Gladstone Commercial Corporation

Notes to Unaudited Consolidated Financial Statements

(Dollars in Thousands, Except Share and per Share Data or Unless Otherwise Indicated)

1. Organization and Significant Accounting Policies

Gladstone Commercial Corporation (the Company) was incorporated on February 14, 2003 under the General Corporation Law of Maryland. The Company operates in a manner so as to qualify as a real estate investment trust (REIT) for federal income tax purposes and exists primarily for the purposes of engaging in the business of investing in real estate properties net leased to creditworthy entities and making mortgage loans to creditworthy entities. Subject to certain restrictions and limitations, the business of the Company is managed by Gladstone Management Corporation, a Delaware corporation (the Adviser).

Subsidiaries

The Company conducts substantially all of its operations through a subsidiary, Gladstone Commercial Limited Partnership, a Delaware limited partnership (the Operating Partnership). As the Company currently owns all of the general and limited partnership interests of the Operating Partnership through GCLP Business Trust I and II, as discussed in more detail below, the financial position and results of operations of the Operating Partnership are consolidated with those of the Company.

Gladstone Commercial Lending, LLC, a Delaware limited liability company (Gladstone Commercial Lending) and a subsidiary of the Company, was created to conduct all operations related to real estate mortgage loans of the Company. As the Operating Partnership currently owns all of the membership interests of Gladstone Commercial Lending, the financial position and results of operations of Gladstone Commercial Lending are consolidated with those of the Company.

Gladstone Commercial Advisers, Inc., a Delaware corporation (Commercial Advisers) and a subsidiary of the Company, is a taxable REIT subsidiary (TRS), which was created to collect all non-qualifying income related to the Company's real estate portfolio. There have been no such fees earned to date. Since the Company owns 100% of the voting securities of Commercial Advisers, the financial position and results of operations of Commercial Advisers are consolidated with those of the Company.

GCLP Business Trust I and GCLP Business Trust II, each a subsidiary and business trust of the Company, were formed under the laws of the Commonwealth of Massachusetts on December 28, 2005. The Company transferred its 99% limited partnership interest in the Operating Partnership to GCLP Business Trust I in exchange for 100 trust shares. Gladstone Commercial Partners, LLC transferred its 1% general partnership interest in the Operating Partnership to GCLP Business Trust II in exchange for 100 trust shares.

Interim Financial Information

Interim financial statements of the Company are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and pursuant to the requirements for reporting on Form 10-Q and in accordance with Article 10 of Regulation S-X. Accordingly, certain disclosures accompanying annual financial statements prepared in accordance with GAAP are omitted. In the opinion of the Company's management, all adjustments, consisting solely of normal recurring accruals, necessary for the fair statement of financial statements for the interim period have been included. The interim financial statements and notes thereto should be read in conjunction with the financial statements and notes thereto included in the Company's Form 10-K for the year ended December 31, 2010, as filed with the Securities and Exchange Commission on March 8, 2011.

Out of Period Adjustment

During the three months ended March, 31 2011, the Company recorded adjustments to due diligence expense, depreciation and amortization expense and to certain balance sheet accounts in connection with the property the Company acquired in December 2010. As a result of these errors, the Company understated net income by \$250 for the year ended December 31, 2010, or \$0.03 per share. The Company

Table of Contents

concluded that these adjustments were not material to the 2010 results of operations nor are they expected to be material to the full year 2011 results. As such, these adjustments were recorded during the three months ended March 31, 2011.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

Reclassifications

Certain amounts on the consolidated statements of operations from prior years' financial statements have been reclassified to conform to the current year presentation. These reclassifications had no effect on previously reported net income or stockholders' equity.

Investments in Real Estate

The Company records investments in real estate at cost and capitalizes improvements and replacements when they extend the useful life or improve the efficiency of the asset. The Company expenses costs of repairs and maintenance as such costs are incurred. The Company computes depreciation using the straight-line method over the estimated useful life or 39 years for buildings and improvements, 5 to 7 years for equipment and fixtures, and the shorter of the useful life or the remaining lease term for tenant improvements and leasehold interests.

The Company accounts for its acquisitions of real estate in accordance with Accounting Standards Codification (ASC) 805, Business Combinations, which requires that the purchase price of real estate be recorded at fair value and allocated to the acquired tangible assets and liabilities, consisting of land, building, tenant improvements, long-term debt and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, the value of in-place leases, the value of unamortized lease origination costs, the value of tenant relationships and the value of capital lease obligations, based in each case on their fair values. ASC 805 also requires that all expenses related to the acquisition be expensed as incurred, rather than capitalized into the cost of the acquisition as had been the previous accounting.

Management's estimates of value are made using methods similar to those used by independent appraisers (e.g., discounted cash flow analysis). Factors considered by management in its analysis include an estimate of carrying costs during hypothetical expected lease-up periods considering current market conditions and costs to execute similar leases. The Company also considers information obtained about each property as a result of its pre-acquisition due diligence, marketing and leasing activities in estimating the fair value of the tangible and intangible assets and liabilities acquired. In estimating carrying costs, management also includes real estate taxes, insurance and other operating expenses and estimates of lost rentals at market rates during the hypothetical expected lease-up periods, which primarily range from nine to eighteen months, depending on specific local market conditions. Management also estimates costs to execute similar leases, including leasing commissions, legal and other related expenses to the extent that such costs are not already incurred in connection with a new lease origination as part of the transaction.

The Company allocates purchase price to the fair value of the tangible assets of an acquired property by valuing the property as if it were vacant. The as-if-vacant value is allocated to land, building and tenant improvements based on management's determination of the relative fair values of these assets. Real estate depreciation expense on these tangible assets, was \$2,488 and \$4,878 for the three and six months ended June 30, 2011, respectively, and \$2,384 and \$4,775 for the three and six months ended June 30, 2010, respectively.

Table of Contents

Above-market and below-market in-place lease values for owned properties are recorded based on the present value (using an interest rate which reflects the risks associated with the leases acquired) of the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) management's estimate of fair market lease rates for the corresponding in-place leases, measured over a period equal to the remaining non-cancelable term of the lease. The capitalized above-market lease values, included in the accompanying balance sheet as part of deferred rent receivable, are amortized as a reduction of rental income over the remaining non-cancelable terms of the respective leases. Total amortization related to above-market lease values was \$91 and \$154 for the three and six months ended June 30, 2011, and \$63 and \$127 for the three and six months ended June 30, 2010, respectively. The capitalized below-market lease values, included in the accompanying consolidated balance sheet as deferred rent liability, are amortized as an increase to rental income over the remaining non-cancelable terms of the respective leases. Total amortization related to below-market lease values was \$250 and \$489 for the three and six months ended June 30, 2011, and \$231 and \$474 for the three and six months ended June 30, 2010, respectively.

The total amount of the remaining intangible assets acquired, which consist of in-place lease values, unamortized lease origination costs, and customer relationship intangible values, are allocated based on management's evaluation of the specific characteristics of each tenant's lease and the Company's overall relationship with that respective tenant. Characteristics to be considered by management in allocating these values include the nature and extent of our existing business relationships with the tenant, growth prospects for developing new business with the tenant, the tenant's credit quality and the Company's expectations of lease renewals (including those existing under the terms of the lease agreement), among other factors.

The value of in-place leases and unamortized lease origination costs are amortized to expense over the remaining term of the respective leases, which generally range from 10 to 15 years. The value of customer relationship intangibles, which is the benefit to the Company resulting from the likelihood of an existing tenant renewing its lease, are amortized to expense over the remaining term and any anticipated renewal periods in the respective leases, but in no event does the amortization period for intangible assets exceed the remaining depreciable life of the building. Should a tenant terminate its lease, the unamortized portion of the above-market and below-market lease values, in-place lease values, unamortized lease origination costs and customer relationship intangibles will be immediately charged to the related income or expense. Total amortization expense related to these intangible assets, was \$987 and \$1,967 for the three and six months ended June 30, 2011, respectively, and \$1,006 and \$1,938 for the three and six months ended June 30, 2010, respectively.

Impairment

The Company accounts for the impairment of real estate, including intangible assets, in accordance with ASC 360-10-35, Property, Plant, and Equipment, which requires the Company to periodically review the carrying value of each property to determine if circumstances indicate impairment in the carrying value of the investment exist or that depreciation periods should be modified. If circumstances support the possibility of impairment, the Company prepares a projection of the undiscounted future cash flows, without interest charges, of the specific property and determines if the investment in such property is recoverable. If impairment is indicated, the Company will write down the carrying value of the property to its estimated fair value.

In light of current economic conditions, the Company evaluates its entire portfolio each quarter for any impairment indicators and performed an impairment analysis on those select properties that had an indication of impairment. In performing the analysis, the Company considered such factors as the tenants' payment history and financial condition, the likelihood of lease renewal, business conditions in the industry in which the tenants operate and whether the fair value of the real estate has decreased. The Company concluded that none of its properties were impaired, and will continue to monitor its portfolio for any indicators that may change this conclusion. There have been no impairments recognized on real estate assets in the Company's history.

Table of Contents

The Company considers cash equivalents to be all short-term, highly-liquid investments that are both readily convertible to cash and have a maturity of three months or less at the time of purchase, except that any such investments purchased with funds held in escrow or similar accounts are classified as restricted cash. Items classified as cash equivalents include money-market deposit accounts. All of the Company's cash and cash equivalents at June 30, 2011 were held in the custody of three financial institutions, and the Company's balance at times may exceed federally insurable limits.

Restricted Cash

Restricted cash consists of security deposits and receipts from tenants for reserves. These funds will be released to the tenants upon completion of agreed upon tasks, as specified in the lease agreements, mainly consisting of maintenance and repairs on the buildings and upon receipt by the Company of evidence of insurance and tax payments. For purposes of the statements of cash flows, changes in restricted cash caused by changes in reserves held for tenants are shown as investing activities. Changes in restricted cash caused by changes in security deposits are reflected in cash from financing activities.

