In order to complete its quarterly financial statements, the registrant sought to obtain certain valuation information from a third party. Based on its analysis of transactions that occurred well after the end of the second quarter of 2015, the Company has determined that the decline in the value of its investment in the common equity of Mevion Medical Systems is other than temporary. The Company obtained certain data from third parties only in the past few days and has not yet finalized a valuation of its investment or presented the methodology and results to its independent registered public accounting firm. Based on the work done to date, the non-cash impairment charge is expected to be approximately \$2.1 million. The Company intends to maintain its equity interest in Mevion.
