Explanatory Note

The Colonial BancGroup, Inc. (BancGroup , Colonial or the Company) is filing this amendment to its Annual Report on Form 10-K for the year ended December 31, 2004 to amend and restate financial statements and other financial information filed with the Securities and Exchange Commission (SEC). This amendment is being filed to correct errors in the originally filed Annual Report on Form 10-K related to the Company's derivative accounting under Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133).

In 2005 and prior years, the Company entered into interest rate swap agreements on brokered certificates of deposit (CD swaps) and junior subordinated debt (junior subordinated debt swaps) that were accounted for as fair value hedges under SFAS No. 133. The Company elected a method of fair value hedge accounting, commonly referred to as the abbreviated method of hedge accounting described in paragraph 65 of SFAS No. 133, which allowed the Company to assume no ineffectiveness in these transactions as long as critical terms did not change. The Company recently concluded that the CD swaps and junior subordinated debt swaps did not qualify for these methods in the periods covered by the restatement. In retrospect, the CD swaps did not comply due to the death puts contained in the brokered CDs, which allow the estate of the CD holder to require the bank to redeem the CD in the event of the CD holder's death. In addition, the junior subordinated debt swaps did not comply due to interest deferral features present in the junior subordinated debt. Hedge accounting under SFAS No. 133 is not allowed retrospectively because the hedge documentation required for the long-haul method was not in place at the inception of the hedge. Eliminating the application of fair value hedge accounting reverses the fair value adjustments that have been made to the brokered certificates of deposit and junior subordinated debt and results in all fair value changes for the interest rate swaps being recognized in noninterest income. Additionally, the net cash settlement payments received during each of the affected periods for these interest rate swaps were reclassified from interest expense on brokered certificates of deposit and junior subordinated debt to noninterest income. Adjustments were also made for other non-significant items.

The effect this restatement had on earnings for the affected periods is as follows:

	Year Ended December 31, 2004	Year Ended December 31, 2003	Year Ended December 31, 2002
		(In thousands)	
Interest expense	\$ 17,268	\$ 11,495	\$ 5,961
Noninterest income	15,174	5,605	24,846
Noninterest expense	1,779	877	917
Provision for income taxes	(1,402)	(2,451)	6,505
Net income	\$ (2,471)	\$ (4,316)	\$ 11,463
Diluted earnings per share	\$ (0.02)	\$ (0.04)	\$ 0.10

In addition, the following Items have changed: Item 6, Item 7, Item 7A and Item 9A. For additional information on the restatement see Note 1, Restatement, in the Notes to Consolidated Financial Statements.

PART I

Item 1. *Business*

General

The Registrant, The Colonial BancGroup, Inc. (BancGroup) is a Delaware corporation organized in 1974 as a bank holding company under the Bank Holding Act of 1956, as amended (the BHCA). BancGroup was originally organized as Southland Bancorporation, and its name was changed in 1981. In 1997, pursuant to the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994, BancGroup consolidated its banking subsidiaries located in Georgia, Florida and Tennessee into Colonial Bank, its banking subsidiary in Alabama. In 2000, pursuant to the Gramm-Leach-Bliley Financial Services Modernization Act (Gramm-Leach), BancGroup elected to become a financial holding company which allows it to affiliate with securities firms and insurance companies and to engage in other activities that are financial in nature, incidental to such financial activities, or complementary to such activities.

The principal activity of BancGroup is to supervise and coordinate the business of its subsidiaries and to provide them with capital and services. BancGroup derives substantially all of its income from dividends received from Colonial Bank. Various statutory provisions and regulatory policies limit the amount of dividends Colonial Bank may pay without regulatory approval. In addition, federal statutes restrict the ability of Colonial Bank to make loans to BancGroup.

Bank Subsidiary

Colonial Bank was converted into a national association on August 8, 2003. Its legal name was changed to Colonial Bank, N.A. but it still does business as, and is usually referred to herein as Colonial Bank. As of December 31, 2004, Colonial Bank had a total of 292 branches, with 127 branches in Florida, 115 branches in Alabama, 22 branches in Georgia, 12 branches in Texas, 13 branches in Nevada and 3 branches in Tennessee. Colonial Bank conducts a general commercial banking business in its respective service areas and offers a variety of demand, savings and time deposit products as well as extensions of credit through personal, commercial and mortgage loans within each of its market areas. Colonial Bank also provides additional services to its markets through cash management services, electronic banking services, credit card and merchant services and wealth management services. Wealth management services include trust services, insurance sales and the sales of various types of investment products such as mutual funds, annuities, stocks, municipal bonds and U.S. government securities.

Colonial Bank encounters intense competition in its commercial banking business, generally from other banks located in its respective metropolitan and service areas. Colonial Bank competes for interest bearing funds with other banks and with many non-bank issuers of commercial paper and other securities. In the case of larger customers, competition exists with banks in other metropolitan areas of the United States, many of which are larger in terms of capital resources and personnel. In the conduct of certain aspects of its commercial banking business, Colonial Bank competes with savings and loan associations, credit unions, mortgage banks, factors, insurance companies and other financial institutions. At December 31, 2004, Colonial Bank accounted for approximately 99.8% of BancGroup's consolidated assets.

Nonbanking Subsidiaries

BancGroup has the following directly and wholly owned nonbanking subsidiaries that are currently active. Colonial Brokerage, Inc., a Delaware Corporation, provides full service and discount brokerage services and investment advice and is a member of and is regulated by the National Association of Securities Dealers (NASD). The Colonial BancGroup Building Corporation, an Alabama Corporation, was established primarily to own and lease certain buildings and land used by Colonial Bank. Colonial Capital II, a Delaware statutory trust, issued \$70 million in trust preferred securities in 1997, which are guaranteed by BancGroup. Colonial Capital Trust III, a Delaware statutory trust, was formed in March 2002 and issued \$100 million in trust preferred

securities which are guaranteed by BancGroup. Colonial Capital Trust IV, a Delaware statutory trust, was formed in September of 2003, and issued \$100 million in trust preferred securities which are guaranteed by BancGroup. PCB Statutory Trust I and II were acquired in May 2004 as part of the acquisition of PCB Bancorp, Inc. and have a combined \$15 million in trust preferred securities outstanding, which are guaranteed by BancGroup. MBI Capital Trust was acquired in March 2002 as part of the acquisition of Mercantile BancCorp, Inc. and has \$8 million in trust preferred securities outstanding, which are guaranteed by BancGroup. BancGroup acquired Great Florida Title, LLC, which operates as a title insurance agency, as part of the Manufacturers Bancshares, Inc. acquisition in October 2001.

BancGroup has interests in several real estate developments located in the metropolitan area of Atlanta Georgia. The aggregate investment in such entities is \$5.4 million.

Colonial Bank controls the following active subsidiaries: CBG, Inc., a Nevada Corporation, owns certain trade names and trademarks which it licenses to BancGroup, Colonial Bank, Colonial Brokerage, Inc. and their affiliates for use in their businesses; CBG Investments, Inc., a Nevada corporation, owns and manages investment securities; Colonial Investment Services, Inc., an Alabama corporation; Colonial Investment Services of Florida, Inc., a Florida corporation; Colonial Investment Services of Tennessee, Inc., a Tennessee corporation; Colonial Investment Services of Georgia, Inc., a Georgia corporation; and Colonial Investment Services of Nevada, Inc., a Nevada corporation, all offer various insurance products and annuities for sale to the public, and are regulated by each state's department of insurance. Colonial Asset Management, Inc., an Alabama corporation, is an investment advisor registered with the Alabama Securities Commission. Colonial Bank has 72.43% ownership in Goldleaf Technologies, Inc., a Delaware corporation, which provides internet and ACH services to community banks. CBG Florida REIT Corp., a Florida corporation and Real Estate Investment Trust formed in 2002, owns and manages certain real estate loans. CBG Nevada Holding Corp., a Nevada corporation and wholly owned subsidiary of Colonial Bank, owns all of the common stock and in excess of 90% of the preferred stock of CBG Florida REIT Corp.

At December 31, 2004, BancGroup and its subsidiaries employed 4,303 persons. BancGroup's principal offices are located at and its mailing address is: One Commerce Street, Suite 800, Montgomery, Alabama 36104. BancGroup's telephone number at its principal office is (334) 240-5000.

Available Information

BancGroup makes available, free of charge through its Internet website (www.colonialbank.com), the Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(a) of the Exchange Act as soon as reasonably practicable after electronically filing or furnishing such material with the Securities and Exchange Commission.

Certain Regulatory Considerations

The following is a brief summary of the regulatory environment in which BancGroup and Colonial Bank operate and is not designed to be a complete discussion of all statutes and regulations affecting such operations, including those statutes and regulations specifically mentioned herein. Changes in the laws and regulations applicable to BancGroup and Colonial Bank can affect the operating environment in substantial and unpredictable ways. BancGroup cannot accurately predict whether legislation will ultimately be enacted, and if enacted, the ultimate effect that it or implementing regulations would have on its or its subsidiaries' financial condition or results of operations. While banking regulations are material to the operations of BancGroup and Colonial Bank, it should be noted that supervision, regulation, and examination of BancGroup and Colonial Bank are intended primarily for the protection of depositors, not security holders.

BancGroup is a registered bank holding company and a financial holding company subject to supervision and regulation by the Board of Governors of the Federal Reserve System (the "Federal Reserve"). As such, it is

subject to the BHCA and many of the Federal Reserve's regulations promulgated thereunder. The Federal Reserve has broad enforcement powers over bank holding companies, including the power to impose substantial fines and civil penalties.

Colonial Bank, a national banking association, is subject to supervision and examination by the Office of the Comptroller of the Currency (the OCC). Colonial Bank converted from an Alabama state-chartered Federal Reserve member bank to a national banking association on August 8, 2003. The deposits of Colonial Bank are insured by the Federal Deposit Insurance Corporation (FDIC) to the extent provided by law. The FDIC assesses deposit insurance premiums the amount of which may, in the future, depend in part on the condition of Colonial Bank. Moreover, the FDIC may terminate deposit insurance of Colonial Bank under certain circumstances. The bank regulatory agencies have broad enforcement powers over depository institutions under their jurisdiction, including the power to terminate deposit insurance, to impose fines and other civil and criminal penalties, and to appoint a conservator or receiver if any of a number of conditions are met.

Mergers, Acquisitions and Changes in Control

One limitation under the BHCA and the Federal Reserve's regulations requires that BancGroup obtain prior approval of the Federal Reserve before BancGroup acquires, directly or indirectly, more than 5% of any class of voting securities of another bank. Prior approval also must be obtained before BancGroup acquires all or substantially all of the assets of another bank, or before it merges or consolidates with another bank holding company. Because BancGroup is a registered bank holding company, persons seeking to acquire 25% or more of any class of its voting securities must receive the prior approval of the Federal Reserve. Similarly, under certain circumstances, persons seeking to acquire between 5% and 25% also may be required to obtain prior Federal Reserve approval.

In September 1994, Congress enacted the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994. This legislation, among other things, amended the BHCA to permit bank holding companies, subject to certain limitations, to acquire either control or substantial assets of a bank located in states other than that bank holding company's home state regardless of state law prohibitions. This legislation became effective on September 29, 1995. In addition, this legislation also amended the Federal Deposit Insurance Act to permit, beginning on June 1, 1997 (or earlier where state legislatures provided express authorization), the merger of insured banks with banks in other states, subject to certain limitations.

FDIC Improvement Act

As a result of enactment in 1991 of the FDIC Improvement Act, banks are subject to increased reporting requirements and more frequent examinations by the bank regulatory agencies. The agencies also have the authority to dictate certain key decisions that formerly were left to management, including compensation standards, loan underwriting standards, asset growth, and payment of dividends. Failure to comply with these standards, or failure to maintain capital above specified levels set by the regulators, could lead to the imposition of penalties or the forced resignation of management. If a bank becomes critically undercapitalized, the banking agencies have the authority to place an institution into receivership.

Consumer Protection Laws

There are a number of laws that govern the relationship between Colonial Bank and its customers. For example, the Community Reinvestment Act is designed to encourage lending by banks to persons in low and moderate income areas. The Home Mortgage Disclosure Act and the Equal Credit Opportunity Act attempt to minimize lending decisions based on impermissible criteria, such as race or gender. The Truth-in-Lending Act and the Truth-in-Savings Act require banks to provide certain disclosure of relevant terms related to loans and savings accounts, respectively. Anti-tying restrictions (which prohibit, for instance, conditioning the availability or terms of credit on the purchase of another banking product) further restrict Colonial Bank's relationships with its customers.

Gramm-Leach-Bliley Financial Services Modernization Act

In 1999, Gramm-Leach was signed into law and it became effective on March 11, 2000. The primary purpose of Gramm-Leach was to eliminate barriers between investment banking and commercial banking and to permit, within certain limitations, the affiliation of financial service providers. Generally, Gramm-Leach (1) repealed the historical restrictions against, and eliminated many federal and state law barriers to affiliations among banks, securities firms, insurance companies and other financial service providers, (2) provided a uniform framework for the activities of banks, savings institutions and their holding companies, (3) broadened the activities that may be conducted by and through national banks and other banking subsidiaries of bank holding companies, (4) provided an enhanced framework for protecting the privacy of consumers information, (5) adopted a number of provisions related to the capitalization, membership, corporate governance and other measures designed to modernize the Federal Home Loan Bank System, (6) modified the laws governing the implementation of the Community Reinvestment Act, and (7) addressed a variety of other legal and regulatory issues affecting both day-to-day operations and long-term activities of financial institutions.

More specifically, under Gramm-Leach, bank holding companies, such as BancGroup, that meet certain management, capital, and Community Reinvestment Act standards, are permitted to become financial holding companies and, by doing so, to affiliate with securities firms and insurance companies and to engage in other activities that are financial in nature, incidental to such financial activities, or complementary to such activities. A bank holding company may become a financial holding company if each of its subsidiary banks is well capitalized under the FDIC Improvement Act prompt corrective action provisions, is well managed and has at least a satisfactory rating under the Community Reinvestment Act. The required filing is a declaration that the bank holding company wishes to become a financial holding company and meets all applicable requirements. BancGroup became a financial holding company on May 12, 2000.

Generally, no prior regulatory approval will be required for a financial holding company to acquire a company, other than a bank or savings association, engaged in activities permitted under Gramm-Leach. Activities cited by Gramm-Leach as being financial in nature include:

securities underwriting, dealing and market making;

sponsoring mutual funds and investment companies;

insurance underwriting and agency;

merchant banking activities; and

activities that the Federal Reserve has determined to be closely related to banking.

Privacy Laws

In 2000, the federal banking regulators issued final regulations implementing certain provisions of Gramm-Leach governing the privacy of consumer financial information. The regulations limit the disclosure by financial institutions, such as BancGroup, Colonial Bank and certain of their subsidiaries, of nonpublic personal information about individuals who obtain financial products or services for personal, family, or household purposes. Subject to certain exceptions allowed by law, the regulations cover information sharing between financial institutions and nonaffiliated third parties. More specifically, the regulations require financial institutions to (i) provide initial notices to customers about their privacy policies, describing the conditions under which they may disclose nonpublic personal financial information to nonaffiliated third parties and affiliates; (ii) provide annual notices of their privacy policies to their current customers; and (iii) provide a reasonable method for consumers to opt out of disclosures to nonaffiliated third parties.

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

The Fair Credit Reporting Act (FCRA) governs the ability of a financial institution to share consumer financial information with its affiliates. The FCRA requires financial institutions to provide their customers with notice and an opportunity to opt-out before sharing certain information with its affiliates. In December 2003, the Fair and Accurate Credit Transactions Act of 2003 (FACTA) was enacted. FACTA included a provision

further limiting a financial institution's ability to share customer information with its affiliates for marketing purposes by requiring financial institutions to provide their customers with the ability to opt-out of such sharing of customer information. Regulations implementing this provision of FACTA have been proposed but not finalized.

Protection of Customer Information

In February 2001, the federal banking regulators issued final regulations implementing the provisions of Gramm-Leach relating to the protection of customer information. The regulations, applicable to national banking associations, like Colonial Bank, and certain of their nonbank subsidiaries, and to bank holding companies, like BancGroup, and certain of their nonbank subsidiaries, relate to administrative, technical, and physical safeguards for customer records and information. These safeguards are intended to: insure the security and confidentiality of customer records and information; protect against any anticipated threats or hazards to the security or integrity of such records; protect against unauthorized access to or use of such records or information that could result in substantial harm or inconvenience to any customer; and ensure the proper disposal of such information.

Bank Secrecy Act

The Bank Secrecy Act (the BSA) and its implementing regulation is a tool the U.S. government uses to fight drug trafficking, money laundering and other crimes. Under the BSA, financial institutions are required to file certain reports, including suspicious activities reports, with the Financial Crimes Enforcement Network under certain circumstances. Financial institutions are also required to have policies and procedures in place to ensure compliance with the BSA. If a financial institution fails to timely file a report or fails to implement its BSA policies and procedures, it could subject the institution to enforcement action or civil money penalties.

On October 26, 2001, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act) was signed into law. The USA PATRIOT Act amended the BSA and broadened the application of anti-money laundering regulations to apply to additional types of financial institutions, such as broker-dealers, and strengthened the ability of the U.S. government to detect and prosecute international money laundering and the financing of terrorism. The principal provisions of Title III of the USA PATRIOT Act require that regulated financial institutions, including national banks: (i) establish an anti-money laundering program that includes training and audit components; (ii) comply with regulations regarding the verification of the identity of any person seeking to open an account; (iii) take additional required precautions with non-U.S. owned accounts; and (iv) perform certain verification and certification of money laundering risk for their foreign correspondent banking relationships. The USA PATRIOT Act also expanded the conditions under which funds in a U.S. interbank account may be subject to forfeiture and increased the penalties for violation of anti-money laundering regulations. Failure of a financial institution to comply with the USA PATRIOT Act requirements could have serious legal and reputational consequences for the institution. BancGroup has adopted policies, procedures and controls to address compliance with the requirements of the USA PATRIOT Act under the existing regulations and will continue to revise and update its policies, procedures and controls to reflect changes required by the USA PATRIOT Act and implementing regulations.

Safety and Soundness Standards

Pursuant to FDICIA, the federal banking regulatory agencies have adopted a set of guidelines prescribing safety and soundness standards for depository institutions such as Colonial Bank. The guidelines establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, asset quality, earnings and compensation, fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risks and exposures specified in the guidelines. The guidelines prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal shareholder. In addition, the agencies adopted regulations that authorize an agency to order

an institution that has been given notice by an agency that it is not satisfying any of such safety and soundness standards to submit a compliance plan. If the institution fails to submit an acceptable compliance plan or fails to implement an accepted plan, the agency must issue an order directing action to correct the deficiency and may issue an order directing other actions be taken, including restricting asset growth, restricting interest rates paid on deposits, and requiring an increase in the institution's ratio of tangible equity to assets.

Payment of Dividends and Other Restrictions

BancGroup is a legal entity separate and distinct from its subsidiaries, including Colonial Bank. There are various legal and regulatory limitations on the extent to which BancGroup's subsidiaries can, among other things, finance, or otherwise supply funds to, BancGroup. Specifically, dividends from Colonial Bank are the principal source of BancGroup's cash funds and there are certain legal restrictions under the National Bank Act and OCC regulations on the payment of dividends by national banks. The relevant regulatory agencies also have authority to prohibit BancGroup and Colonial Bank from engaging in what, in the opinion of such regulatory body, constitutes an unsafe or unsound banking practice. The payment of dividends could, depending upon the financial condition of BancGroup and Colonial Bank, be deemed to constitute such an unsafe or unsound practice.

In addition, Colonial Bank and its subsidiaries are subject to limitations under Sections 23A and 23B of the Federal Reserve Act with respect to extensions of credit to, investments in, and certain other transactions with, BancGroup and its other subsidiaries. Furthermore, loans and extensions of credit are also subject to various collateral requirements. On October 31, 2002, the Federal Reserve adopted Regulation W, which combines the Federal Reserve's interpretations and exemptions relating to Sections 23A and 23B of the Federal Reserve Act. Regulation W became effective on April 1, 2003 and is applicable to national banks.

Capital Adequacy

The Federal Reserve has adopted minimum risk-based and leverage capital guidelines for bank holding companies. The minimum required ratio of total capital to risk-weighted assets (including certain off-balance sheet items, such as standby letters of credit) is 8%, of which 4% must consist of Tier 1 capital. As of December 31, 2004, BancGroup's total risk-based capital ratio was 11.39% (restated), including 8.80% (restated) of Tier 1 capital. The minimum required leverage capital ratio is 3% for bank holding companies that meet certain specified criteria, including that they have the highest regulatory rating. A minimum leverage ratio of 4% is required for bank holding companies not meeting these criteria. As of December 31, 2004, BancGroup's leverage capital ratio was 7.16% (restated). Generally, bank holding companies are expected to operate well above the minimum capital ratios. Higher capital ratios may be required for any bank holding company if warranted by its particular circumstances or risk profile. Failure to meet capital guidelines can subject a bank holding company to a variety of enforcement remedies, including restrictions on its operations and activities. The OCC has adopted substantially similar capital requirements for national banks.

Regarding depository institutions, the prompt corrective action provisions of the federal banking statutes establish five capital categories (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized), and impose significant restrictions on the operations of an institution that is not at least adequately capitalized. Under certain circumstances, an institution may be downgraded to a category lower than that warranted by its capital levels, and subjected to the supervisory restrictions applicable to institutions in the lower capital category. As of December 31, 2004, Colonial Bank was well capitalized under the regulatory framework for prompt corrective action.

An undercapitalized depository institution is subject to restrictions in a number of areas, including capital distributions, payments of management fees and expansion. In addition, an undercapitalized depository institution is required to submit a capital restoration plan. A depository institution's holding company must guarantee the capital plan up to an amount equal to the lesser of 5% of the depository institution's assets at the time it becomes undercapitalized or the amount needed to restore the capital of the institution to the levels

required for the institution to be classified as adequately capitalized at the time the institution fails to comply with the plan. A depository institution is treated as if it is significantly undercapitalized if it fails in any material respect to implement a capital restoration plan.

Significantly undercapitalized depository institutions may be subject to a number of additional significant requirements and restrictions, including requirements to sell sufficient voting stock to become adequately capitalized, to improve management, to restrict asset growth, to prohibit acceptance of correspondent bank deposits, to restrict senior executive compensation and to limit transactions with affiliates. Critically undercapitalized depository institutions are further subject to restrictions on paying principal or interest on subordinated debt, making investments, expanding, acquiring or selling assets, extending credit for highly-leveraged transactions, paying excessive compensation, amending their charters or bylaws and making any material changes in accounting methods. In general, a receiver or conservator must be appointed for a depository institution within 90 days after the institution is deemed to be critically undercapitalized.

Support of Subsidiary Bank

Under Federal Reserve Board policy, BancGroup is expected to act as a source of financial strength to, and to commit resources to support, Colonial Bank. This support may be required at times when, absent such Federal Reserve Board policy, BancGroup might not otherwise be inclined to provide it. In the event of a bank holding company's bankruptcy, any commitment by the bank holding company to a federal bank regulatory agency to maintain the capital of a subsidiary bank will be assumed by the bankruptcy trustee and entitled to priority of payment.

FDIC Insurance Assessments

The FDIC is an independent federal agency established originally to insure the deposits, up to prescribed statutory limits, of federally insured banks and to preserve the safety and soundness of the banking industry. The FDIC maintains two separate insurance funds: the Bank Insurance Fund (BIF) and the Savings Association Insurance Fund (SAIF). Colonial Bank's deposit accounts are insured by the FDIC under the BIF to the maximum extent permitted by law. Colonial Bank pays deposit insurance premiums to the FDIC based on a risk-based assessment system established by the FDIC for all BIF-member institutions.

Under FDIC regulations, institutions are assigned to one of three capital groups for insurance premium purposes (well capitalized, adequately capitalized and undercapitalized). These three groups are then divided into subgroups, which are based on supervisory evaluations by the institution's primary federal regulator, resulting in nine assessment classifications. Assessment rates vary depending upon the assessment classification. In addition, regardless of the potential risk to the insurance fund, federal law requires the FDIC to establish assessment rates that will maintain each insurance fund's ratio of reserves to insured deposits at 1.25%. During 2004 and for the first semiannual assessment period of 2005, assessment rates for BIF-insured institutions ranged from 0 cents per \$100 of assessable deposits for well-capitalized institutions with minor supervisory concerns to 27 cents per \$100 of assessable deposits for undercapitalized institutions with substantial supervisory concerns. The assessment rate schedule is subject to change by the FDIC and, accordingly, the assessment rate could increase or decrease in the future.