Funds Held in Escrow

Funds held in escrow consist of funds held by certain of the Company's lenders for properties held as collateral by these lenders. These funds will be released to the Company upon completion of agreed upon tasks, as specified in the mortgage agreements, mainly consisting of maintenance and repairs on the buildings, and when evidence of insurance and tax payments has been submitted to the lenders.

Deferred Financing Costs

Deferred financing costs consist of costs incurred to obtain financing, including legal fees, origination fees and administrative fees. The costs are deferred and amortized using the straight-line method, which approximates the effective interest method, over the term of the secured financing. The Company made payments of \$216 and \$226 for deferred financing costs during the three and six months ended June 30, 2011, respectively, and \$11 and \$61 for deferred financing cost during the three and six months ended June 30, 2010, respectively. Total amortization expense related to deferred financing costs is included in interest expense and was \$225 and \$456 for the three and six months ended June 30, 2011, respectively, and \$272 and \$544 for the three and six months ended June 30, 2010, respectively.

Obligation Under Capital Lease

In conjunction with the Company's acquisition of a building in Fridley, Minnesota in February 2008, the Company acquired a ground lease on the parking lot of the building, which had a purchase obligation to acquire the land under the ground lease at the end of the term in April 2014 for \$300. In accordance with ASC 840-10-25, Leases, the Company accounted for the ground lease as a capital lease and recorded the corresponding present value of the obligation under the capital lease. The Company recorded total interest expense related to the accretion of the capital lease obligation of \$3 and \$6 for each of the three and six months ended June 30, 2011 and 2010, respectively.

Revenue Recognition

Rental revenue includes rents that each tenant pays in accordance with the terms of its respective lease reported evenly over the non-cancelable term of the lease. Most of the Company's leases contain rental increases at specified intervals. The Company recognizes such revenues on a straight-line basis. Deferred rent receivable in the accompanying consolidated balance sheet includes the cumulative difference between rental revenue, as recorded on a straight line basis, and rents received from the tenants in accordance with the lease terms, along with the capitalized above-market in-place lease values of certain acquired properties. Accordingly, the Company determines, in its judgment, to what extent the deferred rent receivable applicable to each specific tenant is collectable. The Company reviews deferred rent receivable, as it relates to straight line rents, on a quarterly basis and takes into consideration the tenant's payment history, the financial condition of the tenant, business conditions in the industry in which the tenant

Table of Contents

operates and economic conditions in the geographic area in which the property is located. In the event that the collectability of deferred rent with respect to any given tenant is in doubt, the Company records an allowance for uncollectable accounts or records a direct write-off of the specific rent receivable. No such reserves or direct write-offs have been recorded as of June 30, 2011.

Tenant recovery revenue includes payments from tenants as reimbursements for franchise taxes, management fees, insurance, and ground lease payments. The Company recognizes tenant recovery revenue in the same periods that it incurs the related expenses.

Income Taxes

The Company has operated and intends to continue to operate in a manner that will allow it to qualify as a REIT under the Internal Revenue Code of 1986, as amended, and, accordingly, will not be subject to federal income taxes on amounts distributed to stockholders (except income from foreclosure property), provided that it distributes at least 90% of its REIT taxable income to its stockholders and meets certain other conditions. To the extent that the Company satisfies the distribution requirement but distributes less than 100% of its taxable income, the Company will be subject to federal corporate income tax on its undistributed income.

Commercial Advisers is a wholly-owned TRS that is subject to federal and state income taxes. Though Commercial Advisers has had no activity to date, the Company would account for any future income taxes in accordance with the provisions of ASC 740, *Income Taxes*. Under ASC 740-10-25, the Company accounts for income taxes using the asset and liability method under which deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases.

Asset Retirement Obligations

ASC 410, *Asset Retirement and Environmental Obligation*, requires an entity to recognize a liability for a conditional asset retirement obligation when incurred if the liability can be reasonably estimated. ASC 410-20-20 clarifies that the term *Conditional Asset Retirement Obligation* refers to a legal obligation (pursuant to existing laws or by contract) to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. ASC 410-20-25-6 clarifies when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. The Company has accrued a liability and corresponding increase to the cost of the related properties for disposal related to all properties constructed prior to 1985 that have, or may have, asbestos present in the building. The liabilities are accreted over the life of the leases for the respective properties. There were no liabilities accrued during the six months ended June 30, 2011 and 2010, as the properties acquired during these periods were constructed after 1985. The Company also recorded expenses of \$39 and \$77 during the three and six months ended June 30, 2011 respectively, and \$38 and \$75 during the three and six months ended June 30, 2010, respectively, related to the accretion of the obligation.

Stock Issuance Costs

The Company accounts for stock issuance costs in accordance with SEC Staff Accounting Bulletin (*SAB*) Topic 5.A, which states that incremental costs directly attributable to a proposed or actual offering of securities should be deferred and charged against the gross proceeds of the offering. Accordingly, the Company records costs incurred related to its ongoing equity offerings to other assets on its consolidated balance sheet and ratably applies these amounts to the cost of equity as stock is issued. If an equity offering is subsequently terminated and there are amounts remaining in other assets that have not been allocated to the cost of the offering, the remaining amounts are recorded as an expense on the consolidated statement of operations.

Table of Contents

2. Related-Party Transactions

The Company is externally managed pursuant to contractual arrangements with its Adviser and Gladstone Administration, LLC (the Administrator), which collectively employ all of the Company's personnel and pay their salaries, benefits, and general expenses directly. The Company has an advisory agreement with its Adviser (the Advisory Agreement) and an administration agreement with its Administrator (the Administration Agreement). The management services and administrative fees under the Advisory and Administration Agreements are described below. As of June 30, 2011 and December 31, 2010, respectively, \$1,091 and \$965 were due to the Adviser.

Advisory Agreement

The Advisory Agreement provides for an annual base management fee equal to 2% of the Company's total stockholders' equity, less the recorded value of any preferred stock (common stockholders' equity), and an incentive fee based on funds from operations (FFO). For the three and six months ended June 30, 2011 the Company recorded a base management fee of \$435 and \$787, respectively, and for the three and six months ended June 30, 2010, the Company recorded a base management fee of \$296 and \$609, respectively.

For purposes of calculating the incentive fee, FFO includes any realized capital gains and capital losses, less any distributions paid on preferred stock and senior common stock, but FFO does not include any unrealized capital gains or losses. The incentive fee rewards the Adviser if the Company's quarterly FFO, before giving effect to any incentive fee (pre-incentive fee FFO), exceeds 1.75%, or 7% annualized (the hurdle rate), of total common stockholders' equity. The Adviser receives 100% of the amount of the pre-incentive fee FFO that exceeds the hurdle rate, but is less than 2.1875% of the Company's common stockholders' equity. The Adviser also receives an incentive fee of 20% of the amount of the Company's pre-incentive fee FFO that exceeds 2.1875% of common stockholders' equity.

For the three and six months ended June 30, 2011, the Company recorded an incentive fee of \$840 and \$1,672, respectively, offset by a credit related to an unconditional and irrevocable voluntary waiver issued by the Adviser of \$445 and \$931, respectively, resulting in a net incentive fee for the three and six months ended June 30, 2011, of \$395 and \$741, respectively. For the three and six months ended June 30, 2010, the Company recorded an incentive fee of \$829 and \$1,675, respectively, offset by a credit related to an unconditional and irrevocable voluntary waiver issued by the Adviser of \$56 and \$56, respectively, resulting in a net incentive fee for the three and six months ended June 30, 2010, of \$773 and \$1,619, respectively. The Board of Directors of the Company accepted the Adviser's offer to waive on a quarterly basis a portion of the incentive fee for the three and six months ended June 30, 2011 and 2010, respectively in order to support the current level of distributions to the Company's stockholders. This waiver may not be recouped by the Adviser in the future.

Administration Agreement

Pursuant to the Administration Agreement, the Company pays for its allocable portion of the Administrator's overhead expenses in performing its obligations to the Company, including, but not limited to, rent and the salaries and benefits of its personnel, including its chief financial officer, chief compliance officer, internal counsel, treasurer, investor relations and their respective staffs. The Company's allocable portion of expenses is derived by multiplying the Administrator's total allocable expenses by the percentage of the Company's total assets at the beginning of each quarter in comparison to the total assets of all companies managed by the Adviser under similar agreements. For the three and six months ended June 30, 2011, the Company recorded an administration fee of \$260 and \$516, respectively, and for the three and six months ended June 30, 2010, the Company recorded an administration fee of \$219 and \$451, respectively.

Table of Contents*Dealer Manager Agreement*

In connection with the offering of the Company's Senior Common Stock, see Note 6, *Stockholders' Equity*, for further details, the Company entered into a Dealer Manager Agreement, dated March 25, 2011 (the "Dealer Manager Agreement"), with Gladstone Securities, LLC (the "Dealer Manager"), pursuant to which the Dealer Manager agreed to act as the Company's exclusive dealer manager in connection with the offering. The Dealer Manager is an affiliate of the Company, as its parent company is controlled by Mr. David Gladstone, the Company's Chairman and Chief Executive Officer. Pursuant to the terms of the Dealer Manager Agreement, the Dealer Manager is entitled to receive a sales commission in the amount of 7.0% of the gross proceeds of the shares of Senior Common Stock sold, plus a dealer manager fee in the amount of 3.0% of the gross proceeds of the shares of Senior Common Stock sold. The Dealer Manager, in its sole and absolute discretion, may re-allow all of its selling commissions attributable to a participating broker-dealer and may also re-allow a portion of its Dealer Manager fee earned in respect of the proceeds generated by the participating broker-dealer to any participating broker-dealer as a non-accountable marketing allowance. In addition, the Company has agreed to indemnify the Dealer Manager against various liabilities, including certain liabilities arising under the federal securities laws. The company has not made any payments to date to the Dealer Manager pursuant to this agreement.

