McAfee, Inc.

(Exact name of registrant as specified in its charter)

Delaware

*(State or other jurisdiction of
incorporation or organization)*

77-0316593

*(I.R.S. Employer
Identification Number)*

3965 Freedom Circle

Santa Clara, California

(Address of principal executive offices)

95054

(Zip Code)

Registrant's telephone number, including area code:

(408) 988-3832

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required

to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2009, 155,372,744 shares of the registrant's common stock, \$0.01 par value, were outstanding.

MCAFEE, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Business

McAfee, Inc. and our wholly owned subsidiaries (we , us or our) are a global dedicated security technology company that secures systems and networks from known and unknown threats. We empower home users, businesses, government agencies, service providers and our partners with the ability to block attacks, prevent disruptions, and continuously track and improve their security and compliance. We operate our business in five geographic regions: North America; Europe, Middle East and Africa (EMEA); Japan; Asia-Pacific, excluding Japan; and Latin America.

2. Summary of Significant Accounting Policies

The accompanying condensed consolidated financial statements include our accounts as of March 31, 2009 and December 31, 2008 and for the three months ended March 31, 2009 and March 31, 2008. All intercompany accounts and transactions have been eliminated in consolidation. These condensed consolidated financial statements have been prepared by us, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. The December 31, 2008 condensed consolidated balance sheet was derived from audited consolidated financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. However, we believe that all disclosures are adequate to make the information presented not misleading. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto, included in our annual report on Form 10-K for the year ended December 31, 2008.

In the opinion of our management, all adjustments (which consist of normal recurring adjustments, except as disclosed herein) necessary to fairly present our financial position, results of operations and cash flows for the interim periods presented have been included. The results of operations for the three months ended March 31, 2009 are not necessarily indicative of the results to be expected for the full year or for any future periods.

Significant Accounting Policies

Marketable Securities

All marketable securities are classified as available-for-sale securities. Available-for-sale securities are carried at fair value with resulting unrealized gains and losses, net of related taxes, reported as a component of accumulated other comprehensive income. Premium and discount on debt securities recorded at the date of purchase are amortized and accreted, respectively, to interest income using the effective interest method. Short-term marketable securities are those with remaining maturities at the balance sheet date of less than one year. Long-term marketable securities have remaining maturities at the balance sheet date of one year or greater. Realized gains and losses on sales of all such investments are reported in earnings and computed using the specific identification cost method.

We assess the value of our available-for-sale marketable securities on a regular basis to assess whether an other-than-temporary decline in the fair value has occurred. Factors which we use to assess whether an other-than-temporary decline has occurred include, but are not limited to, the likely reason for the unrealized loss,

period of time the fair value was below amortized cost, changes in underlying collateral, changes in ratings, market trends and conditions, and our intent and ability to hold until we recover such losses. Any other-than-temporary decline in value is reported in earnings and a new cost basis for the marketable security is established. In the three months ended March 31, 2009, we recorded additional impairment on previously impaired marketable securities totaling \$0.7 million for continued declines in fair value. We had no other-than-temporary impairment of marketable securities in the three months ended March 31, 2008.

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Inventory*

Inventory, which consists primarily of finished goods held at our warehouse and other fulfillment partner locations and finished goods sold to our channel partners but not yet sold through to the end-user, is stated at lower of cost or market. Cost is computed using standard cost, which approximates actual cost on a first in, first out basis. Inventory balances are included in other current assets on our condensed consolidated balance sheets and were \$14.5 million as of March 31, 2009 and \$10.2 million as of December 31, 2008.

Deferred Costs of Revenue

Deferred costs of revenue, which consist primarily of costs related to revenue-sharing and royalty arrangements, and the direct cost of materials that are associated with product and subscription revenues deferred over a service period, including arrangements that are deferred due to lack of the vendor-specific objective evidence (VSOE) of fair value on an undelivered element, are included in the prepaid expenses line item and other assets line item on our condensed consolidated balance sheets. We generally recognize such deferred costs as revenue is recognized. At March 31, 2009, our deferred costs were \$213.5 million compared to \$184.6 million at December 31, 2008.