In addition to deposit insurance assessments, the FDIC is authorized to collect assessments against insured deposits to be paid to the Finance Corporation (FICO) to service FICO debt incurred in the 1980s. The FICO assessment rate is adjusted quarterly. The average annual assessment rate in 2004 was 1.50 cents per \$100 for BIF-insured deposits. For the first quarter of 2005, the FICO assessment rate for such deposits will be 1.44 cents per \$100 of assessable deposits.

The Bank's assessment expense for the year ended December 31, 2004 equaled \$1,542,000.

OCC Assessment

The OCC imposes a semiannual assessment on all national banks under its supervision. The amount of the assessment is based on the bank's total assets. The assessment for the first half of the year is based on prior year's total assets as of December 31, and the assessment for the second half of the year is based on the total assets as of June 30. Colonial Bank's assessment expense for the year ended December 31, 2004 equaled \$2,149,000.

Other Subsidiary Regulation

Certain subsidiaries of BancGroup and Colonial Bank are regulated by other governmental agencies. Where material, such regulation is disclosed with the disclosure of the subsidiary.

Additional Information

Additional information, including statistical information concerning the business of BancGroup, is set forth herein. See Selected Financial Data and Selected Quarterly Financial Data 2004-2003 and Management's Discussion and Analysis of Financial Condition and Results of Operations.

Executive Officers and Directors

Pursuant to general instruction G, information regarding executive officers of BancGroup is contained herein at Item 10.

Item 2. *Properties*

BancGroup leases its executive offices in Montgomery, Alabama, operations centers in Birmingham, Alabama and Orlando, Florida and maintains regional executive offices in Alabama, Florida, Georgia, Nevada, and Texas.

As of December 31, 2004, Colonial Bank owned 201 and leased 91 of its full-service banking offices. See Notes to the Consolidated Financial Statements included herein.

Item 3. *Legal Proceedings*

In the opinion of BancGroup, based on review and consultation with legal counsel, the outcome of any litigation presently pending is not anticipated to have a material adverse effect on BancGroup's consolidated financial statements or results of operations.

Item 4. *Submission of Matters to a Vote of Security Holders*

None.

PART II

Item 5. Market for Registrant's Common Equity and Related Stockholder Matters

BancGroup's Common Stock is traded on the New York Stock Exchange under the symbol CNB. As of February 28, 2005, BancGroup had outstanding 145,546,391 shares of Common Stock, with 9,506 registered shareholders.

The following table indicates the high and low closing prices for and dividends paid on Common Stock during 2004 and 2003.

	Sale Price of Common Stock		Dividends Declared On Common Stock (per share)
	High	Low	
2004			
1st Quarter	\$ 18.58	\$ 16.52	\$.145
2nd Quarter	18.28	16.78	.145
3rd Quarter	20.66	17.81	.145
4th Quarter	22.45	20.53	.145
2003			
1st Quarter	12.77	10.75	.14
2nd Quarter	14.24	11.30	.14
3rd Quarter	15.03	14.13	.14
4th Quarter	17.47	14.65	.14

BancGroup has historically paid dividends each quarter. The restrictions imposed upon Colonial Bank in regard to its ability to pay dividends to BancGroup, which in turn limit BancGroup's ability to pay dividends, are described herein. See Payments of Dividends and Other Restrictions .

Equity Compensation Plans

The following table summarizes BancGroup's equity compensation plans as of December 31, 2004:

Plan Category	Number of Shares to be Issued upon the Exercise of Outstanding Options, Warrants and Rights	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans
Equity Compensation Plans approved by the shareholders	3,866,949	\$ 13.8514	7,822,350

There were no equity compensation plans not approved by the shareholders.

Item 6. Selected Financial Data

The selected financial data in the following tables have been restated to reflect adjustments to the Company's consolidated financial statements and other information contained in Form 10-K for the year ended December 31, 2004, originally filed with the Securities and Exchange Commission on March 11, 2005. The following selected financial data should be read in conjunction with our restated financial statements and the related notes.

	2004	2003	2002	2001	2000
	(Restated)	(Restated)	(Restated)		
(In thousands, except per share amounts)					
Statement of Income

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

As discussed in Note 1, Restatement, in the Notes to Consolidated Financial Statements, the Company is restating financial statements and other financial information for the years ended December 31, 2004, 2003 and 2002.

In 2005 and prior years, the Company entered into interest rate swap agreements on brokered certificates of deposit (CD swaps) and junior subordinated debt (junior subordinated debt swaps) that were accounted for as fair value hedges under SFAS No. 133. The Company elected a method of fair value hedge accounting, commonly

referred to as the abbreviated method of hedge accounting described in paragraph 65 of SFAS No. 133, which allowed the Company to assume no ineffectiveness in these transactions as long as critical terms did not change. The Company recently concluded that the CD swaps and junior subordinated debt swaps did not qualify for these methods in the periods covered by this restatement. In retrospect, the CD swaps did not comply due to the death puts contained in the brokered CDs, which allow the estate of the CD holder to require the bank to redeem the CD in the event of the CD holder's death. In addition, the junior subordinated debt swaps did not comply due to interest deferral features present in the junior subordinated debt. Hedge accounting under SFAS No. 133 is not allowed retrospectively because the hedge documentation required for the long-haul method was not in place at the inception of the hedge. Eliminating the application of fair value hedge accounting reverses the fair value adjustments that have been made to the brokered certificates of deposit and junior subordinated debt and results in all fair value changes for the interest rate swaps being recognized in noninterest income. Additionally, the net cash settlement payments received during each of the affected periods for these interest rate swaps were reclassified from interest expense on brokered certificates of deposit and junior subordinated debt to noninterest income. Adjustments were also made for other non-significant items.

For additional information on the restatement see Note 1, Restatement, in the Notes to the Consolidated Financial Statements.

This Annual Report on Form 10-K/A, contains forward-looking statements about the Company. Broadly speaking, forward-looking statements include forecasts of future financial results and condition, expectations for future operations and business, and any assumptions underlying those forecasts and expectations. Do not unduly rely on forward-looking statements. Actual outcomes and results might differ significantly from forecasts and expectations. Please refer to Factors that May Affect Future Results for a discussion of some of the factors that may cause results to differ.

Management's Discussion and Analysis of Financial Condition and Results of Operations is presented on the following pages. The principal purpose of this review is to provide the reader of the attached financial statements and accompanying footnotes with a detailed analysis of the financial results of The Colonial BancGroup, Inc. and subsidiaries (for the purposes of this Item 7, BancGroup, Colonial, or the Company).

EXECUTIVE OVERVIEW

The Colonial BancGroup, Inc. is a \$18.9 billion financial services company providing diversified services including retail and commercial banking, wealth management services, mortgage banking and insurance through its branch network, private banking offices or officers, ATMs and the internet as well as other distribution channels to consumers and businesses. At December 31, 2004, BancGroup's branch network consisted of 292 offices in Florida, Alabama, Georgia, Nevada, Tennessee and Texas.

BancGroup is primarily a Florida bank with more of its assets in Florida than in any other state. The following chart includes the approximate assets, deposits and branches as of December 31, 2004 on a pro forma basis with the Union Bank acquisition which closed on February 10, 2005.

	Assets		Deposits		Branches

Strategy

BancGroup is built upon the foundation of a community banking philosophy that emphasizes local responsibility for customer relationships. This operating philosophy has been important in making acquisitions, retaining skilled and highly motivated local management teams, and developing a strong customer base, particularly with respect to lending relationships.

The expertise in each local market is supported by centralized operations, which allow the local banking officers to concentrate on the customer. Through this structure of local customer relationship responsibility and centralized operations, the local banks have decision making capability while at the same time having an effective operational structure at their disposal to service the customer in the most cost effective and efficient manner.

We are continuing to expand our geographic footprint through internal growth and acquisitions. Our internal growth strategies include seeking quality loan growth in each regional market, generating deposit growth through the development of customer relationships and competitive product offerings, growth in noninterest income through continued expansion of fee based products and services and the ongoing development of a sales oriented business culture with an emphasis on customer service. Our acquisition strategies focus on finding strong banks in growth markets that fit into our strategic plans and desired market areas.

Earnings Overview

Colonial reported record net income of \$173 million for the year ended 2004, a 19% increase over 2003. The Company also earned record earnings per share of \$1.31 for the year ended 2004, a 13% increase over 2003.

Net interest income for the year increased 15% over 2003 due to 10% growth in average earning assets and a 14 basis point expansion in net interest margin. The fourth quarter of 2004 was the fifth consecutive quarter that Colonial expanded its net interest margin.

Average earning assets increased \$1.4 billion over 2003 primarily from growth of \$598 million in loans and \$633 million in securities. Average earning assets grew \$357 million from the acquisition of P.C.B. Bancorp, which closed in May 2004. Average loan balances, excluding mortgage warehouse loans, grew internally \$717 million, or 7%, during 2004. Average mortgage warehouse loans however, decreased \$424 million, or 29%, during 2004.

The net interest margin increased to 3.52% in 2004 compared to 3.38% in 2003. The increase in the net interest margin was primarily due to the lower cost of interest bearing liabilities, which more than offset the decline in yield on earning assets. The cost of interest bearing liabilities declined 21 basis points to 2.03% compared to 2.24% in 2003, while the yield on earning assets fell six basis points in 2004 to 5.25% compared to 5.31% in 2003.

Colonial's average non-time interest bearing deposits grew \$1.1 billion, or 30% (24% excluding the PCB acquisition), from 2003 to 2004. The cost of average non-time interest bearing deposits increased only 9 basis points during 2004. Total average deposits increased \$1.4 billion, or 15% (12% excluding the PCB acquisition), from December 31, 2003.

Noninterest income for the year ended 2004 was \$153 million, an increase of \$15 million, or 11%, over 2003. Increases in service charges, fees from electronic banking services, gains on sales of securities, bank-owned life insurance, net cash settlements of swap derivatives and changes in fair value of swap derivatives were offset by decreases in mortgage banking income and wealth management revenue. Mortgage banking income

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

is directly affected by changes in mortgage rates while wealth management revenues are dependent upon customer perception of the financial and equity markets.

Noninterest expense for 2004 was \$432 million, which included \$7.4 million in net losses on the early extinguishment of debt. Excluding the losses on early extinguishment of debt, noninterest expense increased 13%

over 2003. Colonial enhanced its franchise by adding 30 new locations, including 16 through an acquisition during 2004. These new locations and acquisition related expenses accounted for approximately one-third of the total increase in noninterest expense. The remaining increases included additional expenses from salaries and benefits, legal costs, occupancy expenses related to branch closures (seven in 2004), technology initiatives and professional fees associated with Sarbanes-Oxley Section 404 compliance.

Colonial improved upon its already excellent credit quality by ending 2004 with a new record low nonperforming assets ratio of 0.29%. Nonperforming assets decreased by 51% from December 31, 2003. Net charge-offs as a percent of average net loans for 2004 were 0.19%. Colonial's net charge-offs have consistently been lower than the average net charge-off ratio for southern regional banks as well as all FDIC banks. The allowance for loan losses as a percentage of net loans at December 31, 2004, was 1.16% compared to 1.20% at December 31, 2003 as a result of improving credit quality trends. The Company will continue to monitor trends in the economy and asset quality to assess the adequacy of its allowance for loan losses.

The Company's total risk-based capital ratio at December 31, 2004 was 11.39% (restated) and its Tier I risk-based capital ratio was 8.80% (restated), exceeding the minimum regulatory guidelines of 8% and 4%, respectively, for bank holding companies. The Company's total and Tier I risk-based capital ratios at December 31, 2003 were 12.55% (restated) and 9.41% (restated), respectively. The Company's Tier I leverage ratios were 7.16% (restated) and 7.55% (restated) at December 31, 2004 and 2003, respectively, exceeding the minimum regulatory guideline of 3% for bank holding companies.

In 2004, the Company paid its stockholders dividends of \$75.6 million, or \$0.58 per share, compared to \$69.8 million or \$0.56 per share in 2003. The Company declared a \$0.1525 per share dividend payable on February 11, 2005 to holders of record as of January 28, 2005.

Business Combinations

Colonial continues its expansion into high growth areas by selectively expanding its existing markets through acquisitions. As a result of recent business combinations in those markets and strong internal growth, a majority of Colonial's total assets and total deposits are located in Florida.

On February 10, 2005, Colonial completed the acquisition of Union Bank of Florida (Union), headquartered in Sunrise, Florida (Broward County). Union had approximately \$1 billion in assets, \$631 million in deposits and \$643 million in loans at February 10, 2005. The acquisition of Union added 17 full-service offices in Miami-Dade, Broward and Palm Beach counties to Colonial's franchise. Total consideration for the transaction was approximately \$233.5 million and consisted of approximately 75% cash and 25% stock.

On January 18, 2005, Colonial announced the signing of a definitive agreement to acquire First Federal Savings Bank of Lake County (FFLC). FFLC, headquartered in Leesburg, Florida, had assets of \$1 billion, deposits of \$795 million and loans of \$884 million at December 31, 2004. FFLC currently operates 16 full-service offices in Lake, Sumter, Citrus and Marion counties in Central Florida. Total consideration for the transaction is approximately \$232 million. Under the terms of the agreement, FFLC shareholders will elect to receive either two shares of Colonial stock or \$42 in cash for each FFLC share they own. The cash consideration will be capped at approximately 35% of the transaction. This transaction is expected to be completed by the end of the second quarter of 2005.

In May 2004, BancGroup acquired P.C.B. Bancorp, Inc. (PCB) and its four subsidiary banks, Premier Community Bank of Florida, Premier Community Bank, Premier Community Bank of Southwest Florida, and Premier Community Bank of South Florida. PCB had 16 full service offices on the east and west coasts of southern Florida. At the time of acquisition, PCB had approximately \$688 million in total assets, \$494 million in loans, and \$547 million in deposits. Total consideration for the transaction was approximately \$143.2 million and consisted of approximately 75% stock and 25% cash. BancGroup issued 6,030,434 shares of its common stock to shareholders of PCB.

In October 2003, BancGroup acquired Sarasota Bancorporation (Sarasota) and its wholly owned subsidiary bank, Sarasota Bank. Sarasota Bank operated one branch office in Sarasota, Florida. At the time of acquisition, Sarasota had approximately \$161 million in assets, \$129 million in loans, and \$128 million in deposits. Total consideration for the transaction was approximately \$36.6 million and consisted entirely of stock. BancGroup issued 2,399,852 shares of its common stock to shareholders of Sarasota.

Opportunities

The Company is poised to take advantage of growth opportunities because of its strategic locations in attractive markets in the United States, including Florida, Georgia, Texas and Nevada. During the past few years, Colonial has made a concerted effort to build a solid infrastructure and transform its culture to focus on sales and service. The Company is now reaping the benefits of these strategic initiatives. Colonial continues to find more opportunity to grow relationships within its existing customer base and to expand its presence in chosen markets in the fastest-growing areas of the country. New branches placed in the growth areas of Colonial's existing markets strengthen our ability to serve and grow customers by improving customer convenience, sales opportunities and branch profitability.

Recent Accounting Standards

In December 2003, the American Institute of Certified Public Accountants (AICPA) issued Statement of Position (SOP) 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*. This SOP addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans or debt securities (loans) acquired in a transfer if those differences are attributable, at least in part, to credit quality. It includes such loans acquired in purchase business combinations and applies to all nongovernmental entities, including not-for-profit organizations. This SOP does not apply to loans originated by the entity. This SOP limits the yield that may be accreted (accretable yield) to the excess of the investor's estimate of undiscounted expected principal, interest, and other cash flows (cash flows expected at acquisition to be collected) over the investor's initial investment in the loan. This SOP requires that the excess of contractual cash flows over cash flows expected to be collected (nonaccretable difference) not be recognized as an adjustment of yield, loss accrual, or valuation allowance. This SOP prohibits investors from displaying accretable yield and nonaccretable difference in the balance sheet. Subsequent increases in cash flows expected to be collected generally should be recognized prospectively through adjustment of the loan's yield over its remaining life. Decreases in cash flows expected to be collected should be recognized as impairment. This SOP prohibits carrying over or creation of valuation allowances in the initial accounting of all loans acquired in a transfer that are within the scope of this SOP. The prohibition of the valuation allowance carryover applies to the purchase of an individual loan, a pool of loans, a group of loans, and loans acquired in a purchase business combination. This SOP is effective for loans acquired in fiscal years beginning after December 15, 2004. The changes required by this SOP are not expected to have a material impact on the Company's financial statements.

In March 2004, the Emerging Issues Task Force (EITF) reached a final consensus on Issue 03-1, *The Meaning of Other-Than-Temporary and Its Application to Certain Investments*. The Issue applies to debt and equity securities within the scope of Statement of Financial Accounting Standards (SFAS) 115, certain debt and equity securities within the scope of SFAS 124, and equity securities that are not subject to the scope of SFAS 115 and not accounted for under the equity method of accounting (i.e., cost method investments). Issue 03-1 outlines a three-step model for assessing other-than-temporary impairment. The model involves first determining whether an investment is impaired, then evaluating whether the impairment is other-than-temporary, and if it is, recognizing an impairment loss equal to the difference between the investment's cost and its fair value. The model was to be applied prospectively to all current and future investments in interim or annual reporting periods beginning after June 15, 2004. However, in September 2004 the Financial Accounting Standards Board (FASB) staff issued FASB Staff Position (FSP) EITF Issue 03-1-1 which delayed the effective date for the measurement and recognition guidance contained in Issue 03-1. The guidance for analyzing securities for impairment will be effective with the final issuance of FSP EITF Issue 03-1-a. The disclosure

guidance of Issue 03-1 remains effective and requires quantitative and qualitative disclosures for investments accounted for under SFAS 115 and SFAS 124 for the first annual reporting period ending after December 15, 2003. In addition, disclosures related to cost method investments are effective for annual reporting periods ending after June 15, 2004. Comparative information for the periods prior to the period of initial application is not required. See Note 4, *Securities*, in the Notes to the Consolidated Financial Statements for BancGroup's disclosures under Issue 03-1. The changes required by this EITF Issue are not expected to have a material impact on the Company's financial statements.

On December 16, 2004, the FASB issued SFAS 123(R), *Share-Based Payment*, which is a revision of SFAS 123, *Accounting for Stock-Based Compensation*. SFAS 123(R) supersedes APB Opinion 25, *Accounting for Stock Issued to Employees*, and amends SFAS 95, *Statement of Cash Flows*. Generally, the approach in SFAS 123(R) is similar to the approach described in SFAS 123. However, SFAS 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. SFAS 123(R) must be adopted no later than July 1, 2005. Early adoption will be permitted in periods in which financial statements have not yet been issued. SFAS 123(R) permits public companies to adopt its requirements using one of two methods:

A modified prospective method in which compensation cost is recognized beginning with the effective date (a) based on the requirements of SFAS 123(R) for all share-based payments granted after the effective date and (b) based on the requirements of SFAS 123 for all awards granted to employees prior to the effective date of SFAS 123(R) that remain unvested on the effective date.

A modified retrospective method which includes the requirements of the modified prospective method described above, but also permits entities to restate based on the amounts previously recognized under SFAS 123 for purposes of pro forma disclosures either (a) all prior periods presented or (b) prior interim periods of the year of adoption.

The Company plans to adopt SFAS 123(R) on July 1, 2005 using the modified-prospective method.

As permitted by SFAS 123, the Company currently accounts for share-based payments to employees using Opinion 25's intrinsic value method and, as such, generally recognizes no compensation cost for employee stock options. Accordingly, the adoption of SFAS 123(R)'s fair value method will have an impact on the Company's results of operations, although it will have no material impact on its overall financial position. The impact of adopting SFAS 123(R) cannot be predicted at this time because it will depend on levels of share-based payments granted in the future. However, had the Company adopted SFAS 123(R) in prior periods, the impact of that standard would likely have approximated the impact of SFAS 123 as described in the disclosure of pro forma net income and earnings per share included in the *Stock-Based Compensation* section of Note 2, *Summary of Significant Accounting and Reporting Policies*, in the Notes to the Consolidated Financial Statements.

CRITICAL ACCOUNTING POLICIES

BancGroup's significant accounting policies are presented in Note 2 to the Consolidated Financial Statements. These policies, along with the disclosures presented in the other footnotes, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Those accounting policies involving significant estimates and assumptions by management, which have, or could have, a material impact on the carrying value of certain assets and impact comprehensive income, are considered critical accounting policies. BancGroup recognizes the following as critical accounting policies: Allowance for Loan Losses and Goodwill Impairment Analysis.

Allowance for Loan Losses

Management's ongoing evaluation of the adequacy and allocation of the allowance considers both impaired and unimpaired loans and takes into consideration the Bank's past loan loss experience, known and inherent risks

in the portfolio, adverse situations that may affect the borrowers' ability to repay, estimated value of any underlying collateral and an analysis of current economic conditions. While management believes that it has exercised prudent judgment and applied reasonable assumptions which have resulted in an allowance presented in accordance with generally accepted accounting principles, there can be no assurance that in the future, adverse economic conditions, increased nonperforming loans, regulatory concerns, or other factors will not require further increases in, or re-allocation, of the allowance. A more detailed discussion of BancGroup's allowance for loan losses is included in the Risk Management section and Note 2 to the Consolidated Financial Statements.

The table below illustrates BancGroup's sensitivity to changes in certain factors used in the determination of the allowance for loan losses.

Factors	Estimated Effect on 2005 Provision Expense Assuming the Following Changes in Each Determining Factor(2)	
	+ 10%	10%
	(In thousands)	
Loan portfolio Size	\$ 11,905	\$ (11,905)
Net charge-offs	236	(236)
Criticized loans(1)	1,002	(996)

(1) Criticized loans include all loans rated special mention or worse (includes all nonperforming assets and severely past due loans).

(2) These computations do not contemplate any action BancGroup could undertake in response to changes in each of these risk factors.

Goodwill Impairment Analysis

Goodwill represents the excess of the cost of an acquisition over the fair value of the net assets acquired. BancGroup tests goodwill for impairment on an annual basis, or more often if events or circumstances indicate that there may be impairment. The Company has elected to perform its annual testing as of September 30 each year. The goodwill impairment test is a two-step process, which requires management to make judgments in determining the assumptions used in the calculations. The first step involves estimating the fair value of each reporting unit and comparing it to the reporting unit's carrying value, which includes the allocated goodwill. If the estimated fair value is less than the carrying value, then a second step is performed to measure the actual amount of goodwill impairment. The second step initially involves determining the implied fair value of goodwill. This requires the Company to allocate the estimated fair value to all the assets and liabilities of the reporting unit. Any unallocated fair value represents the implied fair value of goodwill which is compared to its corresponding carrying value. If the carrying value exceeds the implied fair value, an impairment loss is recognized in an amount equal to that excess.

Fair values of reporting units were estimated using discounted cash flow models derived from internal earnings forecasts. The key assumptions used to estimate the fair value of each reporting unit included earnings forecasts for five years, terminal values based on future growth rates and discount rates based on the Company's weighted average cost of capital adjusted for the risks associated with the operations of each reporting unit.

The goodwill impairment analysis for 2004 indicated that no impairment write-offs were required. The table below illustrates BancGroup's sensitivity to changes in the rates used in discounting the estimated future cash flows. The sensitivity analysis was based on information available as of the annual test date of September 30, 2004. Further discussion regarding BancGroup's accounting for goodwill is included at Note 2 to the Consolidated Financial Statements.

	Sensitivity of Goodwill Impairment Analysis Results Assuming the Following Changes in Discount Rates(1)		
	No Change	+ 20%	20%
	(In thousands)		
Total excess of estimated fair value versus carrying value for all reporting units	\$ 2,188,736	\$ 1,381,932	\$ 4,029,647

(1) These computations do not take into account changes in the forecasted cash flows and future annual growth rates. Further, the computations do not contemplate any action BancGroup could undertake in response to changes in the risks associated with the operations of each reporting unit.

REVIEW OF RESULTS OF OPERATIONS

Net Interest Income

Net interest income represents the difference, or spread, between interest and fee income generated from earning assets and the interest expense paid on deposits and borrowed funds. Interest rate volatility, which impacts the volume and mix of earning assets and interest bearing liabilities as well as their rates, can significantly impact net interest income.

Net interest income on a tax equivalent basis increased 14.4% or \$71.6 million to \$569.1 million for the year ended December 31, 2004, from \$497.4 million for the year ended December 31, 2003. The principal factors affecting net interest income in 2004 were growth in average earning assets of 9.7% along with a 14 basis point improvement in the net interest margin.

The net interest margin increased to 3.52% in 2004 compared to 3.38% in 2003. The increase in the net interest margin was primarily due to the lower cost of interest bearing liabilities, which more than offset the decline in yield on earning assets. The cost of interest bearing liabilities declined 21 basis points to 2.03% compared to 2.24% in 2003, while the yield on earning assets fell six basis points in 2004 to 5.25% compared to 5.31% in 2003.