3. Earnings per Share of Common Stock

The following tables set forth the computation of basic and diluted earnings per share of common stock for the three and six months ended June 30, 2011 and 2010. The Company computed basic earnings per share for the three and six months ended June 30, 2011 and 2010 using the weighted average number of shares outstanding during the periods. Diluted earnings per share for the three and six months ended June 30, 2011 and 2010, reflects additional shares of common stock, related to our convertible senior common stock, that would have been outstanding if dilutive potential shares of common stock had been issued, as well as an adjustment to net income available to common stockholders as applicable to common stockholders that would result from their assumed issuance.

	For the three months ended June 30,		For the six months ended June 30,	
	2011	2010	2011	2010
Calculation of basic earnings per share of common stock:				
Net income (loss) available to common stockholders	\$ 331	\$ (17)	\$ 772	\$ 46
Denominator for basic weighted average shares of common stock	9,782	8,545	9,522	8,552
Basic earnings per share of common stock	\$ 0.04	\$ 0.00	\$ 0.08	\$ 0.01

Calculation of diluted earnings per share of common stock:

Net income (loss) available to common stockholders	\$ 331	\$ (17)	\$ 772	\$ 46
Add: Income impact of assumed conversion of senior common stock	15		31	
Net income (loss) available to common stockholders plus assumed conversions	\$ 346	\$ (17)	\$ 803	\$ 46

Denominator for basic weighted average shares of common stock	9,782	8,545	9,522	8,552
Effect of convertible senior common stock	52	(1)	52	1
Denominator for diluted weighted average shares of common stock	9,834	8,545	9,574	8,553
Diluted earnings per share of common stock	\$ 0.04	\$ 0.00	\$ 0.08	\$ 0.01

(1) The convertible senior common stock was excluded from the calculation of diluted earnings per share for the three months ended June 30, 2010 because it was anti-dilutive.

Table of Contents**4. Real Estate and Intangible Assets***Real Estate*

The following table sets forth the components of the Company's investments in real estate, including capitalized leases, as of June 30, 2011 and December 31, 2010:

	June 30, 2011	December 31, 2010
Real estate:		
Land	\$ 58,146 ⁽¹⁾	\$ 55,158 ⁽¹⁾
Building and improvements	349,399	335,576
Tenant improvements	12,175	10,283
Accumulated depreciation	(48,537)	(43,659)
Real estate, net	\$ 371,183	\$ 357,358

⁽¹⁾ Includes land held under a capital lease carried at \$1,100.

During the six months ended June 30, 2011, the Company acquired two properties, which are summarized below:

On April 4, 2011, the Company acquired a 60,000 square foot office building located in Hickory, North Carolina for \$10,650, excluding related acquisition expenses of \$59. The Company funded this acquisition using borrowings from its line of credit. At closing, the Company was assigned the triple net lease with Fiserv Solutions, Inc., which has a remaining term of approximately nine years. The tenant has two options to extend the lease for additional periods of five years each. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of \$1,100.

On June 20, 2011, the Company acquired a 78,421 square foot office building located in Springfield, Missouri for \$15,850, excluding related acquisition expenses of \$57. The Company funded this acquisition through a combination of borrowings from its line of credit and the assumption of \$11,584 of mortgage debt on the property. At closing, the Company was assigned the existing triple net lease with T-Mobile USA, Inc., which has a remaining term of approximately ten years. The tenant has three options to extend the lease for additional periods of five years each. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of \$1,422.

Table of Contents

In accordance with ASC 805 the Company allocated the purchase price of the properties acquired during the six months ended June 30, 2011 as follows:

14

Table of Contents

	Land	Building	Tenant Improvements	In-place Leases	Leasing Costs	Customer Relationships	Above Market Leases	Carrying Value of Assumed Debt	Premium on Assumed Debt	Total Purchase Price
Hickory, North Carolina	\$ 1,163	\$ 5,567	\$ 1,038	\$ 736	\$ 559	\$ 616	\$ 971	\$	\$	\$ 10,650
Springfield, Missouri ⁽¹⁾	1,700	11,626	413	1,174	572	702		11,583	(337)	15,850
	\$ 2,863	\$ 17,193	\$ 1,451	\$ 1,910	\$ 1,131	\$ 1,318	\$ 971	\$ 11,583	\$ (337)	\$ 26,500

⁽¹⁾ The Company paid \$4.3 million in cash for this property, the remaining \$11.6 million was funded with the assumed mortgaged debt.

The weighted average amortization period for the intangible assets acquired during the six months ended June 30, 2011, were as follows:

Intangible assets	Years
In-place leases	9.4
Leasing costs	9.4
Customer relationships	17.5
Above market leases	8.8
All intangible assets	11.9

Future operating lease payments from tenants under non-cancelable leases, excluding tenant reimbursement of expenses, for the remainder of 2011 and each of the five succeeding fiscal years and thereafter is as follows:

Year	Tenant Lease Payments
Six months ending December 31, 2011	\$ 21,601
2012	42,287
2013	37,936
2014	33,884
2015	29,865
2016	25,423
Thereafter	164,174

In accordance with the lease terms, substantially all tenant expenses are required to be paid by the tenant; however, the Company would be required to pay property taxes on the respective properties, and ground lease payments on the property located in Tulsa, Oklahoma, in the event the tenant fails to pay them. The total annualized property taxes for all properties held by the Company at June 30, 2011 was \$6,900, and the total annual ground lease payments on the property located in Tulsa, Oklahoma was \$153.

On January 31, 2011, the Company extended the lease with its tenant occupying its properties located in Decatur, Georgia, Lawrenceville, Georgia, Snellville, Georgia, Covington, Georgia, and Conyers, Georgia. The lease covering

all of these properties was extended for an additional five year period, thereby extending the lease until December 2031. The lease was originally set to expire in December 2026. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of \$1,616. Furthermore, the lease grants the tenant four options to extend the lease for a period of five years each. In connection with the extension of the lease and the modification of certain terms under the lease, the tenant paid \$750 to the Company.

On May 15, 2011, the Company re-leased its previously vacant building located in South Hadley, Massachusetts for a period of six months, and the tenant has a three-month extension option. The lease provides for rent over the term of \$101.

On June 23, 2011, the Company extended the lease with its tenant occupying its properties located in Angola, Indiana and Rock Falls, Illinois. The lease covering these properties was extended for an additional three year period, thereby extending the lease until August 2023. The lease was originally set to expire in August 2020. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of \$345. Furthermore, the lease grants the tenant three options to extend the lease for a period of five years each.

Table of Contents*Intangible Assets*

The following table summarizes the value of intangible assets and the accumulated amortization for each intangible asset class:

	June 30, 2011		December 31, 2010	
	Lease	Accumulated	Lease	Accumulated
	Intangibles	Amortization	Intangibles	Amortization
In-place leases	\$ 21,879	\$ (9,265)	\$ 17,011	\$ (8,362)
Leasing costs	12,126	(5,155)	10,764	(4,685)
Customer relationships	19,430	(6,211)	17,636	(5,617)
	\$ 53,435	\$ (20,631)	\$ 45,411	\$ (18,664)

The estimated aggregate amortization expense for the remainder of 2011 and each of the five succeeding fiscal years and thereafter is as follows:

Year	Estimated Amortization Expense
Six months ending December 31, 2011	\$ 3,246
2012	5,706
2013	3,331
2014	3,072
2015	2,687
2016	2,127
Thereafter	12,635

Table of Contents**5. Mortgage Notes Payable and Line of Credit**

The Company's mortgage notes payable and line of credit as of June 30, 2011 and December 31, 2010 are summarized below:

	Date of Issuance/ Assumption	Principal Maturity Date	Stated Interest Rate at June 30, 2011 ⁽¹⁾	Principal Balance Outstanding June 30, 2011	December 31, 2010
Fixed-Rate Mortgage Notes Payable:					
	09/15/08	10/01/11 ⁽²⁾	4.58%	\$ 45,233	\$ 48,015
	02/21/06	12/01/13	5.91%	8,934	9,022
	02/21/06	06/30/14	5.20%	18,544	18,740
	08/25/05	09/01/15	5.33%	20,602	20,771
	09/12/05	09/01/15	5.21%	12,115	12,209
	12/21/05	12/08/15	5.71%	18,589	18,728
	09/06/07	12/11/15	5.81%	4,255	4,292
	03/29/06	04/01/16	5.92%	16,968	17,000

	06/20/11	06/30/16	6.08%	11,584	
	11/22/06	12/01/16	5.76%	13,858	13,954
	12/22/06	01/01/17	5.79%	21,184	21,330
	02/08/07	03/01/17	6.00%	13,775	13,775
	06/05/07	06/08/17	6.11%	14,240	14,240
	10/15/07	11/08/17	6.63%	15,376	15,474
	12/15/10	12/10/26	6.63%	10,602	10,795
	03/16/05	04/01/30	6.33%	2,483	2,642
Contractual Fixed-Rate Mortgage Notes Payable:				\$ 268,000	\$ 260,869
Premiums and Discounts, net:				(876)	(1,274)
Total Fixed-Rate Mortgage Notes Payable:				\$ 267,124	\$ 259,595
Variable-Rate Line of Credit:	12/28/10	12/27/13	LIBOR +3.00%	\$ 8,200	\$ 27,000
Total Mortgage Notes Payable and Line of Credit				\$ 275,324	\$ 286,595

- (1) The weighted average interest rate on all debt outstanding at June 30, 2011 was approximately 5.60%.
- (2) This note has three annual extension options, which gives the Company the ability to extend the term of the note until October 1, 2013. The first of these options was exercised on September 30, 2010.