Reclassifications

During the three months ended March 31, 2009, we reclassified sales order operation department expenses previously reported in general and administrative expenses to sales and marketing expenses. This reclassification improves the transparency of the cost of our sales process and does not affect our total operating costs, income from operations or net income. The following table sets forth, for all periods presented, the reclassification to conform to our current period presentation and the stock compensation expense included in the reclassification (in thousands):

	Twelve Months Ended December 31,			Three Months Ended March 31, 2008
	2006	2007	2008	
Sales and marketing	\$ 8,838	\$ 9,416	\$ 11,002	\$ 2,751
General and administrative	\$ (8,838)	\$ (9,416)	\$ (11,002)	\$ (2,751)
Stock compensation	\$ 353	\$ 249	\$ 507	\$ 149

In the condensed consolidated statement of cash flows for the three months ended March 31, 2008, we have reclassified \$61.9 million within investing activities to properly reflect partial pay downs received on asset-backed investments, calls and redemptions as proceeds from maturities of marketable securities rather than proceeds from sales of marketable securities .

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Fair Value Measurements*

On January 1, 2008, we adopted SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes a framework for measuring fair value, and expands disclosure requirements regarding fair value measurement. We hold financial assets, such as available-for-sale securities and foreign currency contracts, subject to valuation under SFAS 157. The following table details the fair value measurements within the fair value hierarchy of our financial assets (in thousands):

Description	March 31, 2009	Fair Value Measurements at March 31, 2009 Using		
		Quoted Prices in Active Markets Using Identical Assets (Level 1)(1)	Significant Other Observable Inputs (Level 2)(2)	Significant Unobservable Inputs (Level 3)(3)
Available-for-sale securities:				
United States Government notes and bonds(4)	\$ 71,046	\$ 68,464	\$ 2,582	\$
Corporate notes and bonds(4)	110,802		110,802	
Asset-backed securities(4)	22,589		22,589	
Mortgage-backed securities(4)	11,246		11,246	
Cash and cash equivalents(5)	54,886	33,492	21,394	
Total available-for-sale securities	270,569	101,956	168,613	
Foreign exchange derivatives(6)	(2,358)	(2,358)		
Total	\$ 268,211	\$ 99,598	\$ 168,613	\$

(1) Level 1 classification is applied to any asset that has a readily available quoted price from an active market where there is significant transparency in the executed/quoted price.

(2) Level 2 classification is applied to assets that have evaluated prices received from fixed income vendors with data inputs which are observable either directly or indirectly, but do not represent quoted prices from an active market for each individual security.

(3) Level 3 classification is applied to assets when prices are not derived from existing market data.

- (4) Included in both short-term and long-term marketable securities on our condensed consolidated balance sheets.
- (5) Included in cash and cash equivalents on our condensed consolidated balance sheets.
- (6) Included in other current assets and other accrued liabilities on our condensed consolidated balance sheets.

In February 2008, the Financial Accounting Standard Board (FASB) issued FASB Staff Position (FSP) No. 157-2, *Effective Date of FASB Statement No. 157* (FSP 157-2), which delayed the effective date of SFAS 157 for all non-financial assets and non-financial liabilities that are not remeasured at fair value on a recurring basis (at least annually). FSP 157-2 was effective for us beginning January 1, 2009 and did not have an impact on our consolidated financial position, results of operations or cash flows in the three months ended March 31, 2009. We expect FSP 157-2 to have an impact on us going forward.

In April 2009, the FASB issued three related Staff Positions: (i) FSP No. 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP 157-4), (ii) SFAS No. 115-2 and SFAS No. 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (FSP 115-2 and FSP 124-2), which will be effective for interim and annual periods ending after June 15, 2009, and (iii) SFAS No. 107-1 and APB No. 28-1, *Interim Disclosures about Fair Value of Financial Instruments* , (FSP 107-1 and APB 28-1), which will be effective for interim periods ending after June 15, 2009. FSP 157-4 provides guidance on how to determine the fair value of assets and liabilities under SFAS 157 when there has been a significant decline in market activity and volume and reemphasizes that the objective of a fair value measurement remains an exit price. If we were to conclude that there

Table of Contents

MCAFEE, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

has been a significant decrease in the volume and level of activity of the asset or liability in relation to *normal* market activities, quoted market values may not be representative of fair value and we may conclude that a change in valuation technique or the use of multiple valuation techniques may be appropriate. FSP 115-2 and FSP 124-2 modify the requirements for recognizing other-than-temporarily impaired debt securities and revise the existing impairment model for such securities, by modifying the current intent and ability indicator in determining whether a debt security is other-than-temporarily impaired. FSP 107-1 and APB 28-1 enhance the disclosure of instruments under the scope of SFAS 157 for interim periods. We are currently evaluating the impact that these Staff Positions will have on our consolidated financial position, results of operations or cash flows when adopted in the three months ended June 30, 2009.