The Average Volume and Rates and Analysis of Interest Increases (Decreases) tables present the individual components of net interest income and the net interest margin. An analysis and discussion of the changes in these components is provided following the tables.

- (1) Loans classified as non-accruing are included in the average volume calculation. Interest earned and average rates on non-taxable loans are reflected on a tax equivalent basis. This interest is included in the total interest earned for loans. Tax equivalent interest earned is actual interest earned times 145%.
- (2) Interest earned and average rates on obligations of states and political subdivisions are reflected on a tax equivalent basis. Tax equivalent interest earned is actual interest earned times 145%. Tax equivalent average rate is tax equivalent interest earned divided by average volume.
- (3) Net interest income divided by average total interest-earning assets.
- (4) The mark to market valuations on hedged assets and liabilities are included in either other assets or other liabilities, respectively.
- (5) Interest income on loans includes loan fees of \$42,788, \$38,134 and \$35,357 for 2004, 2003 and 2002, respectively.

- (1) Increases (decreases) are attributed to volume changes and rate changes on the following basis: Volume Change = change in volume times old rate. Rate Change = change in rate times old volume. The Rate/Volume change = change in volume times change in rate, and it is allocated between Volume Change and Rate Change at the ratio that the absolute value of each of those components bear to the absolute value of their total.
- (2) Interest earned and average rates on obligations of states and political subdivisions are reflected on a tax equivalent basis. Tax equivalent interest earned: actual interest earned times 145%. Tax equivalent average rate is: tax equivalent interest earned divided by average volume.

Average Interest Earning Assets

Average interest earning assets grew \$1.4 billion or 10% in 2004. The average yield on earning assets declined six basis points in 2004 due to market rate declines in 2003. These declines encouraged a significant number of early loan payoffs and repositioned the loan portfolio in a lower rate environment. The decline in the average yield on earning assets was lessened by the increases in market rates that occurred in the second half of 2004. During this period, the Federal Reserve raised the target federal funds rate 125 basis points, and BancGroup raised its prime rate in conjunction with those increases. Approximately 80% of BancGroup's loan portfolio is variable or adjustable rate and therefore is directly impacted by changes in market rates. The composition of the earning asset growth is detailed in the sections below.

Loans. Average total loans grew \$598 million or 5.2% in 2004 over 2003. The average mortgage warehouse lending portfolio decreased \$424 million in 2004. Mortgage warehouse lending is a centralized division that provides lines of credit collateralized by residential mortgage loans to

mortgage origination companies. The record low mortgage rates available in 2002 and 2003 resulted in large increases in average loans for this division, as overall mortgage activity, both refinancings and purchases, reached record levels. As mortgage rates

increased the first half of 2004, these volumes declined. Consequently, average mortgage warehouse loans as a percentage of average total loans was 13% in 2003 compared to 9% in 2004. The average yield in mortgage warehouse loans increased 16 basis points in 2004 after declining 16 basis points in 2003. The pricing of these loans is affected by changes in market rates and customer demand.

The average balance of loans, excluding mortgage warehouse lending, showed solid growth in 2004 and increased \$1 billion, or 10% (7% excluding the PCB acquisitions). The average yield on the loan portfolio, excluding the mortgage warehouse division, was 5.63% for 2004, compared to 5.86% for 2003. As a result of changes in market rates, the yield on loans, excluding mortgage warehouse lending, increased in the last two quarters of 2004, but for the year was 23 basis points below the average yield for 2003.

Loans held for sale. Loans held for sale represent single family residential mortgage loans either directly originated, or acquired as short-term participations in mortgage loans. It is the Company's policy to enter into forward sales commitments at the same time these mortgage loans are originated or acquired. Average loans held for sale increased to \$497 million in 2004 from \$373 million in 2003. The average yield on the Company's loans held for sale decreased 31 basis points to 4.82% in 2004 versus 5.13% in 2003.

Securities. On average, the securities portfolio increased to \$3.4 billion in 2004 from \$2.8 billion in 2003. Securities comprised 21% of average earning assets in 2004 compared to 19% in 2003. The average yield increased to 4.54% in 2004 from 4.14% in 2003. The 40 basis point increase in 2004 was primarily due to lower premium amortization on mortgage backed securities, as prepayments slowed during the fourth quarter of 2003 and remained slower throughout 2004. BancGroup also executed several transactions to improve the structure and yield of the securities portfolio, such as selling \$710 million in securities yielding 4.37% and reinvesting those proceeds into securities yielding 4.59% in the first quarter of 2004. The duration of the portfolio (excluding equities) declined during 2004 from an estimated duration of 4.2 years at December 31, 2003 to 3.64 years at December 31, 2004.

Average Interest Bearing Liabilities

Average interest bearing liabilities increased 8%, primarily from 14% growth in interest bearing deposits. The average cost of interest bearing liabilities decreased 21 basis points to 2.03% in 2004, compared to 2.24% in 2003. The lower average cost of funds in 2004 was primarily the result of a shift in deposit mix to non-time deposits from time deposits, continued repricing of deposits in a lower rate environment and lower rates on long term debt as a result of prepaying certain long-term advances and entering into interest rate swaps to convert fixed rates to floating rates. The percentage of average non-time deposits to total average deposits has improved with the ratio increasing to 63% in 2004 compared to 58% in 2003.

Interest bearing deposits. Average non-time interest bearing deposits grew \$1.1 billion, or 30% in 2004 (24% excluding the PCB acquisition). This growth was primarily from sales efforts to emphasize relationship deposit growth, particularly in the money market product during 2004. Average time deposits remained relatively unchanged from 2003 (decreased 2% excluding the PCB acquisition).

The average rate on non-time interest bearing deposits increased nine basis points to 0.92% for 2004 compared to 0.83% for 2003, while the rate on time deposits declined 19 basis points to an average of 2.63% in 2004 compared to 2.82% for 2003.

BancGroup's growth in low cost deposits has decreased its dependence on borrowings whereby total average deposits comprise 67.8% of the Company's total funding for the year ended 2004 compared to 64.5% in 2003. The shift in funding mix contributes favorably to BancGroup's interest rate risk profile and is expected to assist in containing funding costs in a rising interest rate environment.

Borrowings. Average borrowings decreased less than 1% from 2003 due to strong deposit growth in 2004 which decreased the Company's reliance on wholesale funding sources. Due to the previously discussed growth in deposits, average total borrowings were 30% of average total assets for 2004 compared to 33% for 2003. Short term borrowings decreased \$71 million in 2004. The average rate on short term borrowings increased 13 basis points to 1.32% in 2004 versus 1.19% in 2003 in conjunction with increases in the target federal funds rate. The average balance of long term debt increased \$47.8 million in 2004. Rates on long-term debt declined 69 basis points from 2003 due to BancGroup's prepayment of \$512 million in long term FHLB advances which had an average rate of 4.49%, and entrance into interest rate swaps to convert the interest rates on \$575 million of long-term FHLB advances from fixed to floating rates.

Average Noninterest Earning Assets

Average noninterest earning assets increased \$155 million to \$1.3 billion from 2003 to 2004. The 2004 increase was due largely to an increase in bank-owned life insurance (BOLI) and noninterest earning assets obtained through acquisitions, such as goodwill and fixed assets.

Average Noninterest Bearing Liabilities

Average noninterest bearing liabilities increased by \$370 million from 2003 to 2004, a 19% increase. This change primarily relates to the increase in average noninterest bearing deposits of \$359 million from 2003 to 2004, a 19% increase (17% excluding the PCB acquisition). The noninterest bearing deposit mix remained constant at 20% of total deposits in both 2004 and 2003.

Loan Loss Provision

The provision for loan losses for the year ended December 31, 2004 was \$27.0 million compared to \$37.4 million for 2003. Net charge-offs were 0.19% and 0.31% of average loans for the years ended December 31, 2004 and 2003, respectively.

At December 31, 2004 BancGroup had a 548% reserve coverage of nonperforming loans compared to 240% at December 31, 2003. The reduction in loan loss provision was the result of improved credit quality in the loan portfolio. See management's discussion of nonperforming assets and summary of loan loss experience presented in the Review of Financial Condition section of this report.

Noninterest Income

Noninterest income, excluding gains/losses on securities, derivatives, net cash settlement of derivatives and other nonrecurring items, increased \$274 thousand, or 0.2%, from 2003 to 2004.

	<hr/>	<hr/>	<hr/>	<hr/>		<hr/>	<hr/>

The increase in service charges on deposit accounts in 2004 was primarily the result of the internal growth in deposits, the management of fee collection, an increase in cash management services revenues and revenue enhancement initiatives, and increased deposit accounts through acquisitions and new branch openings.

Financial planning services include discount brokerage, investment sales, asset management, trust services and insurance sales including term, universal, whole life and long-term care. The decrease in 2004 was primarily due to declines in sales of securities and annuity products and lower income from trust services.

Electronic banking services enable our customers to bank when and where they want. Electronic banking includes an ATM network, business and personal check card services and our internet banking with bill pay service. The increases in electronic banking fees are primarily the result of deposit growth, increased check card activities and usage, an increase in Visa's interchange fee rate, and an increase in usage of Colonial's internet banking product.

Mortgage banking is available in all of Colonial's banking regions. Colonial offers both adjustable and fixed rate products. Adjustable rate products are generally retained in Colonial's loan portfolio while fixed rate products are sold in the secondary market. Income from loans originated and subsequently sold in the secondary market is reflected in noninterest income. Mortgage banking income from secondary market loans decreased 51.1% to \$8.4 million in 2004. The 2004 decreases are a direct result of changes in mortgage rates which resulted in less refinancing activity than in 2003.

Securities gains were \$7.5 million for the year ended December 31, 2004 compared to \$4.8 million for the same period in 2003. Securities gains were substantially offset by \$7.4 million in net fees related to early extinguishment of debt recorded in noninterest expense. Refer to the *Net Interest Income* section for further discussion of the securities transactions.

Income from BOLI increased 36.3% in 2004 over the previous year primarily due to an additional purchase of \$100 million in BOLI in October of 2004.

The net cash settlement and change in fair value of swap derivatives not designated as hedging instruments increased \$5.1 million and \$6.5 million, respectively, from 2003 due to changes in interest rates underlying the swap derivatives.

Other income for 2004 includes increased revenue from the Goldleaf Technology subsidiary and real estate joint ventures of \$2 million and \$1.8 million, respectively, and nonrecurring gains on sale of certain other assets of \$1.7 million. The remainder of the change in other income included a decrease of \$4.7 million in various other income items including option income offset by increases in fee income from mortgage warehouse lending custodial services and association services.

Noninterest Expense

Noninterest expense increased \$48.2 million, or 13%, excluding loss on early extinguishment of debt, compared to 2003. Total noninterest expense, excluding early extinguishment of debt, to average assets was 2.43% in 2004. The addition of 30 new locations, including 16 through acquisitions, as well as acquisition related expenses during 2004 increased expenses by approximately \$15 million, or 4%, over 2003.

Salaries and employee benefits expense for the year ended December 31, 2004 increased \$21.9 million, or 11%. Salaries and employee benefits of additional employees from bank acquisitions and branch openings accounted for 3% of this increase. The remaining increase was due to normal salary increases, incentive related compensation, increases in production and back office support staffing and additional health care costs. These increases were partially offset by lower production related compensation as a result of lower mortgage banking and financial planning services revenues.

Occupancy expense for the year ended December 31, 2004 increased \$7.5 million, or 16%. The increase was primarily the result of acquisitions, the opening of a new technology center in the fourth quarter of 2003 and the strategic repositioning of branches within our markets through the opening of 14 new locations and the closure of seven locations in Alabama.

Amortization of intangible assets increased \$2.0 million, or 45%, during 2004. The increase in core deposit intangible amortization resulted from the 2004 acquisition of PCB and the 2003 acquisition of Sarasota Bank.

Professional services for the year ended December 31, 2004 increased \$4.5 million, or 30%. The increase was related to legal fees and other professional services, associated with the growth of the Company.

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

In 2004, BancGroup completed the acquisition of PCB which operated 16 full service branches in several counties in Florida. In 2003, BancGroup completed the acquisition of Sarasota Bancorporation in Sarasota, Florida with one branch. The results for 2004 and 2003 include pretax costs associated with these mergers and acquisitions totaling \$2 million and \$271,000, respectively. These costs are comprised of travel, training, marketing, and incremental charges related to the integration of acquired banks, such as system conversion and

customer supplies. Refer to the Business Combination section of the Executive Overview for further information regarding business combinations.

The increases in all other expense categories were primarily due to acquisitions completed and new locations opened in 2004 and 2003 and various technology initiatives. In addition, increases in other expense were primarily from electronic banking charges as a direct result of increased revenues, various investments including Goldleaf Technologies and professional fees as a result of the Sarbanes Oxley Act.

Income Taxes

The effective income tax rate was 34.0% in 2004 and 33.9% in 2003. BancGroup is subject to a statutory federal tax rate of 35% and various state tax rates. For further information concerning the provision for income taxes, refer to Note 24, Income Taxes, in the Notes to Consolidated Financial Statements.

REVIEW OF STATEMENT OF CONDITION

Loans

Management's emphasis, within all of BancGroup's banking regions and specialized lending divisions, is on loan growth in accordance with local market demands and in reliance upon the lending experience and portfolio management expertise in these regions and divisions. Management believes that its strategy of meeting local demands and using local lending expertise has proven successful, especially when combined with the expertise offered by the managers of the specialized lending divisions such as mortgage warehouse and residential real estate. Loans, excluding mortgage warehouse lending, grew 11% in 2004 (6% excluding the PCB acquisition). The strongest loan growth for the Company in 2004 was in the Florida regional bank segment with 18% growth (9% excluding the PCB acquisition), the Texas regional bank segment with 20% growth and the Nevada regional bank segment with 11% growth. Mortgage warehouse lending also grew 13% in 2004.

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

The increase in loans in 2004 compared to 2003 was primarily driven by growth in real estate loans; commercial, construction and residential, which account for 91% of the net increase in loans. Growth in commercial real estate loans reflects an increase in retail, office and warehouse property types offset by declines in lodging and multi-family. The construction real estate portfolio is primarily made up of loans to finance construction projects within the Company's banking markets and the growth in this category during 2004 was mostly in residential property types (development, land zoned residential, home construction, residential lots and condominiums). Residential real estate loan growth was primarily driven by increases in home equity lines as consumers continue to take advantage of relatively low interest rates.

The majority of the remaining net increase in loans for 2004 as compared to 2003 was in mortgage warehouse lending loans, which continue to be a significant line of business for the Company.

The contractual maturities of loans may vary significantly from actual maturities due to loan extensions, early payoffs due to refinancing and other factors. Fluctuations in interest rates are also a major factor in early loan payoffs. The uncertainties of future events, particularly with respect to interest rates, make it difficult to predict the actual maturities. The following table represents the contractual maturities of loans at December 31, 2004.

Loan Maturity/Rate Sensitivity

	December 31, 2004

Refer to the Risk Management section for additional discussion of loans.

Securities

BancGroup determines the funds available for investment based upon anticipated loan and deposit growth, liquidity needs and pledging requirements, as well as other factors. An investment strategy is developed based on these factors, along with the bank's balance sheet position and relative value opportunities in the market.

All securities are either classified as held to maturity or available for sale. Held to maturity securities are those securities which management has the ability and intent to hold until maturity. The carrying value of held to maturity investments was \$6.2 million at the end of 2004. The current year decline was due to paydowns, maturities and calls in the portfolio. Securities classified as held to maturity consisted primarily of U.S. Treasury bonds, agency mortgage-backed securities and municipal obligations. The stated maturity of these securities was 5.91 years with an average life of 3.87 years and an average duration of 1.74 years.

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

Securities available for sale represent those securities that the Company intends to hold for an indefinite period of time and may be sold in response to changes in the bank's interest rate risk position, prepayment risk or other similar factors. These securities are recorded at market value with unrealized gains or losses, net of any tax effect, added to or deducted from shareholders' equity. At December 31, 2004, available-for-sale securities totaled \$3.6 billion or 99.8% of the total portfolio. The stated maturity of these securities was 20.78 years with an average life of 5.19 years and an average duration (excluding equities) of 3.64 years. Stated maturities differ from average lives because borrowers may have the right to call or prepay certain obligations with or without call or prepayment penalties.

The composition of the Company's securities portfolio is reflected in the following table:

Certificates of deposit less than \$100,000	1,974,292	1,802,760	16.6	18.2
Certificates of deposit \$100,000 or more	1,784,437	1,540,274	15.1	15.5
Other time deposits	370,925	367,155	3.1	3.7
Total deposits	\$ 11,863,695	\$ 9,918,434	100.0%	100.0%

BancGroup is continuing to grow deposits throughout its market areas. Non-time deposits grew 25% in 2004, including 22% growth in noninterest bearing deposits (19% and 11%, respectively, excluding the impact of the PCB acquisition). Time deposits grew 11% in 2004 (7% excluding the PCB acquisition). The mix of non-time deposits remained unchanged from the end of the prior year at 64% of total deposits. As market demographics change, products and services are restructured to meet the needs of a particular region or customer base. Strong regional management supported by BancGroup's marketing and treasury departments provide the Company with resources to remain competitive in its deposit markets.

The following restated chart details BancGroup's non-time deposit base by state at December 31, 2004:

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

Total	\$ 6,731,440	\$ 2,792,316	\$ 1,915,503	\$ 883,756	\$ 1,139,865

RISK MANAGEMENT

Credit Risk Management

Colonial has some measure of credit risk in most of its primary banking activities, but the majority of this risk is associated with lending. Colonial has structured its overall credit process so that the credit risk associated with lending can be effectively managed. Our credit risk management process is centered on comprehensive credit and underwriting policies and procedures, a strong and effective loan approval process, continual audit and review functions, and experienced credit professionals at the regional, business-line, and BancGroup levels. In addition, Colonial has a credit risk reporting and analysis group and a special assets/collections group which fall under the supervision of the Chief Credit Officer. The credit risk reporting and analysis group continually evaluates changes in credit risk, monitors large concentrations and exposures of all types and locations, and implements the bank's allowance methodology. The special assets/collections group is charged with minimizing losses, maximizing recoveries, and implementing strategies to reduce problem asset levels. In addition, the internal auditor and regulatory examiners review and perform detailed tests of our credit risk management activities, such as credit underwriting, loan administration, and the allowance process. The overall goals of our credit risk management activities include providing a sound basis for new credit extensions and early recognition of problems/risks so that we can maintain a high quality loan portfolio and achieve long-term earnings growth.

In addition to lending, credit risk is present in our securities portfolio, derivative instruments and in certain deposit activities. The bank's investment area has credit risk management processes in place in order to manage risk in these activities.

Loan Approval and Underwriting

The Chief Credit Officer, who reports directly to the Chief Executive Officer, provides company-wide credit oversight through a company-wide senior credit administration function. This function reviews larger credits prior to approval and also provides an independent review of credits on a continual basis. In addition, the Company has established regional loan committees made up of local officers and directors that approve loans up to certain levels. These committees provide local business and market expertise while BancGroup's senior management provides independent oversight by participating in the state loan committees. Loans to the Company's largest borrowers and loans originated out of specialized business units may go through these committees for approval, but also may go through additional committees established by the Board of Directors and administered by the Chief Credit Officer.

BancGroup has standard policies and procedures for the evaluation and underwriting of new credits, including debt service evaluations and collateral guidelines. Collateral guidelines vary with the creditworthiness of the borrower, but generally require loan to value ratios not to exceed 85% for commercial real estate, 80% for construction, 75% for development, 65% for raw land, and 90% for residential real estate. Commercial non-real estate, financial and agricultural loans are generally collateralized by business inventory, accounts receivables or new business equipment at 50%, 80% and 90% of estimated value, respectively. Installment and consumer loan collateral, where required, is based on 90% or lower loan to value ratios. Collateral values referenced above are monitored and estimated by loan officers through inspections, independent appraisals, reference to broad measures of market values, and current experience with similar properties or collateral. Loans with loan-to-value ratios in excess of 80% have potentially higher risks which are offset by other factors including the borrowers' or guarantors' creditworthiness, the borrowers' other banking relationships, the bank's lending experience with the borrowers, and any other potential sources of repayment.

Concentration

BancGroup has a significant concentration of commercial real estate and construction loans representing 33.2% and 30.5% of total loans as of December 31, 2004, respectively. BancGroup's commercial real estate and construction loans are spread geographically throughout Alabama, Florida and other areas including metropolitan Atlanta, Dallas, Reno and Las Vegas with no more than 11.0% of total commercial real estate and construction loans in any one metropolitan statistical area (MSA). The Alabama economy generally experiences a slow but

steady rate of growth, while BancGroup's markets in Florida, Georgia, Nevada and Texas are experiencing higher rates of growth. The collateral held in the commercial real estate and construction portfolios consists of various property types such as retail properties, 1-4 family residential developments and lots, office buildings, land held for future development or construction, residential homes under construction, multi-family housing, condominium properties, warehouses, lodging and health service facilities. The relatively small average loan size and the application of conservative underwriting guidelines further reduce risk. Net charge-offs to average loans for the commercial real estate portfolio were 0.17% for 2004. Net charge-offs to average loans for the construction portfolio were 0.07% for 2004. In addition to mortgages on the subject properties, substantially all construction and commercial real estate loans have personal guarantees of the principals involved. The owner-occupied commercial real estate portfolio represented 23.4% of the total commercial real estate portfolio outstanding at December 31, 2004. Owner-occupied real estate is primarily dependent on cash flows from operating businesses rather than on the sale or rental of the property; therefore, these loans carry less risk than other commercial real estate loans.

Management believes that its existing distribution of commercial real estate and construction loans, whether grouped geographically, by industry, or by borrower, reduces BancGroup's risk exposure. The current distribution of commercial real estate and construction loans remains diverse in location, size, and collateral function. This diversification, in addition to our emphasis on quality underwriting, serves to reduce the risk of losses. The following charts reflect the geographic diversity and property type distribution of Construction and Commercial Real Estate loans at December 31, 2004.

	<u>Construction</u>	<u>% of Total</u>	<u>Commercial Real Estate</u>	<u>% of Total</u>

Selected Characteristics of the 75 Largest Construction and Commercial Real Estate Loans

	<u>Construction</u>	<u>Commercial Real Estate</u>
75 Largest Loans Total (in thousands)	\$ 1,155,423	\$ 752,170
% of 75 largest loans to category total	29.4%	17.6%
Average Loan-to-Value Ratio (75 largest loans)	69%	67%
Average Debt Coverage Ratio (75 largest loans)	N/A	1.42x

Residential real estate loans represent 17.3% of total loans in 2004. Substantially all of these loans are adjustable rate first mortgages on single-family, owner-occupied properties, and therefore, have generally less credit risk and lower interest rate sensitivity. BancGroup has a history of successfully lending in the residential real estate market and its quality ratios remain favorable in this portfolio segment. Net charge-offs to average loans for the residential real estate portfolio was 0.10% for 2004. The growth in this portfolio was mainly in home equity lines of credit which grew 34.0% during 2004 and now represent 23.2% of residential real estate loans. This increase is due to the new equity line products that were introduced over the last few years as well as general market trends.

Loans classified as commercial, financial, and agricultural, representing 7.8% of total loans, consist of secured and unsecured credit lines and equipment loans for various industrial, agricultural, commercial, financial, retail, or service businesses. The risks associated with loans in this category are generally related to the earnings capacity of, and the cash flows generated from, the individual business activities of the borrowers.

Consumer loans, representing 1.5% of total loans, are loans to individuals for various purposes. Automobile loans and unsecured loans make up the majority of these loans. The principal source of repayment is the earning capacity of the individual borrower, as well as the value of the collateral for secured loans.

BancGroup maintains a mortgage warehouse lending division. This department provides lines of credit collateralized by residential mortgage loans to mortgage origination companies. Loans outstanding at December 31, 2004 were \$1.1 billion, with unfunded commitments of \$770.5 million.

The Company has 38 credits with commitments (funded and unfunded) of \$866 million that fall within the bank regulatory definition of a Shared National Credit (generally defined as a total loan commitment in excess of \$20 million that is shared by three or more lenders). The largest outstanding amount to any single borrower is \$75 million (which is a mortgage warehouse lending credit), with the smallest credit being approximately \$20,000. At December 31, 2004, \$492 million of these commitments were funded.

Although by definition these commitments are considered Shared National Credits, BancGroup's loan officers have established long-term relationships with each of these borrowers. These commitments are comprised of the following:

75% - mortgage warehouse lines to 21 large institutions,

22% - 15 commercial real estate credit facilities to companies with headquarters located within Colonial's existing markets,

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

2% - one operating facility to a large national insurance company, and

1% - one international credit to a correspondent bank in Argentina.

Management believes that these are sound participations involving credits that fit within Colonial's lending philosophy and meet its conservative underwriting guidelines.