Mortgage Notes Payable

As of June 30, 2011, the Company had 18 fixed-rate mortgage notes payable, collateralized by a total of 56 properties. The Company is not a co-borrower, but has limited recourse liabilities that could result from any one or more of the following circumstances: a borrower voluntarily filing for bankruptcy, improper conveyance of a property, fraud or material misrepresentation, misapplication or misappropriation of rents, security deposits, insurance proceeds or condemnation proceeds, or physical waste or damage to the property resulting from a borrower's gross negligence or willful misconduct. The Company will also indemnify lenders against claims resulting from the presence of hazardous substances or activity involving hazardous substances in violation of environmental laws on a property. The weighted-average interest rate on the mortgage notes payable as of June 30, 2011 was 5.68%.

The Company has \$45,233 of balloon principal payments maturing under one of its long-term mortgages on September 30, 2011; however, the mortgage has two remaining annual extension options through 2013, and the Company intends to exercise one of these options in 2011. As long as the Company is in compliance with certain covenants under the mortgage loan, it will be able to exercise the renewal option. As of June 30, 2011 the Company was in compliance with these covenants.

Table of Contents

The fair market value of all fixed-rate mortgage notes payable outstanding as of June 30, 2011 was \$261,089, as compared to the carrying value stated above of \$267,124. The fair market value is calculated based on a discounted cash flow analysis, using interest rates based on management's estimate of market interest rates on long-term debt with comparable terms.

Scheduled principal payments of mortgage notes payable for the remainder of 2011, each of the five succeeding fiscal years and thereafter are as follows:

Year	Scheduled principal payments
Six months ending December 31, 2011	\$ 47,081 ⁽¹⁾
2012	3,956
2013	12,793
2014	21,439
2015	55,282
2016	58,850
Thereafter	68,599
	\$ 268,000

- (1) The \$45.2 million mortgage note issued in September 2008 was extended on September 30, 2010 for one year. The Company expects to exercise additional options to extend the maturity date until October 2013.

Line of Credit

In December 2010, the Company procured a \$50,000 line of credit (with Capital One, N.A. serving as a revolving lender, a letter of credit issuer and as an administrative agent and Branch Banking and Trust Company serving as a revolving lender and a letter of credit issuer), which matures on December 28, 2013. The line of credit provides for a senior secured revolving credit facility of up to \$50,000 with a standby letter of credit sublimit of up to \$20,000. The line of credit may, upon satisfaction of certain conditions, be expanded up to \$75,000. Currently, nine of the Company's properties are pledged as collateral under its line of credit. The interest rate per annum applicable to the line of credit is equal to the London Interbank Offered Rate, or LIBOR, plus an applicable margin of up to 3.00%, depending upon the Company's leverage. The leverage ratio used in determining the applicable margin for interest on the line of credit is recalculated quarterly. The Company is subject to an annual maintenance fee of 0.25% per year. The Company's ability to access this source of financing is subject to its continued ability to meet customary lending requirements, such as compliance with financial and operating covenants and its meeting certain lending limits. One such covenant requires the Company to limit distributions to its stockholders to 95% of our FFO, with acquisition-related costs required to be expensed under ASC 805 added back to FFO. In addition, the maximum amount the Company may draw under this agreement is based on a percentage of the value of properties pledged as collateral to the banks, which must meet agreed upon eligibility standards.

If and when long-term mortgages are arranged for these pledged properties, the banks will release the properties from the line of credit and reduce the availability under the line of credit by the advanced amount of the released property. Conversely, as the Company purchases new properties meeting the eligibility standards, it may pledge these new properties to obtain additional availability under this agreement. The availability under the line of credit will also be reduced by letters of credit used in the ordinary course of business. The Company may use the advances under the line of credit for both general corporate purposes and the acquisition of new investments.

Table of Contents

At June 30, 2011, there was \$8,200 outstanding under the line of credit at an interest rate of 3.2% and \$5,050 outstanding under letters of credit at a weighted average interest rate of 3.0%. At June 30, 2011, the remaining borrowing capacity available under the line of credit was \$32,314. The Company was in compliance with all covenants under the line of credit as of June 30, 2011. The amount outstanding on the line of credit as of June 30, 2011 approximates fair value, because the debt is short-term and variable rate.

6. Stockholders' Equity

The following table summarizes the changes in stockholders' equity for the six months ended June 30, 2011:

	Preferred	Senior Common	Common	Capital in Excess of Par Value	Notes Receivable from Employees	Distributions in Excess of Accumulated Earnings	Total Stockholders Equity
Balance at December 31, 2010	\$ 2	\$	\$ 9	\$ 174,261	\$ (963)	\$ (61,934)	\$ 111,375
Issuance of common stock, net			2	34,403			34,405
Repayment of principal on employee notes receivable					532		532
Distributions declared to common, senior common and preferred stockholders						(9,302)	(9,302)
Net income						2,850	2,850
Balance at June 30, 2011	\$ 2	\$	\$ 11	\$ 208,664	\$ (431)	\$ (68,386)	\$ 139,860

The following table is a summary of all outstanding notes issued to employees of the Adviser for the exercise of stock options:

	Number of Options	Strike Price of Options	Amount of Promissory Note Issued to Employees	Outstanding Balance of Employee Loans at June 30, 2011	Outstanding Balance of Employee Loans at December 31, 2010	Maturity Date of Note	Interest Rate on Note
Date Issued	Exercised	Exercised					
Sep 2004	25	\$ 15.00	\$ 375	\$ 20	\$ 20		5.00%

						Sep 2013	
						Apr 2015	
Apr 2006	12	16.10	193	4	5	May 2016	7.77%
May 2006	50	16.85	843		531	May 2016	7.87%
May 2006	2	16.10	32	32	32	Nov 2015	7.87%
Nov 2006	25	15.00	375	375	375		8.15%
	114	\$	1,818	\$	431	\$	963

In accordance with ASC 505-10-45-2, Equity, receivables from employees for the issuance of capital stock to employees prior to the receipt of cash payment should be reflected in the balance sheet as a reduction to stockholders equity. Therefore, these notes were recorded as full recourse loans to employees and are included in the equity section of the accompanying consolidated balance sheets. As of June 30, 2011, each loan maintained its full recourse status.

Table of Contents

The Company's Board of Directors declared the following distributions per share for the three and six months ended June 30, 2011 and 2010:

	For the three months ended June 30,		For the six months ended June 30,	
	2011	2010	2011	2010
Common Stock	\$ 0.375	\$ 0.375	\$ 0.750	\$ 0.750
Senior Common Stock	\$ 0.2625	\$ 0.2625	\$ 0.5250	\$ 0.5250
Series A Preferred Stock	\$0.4843749	\$0.4843749	\$0.9687498	\$0.9687498
Series B Preferred Stock	\$ 0.4688	\$ 0.4688	\$ 0.9375	\$ 0.9375

On February 2, 2011, the Company sold 725,000 shares of its common stock at \$18.35 per share in an underwritten public offering of its common stock. The Company also granted the underwriters a 30-day option to purchase up to 108,750 shares of common stock on the same terms and conditions to cover over-allotments, if any. On February 11, 2011, the underwriters exercised their option to purchase an additional 108,750 shares of common stock. The net proceeds, including the over-allotment, after deducting the underwriting discount and offering expenses were \$14,322. The Company used the proceeds of the offering to repay a portion of the outstanding balance under its line of credit and for general corporate purposes.

On June 15, 2011, the Company sold 1,200,000 shares of its common stock at \$17.55 per share in an underwritten public offering of its common stock. The Company also granted the underwriters a 30-day option to purchase up to 180,000 shares of common stock on the same terms and conditions to cover over-allotments, if any. On July 6, 2011, the underwriters exercised their option to purchase an additional 174,000 shares of common stock. The net proceeds, including the over-allotment, after deducting the underwriting discount and offering expenses were \$22,705. The Company used the proceeds of the offering to repay a portion of the outstanding balance under its line of credit and for general corporate purposes.

The Company has an open market sale agreement, or the Open Market Sale Agreement, with Jefferies & Company, Inc., or Jefferies, under which it may, from time to time, offer to sell shares of its common stock with an aggregate sales price of up to \$25,000 on the open market through Jefferies, as agent, or to Jefferies, as principal. As of June 30, 2011, the Company had sold 192,365 shares with net proceeds of \$3,400, and has a remaining capacity to sell up to \$21,600 of common stock under the Open Market Sale Agreement with Jefferies. The program was not utilized during the three months ending June 30, 2011.

On March 28, 2011, the Company commenced an offering of an aggregate of 3,500,000 shares of its senior common stock, par value \$0.001 per share, at a price to the public of \$15.00 per share, of which 3,000,000 shares are intended to be offered pursuant to the primary offering and 500,000 shares are intended to be offered pursuant to the Company's distribution reinvestment plan (the "DRIP"). The Company, however, reserves the right to reallocate the number of shares being offered between the primary offering and the DRIP. To date the Company has not sold any shares of senior common stock in this ongoing offering.

7. Subsequent Events

On July 6, 2011, in connection with the Company's common stock offering completed on June 15, 2011, the underwriters of the offering exercised and closed their option to purchase an additional 174,000 shares of common stock from the Company. The Company received approximately \$2,865 in additional net proceeds from the sale of these shares after deducting the underwriting discount and offering expenses.

