policies and limits established by senior management, which are reviewed and approved by the full Board of Directors at least annually. The economic environment continually presents uncertainties as to future interest rate trends. The Asset and Liability Committee regularly utilizes a model that projects net interest income based on increasing or decreasing interest rates, in order to be better able to respond to changes in interest rates.

At June 30, 2008, \$233.0 million or 92.2% of the Company's securities had fixed interest rates and substantially all investment securities are issued by the federal government, its agencies or state and local municipalities with underlying insurance. Changes in interest rates affect the value of the Company's interest earning assets and in particular its securities portfolio. Generally, the value of securities fluctuates inversely with changes in interest rates. Decreases in the fair value of securities available for sale, therefore, could have an adverse effect on stockholder's equity. Increases in interest rates could result in decreases in the market value of

Table of Contents

interest earning assets, which could adversely affect the Company's results of operations if sold. The Company is also subject to reinvestment risk associated with changes in interest rates. Increases in market interest rates also could affect the type (fixed-rate or adjustable-rate) and amount of loans originated by the Company and the average life of loans and securities, which can impact the yields earned on the Company's loans and securities. Changes in interest rates may affect the average life of loans and mortgage related securities. In periods of decreasing interest rates, the average life of loans and securities held by the Company may be shortened to the extent increased prepayment activity occurs during such periods which, in turn, may result in the investment of funds from such prepayments in lower yielding assets. Under these circumstances the Company is subject to reinvestment risk to the extent that it is unable to reinvest the cash received from such prepayments at rates that are comparable to the rates on existing loans and securities. Additionally, increases in interest rates may result in decreasing loan prepayments with respect to fixed rate loans, and therefore an increase in the average life of such loans, may result in a decrease in loan demand, and make it more difficult for borrowers to repay adjustable rate loans.

The Company utilizes the results of a detailed and dynamic simulation model to quantify the estimated exposure to net interest income to sustained interest rate changes. Management routinely monitors simulated net interest income sensitivity over a rolling two-year horizon. The simulation model captures the seasonality of the Company's deposit flows and the impact of changing interest rates on the interest income received and the interest expense paid on all assets and liabilities reflected on the Company's Balance Sheet. This sensitivity analysis is compared to the asset and liability policy limits that specify a maximum tolerance level for net interest income exposure over a one-year horizon given both a 200 basis point upward and downward shift in interest rates. A parallel and pro rata shift in rates over a twelve-month period is assumed.

The following reflects the Company's net interest income sensitivity analysis at June 30, 2008:

Change in Interest Rates in Basis Points (Dollars in thousands)	June 30, 2008 Potential Change in Net Interest Income		December 31, 2007 Potential Change in Net Interest Income	
	\$ Change	% Change	\$ Change	% Change
200	\$ (2,411)	(7.76)%	\$ (1,833)	(7.05)%
100	\$ (1,283)	(4.13)%	\$ (897)	(3.45)%
Static	-	-	-	-
(100)	\$ 786	2.53%	\$ 555	2.13%

The preceding sensitivity analysis does not represent a Company forecast and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions including, but not limited to, the nature and timing of interest rate levels and yield curve shapes, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, and reinvestment and replacement of asset and liability cash flows. While assumptions are developed based upon perceived current economic and local market conditions, the Company cannot make any assurances as to the predictive nature of these assumptions including how customer preferences or competitor influences may change.

Also, as market conditions vary from those assumed in the sensitivity analysis, actual results will also differ due to prepayment and refinancing levels likely deviating from those assumed, the varying impact of interest rate change caps or floors on adjustable rate assets, the potential effect of changing debt service levels on customers with adjustable rate loans, depositor early withdrawals, prepayment penalties and product preference changes and other

internal and external variables. Furthermore, the sensitivity analysis does not reflect actions that management might take in responding to, or anticipating changes in interest rates and market conditions.

Item 4. Controls and Procedures

An evaluation was performed under the supervision and with the participation of the Company's management, including the Principal Executive Officer and Principal Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended) as of June 30, 2008. Based on that evaluation, the Company's Principal Executive Officer and Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this quarterly report. There has been no change in the Company's internal control over financial reporting during the quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