Allowance for Loan Losses

Colonial, through its lending and credit functions, continuously reviews its loan portfolio for credit risk. Colonial employs an independent credit review area that reviews the lending and credit functions to validate that credit risks are appropriately identified. The Company remains committed to the early recognition of problem loans and to ensuring an adequate level of allowance to cover losses. At December 31, 2004, the Company's total allowance was \$148.8 million, which represented 1.16% of period-end loans.

Using input from the Company's comprehensive credit risk identification process, the Company's credit risk management area analyzes and validates the Company's loan loss reserve methodology at least quarterly. The analysis includes three basic elements: specific allowances for individual loans, general allowances for loan pools, and allowances based on identified economic conditions and other risk factors. The credit risk management area, along with senior management, review the methodology and ensure it is appropriate and that all material risk elements have been assessed in order to determine the appropriate level of allowance for the inherent losses in the loan portfolio at each quarter end. In addition, the allowance methodology is discussed with and reviewed quarterly by the Audit Committee.

The first element of the allowance for loan losses analysis involves the calculation of specific allowances for individual impaired loans as required by SFAS 114, *Accounting by Creditors for Impairment of a Loan*. In addition, the Company requires that a broad group of loans be tested for impairment each quarter (this includes all loans of \$500,000 and over that have internal risk ratings below a predetermined classification level, plus all significantly past due loans of \$200,000 and over). The credit risk management area validates all impairment testing and validates the reserve allocations for all impaired loans each quarter. Reserves associated with this element are based on a thorough analysis of the most probable sources of repayment which is normally the liquidation of collateral, but also includes discounted future cash flows or the market value of the loan itself. As of December 31, 2004 and 2003, the specific allowance calculations for this element of the allowance totaled \$8.0 million and \$15.6 million, respectively. The decrease in the reserve between these two periods primarily resulted from a 58.6% decline in the dollar amount of loans that met the criteria for impaired status.

The second reserve element is the general allowance for loan pools assessed by applying loan loss allowance factors to groups of loans within the portfolio that have similar characteristics. This part of the methodology is governed by SFAS 5, *Accounting for Contingencies*. The general allowance factors are based upon recent and historical charge-off experience and are typically applied to the portfolio by loan type and internal risk rating. Historical loss analyses provide the basis for factors used for homogenous pools of smaller loans, such as residential real estate and other consumer loan categories which are not evaluated based on individual risk ratings but almost entirely based on historical losses. The statistics used in the analysis of this second reserve element are adjusted quarterly based on loss trends and risk rating migrations. As of December 31, 2004 and 2003, the general allowance calculations totaled \$111.5 million and \$105.0 million, respectively. The increase between the periods was primarily the result of portfolio growth which was partially offset by lower criticized and classified risk assets.

The third element of the allowance represents the effect of factors that are not fully captured elsewhere in the model, and includes amounts for deteriorating industries, macroeconomic factors and model imprecision. The Company analyzes and revises this part of the allowance at least quarterly. The qualitative risk factors of this third allowance segment are subjective and require a high degree of management judgment. As of December 31, 2004 and 2003, the allowance calculated for economic conditions and other risk factors relating to specific loan categories totaled \$17.2 million and \$7.0 million, respectively. The change in this portion of the reserve is due to increased interest rates in 2004 that subject the commercial real estate and construction portfolios to increased loss levels as well as other economic factors affecting commercial real estate. In addition to the allocated portions, an unallocated amount is calculated to adjust the allowance for imprecision inherent in estimates used for the allocated portions of the reserve. The unallocated allowance is the result of our judgement of risks inherent in the portfolio, economic uncertainties and other subjective factors, including industry trends. At December 31, 2004 and 2003, the unallocated allowance was \$12.1 million and \$10.9 million, respectively.

Allowance for loan losses as a percent of nonperforming loans (nonaccrual and renegotiated)	548%	240%	191%	239%	258%

Nonperforming Assets

BancGroup classifies problem loans into four categories: nonaccrual, past due, renegotiated and other potential problems. When management determines that a loan no longer meets the criteria for a performing loan and collection of interest appears doubtful, the loan is placed on nonaccrual status. Loans are generally placed on nonaccrual if full collection of principal and interest becomes unlikely (even if all payments are current) or if the loan is delinquent in principal or interest payments for 90 days or more, unless the loan is well secured and in the process of collection. BancGroup's policy is to charge off consumer installment loans 120 days past due unless they are in the process of foreclosure and are adequately collateralized. Management closely monitors all loans that are contractually 90 days past due, renegotiated or nonaccrual. These loans are summarized as follows:

Nonperforming Assets

	December 31,				
	2004	2003	2002	2001	2000
	(In thousands)				
Aggregate loans for which interest is not being accrued	\$ 26,983	\$ 57,342	\$ 70,282	\$ 49,675	\$ 41,419
Aggregate loans renegotiated to provide a reduction or deferral of interest or principal because of deterioration in the financial condition of the borrower	191	277	417	1,507	1,161
Total nonperforming loans*	27,174	57,619	70,699	51,182	42,580
Other real estate and in-substance foreclosure	9,711	17,378	20,468	15,198	8,680
Repossessions	154	443	134	355	298
Total nonperforming assets*	\$ 37,039	\$ 75,440	\$ 91,301	\$ 66,735	\$ 51,558
Aggregate loans contractually past due 90 days or more for which interest is being accrued	\$ 8,096	\$ 10,802	\$ 21,693	\$ 28,249	\$ 9,842
Total nonperforming loans as a percent of net loans	0.21%	0.50%	0.60%	0.49%	0.44%
Total nonperforming assets as a percent of net loans, other real estate and repossessions	0.29%	0.65%	0.78%	0.64%	0.53%
Total nonperforming loans and 90 day past due loans for which interest is being accrued as a percent of net loans	0.27%	0.59%	0.79%	0.77%	0.54%
Allowance for loan loss as a percent of nonperforming loans (nonaccrual and renegotiated)	548%	240%	191%	239%	258%

* Total does not include loans contractually past due 90 days or more, which are still accruing interest

The above nonperforming loans represent all material credits for which management has significant doubts as to the ability of the borrowers to comply with the loan repayment terms. Management also expects that the resolution of these problem credits as well as other performing loans will not materially impact future operating results, liquidity or capital resources. The balance of nonperforming assets declined \$38 million, or 51%, during the year ended December 31, 2004 as a result of the resolution of problem assets through the sale of the loans or sale of underlying property, charge-off, and payoffs of a number of larger assets including the sale of the Bank's outstanding loans to Argentine banks. The balance of nonperforming assets can fluctuate due to changes in economic conditions, nonperforming assets obtained in acquisitions, and the disproportionate impact of larger assets. Colonial has historically and consistently experienced favorable levels of nonperforming assets. The recent improvements in nonperforming assets and other credit quality measures are the result of additional improvements in collection, work-out and risk management efforts.

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

Interest income recognized and interest income foregone on nonaccrual loans were not significant for the years ended December 31, 2004, 2003 and 2002.

A loan is considered impaired, based on current information and events, if it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual

terms of the loan agreement. As mentioned previously, Colonial's credit risk management area performs detailed verification and testing to ensure appropriate identification of impaired loans and that proper reserves are held on these loans. The recorded investment in impaired loans at December 31, 2004 and 2003 was \$24.8 million and \$59.9 million, respectively, and these loans had a corresponding valuation allowance of \$8.0 million and \$15.6 million, respectively. The average investment in impaired loans during 2004 and 2003 totaled \$43.8 million and \$64.5 million, respectively. The decrease in impaired loans is primarily due to the resolution of several problem credits.

Management, through its loan officers, internal credit review staff and external examinations by regulatory agencies, has identified approximately \$232.2 million of loans, which have been placed on a classified loan list excluding nonaccrual, other real estate, repossessions and loans that are contractually 90 days past due. The status of all material classified loans is reviewed at least monthly by loan officers, quarterly by BancGroup's centralized credit administration function and annually by regulatory agencies. In connection with such reviews, collateral values are updated where considered necessary. If collateral values are judged insufficient or other sources of repayment are deemed inadequate, the amount of reserve held is increased or the loan is reduced to estimated recoverable amounts. As of December 31, 2004, substantially all of these classified loans are current with their existing repayment terms. Management believes that classification of such loans well in advance of their reaching a delinquent status allows the Company the greatest flexibility in correcting problems and providing adequate reserves. Given the reserves and the demonstrated ability of the borrowers to comply with the existing repayment terms, management believes any exposure from these loans has been adequately addressed at the present time.

Asset/Liability Management

Asset/liability management involves the evaluation, monitoring and management of interest rate risk, liquidity and funding. The Board of Directors has overall responsibility for Colonial's asset/liability management policies. To ensure adherence to these policies, the Asset and Liability Committee (ALCO) establishes and monitors guidelines to control the sensitivity of earnings to changes in interest rates. The guidelines apply to both on and off-balance sheet positions. The goal of the ALCO process is to maximize earnings while carefully controlling interest rate risk.

Interest Rate Risk

Interest rate risk, and its potential effects on earnings, are inherent in the operations of a financial institution. We are subject to interest rate risk because:

Assets and liabilities may mature or re-price at different times (for example, if assets re-price faster than liabilities and interest rates are generally falling, earnings will initially decline);

Assets and liabilities may re-price at the same time but by different amounts (for example, when the general level of interest rates is falling, we may reduce rates paid on checking and savings deposit accounts by an amount that is less than the general decline in market interest rates);

Short-term and long-term market interest rates may change by different amounts (i.e., the shape of the yield curve may affect new loan yields and funding costs differently); or

The remaining maturity of various assets or liabilities may shorten or lengthen as interest rates change (for example, if long-term mortgage interest rates decline sharply, mortgage-backed securities held in the securities available for sale portfolio may prepay significantly earlier than anticipated which could reduce portfolio income). In addition, interest rates may have an indirect impact on loan demand, credit losses, mortgage origination volume, the value of the pension liability and other sources of earnings.

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

Asset/liability management activities include lending, accepting and placing deposits, investing in securities, issuing debt and hedging interest rate risk. Sensitivity of earnings to interest rate changes arises when yields on assets change in a different time period or in a different amount from that of interest cost on liabilities. To mitigate

interest rate risk, the structure of the balance sheet is managed so that movements of interest rates on assets and liabilities are highly correlated in a manner intended to allow Colonial's interest bearing assets and liabilities to contribute to earnings even in periods of volatile interest rates.

Colonial employs the following measurement techniques in the management of interest rate risk: simulation of earnings and simulation of the economic value of equity. These techniques are complementary and are used in concert to provide a comprehensive interest rate risk management capability.

Simulation of earnings is the primary tool used to measure the sensitivity of earnings to interest rate changes. Using computer modeling techniques, Colonial is able to measure the potential impact of different interest rate assumptions on pre-tax earnings. All balance sheet positions, including derivative financial instruments, are included in the model simulation.

The following table represents the output from the Company's simulation model based on the balance sheet at December 31, 2004, when the Fed Funds Rate was 2.25%. The table measures the impact on net interest income of an immediate and sustained change in all market interest rates in 100 basis point increments for the 12 calendar months following the date of the change. This twelve-month projection of net interest income under these scenarios is compared to the twelve-month net interest income projection with rates unchanged.

<u>Basis Points Change</u>	<u>Fed Funds Rate</u>	<u>Percentage Change in 12 Month Projected Net Interest Income Versus Projected Net Interest Income Under No Rate Change (1)</u> (Restated)
+200	4.25	3.8%
+100	3.25	2.5%
No rate change	2.25	
100	1.25	(3.1)%

- (1) The computation of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, estimates of rates on loans and deposits given these rate changes, the ability to maintain interest rate floors on loans as market rates decline, deposit decay rates and loan/investment prepayments. Further, the computations do not take into account changes to the slope of the yield curve, changes in the relative relationship of various market rates, changes in the volume or mix of asset and liabilities on the balance sheet nor do they contemplate any actions BancGroup could undertake in response to changes in interest rates.

Colonial also measures interest rate risk by simulating the impact of changes in interest rates to the market value of equity. The potential effect of these interest rate changes is derived from the impact of such changes on the market value of assets and liabilities. Colonial analyzes the changes in market value of equity to ensure that the Company maintains an adequate capital position.

Liquidity and Funding

Liquidity is the ability of an organization to meet its financial commitments and obligations on a timely basis. These commitments and obligations include credit needs of customers, withdrawals by depositors, repayment of debt when due and payment of operating expenses and dividends. Management of liquidity also includes management of funding sources and their utilization based on current, future and contingency needs. Maintaining and managing adequate liquidity and funding is another prominent focus of ALCO.

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

Retail deposit growth is a primary focus of BancGroup's funding and liquidity strategy. Colonial's average non-time deposits grew by \$1.4 billion, or 26% (22% excluding the PCB acquisition) from 2003. Total deposits increased by \$1.9 billion, or 20% (14% excluding the effects of acquisitions), from December 31, 2003. With branches in four of the top five population growth states, retail deposits are a major component of BancGroup's funding growth. BancGroup finished the year with 22% internal growth in average non-time deposits and 57% of the Company's non-time deposits were in Florida.

BancGroup has worked to expand the availability of short-term and long-term wholesale funding sources in addition to the emphasis on core deposit growth. The Company draws on a variety of funding sources to assist in funding loan growth, securities acquisitions and deposit fluctuations. Fed Funds lines, repurchase agreements and issuances of commercial paper are sources for short-term borrowings. Availability from the Federal Home Loan Bank of Atlanta (FHLB) is also an important part of BancGroup's wholesale funding sources. Credit facilities with the FHLB are used for both short and long-term borrowings. As of December 31, 2004, the lendable collateral value pledged to FHLB amounted to \$4 billion up from \$2.9 billion the prior year. Continued loan growth is likely to increase the lendable collateral value and the FHLB will continue to provide an important source of wholesale liquidity. From time to time BancGroup has issued subordinated debentures, subordinated notes and junior subordinated debt to provide both capital and funding.

Over the course of 2004, BancGroup focused on short-term borrowings to best manage its interest rate risk and to match the short-term funding requirement of mortgage warehouse lending cycles. By year end 2004, short-term borrowings from the FHLB had increased \$600 million over 2003.

Short-term borrowings were comprised of the following at December 31, 2004, 2003, and 2002:

	2004	2003	2002
	(In thousands)		
FHLB borrowings	\$ 1,250,000	\$ 650,000	\$ 555,000
Federal funds purchased	1,217,808	1,150,505	1,278,378
Repurchase agreements (retail)	360,127	400,694	493,725
Repurchase agreements (wholesale)	431,000	451,000	788,886
Commercial paper			15,065
Total Short-Term Borrowings	\$ 3,258,935	\$ 2,652,199	\$ 3,131,054

Additional details regarding short-term borrowings are shown below:

	Maximum Outstanding At Any Month End	Average Balance	Average Interest Rate	Average Interest Rate At December 31
	(In thousands)			
2004				
FHLB borrowings	\$ 1,250,000	\$ 812,702	1.58%	2.44%
Federal funds purchased	1,402,178	1,220,059	1.39%	2.27%
Other short-term borrowings	934,134	873,274	0.98%	1.73%
	\$ 3,586,312	\$ 2,906,035	1.32%	2.20%
2003				
FHLB borrowings	\$ 1,450,000	\$ 612,342	1.30%	1.37%
Federal funds purchased	1,991,264	1,432,460	1.18%	1.00%
Other short-term borrowings	1,384,930	932,588	1.14%	0.81%
	\$ 4,826,194	\$ 2,977,390	1.19%	1.03%

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

2002				
FHLB borrowings	\$ 555,000	\$ 26,986	1.40%	1.30%
Federal funds purchased	1,468,417	1,093,420	1.68%	1.29%
Other short-term borrowings	1,347,197	938,745	1.90%	1.83%
	<u>\$ 3,370,614</u>	<u>\$ 2,059,151</u>	1.77%	1.52%

Long-term borrowings were comprised of the following at December 31, 2004, 2003, and 2002:

	2004 (Restated)	2003 (Restated)	2002 (Restated)
	(In thousands)		
FHLB borrowings (2)	\$ 1,382,913	\$ 1,577,209	\$ 1,653,307
Repurchase agreements (long-term wholesale)	300,000	300,000	
Subordinated notes (2)	265,873	270,703	272,492
Trust preferred securities (1)			178,000
Junior subordinated debentures (1)	302,412	286,598	
Variable rate subordinated debentures	7,725	7,725	7,725
Convertible subordinated debentures			3,100
Other	2,034		
Total Long-Term Borrowings	\$ 2,260,957	\$ 2,442,235	\$ 2,114,624

(1) Due to the adoption of FIN 46, trust preferred securities were deconsolidated and reclassified as junior subordinated debt.

(2) Includes an adjustment to fair market value as required by SFAS 133, due to related interest rate swaps. See Note 10, Derivatives, and Note 15, Long-Term Borrowings, to the Consolidated Financial Statements for further details.

Operational Risk Management

In providing banking services, Colonial processes cash, checks, wires and ACH transactions which expose Colonial to operational risk. Controls over such processing activities are closely monitored to safeguard the assets of Colonial and its customers. However, from time to time, Colonial has incurred losses related to these processes and there can be no assurance that such losses will not occur in the future.

Operational risk is the risk of unexpected losses attributable to human error, systems failures, fraud, or inadequate internal controls and procedures. This risk is mitigated through a system of internal controls that are designed to keep operational risk at levels appropriate to Colonial's corporate standards in view of the risks inherent in the markets in which Colonial operates. The system of internal controls includes policies and procedures that require the proper authorization, approval, documentation and monitoring of transactions. Each business unit is responsible for complying with corporate policies and procedures to do so. Colonial's internal auditors monitor the overall effectiveness of the system of internal controls on an ongoing basis.

Colonial does not engage in business processes that are out of its primary areas of expertise but rather outsources non-core processing functions to limit operational risk associated with non-core business.

Operational losses are monitored closely. Operational losses have historically been immaterial as current earnings have absorbed operational losses without any material impact to earnings or capital.

CAPITAL MANAGEMENT

Capital Adequacy

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

Management is committed to maintaining capital at a level sufficient to protect shareholders and depositors, provide for reasonable growth and fully comply with all regulatory requirements. Management's strategy to achieve these goals is to retain sufficient earnings while providing a reasonable return to shareholders in the form of dividends and return on equity. The Company's dividend payout ratio target range is 35-45%. Dividend rates are determined by the Board of Directors in consideration of several factors including current and projected capital ratios, liquidity and income levels and other bank dividend yields and payment ratios.

The amount of a cash dividend, if any, rests with the discretion of the Board of Directors of BancGroup as well as upon applicable statutory constraints such as the Delaware law requirement that dividends may be paid only out of capital surplus and net profits for the fiscal year in which the dividend is declared and the preceding fiscal year.

BancGroup also has access to equity capital markets through both public and private issuances. Management considers these sources and related return in addition to internally generated capital in evaluating future expansion or acquisition opportunities.

The Federal Reserve Board has issued guidelines identifying minimum Tier I leverage ratios relative to total assets and minimum capital ratios relative to risk-adjusted assets. The minimum leverage ratio is 3% for bank holding companies that meet certain specified criteria, including that they have the highest regulatory rating. A minimum leverage ratio of 4% is required for all bank holding companies not meeting these criteria. Higher capital ratios may be required for any bank holding company if warranted by its particular circumstance or risk profile. The minimum risk adjusted capital ratios established by the Federal Reserve are 4% for Tier I and 8% for total capital. BancGroup's actual capital ratios and the components of capital and risk adjusted asset information (subject to regulatory review) as of December 31, 2004 are stated below:

Capital (dollars in thousands, restated):		
Tier I Capital:		
Shareholders' equity (excluding unrealized gains/losses on securities available for sale and intangible assets plus trust preferred securities) (1)		\$ 1,304,981
Tier II capital:		
Allowable loan loss reserve		148,802
Subordinated debt		234,635
45% of net unrealized gains on available for sale equity securities		577
		<u> </u>
Total Capital		<u>\$ 1,688,995</u>
Risk-Adjusted Assets		\$ 14,825,977
Quarterly average assets (excluding intangible assets and unrealized gains/losses on securities available for sale)		\$ 18,215,372
	December 31, 2004	December 31, 2003
	(Restated)	(Restated)
	<u> </u>	<u> </u>
Tier I Leverage Ratio	7.16%	7.55%
Risk-Adjusted Capital Ratios:		
Tier I Capital Ratio	8.80%	9.41%
Total Capital Ratio	11.39%	12.55%

(1) Due to the adoption of FIN 46, BancGroup no longer reflects trust preferred securities on its consolidated statement of condition, but rather reflects these securities as junior subordinated debentures. However, under current regulatory guidelines, these securities continue to qualify for Tier I Capital treatment.

Regulatory Restrictions

As noted previously, dividends payable by national banks in any year, without prior approval of the appropriate regulatory authorities, are limited.

Colonial Bank is also required by law to maintain noninterest bearing deposits with the Federal Reserve Bank to meet regulatory reserve requirements. At December 31, 2004, these deposits were not material to BancGroup's funding requirements.

COMPARISON OF 2003 WITH 2002

In 2003, we continued to expand in high-growth markets, specifically Florida, with the acquisition of Sarasota Bancorporation in October. This acquisition added a downtown Sarasota location with \$161 million in assets, \$129 million in loans and \$128 million in deposits to Colonial's franchise.

Net income for the year ended December 31, 2003 was \$145.6 million compared to \$151.5 million for the year ended December 31, 2002, a 4% decrease. Earnings per share for 2003 was \$1.16, an 8% decrease compared to \$1.26 for the previous year. This decrease resulted from a decline in the noninterest income recognized for interest rate swaps which were not designated for hedge accounting. The noninterest income related to these swaps declined \$20.2 million, or 81%, from \$24.8 million in 2002 to \$4.6 million in 2003.

Net interest income for 2003 rose 9% over the prior year. The net interest margin decreased 17 basis points to 3.38% for 2003 compared to 3.55% for 2002 due to market rate declines and the change in mix of earning assets. Average earning assets increased 14%, however the average yield on these assets dropped 78 basis points to 5.31% compared to 6.09% in 2002. Interest bearing liabilities increased 13% while rates decreased 67 basis points to 2.24% in 2003 from 2.91% in 2002.

Average total loans grew \$1 billion or 10% in 2003 over 2002. The mortgage warehouse lending portfolio accounted for \$365 million of the overall increase for 2003. The record low mortgage rates available in 2002 and 2003 resulted in large increases in average loans for this division as overall mortgage activity, both refinancings and purchases, reached record levels.

On average the securities portfolio increased to \$2.8 billion in 2003 from \$2.2 billion in 2002. Securities comprise 18.8% of average earning assets in 2003 compared 17.4% in 2002. The average yield dropped to 4.14% in 2003 from 5.10% in 2002. Yields declined in 2003 due in part to low mortgage rates that accelerated prepayments in the portfolio and increased the premium amortization on mortgage backed investments.

The average cost of interest bearing liabilities decreased 67 basis points due to a lower average cost of funds in 2003. This decline was primarily the result of a shift in deposit mix to non-time deposits from time deposits, increased short term borrowings, and continued repricing of deposits and other borrowings due to declines in market rates. The percentage of average non-time deposits to total average deposits has improved significantly with the ratio at 58% in 2003 and 51% in 2002.

Average non-time interest bearing deposits grew \$605,000, or 20.4% in 2003 (20.2% excluding acquisitions). The average rate on interest bearing deposits excluding time deposits dropped 40 basis points to 0.83% for 2003 compared to 1.23% for 2002. The rate on time deposits declined to an average of 2.82% in 2003 compared to 3.48% in 2002.

Average noninterest bearing deposits increased \$388 million from 2002 to 2003, a 27% increase (26% excluding acquisitions). As a result of this growth and the Company's continuing effort to increase low cost or no cost deposits, the noninterest bearing deposit mix improved to 20% of total deposits in 2003 up from 17% in 2002.

Total borrowings increased in 2003 due to earning asset growth and a decline in time deposits discussed above. The percentage of average total borrowings to average total assets was 33% for 2003 compared to 29% in 2002. The increase was primarily short term in nature in order to fund the short term increases in mortgage warehouse lending, mortgage loans held for sale and floating rate loan demand.

Average noninterest earning assets increased \$203 million to \$1.1 billion from 2002 to 2003. The increase was due largely to an increase in BOLI and noninterest earning assets obtained through acquisitions, such as goodwill and fixed assets.

The provision for loan losses for the year ended December 31, 2003 was \$37.4 million compared to \$36 million for 2002. Credit quality continued to be a priority for BancGroup in 2003. At year end 2003, nonperforming assets as a percent of net loans and ORE were 0.65% and net charge-offs as a percent of average net loans were 0.31%. Nonperforming assets were down \$15.9 million, or 17% from December 31, 2002. The Company's total allowance was \$138.5 million at December 31, 2003, which represented 1.20% of period end loans compared to 1.16% at December 31, 2002.