Table of Contents

On July 12, 2011, the Company's Board of Directors declared the following monthly distributions:

Common Stock Cash Distributions

Record Date	Payment Date	Distribution per Share
July 22, 2011	July 29, 2011	\$0.125
August 19, 2011	August 31, 2011	\$0.125
September 22, 2011	September 30, 2011	\$0.125

Senior Common Stock Cash Distributions

Payable to the Holders or Record During the Month of:	Payment Date	Distribution per Share
July	August 5, 2011	\$0.0875
August	September 8, 2011	\$0.0875
September	October 7, 2011	\$0.0875

Series A Preferred Stock Cash Distributions

Record Date	Payment Date	Distribution per Share
July 22, 2011	July 29, 2011	\$0.1614583
August 19, 2011	August 31, 2011	\$0.1614583
September 22, 2011	September 30, 2011	\$0.1614583

Series B Preferred Stock Cash Distributions

Record Date	Payment Date	Distribution per Share
July 22, 2011	July 29, 2011	\$0.15625
August 19, 2011	August 31, 2011	\$0.15625
September 22, 2011	September 30, 2011	\$0.15625

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

All statements contained herein, other than historical facts, may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. These statements may relate to, among other things, future events or our future performance or financial condition. In some cases, you can identify forward-looking statements by terminology such as may, might, believe, will, provided, anticipate, future, could, growth, plan, intend, expect, seek, possible, potential, likely or the negative of such terms or comparable terminology. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our business, financial condition, liquidity, results of operations, funds from operations or prospects to be materially different from any future business, financial condition, liquidity, results of operations, funds from operations or prospects expressed or implied by such forward-looking statements. For further information about these and other factors that could affect our future results, please see the captions titled Risk Factors in this report and in our Annual Report on Form 10-K for the year ended December 31, 2010. We caution readers not to place undue reliance on any such forward-looking statements, which are made pursuant to the Private Securities Litigation Reform Act of 1995 and, as such, speak only as of the date made. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, after the date of this Quarterly Report on Form 10-Q, or Report.

All references to we, our, us and the Company in this Report mean Gladstone Commercial Corporation and its consolidated subsidiaries, except where it is made clear that the term means only Gladstone Commercial Corporation.

OVERVIEW

General

We were incorporated under the General Corporation Law of the State of Maryland on February 14, 2003, primarily for the purpose of investing in and owning net leased industrial and commercial real property and selectively making long-term industrial and commercial mortgage loans. Most of our portfolio of real estate is leased to a wide cross section of tenants ranging from small businesses to large public companies, many of which are corporations that do not have publicly-rated debt. We have historically entered into, and intend in the future to enter into, purchase agreements for real estate having triple net leases with terms of approximately 10 to 15 years and built in rental rate increases. Under a triple net lease, the tenant is required to pay all operating, maintenance and insurance costs and real estate taxes with respect to the leased property. We are actively communicating with buyout funds, real estate brokers and other third parties to locate properties for potential acquisition or to provide mortgage financing in an effort to build our portfolio. We currently own 67 properties totaling 6.9 million square feet, which have a total gross and net carrying value, including intangible assets, of \$473.2 million and \$404.0 million, respectively.

Business Environment

The United States continues to recover from the recession that it entered into during late 2007; however, unemployment remains high and housing starts are low, and these key economic indicators will need to improve for the economy to fully recover. As a result, conditions within the U.S. capital markets generally, and the U.S. real estate capital markets particularly, continue to experience significant dislocation and stress. While we are seeing signs of improvement in both the equity and debt capital markets, these markets remain somewhat challenging.

As a result, the continued challenging economic conditions could still materially and adversely impact the financial condition of one or more of our tenants and, therefore, could increase the likelihood that a tenant may declare bankruptcy or default upon its payment obligations arising under a related lease. For example, the tenant occupying our building located in Hazelwood, Missouri declared bankruptcy in October 2010. The tenant did not confirm our lease in its bankruptcy proceedings in March 2011, and the final rent

Table of Contents

payment was received in April 2011. We are currently working to re-tenant this property. In addition, one of our other buildings remains vacant. The leases on these two vacant buildings comprised 2.4% of our annualized rental income and the annual carrying costs are \$223,000. We are actively seeking new tenants for these properties. All of our remaining properties are occupied and the tenants are paying in accordance with their leases.

Moreover, our ability to make new investments is highly dependent upon our ability to procure external financing. Our principal sources of external financing generally include the issuance of equity securities, long-term mortgage loans secured by properties and borrowings under our line of credit. The market for long-term mortgages has been limited for some time; however, we have recently seen mid-to-long-term (5 to 10 year) mortgages become more obtainable. The collateralized mortgage backed securities, or CMBS, market has been making a comeback in recent months, but it is much more conservative than it was prior to the recession. As a result, we will likely not have the same level of access to the CMBS market that we had prior to the recession. Consequently, we will be looking to both regional banks and the CMBS market to issue mortgages to finance our real estate activities.

Recent Developments

Investment Activities

On April 4, 2011, we acquired a 60,000 square foot office building located in Hickory, North Carolina for \$10.7 million, including related acquisition expenses of \$59,000. We funded this acquisition using borrowings from our line of credit. At closing, we were assigned the existing triple net lease with the existing tenant, which has a remaining term of approximately nine years. The tenant has two options to extend the lease for additional periods of five years each. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of \$1.1 million.

On June 20, 2011, we acquired a 78,421 square foot office building located in Springfield, Missouri for \$15.9 million, including related acquisition expenses of \$57,000. We funded this acquisition through a combination of borrowings from our line of credit and the assumption of approximately \$11.6 million of mortgage debt on the property. At closing, we were assigned the existing triple net lease with T-Mobile USA, Inc., which has a remaining term of approximately ten years. The tenant has three options to extend the lease for additional periods of five years each. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of \$1.4 million.

Leasing Activities

On May 15, 2011, we re-leased our previously vacant building located in South Hadley, Massachusetts for a period of six months, with a three-month extension option. The lease provides for rent over the term of \$101,000.

On June 23, 2011, we extended the lease with the tenant occupying our properties located in Angola, Indiana and Rock Falls, Illinois. The lease covering these properties was extended for an additional three year period, thereby extending the lease until August 2023. The lease was originally set to expire in August 2020. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of approximately \$345,000. Furthermore, the lease grants the tenant three options to extend the lease for a period of five years each.

Equity Activities

On February 2, 2011, we closed on the sale of 725,000 shares of our common stock at \$18.35 per share in an underwritten public offering of our common stock. Subsequently, on February 16, 2011, we closed on the sale of an additional 108,750 shares of common stock on the same terms and conditions in connection with the underwriters exercise of their over-allotment option. The net proceeds, including the over-allotment, after deducting the underwriting discount and offering expenses were \$14.3 million. We used

Table of Contents

the proceeds of the offering to repay a portion of the outstanding balance under our line of credit and for general corporate purposes. The shares were issued under our effective shelf registration statement on file with the Securities and Exchange Commission, or SEC.

On June 15, 2011, we closed on the sale of 1,200,000 shares of our common stock at \$17.55 per share in an underwritten public offering of our common stock. Subsequently, on July 6, 2011, we closed on the sale of an additional 174,000 shares of common stock on the same terms and conditions in connection with the underwriters exercise of their over-allotment option. The net proceeds, including the over-allotment, after deducting the underwriting discount and offering expenses were \$22.7 million. We used the proceeds of the offering to repay a portion of the outstanding balance under our line of credit and for general corporate purposes. The shares were issued under our effective shelf registration statement on file with the SEC.

Diversity of Our Portfolio

Gladstone Management Corporation, or our Adviser, seeks to diversify our portfolio to avoid dependence on any one particular tenant, geographic market or tenant industry. By diversifying our portfolio, our Adviser intends to reduce the adverse effect on our portfolio of a single under-performing investment or a downturn in any particular industry or geographic market. Our largest tenant at June 30, 2011 comprised 7.2% of our total rental income, and our largest concentration of properties was located in Ohio, which accounted for 17.4% of our total rental income. The table below reflects the breakdown of our total rental income by tenant industry classification for the six months ended June 30, 2011 and 2010, respectively:

Industry Classification	For the six months ended June 30, 2011		For the six months ended June 30, 2010	
	(Dollars in Thousands)		(Dollars in Thousands)	
	Rental Income	Percentage of Rental Income	Rental Income	Percentage of Rental Income

Table of Contents

Our Adviser and Administrator

Our Adviser is led by a management team which has extensive experience purchasing real estate and originating mortgage loans. Our Adviser is controlled by Mr. David Gladstone, our chairman and chief executive officer. Mr. Gladstone is also the chairman and chief executive officer of our Adviser. Terry Lee Brubaker, our vice chairman, chief operating officer, secretary and director, is a member of the board of directors of our Adviser as well as its vice chairman and chief operating officer. George Stelljes III, our president, chief investment officer and director, is a member of the board of directors of our Adviser and its president and chief investment officer. Gladstone Administration, LLC, or our Administrator, employs our chief financial officer, chief compliance officer, internal counsel, treasurer, investor relations department and their respective staffs. Our Adviser and Administrator also provide investment advisory and administrative services, respectively, to our affiliates, Gladstone Capital Corporation and Gladstone Investment Corporation, both publicly-traded business development companies, as well as Gladstone Land Corporation, a private agricultural real estate company. With the exception of our chief financial officer, all of our executive officers serve as either directors or executive officers, or both, of Gladstone Capital Corporation and Gladstone Investment Corporation. Our treasurer is also an executive officer of Gladstone Securities, a broker-dealer registered with the Financial Industry Regulatory Authority. In the future, our Adviser may provide investment advisory services to other funds, both public and private, of which it is the sponsor.

Advisory and Administration Agreements

We are externally managed pursuant to contractual arrangements with our Adviser and our Administrator. Our Adviser and Administrator employ all of our personnel and pay their payroll, benefits, and general expenses directly. We have an advisory agreement with our Adviser, or the Advisory Agreement, and an administration agreement with our Administrator, or the Administration Agreement.

Under the terms of the Advisory Agreement, we are responsible for all expenses incurred for our direct benefit. Examples of these expenses include legal, accounting, interest on short-term debt and mortgages, tax preparation, directors and officers insurance, stock transfer services, stockholder-related fees, consulting and related fees. In addition, we are also responsible for all fees charged by third parties that are directly related to our business, which may include real estate brokerage fees, mortgage placement fees, lease-up fees and transaction structuring fees (although we may be able to pass some or all of such fees on to our tenants and borrowers).