Recent Accounting Pronouncements

Instruments Granted in Share-Based Payment Transactions

In June 2008, the FASB issued EITF 03-06-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (EITF 03-06-1). EITF 03-06-1 provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method in SFAS No. 128, *Earnings per Share* . EITF 03-06-1 was effective for us beginning January 1, 2009 and did not have an impact on our consolidated results of operations as our stock-based awards are not eligible to receive dividends.

Useful Life of Intangible Assets

In April 2008, the FASB issued FSP No. 142-3, *Determination of the Useful Life of Intangible Assets* (FSP 142-3). FSP 142-3 amends the factors an entity should consider in developing renewal or extension assumptions used in determining the useful life of recognized intangible assets under FASB Statement No. 142, *Goodwill and Other Intangible Assets* and the period of expected cash flows used to measure the fair value under FASB Statement No. 141, *Business Combinations* . FSP 142-3 was effective for us beginning January 1, 2009 and did not have an impact on our consolidated financial position, results of operations or cash flows.

Derivative Instruments and Hedging Activities

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133), to expand disclosures about an entity's derivative instruments and hedging activities, but does not change SFAS 133's scope of accounting. SFAS 161 was effective for us beginning January 1, 2009. As a result, we have included additional disclosures for our derivative financial instruments in Note 5.

Noncontrolling Interests

In December 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of Accounting Research Bulletin No. 51 (SFAS 160). SFAS 160

amends Accounting Research Bulletin No. 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 was effective for us beginning January 1, 2009. The adoption of SFAS 160 did not have an impact on our consolidated financial position, results of operations or cash flows.

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Business Combinations*

In December 2007, the FASB revised SFAS No. 141, *Business Combinations* (SFAS 141(R)), to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. SFAS 141(R) changes the accounting for business combinations by requiring that an acquiring entity measures and recognizes identifiable assets acquired and liabilities assumed at the acquisition date fair value with limited exceptions. The changes include the treatment of acquisition related transaction costs, the valuation of any noncontrolling interest at the acquisition date fair value, the recording of acquired contingent liabilities at acquisition date fair value and the subsequent re- measurement of such liabilities after acquisition date, the recognition of capitalized in-process research and development, the accounting for acquisition-related restructuring cost accruals subsequent to the acquisition date and the recognition of changes in the acquirer's income tax valuation allowance (see Note 4). SFAS 141(R) was effective for us beginning January 1, 2009. SFAS 141(R) impacts our condensed consolidated financial statements, but the nature and magnitude of the specific effects depends upon the nature, terms and size of acquisitions we consummate. At March 31, 2009, \$20.2 million of the \$88.6 million liability for unrecognized tax benefits relate to tax positions of acquired entities taken prior to our acquisition. Liabilities settled for lesser or greater amounts will affect the income tax expense in the period of adjustment.

Revision to Contingencies under 141(R)

In April 2009, the FASB issued FSP No. 141(R)-1, *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies* (FSP 141(R)-1). FSP 141(R)-1 amends the provisions in Statement 141(R) for the initial recognition and measurement, subsequent measurement and accounting, and disclosures for assets and liabilities arising from contingencies in business combinations. The FSP eliminates the distinction between contractual and non-contractual contingencies, including the initial recognition and measurement criteria in Statement 141(R) and instead carries forward most of the provisions in SFAS 141 for acquired contingencies. FSP 141(R)-1 is effective for contingent assets and contingent liabilities acquired in business combinations for which the acquisition date is on or after January 1, 2009. We expect FSP 141(R)-1 will have an impact on our condensed consolidated financial statements, but the nature and magnitude of the specific effects will depend upon the nature, term and size of the acquired contingencies from future acquisitions.