Noninterest income for the year ended 2003 was \$139 million, an increase of 5% over 2002. Increases in revenues from service charges on deposit accounts, financial planning services, electronic banking services, mortgage banking and net cash settlement of swap derivatives of 19%, 37%, 23%, 23% and 92%, respectively, were substantially offset by a 136% decrease in the change in fair value of swap derivatives.

Financial planning services' 2003 increase was primarily the result of additional sales of investment and annuity products as well as an increase in revenue from trust services due to the acquisition of Palm Beach National in September 2002.

The increase in electronic banking fees were primarily the result of deposit growth with focused cross-sales of electronic services to new and existing depositors. Electronic banking revenues began to decline in the third quarter of 2003 as a result of Visa's settlement with its merchant customers; however, these declines were partially offset by increased debit card penetration as well as increased usage of electronic banking products.

Mortgage origination volume and product mix are affected by changes in mortgage interest rates; therefore, mortgage banking revenues were high during the first half of 2003 and then dropped off as long term rates increased in the second half of 2003. Mortgage origination income from secondary market loans increased 23.1% to \$17.2 million in 2003 compared to \$14 million in 2002. Lower rates in 2002 and 2003 created increased demand for fixed rate products and fueled an increase in home purchases and refinancing of existing home mortgages.

The net cash settlement and change in fair value of swap derivatives not designated as hedging instruments increased \$5.5 million and decreased \$25.8 million, respectively, from 2002 due to changes in interest rates underlying the swap derivatives.

The Company recorded approximately \$4.3 million in other income from option trading in 2003, and had a 45.9% increase in BOLI income over 2002 due to additional purchases of BOLI in the amount of \$80 million in May of 2003.

Noninterest expense for 2003 increased 18% over 2002. This increase is primarily due to increases in salaries, incentive related compensation, pension and health benefit costs and expenses related to the strategic repositioning of branches within the Company's markets and various other operating expenses such as legal, insurance, advertising and ORE expenses. Total noninterest expense to average assets was 2.37% in 2003.

Due to the Company's growth, additional investments were made in key personnel for leadership roles in commercial and industrial lending, small business initiatives, treasury and operational resources. Salary increases in 2003 also included additional employees from bank acquisitions, branch openings, normal salary increases, additional production and incentive related compensation, and increased pension and health benefit costs.

Occupancy expense for the year ended December 31, 2003 increased \$4.1 million. The increase was primarily the result of acquisitions, a new technology center that opened in the fourth quarter of 2003 and the strategic repositioning of branches within our markets.

Furniture and equipment expense increased \$6.2 million in 2003 primarily due to the rollout of the new Eagle technology system in the Company's branches during the year, the installation of new software and upgrades to our network infrastructure, as well as the addition of nine new branches and completed acquisitions.

Amortization of intangible assets increased \$1.6 million during 2003 due to the increase in core deposit intangibles resulting from the acquisition of Sarasota Bank and the 2002 acquisitions of Palm Beach National and First Mercantile. Advertising expenses increased \$1.4 million during 2003 as a result of the Company's marketing efforts related to its emphasis on deposit growth. Insurance expenses increased \$1.1 million due to increased rates on policy premiums. Legal expenses increased \$1.2 million in 2003 related to normal business issues, the OCC conversion, as well as additional work related to new or proposed banking and securities laws and regulations.

Income taxes were \$74.8 million in 2003, a decrease of \$5.6 million from 2002. The effective income tax rate was 33.9 percent in 2003 and 34.5 percent in 2002. BancGroup is subject to a statutory federal tax rate of 35 percent and various state tax rates.

Our tier I capital and total capital ratios were 9.41% (restated) and 12.55% (restated), respectively, at December 31, 2003, and 7.86% (restated) and 11.03% (restated), respectively, at December 31, 2002. Our leverage ratio at December 31, 2003, was 7.55% (restated) and at December 31, 2002, 6.57% (restated).

In July 2000, BancGroup announced its definitive plans to exit the mortgage servicing business and discontinue mortgage banking as a separate business unit. As a result, the Company recorded a loss on disposal of discontinued operations of \$4.3 million after tax in 2000. As of December 31, 2000, all loan servicing transfers were completed and the mortgage servicing rights removed from the Company's balance sheet. Due to the volume of loans transferred and the costs and complexity in providing certain documentation, the Company revised its estimate of the cost to complete the disposition of this business resulting in an \$846,000 net of tax expense in 2002.

FACTORS THAT MAY AFFECT FUTURE RESULTS

Our annual report to our stockholders and our Annual Report on Form 10-K/A contain forward-looking statements within the meaning of the federal securities laws. Words such as believes, estimates, plans, expects, should, may, might, outlook, and anticipates, and similar are intended to identify forward-looking statements. The forward-looking statements in these reports are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in or implied by the statements. Factors that may cause actual results to differ materially from those contemplated by such forward-looking statements include, among other things, the following possibilities:

deposit attrition, customer loss, or revenue loss in the ordinary course of business;

increases in competitive pressure in the banking industry;

costs or difficulties related to the integration of the businesses of BancGroup and institutions it acquires are greater than expected;

inability of BancGroup to realize elements of its strategic plans for 2005 and beyond;

changes in the interest rate environment which expand or reduce margins or adversely affect critical estimates as applied and projected returns on investments;

economic conditions affecting real estate values and transactions in BancGroup's market and/or general economic conditions, either nationally or regionally, that are less favorable than expected;

management's assumptions and estimates underlying critical accounting policies prove to be inadequate or materially incorrect or are not borne out by subsequent events;

changes which may occur in the regulatory environment;

a significant rate of inflation (deflation);

acts of terrorism or war; and

changes in the securities markets.

Many of these factors are beyond our control. Readers are cautioned not to place undue reliance on any forward looking statements made by or on behalf of BancGroup. Any such statement speaks only as of the date the statement was made or as of such date that may be referenced within the statement. BancGroup undertakes no obligation to update or revise any forward-looking statements.

Industry Factors

As a financial services company, our earnings are significantly affected by general business and economic conditions.

Our business and earnings are impacted by general business and economic conditions in the United States and abroad. These conditions include short-term and long-term interest rates, inflation, money supply, fluctuations in both debt and equity capital markets, and the strength of the U.S. economy and the local economies in which we operate. For example, an economic downturn, increase in unemployment, or other events that negatively impact household and/or corporate incomes could decrease the demand for the Company's loan and non-loan products and services and increase the number of customers who fail to pay interest or principal on their loans.

Our earnings are significantly affected by the fiscal and monetary policies of the federal government and its agencies.

The Board of Governors of the Federal Reserve System regulates the supply of money and credit in the United States. Its policies determine in large part our cost of funds for lending and investing and the return we earn on those loans and investments, both of which impact our net interest margin, and can materially affect the value of financial instruments we hold, such as debt securities. Its policies also can affect our borrowers, potentially increasing the risk that they may fail to repay their loans. Changes in Federal Reserve Board policies are beyond our control and difficult to predict or anticipate.

The financial services industry is highly competitive.

We operate in a highly competitive industry which could become even more competitive as a result of legislative, regulatory and technological changes and continued consolidation. Banks, securities firms and insurance companies can now merge by creating a relatively new type of financial services company called a financial holding company, which can offer virtually any type of financial service, including banking, securities underwriting, insurance (both agency and underwriting) and merchant banking. A number of foreign banks have acquired financial services companies in the United States, further increasing competition in the U.S. market. Also, technology has lowered barriers to entry and made it possible for nonbanks to offer products and services traditionally provided by banks, such as automatic transfer and automatic payment systems. Many of our competitors have fewer regulatory constraints and some have lower cost structures.

We are heavily regulated by federal agencies.

The holding company, its subsidiary bank and certain nonbank subsidiaries are heavily regulated by federal agencies. This regulation is to protect depositors, federal deposit insurance funds and the banking system as a whole, not security holders. Congress and federal regulatory agencies continually review banking laws, regulations and policies for possible changes. Changes to statutes, regulations or regulatory policies, including changes in interpretation or implementation of statutes, regulations or policies, could affect us in substantial and unpredictable ways

including limiting the types of financial services and products we may offer and/or increasing the ability of nonbanks to offer competing financial services and products. Also, our failure to comply with laws,

regulations or policies could result in sanctions by regulatory agencies and damage to our reputation. For more information, refer to discussions of regulatory considerations contained in Item 1 Business and Note 17, Regulatory Matters and Restrictions.

Future legislation could change our competitive position.

Various legislation, including proposals to substantially change the financial institution regulatory system and to expand or contract the powers of banking institutions and bank holding companies, is from time to time introduced in the Congress. This legislation may change banking statutes and the operating environment of the Company and its subsidiaries in substantial and unpredictable ways. If enacted, such legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions, and other financial institutions. We cannot predict whether any of this potential legislation will be enacted, and if enacted, the effect that it, or any implementing regulations, would have on the financial condition or results of operations of the Company or any of its subsidiaries.

We depend on the accuracy and completeness of information about customers and counterparties.

In deciding whether to extend credit or enter into other transactions with customers and counterparties, we may rely on information furnished to us by or on behalf of customers and counterparties, including financial statements and other financial information. We also may rely on representations of customers and counterparties as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. For example, in deciding whether to extend credit, we may assume that a customer's audited financial statements conform with GAAP and present fairly, in all material respects, the financial condition, results of operations and cash flows of the customer. We also may rely on the audit report covering those financial statements. Our financial condition and results of operations could be negatively impacted to the extent we rely on financial statements that do not comply with GAAP or that are materially misleading.

Consumers may decide not to use banks to complete their financial transactions.

Technology and other changes are allowing parties to complete financial transactions that historically have involved banks. For example, consumers can now pay bills and transfer funds directly without banks. The process of eliminating banks as intermediaries, known as disintermediation, could result in the loss of fee income, as well as the loss of customer deposits and income generated from those deposits.

Company Factors

Maintaining or increasing our market share depends on market acceptance and regulatory approval of new products and services.

Our success depends, in part, on our ability to adapt our products and services to evolving industry standards. There is increasing pressure on financial services companies to provide products and services at lower prices. This can reduce our net interest margin and revenues from our fee-based products and services. In addition, the widespread adoption of new technologies, including internet-based services, could require us to make substantial expenditures to modify or adapt our existing products and services. We might not successfully introduce new products and services, achieve market acceptance of our products and services, and/or develop and maintain loyal customers.

The holding company relies on dividends from its subsidiaries for most of its revenue.

The holding company is a separate and distinct legal entity from its subsidiaries. It receives substantially all of its revenue from dividends from its subsidiaries. These dividends are the principal source of funds to pay dividends on the holding company's common stock and interest and principal on its debt. Various federal and/or state laws and regulations limit the amount of dividends that our bank and certain of our nonbank subsidiaries may pay to the holding company. Also, the holding company's right to participate in a distribution of assets upon a subsidiary's liquidation or reorganization is subject to the prior claims of the subsidiary's creditors. For more information, refer to Payment of Dividends and

Other Restrictions in Item 1 and Note 17, Regulatory Matters and Restrictions.

Our accounting policies and methods determine how we report our financial condition and results of operations, and they may require management to make estimates about matters that are inherently uncertain.

Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. Our management must exercise judgment in selecting and applying many of these accounting policies and methods so that not only do they comply with generally accepted accounting principles but also that they reflect management's judgment as to the most appropriate manner in which to record and report our financial condition and results of operations. In some cases, management must select the accounting policy or method to apply from two or more alternatives, any of which might be reasonable under the circumstances yet might result in our reporting materially different amounts than would have been reported under a different alternative. Note 2, Summary of Significant Accounting and Reporting Policies, to the Consolidated Financial Statements describes our significant accounting policies.

We have identified two accounting policies as being critical to the presentation of our financial condition and results of operations because they require management to make particularly subjective and/or complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different conditions or using different assumptions.

These critical accounting policies relate to: (1) allowance for loan losses, and (2) goodwill impairment analysis. Because of the inherent uncertainty of estimates about these matters, we cannot provide any assurance that the Company will not:

Experience results significantly different from those expected at the time of accounting for acquisitions;

Significantly increase its allowance for loan losses and/or sustain loan losses that are significantly higher than the amount reserved;

For more information, refer in this report to Critical Accounting Policies.

We have businesses other than banking.

We are a diversified financial services company. In addition to banking, we provide insurance, investments and mortgages. Although we believe our diversity helps mitigate the impact to the Company when downturns affect any one segment of our industry, it also means that our earnings could be subject to different risks and uncertainties. We discuss one example below.

Mortgage Warehouse & Retail Mortgage Banking

The impact of interest rates on our mortgage banking business can be large and complex. Changes in interest rates can impact the Company's mortgage related revenues. A decline in mortgage rates generally increases the demand for mortgage loans as borrowers refinance, but also generally leads to accelerated payoffs. Conversely, in a constant or increasing rate environment, we would expect fewer loans to be refinanced and a decline in payoffs. Although the Company uses models to assess the impact of interest rates on mortgage related revenues, the estimates of net income produced by these models are dependent on estimates and assumptions of future loan demand, prepayment speeds and other factors which may overstate or understate actual subsequent experience.

We have an active acquisition program.

We regularly explore opportunities to acquire financial institutions and other financial services providers. We cannot predict the number, size or timing of future acquisitions. We typically do not comment publicly on a possible acquisition or business combination until we have signed a

definitive agreement for the transaction.

Our ability to successfully complete an acquisition generally is subject to regulatory approval, and we cannot be certain when or if, or on what terms and conditions, any required regulatory approvals will be granted. We might be required to divest banks or branches as a condition to receiving regulatory approval.

Difficulty in integrating an acquired company may cause us not to realize expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits from the acquisition. Specifically, the integration process could result in higher than expected deposit attrition (run-off), loss of key employees, the disruption of our business or the business of the acquired company, or otherwise adversely affect our ability to maintain relationships with customers and employees or achieve the anticipated benefits of the acquisition. Also, the negative impact of any divestitures required by regulatory authorities in connection with acquisitions or business combinations may be greater than expected.

Our business could suffer if we fail to attract and retain skilled people.

Our success depends, in large part, on our ability to attract and retain key people. Competition for the best people in most activities engaged in by the Company can be intense. We may not be able to hire people or to keep them.

Our stock price can be volatile.

Our stock price can fluctuate widely in response to a variety of factors including:

actual or anticipated variations in our quarterly operating results;

recommendations by securities analysts;

new technology used, or services offered, by our competitors;

significant acquisitions or business combinations, strategic partnerships, joint ventures or capital commitments by or involving us or our competitors;

failure to integrate our acquisitions or realize anticipated benefits from our acquisitions;

operating and stock price performance of other companies that investors deem comparable to us;

news reports relating to trends, concerns and other issues in the financial services industry;

changes in government regulations; and

geopolitical conditions such as acts or threats of terrorism or military conflicts.

General market fluctuations, industry factors and general economic and political conditions and events, such as economic slowdowns or recessions, interest rate changes or credit loss trends, also could cause our stock price to decrease regardless of our operating results.

Item 7A. *Quantitative and Qualitative Disclosures about Market Risk*

This information is included in Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 8. *Financial Statements and Supplementary Data*

The financial statements and supplementary data required by Regulation S-X and by Item 302 of Regulation S-K are set forth in the pages listed below.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To The Board of Directors and Shareholders of

The Colonial BancGroup, Inc.:

We have completed an integrated audit of The Colonial BancGroup, Inc.'s 2004 consolidated financial statements and of its internal control over financial reporting as of December 31, 2004 and audits of its 2003 and 2002 consolidated financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our opinions, based on our audits, are presented below.

Consolidated financial statements

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of The Colonial BancGroup, Inc. and its subsidiaries at December 31, 2004 and 2003, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2004 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 1 to the consolidated financial statements, the Company has restated its 2004, 2003 and 2002 consolidated financial statements.

Internal control over financial reporting

Also, we have audited management's assessment, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A, that The Colonial BancGroup, Inc. did not maintain effective internal control over financial reporting as of December 31, 2004, because of the effect of a material weakness over the classification of interest rate swaps and the related valuation of the hedged brokered certificates of deposit and junior subordinated debt based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We

believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable

assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The following material weakness has been identified and included in management's assessment as of December 31, 2004. As of December 31, 2004, the Company did not maintain effective controls to ensure the appropriate classification of certain interest rate swaps and the related valuation of the hedged brokered certificates of deposit and junior subordinated debt. Specifically, the Company failed to correctly document, measure and record hedge ineffectiveness on certain interest rate swaps. This control deficiency could result in a misstatement to the interest rate swap derivative accounts, the brokered certificate of deposit accounts and the junior subordinated debt accounts that would cause a material misstatement of the annual or interim financial statements that would not be prevented or detected. This control deficiency resulted in the restatement of the Company's 2004 consolidated financial statements and the first, second and third quarter interim consolidated financial statements for 2004 and 2005. Accordingly, management has concluded that this control deficiency constitutes a material weakness.

This material weakness was considered in evaluating the nature, timing, and extent of audit tests applied in our audit of the 2004 consolidated financial statements, and our opinion regarding the effectiveness of the Company's internal control over financial reporting does not affect our opinion on those consolidated financial statements.

Management and we previously concluded that the Company maintained effective internal control over financial reporting as of December 31, 2004. In connection with the restatement of the Company's consolidated financial statements described in Note 1 to the consolidated financial statements, management has determined that the material weakness described above existed as of December 31, 2004. Accordingly,

Management's Report on Internal Control Over Financial Reporting has been restated and our present opinion on internal control over financial reporting, as presented herein, is different from that expressed in our previous report.

In our opinion, management's assessment that The Colonial BancGroup, Inc. did not maintain effective internal control over financial reporting as of December 31, 2004, is fairly stated, in all material respects, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. Also, in our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, The Colonial BancGroup, Inc. has not maintained effective internal control over financial reporting as of December 31, 2004, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO.

/s/ PRICEWATERHOUSECOOPERS LLP

Birmingham, Alabama

March 10, 2005, except for the restatement described in Note 1 to the consolidated financial statements and the matter described in the penultimate paragraph of Management's Report on Internal Control Over Financial Reporting, as to which the date is February 13, 2006

See Notes to Consolidated Financial Statements

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**Note 1. Restatement**

The Colonial BancGroup, Inc. is restating its consolidated financial statements and other financial information to correct errors related to the Company's derivative accounting under Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133).

In 2005 and prior years, the Company entered into interest rate swap agreements on brokered certificates of deposit (CD swaps) and junior subordinated debt (junior subordinated debt swaps) that were accounted for as fair value hedges under SFAS No. 133. The Company elected a method of fair value hedge accounting, commonly referred to as the abbreviated method of hedge accounting described in paragraph 65 of SFAS No. 133, which allowed the Company to assume no ineffectiveness in these transactions as long as critical terms did not change. The Company recently concluded that the CD swaps and junior subordinated debt swaps did not qualify for these methods in the periods covered by the restatement. In retrospect, the CD swaps did not comply due to the death puts contained in the brokered CDs, which allow the estate of the CD holder to require the bank to redeem the CD in the event of the CD holder's death. In addition, the junior subordinated debt swaps did not comply due to interest deferral features present in the junior subordinated debt. Hedge accounting under SFAS No. 133 is not allowed retrospectively because the hedge documentation required for the long-haul method was not in place at the inception of the hedge. Eliminating the application of fair value hedge accounting reverses the fair value adjustments that have been made to the brokered certificates of deposit and junior subordinated debt and results in all fair value changes for the interest rate swaps being recognized in noninterest income. Additionally, the net cash settlement payments received during each of the affected periods for these interest rate swaps were reclassified from interest expense on brokered certificates of deposit and junior subordinated debt to noninterest income. Adjustments were also made for other non-significant items.

The following tables reflect a summary of both the originally reported and the restated amounts:

Consolidated Statements of Condition:

	December 31, 2004		December 31, 2003

THE COLONIAL BANGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In addition, the following Notes to Consolidated Financial Statements have been restated: 2, 3, 10, 13, 15, 17, 18, 24, 25, 26, 27 and 28.

Note 2. Summary of Significant Accounting and Reporting Policies

The Colonial BancGroup, Inc. (BancGroup , Colonial or the Company) and its subsidiaries operate predominantly in the domestic commercial banking industry. The accounting and reporting policies of BancGroup and its subsidiaries conform to the accounting principles generally accepted in the United States of America and to general practice within the banking industry. The following summarizes the most significant of these policies.

Principles of Consolidation

The consolidated financial statements and notes thereto include the accounts of BancGroup, those subsidiaries that are majority owned by BancGroup and over which BancGroup exercises control and variable interest entities (defined below) for which BancGroup is the primary beneficiary. All significant intercompany balances and transactions have been eliminated.

Investments in companies in which BancGroup has significant influence over operating and financing decisions (principally defined as owning a voting or economic interest of 20% to 50%) are generally accounted for by the equity method of accounting. These investments are normally included in other assets and BancGroup's proportionate share of income or loss is included in other noninterest income or expense.

In January 2003, the FASB issued Interpretation No. 46 (FIN 46), *Consolidation of Variable Interest Entities*, and in December, 2003, issued Revised Interpretation No. 46 (FIN 46(R)), *Consolidation of Variable Interest Entities*, which replaced FIN 46. A variable interest entity (VIE) is a corporation, partnership, trust, or any other legal structure used for business purposes that has: (a) an insufficient amount of equity to permit the entity to finance its activities, without additional subordinated financial support from other parties; or (b) a group of equity holders that lack the direct or indirect ability to make decisions about an entity's activities through voting rights or similar rights; or (c) a group of equity holders who are not obligated to absorb the expected losses of the entity or the right to receive the expected residual returns of the entity. A VIE must be consolidated by an investor company if the investor company, regardless of voting interests, is subject to a majority (greater than 50%) of the risk of the expected losses from the VIE's activities or entitled to receive a majority (greater than 50%) of the VIE's expected residual returns or both. Prior to FIN 46, a partially-owned entity was only consolidated into the investor company's consolidated financial statements if it was controlled by the investor company through voting interests.

During 2003, BancGroup adopted FIN 46. The provisions of FIN 46(R) did not change the accounting treatment applicable to BancGroup under the provisions of the original Interpretation. The adoption of this Interpretation had no impact on the Company's net income or earnings per share.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Cash and Cash Equivalents

BancGroup considers cash and highly liquid investments with original maturities of three months or less when purchased as cash and cash equivalents. Cash and cash equivalents consist primarily of cash and due from banks, interest bearing deposits in banks and federal funds sold. The 2004 amounts have been reclassified to exclude securities purchased under agreements to resell from cash equivalents because of the Company's determination that the benefit of these assets is better reflected as an investing activity.

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Business Combinations

BancGroup accounts for business combinations using the purchase method. Under the purchase method, net assets of the business acquired are recorded at their estimated fair values as of the date of acquisition with any excess of the cost of the acquisition over the fair value of the net tangible and identifiable intangible assets acquired recorded as goodwill. Results of operations of the acquired business are included in the income statement from the date of acquisition. Refer to Note 3 for further information about the Company's business combinations.

Securities

Securities are classified as either held to maturity, available for sale, or trading.

Held to maturity or investment securities are securities which management has the ability and intent to hold until maturity. These securities are carried at amortized cost and adjusted for amortization of premiums and accretion of discount.

Securities available for sale represent those securities intended to be held for an indefinite period of time, including securities that management intends to use as part of its asset/liability strategy, or that may be sold in response to changes in interest rates, changes in prepayment risk, the need to increase regulatory capital or other similar factors. Securities available for sale are recorded at market value with unrealized gains and losses net of any tax effect, added to or deducted directly from shareholders' equity.

Trading securities are carried at market value with unrealized gains and losses reflected in income.

Realized and unrealized gains and losses are based on the specific identification method.

Loans Held For Sale

Loans held for sale, which include both originated mortgage loans and acquired short-term participations in pools of mortgage loans, are carried at the lower of aggregate cost or market. The cost of mortgage loans held for sale is the mortgage note amount plus certain net origination costs less discounts collected. Net gains or losses on the sale of loans held for sale are included in other income.

Loans

Loans are stated at the principal amount outstanding, net of unearned income. Unearned income includes deferred fees net of deferred direct incremental loan origination costs. We amortize unearned income to interest income, generally over the contractual life of the loan. Interest income on loans is recognized under the interest method except for certain installment loans where interest income is recognized under the Rule of 78's (sum-of-the-months digits) method, which does not produce results significantly different from the interest method.

Allowance for Loan Losses

A loan is considered impaired, based on current information and events, if it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Uncollateralized loans are measured for impairment based on the present value of expected future cash flows discounted at the historical effective interest rate, while all collateral-dependent loans are measured for impairment based on the fair value of the collateral. Smaller balance homogeneous loans that consist of residential mortgages and consumer loans are evaluated collectively and reserves are established based on historical loss experience.