During the three and six months ended June 30, 2011 and 2010, none of these third party expenses were incurred by us directly. The actual amount of such fees that we incur in the future will depend largely upon the aggregate costs of the properties that we acquire, the aggregate amount of mortgage loans that we make and the extent to which we are able to shift the burden of such fees to our tenants and borrowers. Accordingly, the amount of these fees that we will pay in the future is not determinable at this time.

Management Services and Fees under the Advisory Agreement

The Advisory Agreement provides for an annual base management fee equal to 2.0% of our total stockholders' equity, less the recorded value of any preferred stock, or total common stockholders' equity, and for an incentive fee based on funds from operations, or FFO. Our Adviser does not charge acquisition or disposition fees when we acquire or dispose of properties as is common with other externally-advised REITs. Furthermore, there are no fees charged when our Adviser secures long or short term credit or arranges mortgage loans on our properties, however, our Adviser may earn fee income from our borrowers or tenants or other sources. This fee income earned by our Adviser, or a portion thereof, may, at the sole discretion of the Board of Directors, be credited against our base management fee as a rebate to the base management fee.

Table of Contents

For purposes of calculating the incentive fee, FFO includes any realized capital gains and capital losses, less any distributions paid on preferred stock and senior common stock, but FFO does not include any unrealized capital gains or losses. The incentive fee would reward our Adviser if our quarterly FFO, before giving effect to any incentive fee, or pre-incentive fee FFO, exceeds 1.75%, or the hurdle rate, of total common stockholders' equity. We pay our Adviser an incentive fee with respect to our pre-incentive fee FFO in each calendar quarter as follows:

no incentive fee in any calendar quarter in which our pre-incentive fee FFO does not exceed the hurdle rate of 1.75% (7% annualized);

100% of the amount of the pre-incentive fee FFO that exceeds the hurdle rate, but is less than 2.1875% in any calendar quarter (8.75% annualized); and

20% of the amount of our pre-incentive fee FFO that exceeds 2.1875% in any calendar quarter (8.75% annualized).

Quarterly Incentive Fee Based on FFO

Pre-incentive fee FFO

(expressed as a percentage of total common stockholders' equity)

Percentage of pre-incentive fee FFO allocated to the incentive fee

The incentive fee may be reduced because of a covenant which exists in our line of credit agreement which limits distributions to our stockholders to 95% of FFO. In order to comply with this covenant, our Board of Directors accepted our Adviser's offer to unconditionally, irrevocably and voluntarily waive on a quarterly basis a portion of the incentive fee for both the three and six months ended June 30, 2011 and 2010, respectively, which allowed us to maintain the current level of distributions to our stockholders. These waived fees may not be recouped by our Adviser in the future. Our Adviser has indicated that it intends to continue to waive all or a portion of the incentive fee in order to support the current level of distributions to our stockholders; however, our Adviser is not required to issue any such waiver, either in whole or in part.

Administration Agreement

Pursuant to the Administration Agreement, we pay for our allocable portion of our Administrator's overhead expenses incurred while performing its obligations to us, including, but not limited to, rent and the salaries and benefits expenses of our personnel, including our chief financial officer, chief compliance officer, internal counsel, treasurer, investor relations and their respective staffs. Our allocable portion of expenses is generally derived by multiplying our Administrator's total expenses by the percentage of our total assets at the beginning of each quarter in comparison to the total assets of all companies managed by our Adviser under similar agreements.

Critical Accounting Policies

The preparation of our financial statements in accordance with generally accepted accounting principles in the United States of America, or GAAP, requires management to make judgments that are subjective in nature in order to make certain estimates and assumptions. Management relies on its experience, collects historical and current market data and analyzes this information in order to arrive at what it believes to be reasonable estimates. Under different conditions or assumptions, materially different amounts could be reported related to the accounting policies described below. In addition, application of these accounting

Table of Contents

policies involves the exercise of judgment regarding the use of assumptions as to future uncertainties, and as a result, actual results could materially differ from these estimates. A summary of all of our significant accounting policies is provided in Note 1 to our consolidated financial statements included elsewhere in this Form 10-Q. Below is a summary of accounting policies involving estimates and assumptions that require complex, subjective or significant judgments in their application and that materially affect our results of operations.

Allocation of Purchase Price

When we acquire real estate, we allocate the purchase price, less any expenses related to the acquisition, to (i) the acquired tangible assets and liabilities, consisting of land, building, tenant improvements, long-term debt and (ii) the identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, in-place leases, unamortized lease origination costs, tenant relationships and capital lease obligations, based in each case on their fair values. All expenses related to the acquisition are expensed as incurred, rather than capitalized into the cost of the acquisition as had been required by the previous accounting.

Management's estimates of value are made using methods similar to those used by independent appraisers (e.g., discounted cash flow analysis). Factors considered by management in its analysis include an estimate of carrying costs during hypothetical expected lease-up periods, considering current market conditions and costs to execute similar leases. We also consider information obtained about each property as a result of our pre-acquisition due diligence, marketing and leasing activities in estimating the fair value of the tangible and intangible assets and liabilities acquired. In estimating carrying costs, management also includes real estate taxes, insurance and other operating expenses and estimates of lost rentals at market rates during the hypothetical expected lease-up periods, which primarily range from 9 to 18 months, depending on specific local market conditions. Management also estimates costs to execute similar leases, including leasing commissions, legal and other related expenses to the extent that such costs are not already incurred in connection with a new lease origination as part of the transaction. Management also considers the nature and extent of our existing business relationships with the tenant, growth prospects for developing new business with the tenant, the tenant's credit quality and management's expectations of lease renewals (including those existing under the terms of the lease agreement), among other factors. A change in any of the assumptions above, which are very subjective, could have a material impact on our results of operations.

The allocation of the purchase price directly affects the following in our consolidated financial statements:

The amount of purchase price allocated to the various tangible and intangible assets on our balance sheet;

The amounts allocated to the value of above-market and below-market lease values are amortized to rental income over the remaining non-cancelable terms of the respective leases. The amounts allocated to all other tangible and intangible assets are amortized to depreciation or amortization expense. Thus, depending on the amounts allocated between land and other depreciable assets, changes in the purchase price allocation among our assets could have a material impact on our FFO, a metric which is used by many REIT investors to evaluate our operating performance; and

The period of time over which tangible and intangible assets are depreciated varies greatly, and thus, changes in the amounts allocated to these assets will have a direct impact on our results of operations. Intangible assets are generally amortized over the respective life of the leases, which normally range from 10 to 15 years. Also, we depreciate our buildings over 39 years, but do not depreciate our land. These differences in timing could have a material impact on our results of operations.

Table of Contents

Asset Impairment Evaluation

We periodically review the carrying value of each property to determine if circumstances that indicate impairment in the carrying value of the investment exist or that depreciation periods should be modified. In determining if impairment exists, management considers such factors as our tenants' payment histories, the financial condition of our tenants, including calculating the current leverage ratios of tenants, the likelihood of lease renewal, business conditions in the industries in which our tenants operate and whether the carrying value of our real estate has decreased. If any of the factors above support the possibility of impairment, we prepare a projection of the undiscounted future cash flows, without interest charges, of the specific property and determine if the carrying amount in such property is recoverable. In preparing the projection of undiscounted future cash flows, we estimate the holding periods of the properties and cap rates using information that we obtain from market comparability studies and other comparable sources. If impairment is indicated, the carrying value of the property would be written down to its estimated fair value based on our best estimate of the property's discounted future cash flows using assumptions from market participants. Any material changes to the estimates and assumptions used in this analysis could have a significant impact on our results of operations, as the changes would impact our determination of whether impairment is deemed to have occurred and the amount of impairment loss that we would recognize.

Using the methodology discussed above and in light of the current economic conditions discussed above in

Overview-Business Environment, we evaluated our entire portfolio as of June 30, 2011 for any impairment indicators and performed an impairment analysis on those select properties that had an indication of impairment. As a result of this analysis, we concluded that none of our properties were impaired and we will continue to monitor our portfolio for any indicators that may change our conclusion.

Table of Contents**Results of Operations**

The weighted-average yield on our total portfolio, taking into account vacant properties, was 9.4% as of June 30, 2011. If the portfolio were fully occupied the weighted-average yield would have been 9.6%, assuming returns on our vacant buildings remain steady, as of June 30, 2011. The weighted-average yield on our portfolio is calculated by taking the annualized straight-line rents, reflected as rental income on our consolidated statements of operations, of each acquisition as a percentage of the acquisition. The weighted-average yield does not account for the interest expense incurred on the mortgages placed on our properties.

A comparison of our operating results for the three and six months ended June 30, 2011 and 2010 is below:

Table of Contents

Operating Revenues

Rental income increased for both the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010, because of three properties acquired subsequent to June 30, 2010, partially offset by the lost rental income from two of our properties, which are now vacant.

Interest income from mortgage notes receivable decreased for both the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010, as our only mortgage loan was fully repaid in July 2010. Tenant recovery revenue increased slightly for both the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010, because of an increase in insurance premiums from 2010, resulting in increased reimbursements from our tenants.

Operating Expenses

Depreciation and amortization expenses increased for both the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010, because we acquired three properties subsequent to June 30, 2010. Property operating expenses consist of franchise taxes, management fees, insurance, ground lease payments and overhead expenses paid on behalf of certain of our properties. Property operating expenses decreased during the three months ended June 30, 2011, as compared to the three months ended June 30, 2010, because of a decrease in repairs in maintenance incurred during the three months ended June 30, 2011 versus the three months ended June 30, 2010, partially offset by overhead expenses for which we are now responsible, which were previously paid directly by our tenants, at our two vacant properties. Property operating expenses increased during the six months ended June 30, 2011, as compared to the six months ended June 30, 2010, because of overhead expenses for which we are now responsible, which were previously paid directly by our tenants, at our two vacant properties, partially offset by a reduction in repairs in maintenance at certain of our properties.

