**I. HIGHLIGHTS:**

Bancolombia's net income amounted to Ps 34 billion, US\$ 0.100 per ADS, during the quarter ended June 30, 2002, as compared to a net income of Ps 41 billion, US\$ 0.125 per ADS, for the quarter ended March 31, 2002.

Bancolombia showed positive results during the quarter driven by higher net interest income, and fees and income from services. During the quarter, there was an increase of total net provisions from Ps (39,784) million to Ps (43,610) million, represented by Ps (26,876) million for loans and Ps (25,143) million for investments.

Net interest income increased 13.0% in the second quarter over the first quarter. This increase is the result of higher income from investment portfolio and lower interest expenses. Net interest margin increased to 7.8% from 7.1% quarter-over-quarter.

Bancolombia posted Ps 73 billion in total fees and income from services, up 5.3% during the second quarter. Total fees and income from services increased to 34.4% from 33.4% as a percentage of total operating income quarter-over-quarter.

Bancolombia's total operating expenses increased 1.8% during the quarter mainly due to higher administrative and other expenses, which increased 2.3% for the same period.

Demand for loans from Bancolombia during the second quarter continues to be weak. During the quarter, the Bank's gross loans decreased 1.0% while total deposits increased 6.1%. Consequently, the investment securities portfolio amounted to Ps 3,912 billion, up 13% during the quarter.

The annualized ROE and ROA were 13.3% and 1.3% for the second quarter, respectively.

**Banking Sector<sup>2</sup>**

**Asset Quality**

The Bank's level of past due loans as a percentage of total loans was 5.09% as of June 2002, higher than the 4.87% level registered during the first quarter of 2002. The increase is the result of a deterioration in the debt of a public utility company, EMCALI. This loan was classified as "D" and provisioned at 100% as of March 2002, but as of June 2002 it became past due and was reclassified as "E". However, this company is currently negotiating to restructure its debt. Bancolombia (consolidated) had loan charge-offs of Ps 42,937 million during the quarter.

As of June 30, 2002, the level of allowances of the Bank's past due loans was 118.9%, down from 130.3% registered during the previous quarter. This level is considerably better than the Colombian Banking Sector's average of 56.9% of past due coverage as of June 30, 2002.

### III. INCOME STATEMENT

Bancolombia's net income for the quarter ended June 30, 2002 amounted to Ps 34 billion, compared to Ps 41 billion for the quarter ended March 31, 2002. As we mentioned before, the decrease during the quarter is a result of lower other operating income due to dividends, which under Colombian law are accounted for at the General Shareholders' Meeting during the first quarter, and higher total net provisions.

#### Net Interest Income

Net interest income increased 13% over the quarter to Ps 170 billion from Ps 150 billion. This growth was caused by higher interest income of 4.7% and lower interest expenses, which decreased 5.2% during the same period. As a result, net interest margin increased to 7.8% from 7.1% quarter-over-quarter.

#### Interest Income

Total interest income amounted to Ps 290 billion during the second quarter, up 4.7% from Ps 278 billion registered in the first quarter. Income from interest on investment securities increased 32.8% due to higher volume, while interest on loans decreased 5.3% due to lower DTF rates.

#### Interest Expense

Total interest expenses decreased 5.2% to Ps 120 billion from Ps 127 billion quarter-over-quarter due to lower interest rates. The DTF rate registered during the last week of March 2002 was 10.55%, declining to 8.21% during the last week of June 2002.

#### Provisions

The item "Recovery of provisions for foreclosed assets and other assets" has increased from Ps 6 billion as of June 30, 2001 to Ps 20 billion as of June 30, 2002. Given the increased relevance of this figure, it has been reclassified from "other income" to "total net provisions". As a result, the numbers for total net provisions in this report are adjusted accordingly.

Total net provisions for the second quarter amounted to Ps (43,610) million, up 9.6% when compared to Ps (39,784) million for the previous quarter, as follows:

Provisions for loans decreased to Ps (26,876) million from Ps (49,268) million quarter-over-quarter.

Provisions for foreclosed assets increased to Ps (5,436) million from Ps (4,313) million during the same period. Beginning July 2002, any foreclosed asset received in payment has to be provisioned at 40% of its commercial value.

#### Fees and Income from Services

Total fees and income from services amounted to Ps 73 billion in the second quarter, up 5.3% from Ps 69 billion in the first quarter, and up 20.0% from Ps 61 billion year-over-year. Commissions from banking services, commissions and fees from fiduciary activities, and

checking fees increased 8.3%, 21.3% and 6.4%, respectively, during the quarter. Total fees and income from services reached 34.4% from 33.4% as a percentage of total operating income during the quarter.

As we mentioned in our previous earnings release, in March 2002 the Bank canceled some outstanding VISA credit cards that had not been active during a long period of time. The number of outstanding credit cards decreased 2.5% from June 30, 2001 to June 30, 2002. However, there was an increase of 2.2% quarter-over-quarter. Bancolombia Panama's total assets increased 2.1% from US\$976 million to US\$997 million quarter-over-quarter. This growth was the result of higher volume of investment securities, which increased 6.3% to US\$624 million from US\$587 million during the same period. The Bank's total liabilities increased 2.6% from US\$925 million to US\$949 million quarter-over-quarter.

Bancolombia Panama showed very positive results during the quarter, not taking provisions into account. Net interest income increased 21.6% during the quarter from US\$8.8 million to US\$10.7 million. This was the result of higher volume of the investment portfolio. However, net provisions increased 100.4% during the quarter from US\$(6.9) million to US\$(13.9) million due to a provision for investments. As a result, Bancolombia Panama showed a net loss of US\$ 3.6 million during the second quarter.