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Management's ongoing evaluation of the adequacy of the allowance also considers unimpaired loans and takes into consideration the Bank's past loan loss experience for pools of homogeneous loans, known and inherent risks in the portfolio, adverse situations that may affect the borrowers' ability to repay, and an analysis of current economic conditions. While management believes that it has established the allowance in accordance with generally accepted accounting principles and has taken into account the views of its regulators and the current economic environment, there can be no assurance that in the future the Bank's regulators or its economic environment will not require further increases in, or re-allocation of, the allowance.

The allowance for loan losses is established through charges to earnings in the form of a provision for loan losses. Increases and decreases in the allowance due to changes in the measurement of the impaired loans are included in the provision for loan losses. When a loan or portion of a loan is determined to be uncollectible, the portion deemed uncollectible is charged against the allowance and subsequent recoveries, if any, are credited to the allowance.

Income Recognition on Impaired and Nonaccrual Loans

Loans, including impaired loans, are generally classified as nonaccrual if they are past due as to maturity or payment of principal or interest for a period of more than 90 days, unless such loans are well collateralized and in the process of collection. In addition, if a loan or a portion of a loan is classified as doubtful or is partially charged off, the loan is generally classified as nonaccrual. At management's discretion, loans that are on a current payment status or past due less than 90 days may also be classified as nonaccrual if repayment in full of principal and/or interest is in doubt. While a loan is classified as nonaccrual and the future collectibility of the recorded loan balance is doubtful, collections of interest and principal are generally applied as a reduction to principal outstanding. Loans will continue to be classified as impaired unless they are brought fully current and the collection of scheduled interest and principal is considered probable.

Premises and Equipment

Bank premises and equipment are stated at cost, less accumulated depreciation and amortization. Depreciation is computed generally using the straight-line method over the estimated useful lives of the related assets. Leasehold improvements are amortized over the terms of the respective leases or the estimated useful lives of the improvements, whichever is shorter. Estimated useful lives range from five to forty years for bank buildings and leasehold improvements and three to ten years for furniture and equipment.

Expenditures for maintenance and repairs are charged against earnings as incurred. Costs of major additions and improvements are capitalized. Upon disposition or retirement of property, the asset account is relieved of the cost of the item and the allowance for depreciation is charged with accumulated depreciation. Any resulting gain or loss is reflected in current income.

Other Real Estate Owned

Other real estate owned includes real estate acquired through foreclosure or deed taken in lieu of foreclosure. These amounts are recorded at the lower of outstanding balance or market value less estimated costs to sell the property. Any write-down from the cost to market value required at the time of foreclosure is charged to the allowance for loan losses. Subsequent write-downs and gains or losses recognized on the sale of these properties are included in noninterest income.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the cost of an acquisition over the fair value of the net assets acquired. Other intangible assets represent purchased assets that also lack physical substance but can be distinguished from

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

goodwill because of contractual or other legal rights or because the asset is capable of being sold or exchanged either on its own or in combination with a related contract, asset, or liability. Goodwill and other intangible assets with indefinite useful lives are not amortized, but instead are tested for impairment at least annually. Intangible assets with finite useful lives are amortized over their respective estimated useful lives to their estimated residual values, and are reviewed for impairment if events or circumstances indicate that there may be impairment. All of BancGroup's other intangible assets have finite lives ranging from six to eight years. Refer to Note 12 for further information about the Company's goodwill and other intangible assets.

Long Lived Assets

BancGroup reviews long-lived assets and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If the future undiscounted cash flows expected to result from the use of the asset and its eventual disposition are less than the carrying amount of the asset, an impairment loss is recognized. Long-lived assets and certain identifiable intangibles to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

Income Taxes

BancGroup uses the asset and liability method of accounting for income taxes (See Note 24). Under the asset and liability method, deferred tax assets and liabilities are recorded at currently enacted tax rates applicable to the period in which assets or liabilities are expected to be realized or settled. Deferred tax assets and liabilities are adjusted to reflect changes in statutory tax rates resulting in income adjustments in the period such changes are enacted.

Stock-Based Compensation

SFAS 123, *Accounting for Stock-Based Compensation*, defines a fair value based method of accounting for an employee stock option or similar equity instrument. However, SFAS 123 allows an entity to continue to measure compensation costs for those plans using the intrinsic value based method of accounting prescribed by APB Opinion 25, *Accounting for Stock Issued to Employees*. Entities electing to remain with the accounting in Opinion 25 must make pro forma disclosures of net income and earnings per share as if the fair value based method of accounting defined in SFAS 123 had been applied. Under the fair value based method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. Under the intrinsic value based method, compensation cost is the excess, if any, of the quoted market price of the stock at the grant date or other measurement date over the amount an employee must pay to acquire the stock. BancGroup has elected to continue to measure compensation cost for its stock option plans under the provisions in Opinion 25 and has calculated the fair value of outstanding options for purposes of pro forma disclosure utilizing the Black-Scholes method.

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options.

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

The majority of the Company's options granted in 2004, 2003 and 2002 vest ratably over a period of five years; therefore for purposes of pro forma disclosures, the compensation expense related to these options has been allocated over the vesting period.

THE COLONIAL BANGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company's actual and pro forma information follows (in thousands, except per share data):

	Years Ended December 31,		
	2004	2003	2002
	(Restated)	(Restated)	(Restated)
Net income:			
As reported	\$ 172,877	\$ 145,611	\$ 151,488
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of tax	(1,374)	(1,585)	(2,043)
Pro forma net income	\$ 171,503	\$ 144,026	\$ 149,445
Basic earnings per share:			
As reported	\$ 1.32	\$ 1.17	\$ 1.27
Pro forma	\$ 1.31	\$ 1.16	\$ 1.25
Diluted earnings per share:			
As reported	\$ 1.31	\$ 1.16	\$ 1.26
Pro forma	\$ 1.30	\$ 1.15	\$ 1.24

The fair value of each option grant is estimated on the date of the grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants in 2004, 2003 and 2002, respectively: dividend yield of 2.95%, 3.76% and 4.51%; expected volatility of 26.8%, 31.0% and 32.2%; risk-free interest rates of 3.62%, 3.18% and 3.23%; and expected lives of five years. The weighted average per share fair values of options granted during 2004, 2003 and 2002 were \$4.36, \$3.50, and \$2.59, respectively.

Derivative Instruments and Hedging Activities

The goal of the Company's interest rate risk management process is to minimize the volatility in the net interest margin caused by changes in interest rates. Derivative instruments are used to hedge specific assets or liabilities as a part of this overall process. The Company is also required to recognize certain contracts and commitments as derivatives when the characteristics of those contracts and commitments meet the definition of a derivative. Under the guidelines of SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, all derivative instruments are required to be carried at fair value on the balance sheet.

Derivative instruments designated in a hedge relationship to mitigate exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges under SFAS 133. Changes in the fair value of these derivative instruments are recorded in noninterest income and are offset by the changes in the fair value of the hedged asset or liability. The change in fair value of the hedged asset or liability is included in the basis of the hedged item, while the corresponding change in the fair value of the derivative instrument is recorded as an adjustment to other assets or other liabilities.

Derivative instruments designated in a hedge relationship to mitigate exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. These derivatives are recorded on the statement of condition as either a freestanding asset or liability. The effective portion of the change in the fair value of the derivative instrument is recorded as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. The remaining gain or loss on the derivative instrument in excess of the cumulative change in the present value of future cash flows of the hedged item, if any, is recognized in other noninterest income during the period of change.

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking each hedge transaction. The Company discontinues hedge accounting prospectively when either it is determined that the derivative is no longer highly effective in offsetting changes in the fair value or cash flows of a hedged item; the derivative expires or is sold, terminated or exercised; the derivative is de-designated because it is unlikely that a forecasted transaction will occur; or management determines that designation of the derivative as a hedging instrument is no longer appropriate.

When hedge accounting is discontinued, the derivative continues to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in other noninterest income. When a fair value hedge is discontinued, the hedged asset or liability is no longer adjusted for changes in fair value and the existing basis adjustment is amortized or accreted as an adjustment of yield over the remaining life of the asset or liability. When a cash flow hedge is discontinued but the hedged cash flows or forecasted transaction are still expected to occur, unrealized gains and losses that were accumulated in other comprehensive income are recognized in earnings in the same period when the earnings are affected by the hedged cash flow. When a cash flow hedge is discontinued because a forecasted transaction is not expected to occur, unrealized gains and losses in other comprehensive income are recognized in earnings immediately.

For derivatives not designated as hedging instruments, all changes in fair value are recognized in noninterest income during the period of change. The net cash settlement on these derivatives is included in noninterest income.

Derivative instruments that are used as part of the Company's interest rate risk management strategy consist primarily of interest rate swaps. Interest rate swaps generally involve the exchange of fixed- and variable-rate interest payments between two parties, based on a notional principal amount, interest rate index and maturity date.

In connection with its mortgage banking activities, the Company enters into commitments to fund residential mortgage loans at specified times in the future. A mortgage loan commitment binds the Company to lend funds to a potential borrower at a specified interest rate and within a specified period of time, generally up to 60 days after inception of the commitment. Such a commitment is referred to as a derivative loan commitment if the loan that will result from exercise of the commitment will be held for sale upon funding. As such, loan commitments that are derivatives must be recognized at fair value on the consolidated balance sheet with changes in their fair value recorded as part of income from mortgage banking operations.

Outstanding derivative loan commitments expose the Company to the risk that the price of the loans arising from exercise of the loan commitment might decline from inception of the loan commitment to funding of the loan due to increases in mortgage rates. To protect against this price risk, the Company utilizes forward sales commitments to economically mitigate the risk of potential decreases in the value of the loans that would result from the exercise of the loan commitments. The Company expects that these forward sales commitments will experience changes in fair value opposite to the change in fair value of the derivative loan commitments. The fair values of the commitments are calculated based on changes in market interest rates after the commitment date.

The Company is exposed to credit and market risk by using derivative instruments. If the counterparty fails to perform, credit risk is equal to the extent of the fair value gain in a derivative. When the fair value of a derivative contract is positive, this generally indicates that the counterparty owes the Company, and, therefore, creates a repayment risk for the Company unless it is collateralized. When the fair value of a derivative

contract is negative, the Company owes the counterparty and, therefore, it has no repayment risk. The Company minimizes the credit (or repayment) risk in derivative instruments by entering into transactions with high quality counterparties that are approved by ALCO and requiring collateral when market value exceeds agreed upon levels.

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Market risk is the adverse effect that a change in interest rates, or implied volatility rates, has on the value of a financial instrument. The Company manages the market risk by using derivatives chiefly for hedging purposes and then monitoring the effectiveness of the hedges.

The Company's derivatives activities are monitored by Asset and Liability Committee (ALCO) as part of that committee's oversight of BancGroup's asset/liability and treasury functions. ALCO is responsible for reviewing the hedging strategies that are developed by Treasury, through its analysis of data from financial simulation models and other internal and industry sources. The resulting hedging strategies are then incorporated into BancGroup's overall interest rate risk management and strategies.

Advertising Costs

Advertising costs are expensed as incurred.

Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase

Securities purchased under agreements to resell and securities sold under agreements to repurchase are generally treated as collateralized financing transactions and are recorded at the amount at which the securities were acquired or sold.

Noninterest Income

Noninterest income is accrued and recognized in earnings as services are provided and the amount of income earned is reasonably determinable.

Reclassifications

Certain reclassifications have been made to the 2003 financial statements to conform to the 2004 presentations.

Note 3. Business Combinations

BancGroup completed the acquisition of P.C.B. Bancorp, Inc. (PCB) along with its wholly owned subsidiary banks on May 18, 2004. The results of operations for the acquisition are included in the consolidated financial statements since that date. PCB operated 16 full service branches in several counties in Florida. This acquisition was part of the Company's ongoing effort to expand its presence in high growth markets.

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

Total consideration for the transaction was \$143.2 million, consisting of 6,030,434 shares of BancGroup common stock valued at \$104.1 million, \$35.6 million in cash, and stock options valued at \$3.5 million. This consideration along with other direct acquisition costs and liabilities incurred led to a total acquisition cost of approximately \$147.4 million. The value of the common stock issued was determined based on the average market price of BancGroup's shares over the five day period before and after the terms of the acquisition were agreed to and announced. The fair value of the stock options was determined using the Black-Scholes option pricing model.

The transaction resulted in approximately \$99.0 million of goodwill and \$19.3 million of core deposit intangibles, neither of which are deductible for tax purposes. The goodwill and core deposit intangibles were allocated to the Florida regional bank segment. The core deposit intangibles are being amortized over the estimated useful life of six years.

THE COLONIAL BANCGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition (in thousands):

Assets:	
Cash	\$ 68,944
Securities available for sale	76,877
Loans, net of allowance for loan loss	486,117
Premises and equipment	11,598
Core deposit intangibles	19,255
Goodwill	98,954
Bank owned life insurance	22,582
Accrued interest and other assets	8,314
	<hr/>
Total Assets	\$ 792,641
Liabilities:	
Deposits	\$ 546,933
FHLB borrowings	40,795
Junior subordinated debt	15,420
Repurchase agreements and other borrowings	37,760
Accrued interest and other liabilities	4,332
	<hr/>
Total Liabilities	645,240
	<hr/>
Net Assets	\$ 147,401
	<hr/>

The following table presents unaudited pro forma results of operations for the years ended December 31, 2004 and 2003, as if the acquisition had occurred at January 1, 2003. Since no consideration is given to operational efficiencies and expanded products and services, the pro forma summary information does not necessarily reflect the results of operations as they actually would have been, if the acquisition had occurred at January 1, 2003:

	2004	2003
	(Restated)	(Restated)
	<hr/>	<hr/>
	(unaudited)	
	(In thousands, except per share amounts)

Basic EPS	1.30	1.16
Diluted EPS	1.29	1.15

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

BancGroup completed the acquisition of Sarasota Bancorporation, Inc. (Sarasota) along with its wholly owned subsidiary bank on October 23, 2003. The results of operations for the acquisition are included in the consolidated financial statements since that date. Sarasota operated one branch office in Sarasota, Florida. This acquisition was the result of BancGroup's ongoing effort to expand its presence in high growth markets. The cost of the acquired company was approximately \$37.5 million. This cost included the issuance of 2,399,852 shares of BancGroup common stock. The market value of the stock at acquisition was \$15.24 per share, representing a total market value of approximately \$36.6 million.

THE COLONIAL BANCGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The securities above consist of government agency debentures, agency collateralized mortgage obligations (CMO s) and mortgage-backed securities, AAA-rated private CMO s, and preferred securities. As of December 31, 2004, there were 103 securities carried at an unrealized loss relating to the level of interest rates prevailing in the market. Because of the creditworthiness of the issuers and because the future direction of interest rates is unknown, the impairments are deemed to be temporary. The severity and duration of such impairments are determined by the level of interest rates set by the market. Additionally, BancGroup has the ability to retain these securities until maturity when full repayment would be received. There are also no known current funding needs which would require their liquidation.

Note 5. Loans

A summary of the major categories of loans outstanding is shown in the table below. Outstanding loan balances at December 31, 2004 and 2003 are net of unearned income, including net deferred loan fees of \$17.5 million and \$12.0 million, respectively.

	2004	2003
	(In thousands)	
Commercial, financial and agricultural	\$ 1,007,686	\$ 1,037,782
Real estate-commercial	4,265,700	4,144,143

Real estate-residential	2,223,889	1,982,239
Installment and consumer	187,315	216,481
Mortgage warehouse	1,114,923	982,488
Other	132,326	87,091
Total loans, net of unearned income	\$ 12,857,811	\$ 11,588,895

BancGroup s lending is concentrated in Alabama, Florida, Georgia, Nevada and Texas and repayment of these loans is in part dependent upon the economic conditions in the respective regions of these states. Management does not believe the loan portfolio contains concentrations of credits, either geographically or by borrower, which would increase BancGroup s risk exposure. Management continually evaluates the potential risk in all segments of the portfolio in determining the adequacy of the allowance for loan losses. Other than concentrations of credit risk in commercial, residential and construction real estate loans, management is not aware of any significant concentrations.

Loans classified as commercial real estate loans are loans which are collateralized by real estate held for investment and business purposes. These loans are substantially dependent upon cash flows from income producing improvements attached to the real estate or, in the case of owner-occupied commercial real estate, the cash flows produced by the enterprises occupying the real estate. For BancGroup, commercial real estate property types primarily consist of retail properties, office buildings, apartments, warehouses, churches, schools, lodging, recreational, and health service facilities. The real estate held as collateral on these loans is not raw land or property under construction or development as those property types fall into the real estate construction portfolio.

Commercial Real Estate loans are underwritten based on projected cash flows and loan-to-appraised-value ratios of 85% or less. The risks associated with commercial real estate loans primarily relate to real estate values in local market areas, the equity investments of borrowers, and the borrowers' experience and expertise. BancGroup has diversified its portfolio of commercial real estate loans, resulting in less than 25% of its total commercial real estate loan portfolio and less than 8.5% of its total loan portfolio concentrated in any of the above-mentioned income producing activities.

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Residential Real Estate loans consist of loans made to finance one-to-four family residences and home equity loans on residences. BancGroup's policy is to loan up to 90% of appraised value on these loans without other collateral or security. These loans are largely made up of adjustable rate loans. The principal risks associated with one-to-four family residential loans are the borrowers' income and real estate values.

Real Estate Construction loans include loans to finance single family and multi-family residential as well as nonresidential real estate. The principal risks associated with these loans are related to the borrowers' ability to complete the project, local market demand, the sales market, presales or preleasing, and permanent loan commitments. BancGroup evaluates presale requirements, preleasing rates, permanent loan take-out commitments, as well as other factors in underwriting construction loans.

Colonial's mortgage warehouse lending department provides lines of credit collateralized by residential mortgage loans to mortgage companies. Warehouse loans outstanding at December 31, 2004 and 2003 were \$1.1 billion and \$982.5 million, respectively.

BancGroup evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by BancGroup upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, residential houses, land, owner-occupied commercial real estate and income-producing commercial properties. No additional credit risk exposure, relating to outstanding loan balances, is believed to exist beyond the amounts shown in the consolidated statement of condition at December 31, 2004.

In the normal course of business, loans are made to officers, directors, principal shareholders and to companies in which they own a significant interest. Loan activity to such parties with an aggregate loan balance of more than \$60,000 during the year ended December 31, 2004 is summarized as follows:

Balance 1/1/04	Additions	Reductions	Balance 12/31/04
	(In thousands)		
\$29,752	\$35,926	\$22,160	\$43,518

At December 31, 2004 and 2003, the recorded investment in impaired loans was approximately \$24,801,000 and \$59,897,000, respectively. The impaired loans were measured for impairment based primarily on the value of underlying collateral. The related allowance allocated to impaired loans for 2004 and 2003 was \$7,965,000 and \$15,588,000, respectively. At December 31, 2004, impaired loans with an associated allowance totaled \$11,755,000, while \$13,046,000 of impaired loans had no related allowance. At December 31, 2003, impaired loans with an associated allowance totaled \$36,318,000, while \$23,579,000 of impaired loans had no related allowance. The average recorded investment in impaired loans was approximately \$43,781,000, \$64,501,000 and \$47,881,000 for the years ended December 31, 2004, 2003 and 2002, respectively. The amount of interest recognized on impaired loans during the portion of the year that they were impaired was not significant for 2004, 2003 or 2002.

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

BancGroup uses several factors in determining if a loan is impaired. Generally, nonaccrual loans as well as loans classified as substandard with balances in excess of a specified amount are reviewed for impairment. The internal asset classification procedures include a thorough review of significant loans and lending relationships, and include the accumulation of related data. This data includes loan payment status, borrower's financial data, collateral value and borrower's operating factors such as cash flows and operating income or loss.

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

At December 31, 2004 and 2003, the recorded investment in nonaccrual loans was approximately \$26,983,000 and \$57,342,000, respectively. At December 31, 2004 and 2003, the recorded investment in loans past due 90 days or more and still accruing was approximately \$8,096,000 and \$10,802,000, respectively.

During 2001, as a part of its normal asset/liability management BancGroup securitized \$307 million of its single-family real estate loans with the Federal Home Loan Mortgage Corporation (FHLMC), a government sponsored agency. The Company received 100% of the securities backed by the mortgage loans, which are guaranteed by FHLMC and did not recognize any gain or loss on the securitization. At December 31, 2004 \$9.5 million of these mortgage-backed securities remain in the available for sale securities portfolio and are therefore carried at fair value based on quoted market prices. As it relates to interest rate sensitivity, the fair value of these retained mortgage-backed securities would be expected to react consistently with the other mortgage-backed securities held in BancGroup's securities portfolio. The Company continues to retain servicing rights for the related mortgage loans. The related servicing asset was not material.

Loans with a carrying value of approximately \$7,169,375,000 and \$7,219,504,000 at December 31, 2004 and 2003, respectively, were pledged as collateral for credit facilities.

The following table represents information concerning residential real estate loans, including securitizations, as of December 31, 2004 and 2003:

	2004			2003		
	Total Principal Amount	Total 90 Days or More Past due	Net Credit Losses	Total Principal Amount	Total 90 Days or More Past due	Net Credit Losses
	(In thousands)

	<u> </u>	<u> </u>	<u> </u>
Balance, December 31	\$ 148,802	\$ 138,549	\$ 135,265
	<u> </u>	<u> </u>	<u> </u>

THE COLONIAL BANCGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**Note 7. Discontinued Operations**

In July 2000, BancGroup announced its definitive plans to exit the mortgage servicing business. BancGroup recorded a loss on disposal of the discontinued operation of \$4.3 million after tax. The results of the mortgage servicing business have been classified as discontinued operations in the accompanying financial statements. Loss from discontinued operations, net of income taxes, for the year ended December 31, 2002 was \$846,000. This amount consists primarily of revisions to the estimate of the cost to complete the disposition of the business, which involve costs associated with the delivery of documents and the related indemnifications.

Note 8. Financial Instruments with Off-Balance Sheet Risk

BancGroup is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of its customers. The credit risk associated with these instruments is essentially the same as that involved in extending loans to customers and is subject to BancGroup's credit policies. Credit risk associated with these instruments is represented by the contractual amounts indicated in the table below.

	Contract Amount	
	2004	2003
	(In thousands)	
Financial instruments whose contract amounts represent credit risk:		
Loan commitments	\$ 4,451,473	\$ 3,960,455
Standby letters of credit	211,882	182,099
Commercial letters of credit	2,089	737
Credit card guarantees	5,856	6,755

Commitments to extend credit are agreements to lend to customers as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Colonial does not expect future cash requirements to be significant on these commitments. BancGroup has no significant concentrations of credit risk with any individual counterparty to originate loans.

Standby letters of credit are contingent commitments issued by Colonial Bank generally to guarantee the performance of a customer to a third party. A financial standby letter of credit is a commitment by Colonial Bank to guarantee a customer's repayment of an outstanding loan or debt instrument. In a performance standby letter of credit, Colonial Bank guarantees a customer's performance under a contractual nonfinancial obligation for which it receives a fee. These guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing and similar transactions. The Company holds various assets as collateral supporting those commitments for which collateral is deemed necessary. Beginning January 1, 2003, FIN 45 required the fair value of these commitments to be recorded on the balance sheet. The fair value of the commitment typically approximates the fee received from the customer for issuing such commitments. These

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

fees are deferred and are recognized over the commitment period. The amount recorded for deferred fees as of December 31, 2004 and 2003 was not material to the Company's consolidated balance sheet. At December 31, 2004, Colonial Bank had standby letters of credit outstanding with maturities ranging from less than one year to greater than 15 years. At December 31, 2004, the maximum potential amount of future undiscounted payments the Company could be required to make under outstanding standby letters of credit was \$212 million.

Commercial letters of credit are issued to facilitate trade transactions. Under the terms of a commercial letter of credit, as a general rule, drafts will be drawn when the underlying transaction is consummated as intended. Since the conditions requiring the Company to fund letters of credit may not occur, the Company expects its liquidity requirements to be less than the total outstanding commitments.

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Credit card guarantees are issued by Colonial Bank to guarantee customers' repayment of outstanding credit card loans. The guarantees remain in effect for the life of the related credit card accounts. The Company holds interest bearing deposits as collateral supporting those guarantees for which collateral is deemed necessary. Since the conditions requiring the Company to honor these guarantees may not occur, the Company expects its liquidity requirements to be less than the total outstanding commitments.

The Company enters into indemnification agreements in the ordinary course of business under which it agrees to indemnify third parties against any damages, losses and expenses incurred in connection with legal and other proceedings arising from relationships or transactions with the Company. These relationships or transactions include those arising from service as a director or officer of the Company or its subsidiaries, underwriting agreements relating to the Company's securities, acquisition agreements, and various other business transactions or arrangements. Because the extent of the Company's obligations under these agreements depends entirely upon the occurrence of future events, the Company's potential future liability under these agreements is not determinable.