Due diligence expense primarily consists of legal fees and fees incurred for third-party reports prepared in connection with potential acquisitions and our due diligence analyses related thereto. Due diligence expense increased for the three months ended June 30, 2011, as compared to the three months ended June 30, 2010, because of costs incurred related to the two acquisitions closed during the three months ended June 30, 2011 coupled with due diligence costs incurred for deals in our pipeline. Due diligence expense decreased for the six months ended June 30, 2011, as compared to the six months ended June 30, 2010, due to an out of period adjustment of \$250,000 recorded during the three months ended March 31, 2011 related to the acquisition of the property in Orange City, Iowa in December 2010. See Note 1 to our consolidated financial statements included elsewhere in this Form 10-Q for further detail of the out of period adjustment.

The base management fee increased for the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010, due to an increase in total common stockholders' equity from the issuance of common shares during the six months ended June 30, 2011, the main component of the calculation. The calculation of the base management fee is described in detail above under *Advisory and Administration Agreements*.

The incentive fee increased for the three months ended June 30, 2011, as compared to the three months ended June 30, 2010, due to the increase in pre-incentive fee FFO caused by the increase in rental income from the three properties acquired subsequent to June 30, 2010 coupled with a reduction in interest expense and general and administrative expenses for the period. The incentive fee remained relatively flat for the six months ended June 30, 2011, as compared to the six months ended June 30, 2010, because pre-incentive fee FFO remained flat. The calculation of the incentive fee is described in detail above under *Advisory and Administration Agreements*.

Table of Contents

The administration fee increased for the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010, primarily as a result of an increase in the amount of the total expenses allocated from our Administrator during the periods, coupled with an increase in our allocable portion of the total expenses. The calculation of the administration fee is described in detail above under *Advisory and Administration Agreements*. General and administrative expenses decreased for the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010, primarily as a result of a reduction in legal fees incurred at certain of our properties.

Other Income and Expense

Interest income on employee loans decreased during the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010. This decrease was a result of loan payoffs made by employees during 2010 and 2011, coupled with other principal repayments made during the periods.

Other income decreased during the three months ended June 30, 2011, as compared to the three months ended June 30, 2010, because of income received during the three months ended June 30, 2010 related to tax refunds received during the three months ended June 30, 2010 for overpayment of franchise taxes in certain states. Other income increased during the six months ended June 30, 2011, as compared to the six months ended June 30, 2010, because of settlement income received from the previous tenant in our South Hadley, Massachusetts property related to repairs needed for the parking lot at the building.

Interest expense decreased for the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010. This decrease was primarily a result of the 2.3% decrease in the interest rate charged on our \$45.2 million mortgage loan that was renewed in September 2010, coupled with reduced interest expense on our long-term financings from amortizing principal payments made during 2010 and 2011, partially offset by interest on mortgage debt assumed in December 2010 and June 2011.

Net Income Available to Common Stockholders

Net income available to common stockholders increased for the three and six months ended June 30, 2011, as compared to the three and six months ended June 30, 2010 primarily because of the out of period adjustment that was recorded during the three months ended March 31, 2011, coupled with increased rental income and a decrease in interest expense, as discussed above.

Liquidity and Capital Resources

Overview

Our sources of liquidity include cash flows from operations, cash and cash equivalents, borrowings under our line of credit, obtaining mortgages on our unencumbered properties and issuing additional equity securities. Our available liquidity at June 30, 2011 was \$34.6 million, including \$2.3 million in cash and cash equivalents and an available borrowing capacity of \$32.3 million under our line of credit.

Future Capital Needs

We actively seek conservative investments that are likely to produce income in order to pay distributions as well as attractive long-term capital gains for our stockholders. If we are able to raise, procure or borrow additional equity and debt capital, we would intend to use the proceeds to continue to invest in industrial and commercial real property as well as expand our investment portfolio into other real property sectors, such as retail and medical properties, make mortgage loans, repurchase shares of our preferred stock on the open market or pay down outstanding borrowings under our line of credit. Accordingly, to ensure that we are able to effectively execute our business strategy, we routinely review our liquidity requirements and continually evaluate all potential sources of liquidity. Our short-term liquidity needs include proceeds

Table of Contents

necessary to fund our distributions to stockholders, pay the debt services costs on our existing long-term mortgages, and fund our current operating costs. Our long-term liquidity needs include proceeds necessary to grow and maintain our portfolio of investments.

We believe that our available liquidity is sufficient to fund our distributions to stockholders, pay the debt service costs on our existing long-term mortgages and fund our current operating costs in the near term. We further believe that our cash flow from operations coupled with the potential financing capital available to us in the future are sufficient to fund our long-term liquidity needs. Additionally, to satisfy either our short-term or long-term obligations or both, we may require credits to our management fees that are issued from our Adviser although our Adviser is under no obligation to provide any such credits, either in whole or in part.

Equity Capital

Equity capital markets continue to improve. As a result, we were able to raise \$3.4 million of common equity pursuant to our Open Market Sales Agreement with Jefferies during 2010. We have not sold any common shares under our Open Market Agreement during 2011, however, we raised \$14.3 million of common equity in February 2011 and another \$22.7 million of common equity in June 2011. See *Overview Recent Developments* above. We used these proceeds to repay a portion of the outstanding balance of the line of credit, to acquire additional properties and the remainder for general corporate and working capital needs.

Currently, we have the ability to raise up to \$257.2 million of additional equity capital through the sale of securities that are registered under our universal shelf registration statement on Form S-3 (the "Universal Shelf") in one or more future public offerings. Of the \$257.2 million of available capacity under our Universal Shelf, \$21.6 million of common stock is reserved for additional sales under our Open Market Sale Agreement and \$52.5 million is reserved for sales of our Senior Common Stock.

Debt

As of June 30, 2011, we had 18 fixed-rate mortgage notes payable in the aggregate principal amount of \$268.0 million, collateralized by a total of 56 properties with terms at issuance ranging from 2 years to 25 years. The weighted-average interest rate on the mortgage notes payable as of June 30, 2011 was 5.68%.

We believe that banks are recommencing their general lending practices and the CMBS market is returning, see the discussion in *Overview Business Environment* above. Specifically, we are beginning to see banks that are willing to issue medium to long-term mortgages, between five and ten years, albeit on less favorable terms than were previously available. Consequently, we are focused on obtaining mortgages through both regional banks and CMBS.

We have mortgage debt in the aggregate principal amount of \$1.8 million payable during the remainder of 2011 and \$4.0 million payable during 2012. This does not include \$45.2 million of balloon principal payments maturing on one of our long-term mortgages in 2011; however, this mortgage has two remaining annual extension options through 2013, and we intend to exercise one of these options in 2011. As long as we are in compliance with certain covenants under the mortgage loan, we will be able to exercise the renewal option. The mortgage payments due in 2011 and 2012 are solely comprised of debt amortization payments. We have no balloon principal payments due under any of our other mortgage loans until 2013. We intend to pay the debt amortization payments from operating cash flow and borrowings under our line of credit.

Operating Activities

Net cash provided by operating activities during the six months ended June 30, 2011 was \$9.6 million, as compared to net cash provided by operating activities of \$7.1 million for the six months ended June 30, 2010. This increase was primarily a result of the \$750,000 lease modification fee received from the tenant located in our properties in Georgia in connection with the extension of their lease in January 2011,

Table of Contents

coupled with rental income received from the three properties acquired subsequent to June 30, 2010, and expenses incurred during the six months ended June 30, 2010 related to our terminated offering of our unregistered senior common stock, which were not incurred in 2011. This was partially offset by the two vacancies in our properties, coupled with the lost interest income from the repayment of our mortgage loan in 2010. The majority of cash from operating activities is generated from the rental payments that we receive from our tenants. We utilize this cash to fund our property-level operating expenses and use the excess cash primarily for debt and interest payments on our mortgage notes payable, interest payments on our line of credit, distributions to our stockholders, management fees to our Adviser, and other entity-level expenses.

Investing Activities

Net cash used in investing activities during the six months ended June 30, 2011 was \$16.4 million, which primarily consisted of the acquisition of two properties in 2011, coupled with tenant improvements performed at certain of our properties and net payments to our lenders for reserves, as compared to net cash used in investing activities during the six months ended June 30, 2010 of \$238,000 which primarily consisted of net receipts from lenders for reserves and a decrease in the amount of our restricted cash, partially offset by tenant improvements performed at certain of our properties.

Financing Activities

Net cash provided by financing activities for the six months ended June 30, 2011 was \$2.1 million, which primarily consisted of proceeds from the sale of common stock, partially offset by distributions paid to our stockholders, principal repayments on mortgage notes payable and net repayments on our line of credit. Net cash used in financing activities for the six months ended June 30, 2010 was \$7.1 million, which primarily consisted of distributions paid to our stockholders and principal repayments on mortgage notes payable, partially offset by net borrowings from our line of credit.

Line of Credit

In December 2010, we procured a \$50.0 million line of credit maturing on December 28, 2013, with Capital One, N.A. serving as a revolving lender, a letter of credit issuer and as an administrative agent and Branch Banking and Trust Company serving as a revolving lender and a letter of credit issuer. The line of credit provides for a senior secured revolving credit facility of up to \$50.0 million, with a standby letter of credit sublimit of up to \$20.0 million. The line of credit may, upon satisfaction of certain conditions, be expanded up to \$75.0 million. Currently, nine of our properties are pledged as collateral under our line of credit. The interest rate per annum applicable to the line of credit is equal to the London Interbank Offered Rate, or LIBOR, plus an applicable margin of up to 3.00% depending upon our leverage. Our leverage ratio used in determining the applicable margin for interest on the line of credit is recalculated quarterly. We are subject to an annual maintenance fee of 0.25% per year. Our ability to access this source of financing is subject to our continued ability to meet customary lending requirements such as compliance with financial and operating covenants and our meeting certain lending limits. One such covenant requires us to limit distributions to our stockholders to 95% of our FFO, with acquisition-related costs required to be expensed under ASC 805 added back to FFO. In addition, the maximum amount that we may draw under this agreement is based on a percentage of the value of properties pledged as collateral to the banks, which must meet agreed upon eligibility standards.

