BEIJING, China, July 24, 2009 Baidu, Inc. (NASDAQ: BIDU), the leading Chinese language Internet search provider, today announced its unaudited financial results for the second quarter ended June 30, 2009¹.

Second Quarter 2009 Highlights

Total revenues in the second quarter of 2009 were RMB1,097.5 million (\$160.7 million), a 36.7% increase from the corresponding period in 2008.

Operating profit in the second quarter of 2009 was RMB422.8 million (\$61.9 million), a 53.0% increase from the corresponding period in 2008.

Net income in the second quarter of 2009 was RMB383.3 million (\$56.1 million), a 44.6% increase from the corresponding period in 2008. **Diluted earnings per share (EPS)** for the second quarter of 2009 was RMB11.02 (\$1.61); **diluted EPS excluding share-based compensation expenses** (non-GAAP) for the second quarter of 2009 was RMB11.68 (\$1.71). Costs and expenses related to Baidu's Japan operations for the second quarter of 2009 were RMB39.6 million (\$5.8 million), which reduced diluted EPS by RMB1.14 (\$0.17).

Our focus on execution drove another strong quarter for Baidu, said Robin Li, Baidu's chairman and CEO. Our ongoing initiatives to improve user and customer experience further solidified Baidu's leading market position as both large companies and SMEs are increasingly drawn to the superior ROI offered by Baidu's P4P platform.

Mr. Li noted that the recently introduced Baidu Online Marketing Professional Edition, branded as Phoenix Nest, while still in its early stages, is already seeing encouraging customer acceptance.

Jennifer Li, Baidu's chief financial officer, commented, "The inherent scalability of Baidu's business model should allow us to produce strong margins as revenues continue to grow rapidly. At the same time, we will continue to invest in initiatives that best position Baidu for continued long-term growth."

About Non-GAAP Financial Measures

To supplement Baidu's consolidated financial results presented in accordance with GAAP, Baidu uses the following measures defined as non-GAAP financial measures by the SEC: adjusted EBITDA, operating profit excluding share-based compensation expenses, net income excluding share-based compensation expenses, and basic and diluted EPS excluding share-based compensation expenses. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. For more information on these non-GAAP financial measures, please see the tables captioned

Reconciliations of non-GAAP results of operations measures to the nearest comparable GAAP measures and

Reconciliation from net cash provided by operating activities to adjusted EBITDA set forth at the end of this release.

Baidu believes that these non-GAAP financial measures provide meaningful supplemental information regarding its performance and liquidity by excluding certain expenses, particularly share-based compensation expenses, that may not be indicative of its operating We believe that both management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning and forecasting future periods. These non-GAAP financial measures also facilitate management's internal comparisons to Baidu's historical performance and liquidity. Baidu has computed its non-GAAP financial measures using the same consistent method from quarter to quarter since April 1, 2006. We believe these non-GAAP financial measures are useful to investors in allowing for greater transparency with respect to supplemental information used by management in its financial and operational decision making. A limitation of using these non-GAAP financial measures is that these non-GAAP measures exclude share-based compensation charge that has been and will continue to be for the foreseeable future a significant recurring expense in our results of operations. A limitation of using non-GAAP Adjusted EBITDA is that it does not include all items that impact our net income for the period. Management compensates for these limitations by providing specific information regarding the GAAP amounts excluded from each non-GAAP measure. The accompanying tables have more details on the reconciliations between GAAP financial measures that are most directly comparable to non-GAAP financial measures.