Note 9. Variable Interest Entities

BancGroup adopted FIN 46, *Consolidation of Variable Interest Entities*, on July 1, 2003. A revision of FIN 46 was issued by the FASB in December 2003; however, the provisions of the revised Interpretation did not change the accounting treatment applicable to BancGroup under the provisions of the original Interpretation. The adoption of this Interpretation had no impact on the Company's net income or earnings per share.

As a result of adopting FIN 46, BancGroup deconsolidated its special purpose trusts which were formed for the issuance of trust preferred securities to outside investors because the Company does not absorb a majority of the expected losses or residual returns of the trusts. The trusts were previously consolidated because they are controlled by the Company through a majority voting interest. The effect of such deconsolidation was 1) to remove the trust preferred securities from the consolidated statement of condition; 2) to recognize the Company's junior subordinated debt obligations to the special purpose trusts; and 3) to recognize the Company's equity investments in the common stock of the special purpose trusts. The junior subordinated debt obligations and equity investments were previously eliminated in consolidation. Those equity investments, totaling \$9.1 million, represent the Company's maximum exposure to loss as a result of its involvement with the special purpose trusts. Total assets of the special purpose trusts were \$309 million as of December 31, 2004.

BancGroup holds variable interests in five joint ventures which invest in real estate developments located in the Atlanta metropolitan area of Georgia. Three of the entities are required to be consolidated, while the other two are not under the guidance of FIN 46. For the consolidated entities, total assets are \$10.6 million as of December 31, 2004, and the Company's maximum exposure to loss is \$9.6 million. For the unconsolidated entities, total assets are \$10.1 million as of December 31, 2004, and the Company's maximum exposure to loss is \$3.2 million.

BancGroup also holds variable interests in several entities formed to provide affordable housing. The entities had total assets of approximately \$215.9 million as of December 31, 2004, and the Company's maximum exposure to loss is approximately \$10.4 million. The Company is not required to consolidate these entities.

Note 10. Derivatives

BancGroup maintains positions in derivative financial instruments to manage interest rate risk and facilitate asset/liability management strategies. The fair value of derivatives are recorded in other assets or other liabilities.

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**Interest Rate Swaps**

At December 31, 2004, BancGroup had interest rate swap positions on subordinated debt, junior subordinated debt, brokered CDs, long-term FHLB advances and commercial loans. The fair value and related notional amounts (in thousands) of all interest rate swaps by category as of December 31, 2004 and December 31, 2003 are shown below:

	December 31, 2004		December 31, 2003	
	(Restated)		(Restated)	
	Notional		Notional	
	Amount	Fair Value	Amount	Fair Value
Fair Value Hedges				
Interest rate swaps hedging long-term FHLB advances	\$ 575,000	\$ 11,949	\$	\$
Interest rate swaps hedging subordinated debt	250,000	15,873	250,000	20,704
Interest rate swaps hedging loans	6,417	(25)	2,333	(150)
	<u>\$ 831,417</u>	<u>\$ 27,797</u>	<u>\$ 252,333</u>	<u>\$ 20,554</u>
Nonhedging Derivatives				
Interest rate swaps on junior subordinated debt	\$ 270,000	\$ 10,009	\$ 270,000	\$ 11,354
Interest rate swaps on brokered CDs	150,000	(814)	60,000	(88)
	<u>\$ 420,000</u>	<u>\$ 9,195</u>	<u>\$ 330,000</u>	<u>\$ 11,266</u>

Fair Value Hedges

The Company enters into fair value hedges to effectively convert the interest rates of certain instruments from fixed to floating. The critical terms of the interest rate swaps match the terms of the corresponding hedged items. There were no hedging gains and losses resulting from hedge ineffectiveness recognized for the years ended December 31, 2004, 2003, and 2002.

Nonhedging Derivatives

For derivatives not designated as hedging instruments, all changes in fair value are recognized in noninterest income during the period of change. The net cash settlement of these derivatives is included in noninterest income.

Commitments to Originate and Sell Mortgage Loans

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

BancGroup, as part of its retail mortgage loan production activities, routinely enters into short-term commitments to originate loans. Most of the loans will be sold to third parties upon closing. For those loans, the Company enters into individual forward sales commitments at the same time the commitment to originate is finalized. While the forward sales commitments function as an economic offset and effectively eliminate the Company's financial risk of rate changes during the rate lock period, both the commitment to originate mortgage loans that will be sold and the commitment to sell the mortgage loans are derivatives under the guidance of SFAS 133 (as amended), the fair values of which are essentially equal and offsetting. The fair values are calculated based on changes in market interest rates after the commitment date. The notional amounts of these mortgage loan origination commitments and the related forward sales commitments were \$19.9 million at December 31, 2004. The unrealized gains/losses of the origination and sales commitments were not material at December 31, 2004.

BancGroup has also executed individual forward sales commitments related to retail mortgage loans and short-term participations in mortgage loans, which are all classified as Loans Held for Sale. The forward sales commitments related to the short-term participations allow the Company to sell the loan participations to investor institutions for an amount equal to the Company's original acquisition cost. Forward sales commitments function as an economic offset and mitigate the Company's market risk on the retail mortgage loans and the short-term

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

participations in loans. The notional values of the forward sales commitments on retail mortgage loans and short-term participations at December 31, 2004 were \$21.8 million and \$656.7 million, respectively. Because the sales commitments are in place so briefly, the unrealized gains/losses have been determined to be immaterial.

Options

BancGroup occasionally enters into over-the-counter option contracts on bonds in its securities portfolio. SFAS 133 requires that the fair value of these option contracts be recorded in the financial statements. However, there were no option contracts outstanding as of either December 31, 2004 or 2003.

Note 11. Premises and Equipment

Premises and equipment are summarized as follows:

	2004	2003
	<u> </u>	<u> </u>
	(In thousands)	
Land	\$ 70,683	\$ 61,455
Bank premises	166,966	145,013
Equipment	129,752	116,463
Leasehold improvements	40,359	34,792
Construction in progress	11,652	25,413
Automobiles and airplane	24,870	24,827
	<u> </u>	<u> </u>
Total	444,282	407,963
	<u> </u>	<u> </u>
Less accumulated depreciation and amortization	(174,046)	(161,793)
	<u> </u>	<u> </u>
Premises and equipment, net	\$ 270,236	\$ 246,170
	<u> </u>	<u> </u>

Depreciation expense for premises and equipment amounted to \$26,913,000 in 2004, \$25,234,000 in 2003 and \$24,767,000 in 2002.

Note 12. Goodwill and Other Intangible Assets

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

A summary of goodwill by reportable segment follows (in thousands):

	December 31, 2002				December 31, 2003				December 31, 2004			
	Goodwill	Purchase accounting		Impairment	Goodwill	Purchase accounting		Impairment	Goodwill	Purchase accounting		Impairment

Total	\$ 225,677	\$ 26,041	\$ 1,758	\$	\$ 253,476	\$ 98,954	\$ 106	\$	\$ 352,536	\$	\$	\$

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Goodwill acquired during 2004 is related to the PCB acquisition and is further discussed in Note 3. Purchase accounting adjustments recorded during 2004 are related to refinement of original estimates recorded for the acquisition of Sarasota Bank in October of 2003.

BancGroup has finite-lived intangible assets capitalized on its balance sheet in the form of core deposits and other intangibles. Amortizable intangible assets at December 31, 2004 and 2003 are as follows:

	December 31,	
	2004	2003
	(in thousands)	
Core deposits		
Gross carrying amount	\$ 54,606	\$ 35,351
Less: accumulated amortization	(13,344)	(7,053)
Net carrying amount	41,262	28,298
Other intangibles		
Gross carrying amount	587	587
Less: accumulated amortization	(245)	(171)
Net carrying amount	342	416
Total finite-lived intangibles		
Gross carrying amount	55,193	35,938
Less: accumulated amortization	(13,589)	(7,224)
Net carrying amount	\$ 41,604	\$ 28,714

Amortization expense on finite-lived intangible assets totaled \$6,364,000, \$4,385,000, and \$2,813,000 for 2004, 2003, and 2002, respectively. Aggregate annual amortization expense of currently recorded core deposits and other intangibles is expected to be approximately \$7.7 million for years 2005 through 2008 and approximately \$7.6 million for 2009.

Note 13. Time Deposits

Certificates of deposit of less than \$100,000 totaled \$2.2 billion at December 31, 2004, while certificates of deposit of \$100,000 or more totaled \$1.8 billion. Other time deposits, which consist primarily of IRAs, totaled \$0.4 billion. At December 31, 2004, the scheduled maturities of time deposits (restated) were as follows:

	(In thousands)
2005	\$ 2,709,761
2006	692,658
2007	368,341
2008	179,072
2009	246,210
Thereafter	121,615
Total	\$ 4,317,657

THE COLONIAL BANGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 14. Short-Term Borrowings

Short-term borrowings are summarized as follows:

	2004	2003	2002
	<u> </u>	<u> </u>	<u> </u>
	(In thousands)		
FHLB borrowings	\$ 1,250,000	\$ 650,000	\$ 555,000
Federal funds purchased	1,217,808	1,150,505	1,278,378
Repurchase agreements (retail)	360,127	400,694	493,725
Repurchase agreements (wholesale)	431,000	451,000	788,886
Commercial paper			15,065
	<u> </u>	<u> </u>	<u> </u>
Total	<u>\$ 3,258,935</u>	<u>\$ 2,652,199</u>	<u>\$ 3,131,054</u>

BancGroup is a member of the Federal Home Loan Bank of Atlanta (FHLB). At December 31, 2004 and 2003, the Company had borrowings of \$2.6 billion and \$2.2 billion outstanding, of which \$1.4 billion and \$1.6 billion, respectively, are included in long-term debt. The remaining \$1.3 billion and \$650 million were included in short-term borrowings at each year-end. FHLB credit availability at December 31, 2004 was \$1.4 billion based on current collateral, which consists of 1-4 family residential, commercial real estate, home equity lines of credit, and second mortgage loans, along with specified mortgage-backed securities.

Note 15. Long-Term Borrowings

Long-term borrowings are summarized as follows:

	2004	2003
	(Restated)	(Restated)
	<u> </u>	<u> </u>
	(In thousands)	
Variable rate subordinated debentures	\$ 7,725	\$ 7,725
Subordinated notes	265,873	270,703
Junior subordinated debt	302,412	286,598
FHLB borrowings	1,382,913	1,577,209
Repurchase agreements (wholesale)	300,000	300,000
Other	2,034	
	<u> </u>	<u> </u>

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

Total	\$ 2,260,957	\$ 2,442,235
-------	---------------------	---------------------

In connection with the ASB Bancshares, Inc. acquisition on February 5, 1998, BancGroup issued \$7,725,000 of variable rate subordinated debentures due February 5, 2008 (1998 Debentures). These variable rate subordinated debentures bear interest equal to the New York Prime Rate minus 1% (but in no event less than 7% per annum).

On March 15, 1999, Colonial issued \$100 million of subordinated notes, due March 15, 2009. The notes qualify as Tier II capital, bear interest at 8.00% and are not subject to redemption prior to maturity. Colonial executed two interest rate swaps whereby Colonial will receive fixed rates and pay floating rates, effectively converting the fixed rate notes to floating. The result of these interest rate swaps created effective floating rates of 3-month LIBOR plus 4.01% on \$50 million and 3-month LIBOR plus 4.015% on \$50 million. The total fair market value of the swaps at December 31, 2004 was \$69,000.

THE COLONIAL BANGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On May 23, 2001, Colonial issued \$150 million in 9.375% subordinated notes due June 1, 2011. This debt qualifies as Tier II capital. In connection with this issuance, Colonial executed an interest rate swap whereby Colonial will receive a fixed rate and pay a floating rate, effectively converting the fixed rate notes to floating. The result of this interest rate swap created an effective floating rate of 3-month LIBOR plus 3.2775%. The fair market value of the swap at December 31, 2004 was \$15.8 million.

Due to Colonial's adoption of FIN 46 on July 1, 2003, all of its trust preferred securities were deconsolidated (refer to Note 9 for further information). As a result, the trust preferred securities are no longer reflected on Colonial's consolidated statement of condition, and instead it now reflects the junior subordinated debt that was issued to the special purpose trusts. The junior subordinated debt has the same terms as the trust preferred securities.

On January 29, 1997, Colonial issued, through a special purpose trust, \$70 million of trust preferred securities, representing \$72 million in junior subordinated debt, that qualify as Tier I capital. The securities bear interest at 8.92% and are subject to redemption by Colonial, in whole or in part, at any time after January 29, 2007 until maturity in January 2027.

On March 21, 2002, Colonial issued, through a special purpose trust, \$100 million of trust preferred securities, representing \$103 million in junior subordinated debt, that qualify as Tier I capital. The securities bear interest at 8.32% and are subject to redemption by Colonial, in whole or in part, at any time after April 1, 2007 until maturity in April 2032.

In March 2002, Colonial added \$8 million in trust preferred securities, representing \$8 million in junior subordinated debt, as part of the acquisition of Mercantile BancCorp, Inc. The securities qualify as Tier I capital and bear interest at a quarterly adjusted rate of prime plus 1.25%. These securities are subject to redemption by Colonial in whole at any time after September 7, 2006 until maturity in September 2031.

On September 16, 2003, Colonial issued, through a special purpose trust, \$100 million of trust preferred securities, representing \$103 million in junior subordinated debt, that qualify as Tier I capital. The securities bear interest at 7.875% and are subject to redemption by Colonial, in whole or in part, at any time after October 1, 2008 until maturity in October 2033.

In May 2004, Colonial added \$15 million in trust preferred securities, representing \$15 million in junior subordinated debt, as part of the acquisition of P.C.B. Bancorp, Inc. These securities qualify as Tier I capital and bear interest at average rates of 3-month LIBOR plus 3.32% on \$10 million and 3-month LIBOR plus 3.40% on \$5 million. Colonial may redeem \$10 million, in whole or in part, on any March 26, June 26, September 26 or December 26 on or after September 26, 2007 until maturity in September 2032. Colonial may redeem \$5 million, in whole or in part, on any March 26, June 26, September 26 or December 26 on or after March 26, 2008 until maturity in March 2033.

The subordinated debentures, notes, trust preferred securities and junior subordinated debt described above are subordinate to substantially all remaining liabilities of Colonial.

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

Colonial had long-term FHLB Borrowings outstanding of \$1.4 billion and \$1.6 billion at December 31, 2004 and 2003, respectively. These borrowings bear interest rates of 1.84% to 6.22% and mature from 2005 to 2014. During 2004, the Company entered into interest swap agreements to convert \$575 million of existing FHLB advances to a weighted floating rate of 3-month LIBOR plus 1.2843%. These advances had a weighted average fixed rate of 4.9076%. The total fair market value of the swaps at December 31, 2004 was \$11.9 million.

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Colonial had a long-term security repurchase agreement in the amount of \$300 million outstanding at December 31, 2004. The arrangement matures in August 2006 and bears interest at a rate of 1-month LIBOR plus 0.04%.

At December 31, 2004, long-term debt, including the current portion, is scheduled to mature as follows:

	Parent Only (Restated)	Consolidated BancGroup (Restated)
	(In thousands)	
2005	\$	\$ 53,330
2006		705,199
2007		101,835
2008	7,725	218,125
2009		208,000
Thereafter	302,063	946,012
Subtotal	309,788	2,232,501
Purchase accounting fair value adjustments	349	634
Hedge accounting fair value adjustments		27,822
Total	\$ 310,137	\$ 2,260,957

Note 16. Capital Stock

In addition to the authorized BancGroup common stock currently outstanding, the Board of Directors is authorized to issue shares of the preference stock in one or more series, and in connection with such issuance, to establish the relative rights, preferences, and limitations of each such series. Shareholders of BancGroup may not act by written consent or call special meetings.

The Company has a dividend reinvestment and common stock purchase plan under which shareholders may automatically reinvest their cash dividends in shares of common stock as well as make optional cash purchases of common stock from \$10 to \$120,000 per year. The total number of shares authorized for issuance under this plan is 2,000,000. Total shares issued under this plan were 785,533 and 596,031 as of December 31, 2004 and 2003, respectively.

Forward Sale Agreement

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

On November 18, 2004, the Company entered into a forward sale agreement relating to 8,400,000 shares of the Company's common stock. The commitment is accounted for as an equity instrument, in accordance with EITF 00-19, *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*.

The forward sale agreement matures on November 23, 2005, but it may be settled in all or part at earlier settlement dates to be specified at the Company's discretion. The agreement provides for an initial forward sale price of \$21.452 per share subject to certain adjustments. The Company expects to settle the agreement entirely by the delivery of shares of its common stock. The Company may elect cash or net share settlement for all or a portion of its obligations. The maximum number of shares that could be required to be issued by the Company to net share settle the commitment is 50 million.

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of December 31, 2004, the fair value of the cash settlement option was approximately \$2.0 million and the fair value of the net share settlement option was 94,564 shares. For each increase of one dollar in the average market price of BancGroup common stock on December 31, 2004, the fair value of the cash settlement option would decrease by \$8.4 million and the fair value of the net share settlement option would decrease by 395,667 shares.

On February 24, 2005, BancGroup settled the forward sale agreement with 8,400,000 shares of common stock. BancGroup received approximately \$179.8 million, or \$21.40 per share, in proceeds from the purchaser in this settlement.

Note 17. Regulatory Matters and Restrictions

Dividends payable by national and state banks in any year, without prior approval of the appropriate regulatory authorities, are limited to the bank's net profits (as defined) for that year combined with its retained net profits for the preceding two years. Under these limitations, approximately \$196 million of retained earnings plus certain 2005 earnings would be available for distribution to BancGroup, from its subsidiaries, as dividends in 2005 without prior approval from the respective regulatory authorities.

Colonial Bank is required by law to maintain noninterest bearing deposits with the Federal Reserve Bank to meet regulatory reserve requirements. The average amount of those reserves was approximately \$3.6 million and \$4.6 million for the years ended December 31, 2004 and 2003, respectively.

BancGroup and Colonial Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on BancGroup's financial position. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, BancGroup and Colonial Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. BancGroup's and Colonial Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require BancGroup and Colonial Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I capital (as defined) to average assets (as defined). Management believes, as of December 31, 2004 and 2003, that BancGroup and Colonial Bank meet all capital adequacy requirements to which they are subject.

THE COLONIAL BANGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of December 31, 2004, the most recent notification from the Federal Deposit Insurance Corporation categorized Colonial Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, BancGroup and Colonial Bank must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed BancGroup's category. Actual capital amounts and ratios for BancGroup and Colonial Bank are also presented in the following table:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio(1)	Amount	Ratio	Amount	Ratio
(In thousands, restated)						
As of December 31, 2004						
Total Capital (to risk weighted assets)						
Consolidated	\$ 1,688,995	11.39%	\$ 1,186,078	≥ 8.0%		
Colonial Bank	1,587,346	10.72	1,184,096	≥ 8.0	\$ 1,480,120	≥ 10.0%
Tier I Capital (to risk weighted assets)						
Consolidated	1,304,981	8.80	593,039	≥ 4.0		
Colonial Bank	1,207,967	8.16	592,048	≥ 4.0	888,072	≥ 6.0
Tier I Capital (to average assets)(2)						
Consolidated	1,304,981	7.16	728,615	≥ 4.0		
Colonial Bank	1,207,967	6.64	727,761	≥ 4.0	909,701	≥ 5.0
As of December 31, 2003						
Total Capital (to risk weighted assets)						
Consolidated	\$ 1,575,594	12.55%	\$ 1,004,133	≥ 8.0%		
Colonial Bank	1,481,103	11.83	1,001,206	≥ 8.0	\$ 1,251,508	≥ 10.0%
Tier I Capital (to risk weighted assets)						
Consolidated	1,180,856	9.41	502,066	≥ 4.0		
Colonial Bank	1,092,544	8.73	500,603	≥ 4.0	750,905	≥ 6.0
Tier I Capital (to average assets)(2)						
Consolidated	1,180,856	7.55	625,426	≥ 4.0		
Colonial Bank	1,092,544	7.01	640,359	≥ 4.0	800,449	≥ 5.0

(1) These ratios are subject to regulatory review

(2) The leverage ratio consists of Tier I Capital divided by quarterly average assets, excluding intangible assets and unrealized gains/losses on securities available for sale. The minimum leverage ratio guideline is 3% for banking organizations that do not anticipate significant growth and that have well-diversified risk, excellent asset quality, high liquidity, good earnings, effective management and monitoring of market risk and, in general, are considered top-rated, strong banking organizations.

Note 18. Leases

BancGroup and its subsidiaries have entered into certain noncancellable leases for premises and equipment used in connection with its operations. The majority of these noncancellable lease agreements contain renewal options for varying periods at the same or renegotiated rentals, and several contain purchase options at fair value. Future minimum lease payments under all noncancellable operating leases with initial

Edgar Filing: COLONIAL BANGROUP INC - Form 10-K/A

or remaining terms (exclusive of renewal options) of one year or more at December 31, 2004 were as follows:

	<u>(In thousands)</u>
2005	\$ 29,225
2006	26,597
2007	20,873
2008	17,123
2009	15,226
Thereafter	72,238
Total	\$ 181,282

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Rent expense for all leases amounted to \$31,968,000 in 2004, \$29,806,000 in 2003 and \$25,563,000 in 2002.

Note 19. Employee Benefit Plans

BancGroup and subsidiaries are participants in a pension plan that covers most employees who have met certain age and length of service requirements. The plan provides benefits based on final average earnings, covered compensation, and years of benefit service. Actuarial computations for financial reporting purposes are based on the projected unit credit method. The measurement date is December 31. Based on current actuarial projections, BancGroup will not be required to make a contribution to the plan in 2005. However, BancGroup assesses the funded status of the plan quarterly and may, at its discretion, make contributions even when not required. Currently, BancGroup does not expect to make a material contribution.

Employee pension benefit plan status at December 31:

	<u>2004</u>	<u>2003</u>

Amortization of prior service cost	9	9	9
Recognition of net actuarial loss	800	766	
	<u> </u>	<u> </u>	<u> </u>
Net annual benefit cost	\$ 6,199	\$ 6,256	\$ 3,666
	<u> </u>	<u> </u>	<u> </u>

THE COLONIAL BANGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The accumulated benefit obligation for the plan was \$52.1 million and \$41.5 million at December 31, 2004 and 2003, respectively.

	<u>2004</u>	<u>2003</u>
Weighted-average assumptions used to determine benefit obligations at December 31		
Discount rate	5.75%	6.25%
Rate of compensation increase	4.00	4.00
	<u>2004</u>	<u>2003</u>
Weighted-average assumptions used to determine net periodic benefit cost for years ended December 31		
Discount rate	6.25%	6.75%
Expected return on plan assets	8.75	8.75
Rate of compensation increase	4.00	4.00

The expected return on plan assets assumption was developed through analysis of historical market returns, current market conditions, and the fund's past experience. The historical returns of asset categories as weighted by the target allocation would produce an expected return of 9.10%, as follows:

	<u>Target Allocation</u>	<u>15-year Annualized</u>	<u>Historical Return Weighted Average</u>
U.S. equity	60%	10.88%	6.52%
International equity	10%	4.23%	0.43%
Fixed income	25%	7.70%	1.92%
Cash and cash equivalents	5%	4.51%	0.23%
Total portfolio	<u>100%</u>		<u>9.10%</u>

The Company's estimates of future market returns by asset category are lower than actual long-term historical returns due to inherent uncertainties in future performance.

The pension plan's weighted-average asset allocations at December 31, 2004, and 2003, by asset category are as follows:

**Percentage of
Plan Assets at**

	December 31,	
	2004	2003
U.S. equity	62%	49%
International equity	10%	8%
Fixed income	25%	18%
Cash and cash equivalents	3%	25%
Total	100%	100%

The cash and cash equivalents balance at the end of 2003 included a \$9 million contribution that was made by BancGroup in December. This contribution was invested in securities by the plan in January 2004.

The pension plan seeks to grow the plan assets in relation to the benefit obligations to participants and beneficiaries, while prudently managing the risk of a decrease in the plan assets relative to those liabilities. The Plan Committee and the Investment Managers maintain the fund in compliance with all applicable laws governing the operation of pension plans, including ERISA and its fiduciary standards.

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The assets of the Plan are invested in a broadly diversified portfolio that includes the following asset classes in the respective allocation levels:

	<u>Minimum</u>	<u>Maximum</u>
U.S. equity	35%	75%
International equity	0%	10%
Fixed income	25%	45%
Real estate	0%	10%
Alternative investment	0%	5%
Cash	0%	10%

Colonial BancGroup common stock may be included in the U.S. equity allocation up to a maximum of 10% of the fund.