If and when we are able to procure long-term mortgages for these pledged properties, the banks will release the properties from the line of credit and reduce the availability under the line of credit by the advanced amount of the released property. Conversely, as we purchase new properties meeting the eligibility standards, we may pledge these new properties to obtain additional advances under this agreement. Our availability under the line of credit will also be reduced by letters of credit used in the ordinary course of business. We may use the advances under the line of credit for both general corporate purposes and the acquisition of new investments.

Table of Contents

At June 30, 2011, there was \$8.2 million outstanding under the line of credit at an interest rate of 3.2% and \$5.1 million outstanding under letters of credit at a weighted average interest rate of 3.0%. At June 30, 2011, the remaining borrowing capacity available under the line of credit was \$32.3 million. Our ability to increase the availability under our line of credit is dependent upon our pledging additional properties as collateral. Traditionally, we have pledged new properties to the line of credit as we arrange for long-term mortgages for these pledged properties. Currently, only eleven of our properties do not have long-term mortgages, and nine of those are pledged as collateral under our line of credit. Accordingly, we have only two properties which are unencumbered, and which may be pledged as collateral to increase the borrowing capacity available under the line of credit. We were in compliance with all covenants under the line of credit as of June 30, 2011.

Contractual Obligations

The following table reflects our material contractual obligations as of June 30, 2011:

Contractual Obligations	Total	Payments Due by Period (Dollars in Thousands)			
		Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Debt Obligations ⁽¹⁾	276,200	\$ 48,988	\$ 42,486	\$ 105,551	\$ 79,175
Interest on Debt Obligations ⁽²⁾	66,642	14,082	26,585	19,607	6,368
Capital Lease Obligations ⁽³⁾	300		300		
Operating Lease Obligations ⁽⁴⁾	1,527	153	305	305	764
Total	\$ 344,669	\$ 63,223	\$ 69,676	\$ 125,463	\$ 86,307

- (1) Debt obligations represent borrowings under our line of credit, which represents \$8,200 of the debt obligation due in 2013, and mortgage notes payable that were outstanding as of June 30, 2011. The \$45,233 mortgage note issued in September 2008 matures in October 2011, and we expect to exercise each of our options to extend the maturity date until October 2013.
- (2) Interest on debt obligations includes estimated interest on our borrowings under our line of credit. The balance and interest rate on our line of credit is variable; thus, the amount of interest calculated for purposes of this table was based upon rates and balances as of June 30, 2011.
- (3) Capital lease obligations represent the obligation to purchase the land held under the ground lease on our property located in Fridley, Minnesota.
- (4) Operating lease obligations represent the ground lease payments due on our Tulsa, Oklahoma property, which expires in June 2021.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as of June 30, 2011.

Table of Contents

Funds from Operations

The National Association of Real Estate Investment Trusts, or NAREIT, developed FFO as a relative non-GAAP supplemental measure of operating performance of an equity REIT, in order to recognize that income-producing real estate historically has not depreciated on the same basis determined under GAAP. FFO, as defined by NAREIT, is net income (computed in accordance with GAAP), excluding gains or losses from sales of property, plus depreciation and amortization of real estate assets, and after adjustments for unconsolidated partnerships and joint ventures.

FFO does not represent cash flows from operating activities in accordance with GAAP, which, unlike FFO, generally reflects all cash effects of transactions and other events in the determination of net income and should not be considered an alternative to net income as an indication of our performance or to cash flows from operations as a measure of liquidity or ability to make distributions. Comparison of FFO, using the NAREIT definition, to similarly titled measures for other REITs may not necessarily be meaningful due to possible differences in the application of the NAREIT definition used by such REITs.

FFO available to common stockholders is FFO adjusted to subtract distributions made to holders of preferred and senior common stock. We believe that net income available to common stockholders is the most directly comparable GAAP measure to FFO available to common stockholders.

Basic funds from operations per share, or Basic FFO per share, and diluted funds from operations per share, or Diluted FFO per share, is FFO available to common stockholders divided by the number of weighted average shares of common stock outstanding and FFO available to common stockholders divided by the number of weighted average shares of common stock outstanding on a diluted basis, respectively, during a period. We believe that FFO available to common stockholders, Basic FFO per share and Diluted FFO per share are useful to investors because they provide investors with a further context for evaluating our FFO results in the same manner that investors use net income and earnings per share, or EPS, in evaluating net income available to common stockholders. In addition, because most REITs provide FFO available to common stockholders, Basic FFO and Diluted FFO per share information to the investment community, we believe these are useful supplemental measures when comparing us to other REITs. We believe that net income is the most directly comparable GAAP measure to FFO, Basic EPS is the most directly comparable GAAP measure to Basic FFO per share, and that diluted EPS is the most directly comparable GAAP measure to Diluted FFO per share.

	For the three months ended June 30,	
	2011	2010
	(Dollars in Thousands, Except Per Share Data)	
Net income	\$ 1,370	\$ 1,006

Distributions declared per share of common stock	\$	0.750	\$ 0.750
Percentage of FFO paid per share of common stock		94%	95%

Table of Contents**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

Market risk includes risks that arise from changes in interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market sensitive instruments. The primary risk that we believe we are and will be exposed to is interest rate risk. Certain of our leases contain escalations based on market interest rates, and the interest rate on our existing line of credit is variable. Although we seek to mitigate this risk by structuring such provisions of our loans and leases to contain a minimum interest rate or escalation rate, as applicable, these features do not eliminate this risk. We have not entered into any derivative contracts to attempt to further manage our exposure to interest rate fluctuations.

To illustrate the potential impact of changes in interest rates on our net income for the three and six months ended June 30, 2011, we have performed the following analysis, which assumes that our balance sheet remains constant and that no further actions beyond a minimum interest rate or escalation rate are taken to alter our existing interest rate sensitivity.

The following table summarizes the impact of a 1%, 2% and 3% increase in the one month LIBOR for the three months ended June 30, 2011. As of June 30, 2011, our effective average LIBOR was 0.19%; thus, a 1% decrease could not occur.

(Dollars in Thousands)			
Interest Rate Change	Increase to Rental Income	Increase to Interest Expense	Net Decrease to Net Income
1% Increase to LIBOR	\$	\$ 35	\$ (35)
2% Increase to LIBOR		71	(71)
3% Increase to LIBOR	1	106	(105)

As of June 30, 2011, the fair value of our fixed rate debt outstanding was \$261.1 million. Interest rate fluctuations may affect the fair value of our fixed rate debt instruments. If interest rates on our fixed rate debt instruments, using rates at June 30, 2011, had been one percentage point higher or lower, the fair value of those debt instruments on that date would have decreased or increased by \$8.7 million and \$9.2 million, respectively.

In the future, we may be exposed to additional effects of interest rate changes, primarily as a result of our line of credit or long-term mortgage debt, which we use to maintain liquidity and fund expansion of our real estate investment portfolio and operations. Our interest rate risk management objectives are to limit the impact of interest rate changes on earnings and cash flows and to lower overall borrowing costs. To achieve these objectives, we will borrow primarily at fixed rates or variable rates with the lowest margins available and, in some cases, with the ability to convert variable rates to fixed rates. We may also enter into derivative financial instruments such as interest rate swaps and caps in order to mitigate the interest rate risk on a related financial instrument. We will not enter into derivative or interest rate transactions for speculative purposes.

In addition to changes in interest rates, the value of our real estate is subject to fluctuations based on changes in local and regional economic conditions and changes in the creditworthiness of lessees and borrowers, all of which may affect our ability to refinance debt if necessary.

Table of Contents

Item 4. Controls and Procedures

a) Evaluation of Disclosure Controls and Procedures

As of June 30, 2011, our management, including our chief executive officer and chief financial officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)). Based on that evaluation, management, including the chief executive officer and chief financial officer, concluded that our disclosure controls and procedures were effective as of June 30, 2011 in providing a reasonable level of assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in applicable SEC rules and forms, including providing a reasonable level of assurance that information required to be disclosed by us in such reports is accumulated and communicated to our management, including our chief executive officer and our chief financial officer, as appropriate to allow timely decisions regarding required disclosure. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated can provide only reasonable assurance of necessarily achieving the desired control objectives, and management was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

b) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2011 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Neither we nor any of our subsidiaries are currently subject to any material legal proceedings, nor, to our knowledge, is any material legal proceeding threatened against us or our subsidiaries.

Item 1A. Risk Factors

Our business is subject to certain risks and events that, if they occur, could adversely affect our financial condition and results of operations and the trading price of our common stock. For a discussion of these risks, please review the risk below and refer to the section captioned Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2010, filed by us with the Securities and Exchange Commission on March 8, 2011.

Recent delays by U.S. lawmakers to reach an agreement on the national debt ceiling and the uncertainty if lawmakers will be able to implement a budget may materially adversely affect our business, financial condition and results of operations.

The current U.S. debt ceiling and budget deficit concerns have increased the possibility of the credit-rating agencies downgrading the U.S.'s credit rating for the first time in history. While U.S. lawmakers were able to reach an agreement and raise the national debt ceiling, there is still uncertainty about whether the U.S. can implement the budget and thus the U.S. could still default on its obligations in the future. Such a default, the perceived risk of such a default or a downgrade of the U.S.'s credit rating consequently could have a material adverse effect on the financial markets and economic conditions in the U.S. and throughout the world. This could negatively affect our ability to obtain financing for our investments and limit our ability to utilize certain of our current borrowings. In addition, we may have difficulty releasing our properties or collecting rent from tenants that may rely on any funding that is cut by our government. As a result, this could adversely affect our business, financial condition and results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

Item 3. Defaults Upon Senior Securities