At both December 31, 2004 and 2003, plan assets included 164,520 shares of BancGroup common stock with market values of \$3,492,760 (6% of total plan assets) and \$2,849,486 (6% of total plan assets), respectively. Dividends paid to the plan on the BancGroup common stock totaled \$95,422 and \$92,131 during 2004 and 2003, respectively.

Investment managers are selected and monitored for the objective of earning a long-term total return equal to or greater than selected benchmarks over the full business cycle. The average maturity and duration of the fixed income assets are determined in consideration of the current and future benefit payment obligations of the plan.

Permitted equity investments include listed publicly traded securities of domestic and foreign corporations. Permitted fixed income securities include obligations of the U.S. government or its agencies, and U.S. and foreign issuers that are considered investment grade at time of purchase. Commingled funds may be used; those investing in global, emerging market and high yield securities are limited to 10% of the fixed income allocation.

Prohibited securities and transactions include buying of securities on margin, short selling of securities, and the buying and selling of put and call options, or securities not offered through a SEC registration. The Plan Committee may authorize buying and selling futures contracts as a hedge against portfolio loss.

The following benefits are expected to be paid in future years. The expected benefits were estimated based on the same assumptions used to measure the Company's benefit obligation at December 31, 2004 and include benefits attributable to estimated future employee services.

Year	Expected Benefits
------	-------------------

2005	\$ 1,166,320
2006	1,257,253
2007	1,493,969
2008	1,803,647
2009	2,054,560
2010-2014	17,504,294

BancGroup also has an incentive savings plan (the Savings Plan) for all of the employees of BancGroup and its subsidiaries. The Savings Plan provides certain retirement, death, disability and employment benefits to all eligible employees and qualifies as a deferred arrangement under Section 401(k) of the Internal Revenue Code. Participants in the Savings Plan make basic contributions and may make supplemental contributions to increase benefits. BancGroup contributes a minimum of 50% of the basic contributions made by the employees and may make an additional contribution from profits on an annual basis. During 2004, 2003 and 2002 there

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

were no additional contributions paid. An employee's interest in BancGroup's contributions becomes 100% vested after five years of service with the Company. Participants have options as to the investment of their Savings Plan funds, one of which includes purchase of Common Stock of BancGroup. Charges to operations for this plan amounted to approximately \$2,774,000, \$2,588,000 and \$1,759,000 for 2004, 2003 and 2002, respectively.

Note 20. Stock Plans

The 2001 Long Term Incentive Stock Option Plan (the LTIP) provides for the granting of various types of incentive stock-based awards including incentive stock options, nonqualified stock options, stock appreciation rights, restricted stock, and performance units, all of which may be issued only to key employees, officers and directors of BancGroup. The LTIP was approved by the stockholders of BancGroup at their 2001 annual meeting. Shares initially authorized to be issued under the LTIP total 10,000,000 of BancGroup common stock. All options expire no more than ten years from the date of grant, or three months after an employee's termination.

Incentive Stock Options issued under the LTIP are subject to a number of additional limitations including, but not limited to: (i) the options cannot be issued at less than the fair market value of BancGroup common stock on the date they are granted, (ii) the aggregate fair market value (determined as of the date of grant) of all shares of BancGroup common stock with respect to which such options are first exercisable by a participant in any calendar year may not exceed \$100,000; and (iii) the exercise price of such options issued to any individual who owns 10% or more of the combined voting power of BancGroup may not be less than 110% of the fair market value of BancGroup common stock on the date such options are granted and such options must expire not later than five years from the date they are granted.

Nonqualified stock options issued under the LTIP may be issued at an exercise price of not less than 85% of the fair market value of BancGroup common stock on the date of the grant. Stock appreciation rights issued under the LTIP must not be less than the fair market value of BancGroup common stock on the date of grant.

A restricted stock award under the LTIP consists of a grant of BancGroup's common stock to the recipient subject to terms and conditions, including provisions relating to transferability and forfeiture, as determined at the time of the award. The awards typically vest over a five-year period unless they are subject to specific performance criteria. During 2004, no restricted stock awards were granted. During 2003 and 2002, 9,500 and 72,450 restricted stock awards were granted at weighted average market values of \$17.02 and \$14.20, respectively. A total of \$156,316, \$357,159 and \$174,000 in compensation expense was charged to operations under this plan for the years ended December 31, 2004, 2003 and 2002, respectively. This plan replaces the 1992 Stock Bonus and Retention Plan discussed later.

Prior to the LTIP, BancGroup used the 1992 Incentive Stock Options Plan (the 1992 Plan) and the 1992 Nonqualified Stock Option Plan (the 1992 Nonqualified Plan) to provide an incentive to certain officers, key management employees and directors. Options granted under the 1992 Plan must have been at a price not less than the fair market value of the shares at the date of grant. Options granted under the 1992 Nonqualified Plan must have been at a price not less than 85% of the fair market value of the shares at the date of grant. All options expire no more than ten years after the date of grant, or three months after the employee's termination. Both of these plans were terminated on July 1, 2001 and replaced with the LTIP discussed above. Although options previously granted under the 1992 Plan and the 1992 Nonqualified Plan may still be exercised, no further options may be granted.

In 1992, BancGroup adopted the Stock Bonus and Retention Plan to promote the long-term interests of BancGroup and its shareholders by providing a means for attracting and retaining officers, employees and

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

directors by awarding restricted stock which shall vest either over a stated time period or based upon performance criteria. A total of \$554,000, \$1,124,000, and \$969,000 in compensation expense was charged to operations under this plan for the years ended December 31, 2004, 2003, and 2002, respectively. This plan was replaced in June 2001 with the LTIP plan discussed previously.

Pursuant to the various business combinations, BancGroup assumed qualified stock options and non-qualified stock options according to the respective exchange ratios.

Options issued under the LTIP, the 1992 Nonqualified Plan and the 1992 Plan have vesting requirements. In order to fully vest in the options granted, the option recipients are required to remain in the employment of BancGroup (subject to certain exemptions) for periods of between one and five years (These options become exercisable on a pro-rata basis over a period of one to five years) or attain certain performance criteria.

Following is a summary of the transactions in Common Stock under these plans for the years ended December 31, 2004, 2003 and 2002.

	Qualified Plans(1)		Nonqualified Plans(1)	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price

(1) This table includes those plans assumed pursuant to various business combinations according to the respective exchange ratios.

At December 31, 2004, the total shares outstanding and exercisable under these option plans were as follows:

Range of Exercise Prices	Options Outstanding				Options Exercisable		
	Number Outstanding At 12/31/04	Weighted Average Remaining Life (in years)	Weighted Average Exercise Price	Aggregate Option Price	Number Exercisable At 12/31/04	Weighted Average Exercise Price	Aggregate Option Price
\$3.786-\$5.679	23,439	5.06	\$ 4.645	\$ 108,873	23,439	\$ 4.645	\$ 108,873
\$6.941-\$10.380	556,087	4.33	9.741	5,416,595	500,087	9.710	4,855,760
\$10.469-\$15.280	2,208,123	6.21	12.319	27,201,182	1,646,983	12.078	19,891,742
\$16.770-\$21.450	1,079,300	9.52	19.305	20,836,084	77,360	17.270	1,336,041
Total	3,866,949	6.86	\$ 13.851	\$ 53,562,734	2,247,869	\$ 11.652	\$ 26,192,416

As of December 31, 2003 and 2002, the number and weighted average exercise price of exercisable options was 2,136,571 and \$11.39 and 1,824,429 and \$11.10, respectively.

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In 1987, BancGroup adopted the Restricted Stock Plan for Directors (Directors Plan) whereby directors of BancGroup and its subsidiary banks may receive Common Stock in lieu of cash director fees. The election to participate in the Directors Plan is made at the inception of the director s term except for BancGroup directors who make their election annually. Shares earned under the plan for regular fees are issued quarterly while supplemental fees are issued annually. All shares become vested at the expiration of the director s term. During 2004, 2003, and 2002, respectively, 70,770, 63,945, and 86,638 shares of Common Stock were issued under the Directors Plan, representing approximately \$862,000, \$893,000, and \$926,000 in directors fees for 2004, 2003, and 2002, respectively.

In 1994, BancGroup adopted the Employee Stock Purchase Plan which provides employees of BancGroup, who work in excess of 29 hours per week, with a convenient way to become shareholders of BancGroup. The participant authorizes a regular payroll deduction of not less than \$10 and not more than 10% of salary. The participant may also contribute whole dollar amounts of not less than \$100 or not more than \$1,000 each month toward the purchase of the stock at market price. There are 600,000 shares authorized for issuance under this Plan. An additional 400,000 may be acquired from time to time on the open market for issuance under the Plan.

Note 21. Contingencies

BancGroup and its subsidiaries are from time to time defendants in legal actions from normal business activities. Management does not anticipate that the ultimate liability arising from litigation outstanding at December 31, 2004 will have a materially adverse effect on BancGroup s financial statements.

Note 22. Related Parties

Prior to June 2003, BancGroup leased its principal corporate offices from a company partly owned by a principal shareholder of BancGroup. Amounts paid under this lease approximated \$0.6 million and \$1.8 million in 2003 and 2002, respectively.

During 2004, 2003 and 2002, BancGroup and its subsidiaries paid fees of approximately \$4.3 million, \$2.6 million and \$2.5 million, respectively, for legal services required of law firm in which a partner of the firm serves on the Board of Directors.

As of December 31, 2004 and 2003, Colonial Bank had loans outstanding of \$1.2 million and \$5.0 million, respectively, to real estate joint ventures in which BancGroup owns an equity interest.

Refer to Note 5 for information on related party loans.

Note 23. Merger Related Expenses

The Company has recognized external merger related expenses totaling \$1,999,000, \$271,000 and \$874,000 for each of the years ended December 31, 2004, 2003 and 2002, respectively. These costs are comprised primarily of travel, training, marketing, retention bonuses, and incremental charges related to the integration of acquired banks, such as system conversions and customer supplies.

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**Note 24. Income Taxes**

The components of the provision for income taxes were as follows:

	2004	2003	2002
	(Restated)	(Restated)	(Restated)
	(In thousands)		
Currently payable			
Federal	\$ 87,881	\$ 75,688	\$ 70,277
State	3,952	2,103	2,258
Deferred	(2,904)	(3,006)	7,397
Total	\$ 88,929	\$ 74,785	\$ 79,932

The provision for income taxes is presented in the income statement as follows:

	2004	2003	2002
	(Restated)	(Restated)	(Restated)
	(In thousands)		
Continuing operations	\$ 88,929	\$ 74,785	\$ 80,377
Discontinued operations			(445)
Total	\$ 88,929	\$ 74,785	\$ 79,932

The reasons for the difference between income tax expense and the amount computed by applying the statutory federal income tax rate to income before income taxes are as follows:

2004	2003	2002
(Restated)	(Restated)	(Restated)
(In thousands)		

Edgar Filing: COLONIAL BANGGROUP INC - Form 10-K/A

Tax at statutory rate on pre-tax income	\$ 91,586	\$ 77,056	\$ 81,213
Add:			
Tax-exempt income	(5,282)	(1,785)	(3,767)
Other	2,625	(486)	2,486
	<u> </u>	<u> </u>	<u> </u>
Total income taxes	\$ 88,929	\$ 74,785	\$ 79,932
	<u> </u>	<u> </u>	<u> </u>

THE COLONIAL BANGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The components of BancGroup's net deferred tax asset as of December 31, 2004 and 2003, were as follows:

	2004	2003
	(Restated)	(Restated)
	(In thousands)	
Deferred tax assets:		
Allowance for loan losses	\$ 55,897	\$ 48,109
Accrued expenses	6,311	4,625
Other	1,995	5,882
Unrealized loss on securities available for sale	4,969	197
	69,172	58,813
Deferred tax liabilities:		
Fixed assets	3,897	2,911
Intangible assets	14,812	6,891
Other	10,364	4,843
	29,073	14,645
Net deferred tax asset	\$ 40,099	\$ 44,168

The net deferred tax asset is included as a component of accrued interest and other assets in the Consolidated Statement of Condition.

BancGroup did not establish a valuation allowance related to the net deferred tax asset due to taxes paid within the carryback period being sufficient to offset future deductions resulting from the reversal of these temporary differences.

THE COLONIAL BANGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 25. Earnings Per Share

The following table reflects a reconciliation of the numerator and denominator of the basic EPS computation to the numerator and denominator of the diluted EPS computation:

	Income (Restated)	Shares	Per Share Amount (Restated)
(In thousands, except per share amounts)			
2004			
Basic EPS			
Income from continuing operations	\$ 172,877	131,144	\$ 1.32
Effect of dilutive securities:			
Options		1,171	
Diluted EPS	\$ 172,877	132,315	\$ 1.31
2003			
Basic EPS			
Income from continuing operations	\$ 145,611	124,615	\$ 1.17
Effect of dilutive securities:			
Options		523	
Convertible debentures	57	151	
Diluted EPS	\$ 145,668	125,289	\$ 1.16
2002			
Basic EPS			
Income from continuing operations	\$ 152,334	119,583	\$ 1.27
Effect of dilutive securities:			
Options		586	
Convertible debentures	155	479	
Diluted EPS	\$ 152,489	120,648	\$ 1.26

The above calculations exclude options that could potentially dilute basic EPS in the future but were antidilutive for the periods presented. The number of such options excluded was 536 thousand, 996 thousand and 587 thousand in 2004, 2003 and 2002, respectively.

Discontinued operations, net of taxes, had no effect on either basic or diluted earnings per share for 2004, 2003 and 2002.

Note 26. Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash and cash equivalents For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment securities and securities available for sale For debt securities and marketable equity securities held either for investment purposes or for sale, fair value equals quoted market price, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

THE COLONIAL BANCGROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Loans held for sale Due to the duration these assets will be held, the carrying amount is a reasonable estimate of fair value.

Loans For loans, the fair value is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Deposits SFAS 107 states that the fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, interest-bearing checking and savings accounts, is equal to the amount payable on demand at the measurement date. The amount included for these deposits in the following table is their carrying value at December 31, 2004 and 2003. The fair value of other time deposits is calculated based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for like wholesale deposits with similar remaining maturities.

Short-term borrowings Rates currently available to BancGroup for borrowings with similar terms and remaining maturities are used to estimate fair value of existing borrowings by discounting future cash flows.

Long-term debt Rates currently available to BancGroup for debt with similar terms and remaining maturities are used to estimate fair value of existing debt by discounting future cash flows.

Derivatives Fair value is defined as the amount that the Company would receive or pay to terminate the contracts at the reporting date. Market or dealer quotes were used to value the instruments.

Commitments to extend credit and standby letters of credit The value of the unrecognized financial instruments is estimated based on the related deferred fee income associated with the commitments, which is not material to BancGroup's financial statements at December 31, 2004 and 2003.

The estimated fair values of BancGroup's financial instruments at December 31, 2004 and 2003 are as follows:

2004		2003	
Carrying Amount (Restated)	Fair Value	Carrying Amount (Restated)	Fair Value

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 27. Segment Information

The Company has six reportable segments for management reporting. Each regional bank segment consists of commercial lending and full service branches in its geographic region with its own management team. The branches provide a full range of traditional banking products as well as financial planning and mortgage banking services. The mortgage warehouse segment headquartered in Orlando, Florida provides lines of credit collateralized by residential mortgage loans to mortgage origination companies. In addition, the Company reports Corporate/Treasury/Other which includes the investment securities portfolio, nondeposit funding activities including long-term debt, short term liquidity and balance sheet risk management including derivative hedging activities, the parent company's activities, intercompany eliminations and certain support activities not currently allocated to the aforementioned segments and income taxes. In addition, Corporate/Treasury/Other includes income from bank owned life insurance, income and expenses from various nonbank subsidiaries, joint ventures and equity investments, merger related expenses and the unallocated portion of the Company's financial planning business.

The results for these segments are based on our management reporting process, which assigns balance sheet and income statement items to each segment. Unlike financial reporting there is no authoritative guidance for management reporting equivalent to generally accepted accounting principles. Colonial uses an internal funding methodology to assign funds costs to assets and earning credits to liabilities as well as an internal capital allocation methodology with an offset in Corporate/Treasury/Other. The provision for loan losses included in each segment is based on each segment's share of the Company's loan loss reserve. Certain back office support functions are allocated to each segment on the basis most applicable to the function being allocated. The management accounting process measures the performance of the defined segments based on our management structure and is not necessarily comparable with similar information for other financial services companies. If the management structure and/or allocation process changes, allocations, transfers and assignments may change. In that case, results for prior periods would be restated for comparability.

THE COLONIAL BANGROUP, INC.

Note 29. Subsequent Events

Union Bank Acquisition

BancGroup completed the acquisition of Union Bank Financial Corporation's (UB) wholly-owned subsidiary, Union Bank of Florida (Union), a Florida state chartered bank, on February 10, 2005. The acquisition enhances BancGroup's geographic position and expands BancGroup's banking operations within existing locations in Florida, primarily the Dade, Broward and Palm Beach markets. Union's results of operations will be included in BancGroup's consolidated financial results beginning February 11, 2005. Additional information about the reasons for the merger

Edgar Filing: COLONIAL BANCGROUP INC - Form 10-K/A

and factors that contributed to the purchase price is included in BancGroup's Form S-3 filed as of December 28, 2004.

Total consideration for the transaction was \$233.5 million, consisting of 2,903,402 shares of BancGroup common stock valued at \$58.8 million and \$174.8 million in cash. The value of the common stock issued was determined based on the average market price of BancGroup's shares over the five day period before and after the date that the exact number of BancGroup shares to be issued was known. The purchase price was preliminarily allocated to the assets acquired and liabilities assumed based on their estimated fair values at the acquisition date. The final allocation of the purchase price will be adjusted after completion of additional analysis relating to the fair values of Union's tangible and identifiable intangible assets and liabilities, and final decisions regarding integration activities.

THE COLONIAL BANCGROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition. Due to the February 10, 2005 closing date, the allocation of the final purchase price is still subject to refinement as additional information becomes available and further analyses are performed.

(Dollars in thousands)	February 10, 2005
Assets:	
Cash	\$ 21,765
Securities available for sale	309,746
Loans, net of allowance for loan loss	642,749
Premises and equipment	11,986
Goodwill	166,862
Accrued interest and other assets	21,079
Total Assets	1,174,187
Liabilities:	
Deposits	630,826
Short-term borrowings	149,968
Long-term debt	156,750
Accrued interest and other liabilities	3,134
Total Liabilities	940,678
Net Assets	\$ 233,509

The transaction resulted in approximately \$166.9 million of goodwill, which is deductible for tax purposes. The goodwill was allocated to the Florida segment.

First Federal Savings Bank of Lake County Acquisition

On January 18, 2005, Colonial announced the signing of a definitive agreement to acquire First Federal Savings Bank of Lake County (FFLC) for approximately \$232 million. Under the terms of the agreement, FFLC shareholders will elect either 2 shares of Colonial stock or \$42 in cash for each FFLC share they own. The cash consideration will be capped at 35% of the transaction. FFLC is headquartered in Leesburg, Florida, and had total assets of \$1 billion, total deposits of \$795 million and total loans of \$884 million at December 31, 2004. FFLC currently operates 16 full-service offices in Lake, Sumter, Citrus and Marion counties in Central Florida. The transaction closed during the second quarter of 2005.

Forward Sale Agreement

On February 24, 2005, BancGroup settled the forward sale agreement discussed in Note 16. In connection with the settlement of the forward sale agreement, BancGroup issued 8,400,000 shares of common stock. Pursuant to the settlement of the transaction, BancGroup received approximately \$179.8 million, or \$21.40 per share, from the purchaser.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosures*

None

Item 9A. Controls and Procedures

(a) Restatement.

In the course of regular review procedures, our accounting staff identified errors with respect to the Company's use of hedge accounting for certain transactions in accordance with generally accepted accounting principles, including Statement of Financial Accounting Standards No. 133 (SFAS 133) and its related interpretations. The errors were in accounting for interest rate swaps for brokered certificates of deposit and junior subordinated debt. Upon initial application these swaps were viewed as eligible for the abbreviated method of documenting effectiveness of the swaps as hedges. Because these swaps were retrospectively determined not to qualify for the abbreviated method of documentation, we were required to, but did not, test periodically for effectiveness. Adjustments to correct the accounting for these transactions are included in our restated consolidated financial statements.

The accounting staff reported their findings to management, to PricewaterhouseCoopers LLP and to the Audit Committee of the Board of Directors. After initial discussions with the Audit Committee, management reviewed these matters in further detail, and after completing its analysis on December 29, 2005, recommended to the Audit Committee and the Executive Committee of the Board of Directors that previously reported financial results be restated to reflect correction of these errors. The Executive Committee of the Board of Directors and the Audit Committee of the Board of Directors determined at their joint meeting on December 29, 2005, that previously reported results for The Colonial BancGroup Inc.'s Annual Report on Form 10-K for the year ended December 31, 2004 and Quarterly Reports on Form 10-Q for the quarters ended March 31, June 30 and September 30, 2005 should be restated to eliminate hedge accounting for these swaps and, in light of the restatement, that the financial statements and other information referred to above should no longer be relied upon.

(b) Management's Annual Report on Internal Control Over Financial Reporting (as restated)

The management of The Colonial BancGroup, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting for the company. With the participation of the Chief Executive Officer and the Chief Financial Officer, our management conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2004, based on the framework and criteria established in *Internal Control - Integrated Framework*, issued by the Committee of Sponsoring Organizations of the Treadway Commission.

A material weakness is a control deficiency, or combination of control deficiencies, that results in a more than remote likelihood that a material misstatement of the annual or interim financial statement will not be prevented or detected. As of December 31, 2004, the Company did not maintain effective controls to ensure the appropriate classification of interest rate swaps and the related valuation of the hedged brokered certificates of deposit and junior subordinated debt. Specifically, the Company failed to correctly document, measure and record hedge ineffectiveness on certain interest rate swaps. This control deficiency could result in a misstatement to the interest rate swap derivative accounts, the brokered certificate of deposit accounts and the junior subordinated debt accounts that would cause a material misstatement of the annual or interim financial statements that would not be prevented or detected. This control deficiency resulted in the restatement of the Company's 2004 consolidated financial statements and the first, second and third quarter interim consolidated financial statements for 2004 and 2005. Accordingly, management has concluded this control deficiency constitutes a material weakness.

In the original filing of our fiscal 2004 Annual Report on Form 10-K, management previously concluded that the Company maintained effective internal control over financial reporting as of December 31, 2004. In connection with the restatement described above, management has determined that the material weakness described above existed as of December 31, 2004. Because of this material weakness, management has concluded that the Company did not maintain effective internal control over financial reporting as of December 31, 2004 based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. Accordingly, management has restated this report on internal control over financial reporting.

The Colonial BancGroup Inc.'s independent auditor, PricewaterhouseCoopers LLP, a registered public accounting firm, has audited management's revised assessment of our internal control over financial reporting as of December 31, 2004, as stated in their report herein.

(c) Evaluation of Disclosure Controls and Procedures

In connection with the restatement, under the direction of our Chief Executive Officer and Chief Financial Officer, we reevaluated our disclosure controls and procedures as of December 31, 2004. We identified a material weakness in our internal control over financial reporting with respect to accounting for hedge transactions.

Solely as a result of this material weakness, we concluded that our disclosure controls and procedures were not effective as of December 31, 2004.

(d) Remediation of Material Weakness in Internal Control

We are confident that, as of the date of this filing, we have fully remediated the material weakness in our internal control over financial reporting with respect to accounting for derivative transactions. The remedial actions included:

1. improved training, education and accounting reviews designed to ensure that all relevant personnel involved in derivatives transactions understand and apply hedge accounting in compliance with generally accepted accounting principles, including SFAS 133 and its related interpretations;
2. retested our internal financial controls with respect to the types of hedging transactions affected by the restatement to ensure compliance with generally accepted accounting principles, including SFAS 133 and its related interpretations;
3. updated our derivative policy to specifically require utilization of the long-haul method for documenting the effectiveness of swaps related to brokered certificates of deposit and junior subordinated debt; and
4. terminated the swaps on junior subordinated debt during the fourth quarter of 2005 and redesignated the remaining swaps related to brokered certificates of deposit, to be subject to the long-haul method of documenting hedge effectiveness.

As previously reported, there was no change in our internal control over financial reporting during the quarter ended December 31, 2004, that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III**Item 10. Directors and Executive Officers of the Registrant**

The information required by this item as to BancGroup's directors will be contained in BancGroup's proxy statement that will be prepared and filed for BancGroup's 2004 annual meeting of stockholders, under the captions "Election of Directors" and "Section 16 (a) Beneficial Ownership Reporting Compliance," and is incorporated herein by reference.