3. Employee Stock Benefit Plans

We record compensation expense for stock-based awards issued to employees and outside directors in exchange for services provided based on the estimated fair value of the awards on their grant dates. Stock-based compensation expense is recognized over the required service or performance period of the awards. Our stock-based awards include stock options (options), restricted stock units (RSUs), restricted stock awards (RSAs), restricted stock units with performance-based vesting (PSUs) and employee stock purchase rights issued pursuant to our Employee Stock Purchase Plan (ESPP grants).

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes stock-based compensation expense in accordance with the provisions of SFAS No. 123(R), *Share-Based Payment* (SFAS 123(R)) (in thousands):

	Three Months Ended	
	March 31,	
	2009	2008
Amortization of fair value of options	\$ 6,292	\$ 5,577
Restricted stock awards and units	10,274	5,825
Restricted stock units with performance-based vesting	5,948	255
Employee Stock Purchase Plan	1,521	
Benefit related to cash settlement of options		(382)
Tender offer		601
Total stock-based compensation expense	\$ 24,035	\$ 11,876

Amortization of fair value of options. We recognize the fair value of options issued to employees and outside directors and assumed in acquisitions as stock-based compensation expense over the vesting period of the awards. These charges include stock-based compensation expense for options granted prior to January 1, 2006 but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the pro forma provisions of SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS 123), and stock-based compensation expense for options granted subsequent to January 1, 2006 based on the grant date fair value estimated in accordance with the provisions of SFAS 123(R).

Restricted stock awards and units. We recognize the fair value of RSAs and RSUs issued to employees as stock-based compensation expense over the vesting period of the awards. Fair value is determined as the difference between the closing price of our common stock on the grant date and the purchase price of the RSAs and RSUs.

Restricted stock units with performance-based vesting. We recognize stock-based compensation expense for the fair value of PSUs issued to employees.

The PSUs can have performance-based vesting components that vest only if performance criteria are met for each respective performance period (performance component). Additionally, the PSUs can have service-based vesting components that have accelerated vesting provisions if performance criteria are met for each respective performance period (service component). The PSUs issued to employees have either performance components or service components or both.

If the performance criteria are not met for a performance period, then the related performance components that would have vested are forfeited and the related service components do not accelerate. Certain performance criteria allow for different vested amounts based on the level of achievement of the performance criteria.

For certain performance components, we do not communicate the performance criteria to the employees. For these awards, the accounting grant date does not occur until it is known whether the performance criteria are met, and such achievement or non-achievement is communicated to the employees. These awards are marked-to-market at the end of each reporting period through the accounting grant date, and recognized over the expected vesting period, provided we determine it is probable that the performance criteria will be met.

For performance components for which the performance criteria have been communicated to the employees, the accounting grant date is deemed to have occurred. Fair value has been measured on the grant date and is recognized over the expected vesting period, provided we determine it is probable that the performance criteria will be met.

For the service components, each tranche is accounted for as a separate award and the accounting grant date is deemed to have occurred. Fair value is measured on the grant date, and is recognized over the expected vesting period for each tranche. The expected vesting period for each tranche is based off the service-based vesting period

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

or the accelerated vesting period if the performance period has been set and we determine it is probable that the performance criteria will be met.

Employee Stock Purchase Plan. We recognize stock-based compensation expense for the fair value of ESPP grants. The estimated fair value of ESPP grants is based on the Black-Scholes pricing model. Expense is recognized ratably based on contributions and the total fair value of the ESPP grants estimated to be issued.

Benefit related to cash settlement of options. Certain options held by terminated employees expired during the blackout period, the period between July 2006 and December 21, 2007, as they could not be exercised during the 90-day period subsequent to termination. As of December 31, 2007, we recorded a liability of \$5.7 million based on the intrinsic value of these options using our December 31, 2007 closing stock price. We paid \$5.2 million in January 2008 to settle these options based on the average closing price of our common stock subsequent to December 21, 2007, the date we became current on our reporting obligations under the Securities Exchange Act of 1934, as amended. For 2008, we recognized a benefit of \$0.4 million for the difference between the December 31, 2007 liability and the amount paid in 2008. All of these options were cash settled by March 31, 2008.

Tender offer. In January 2008, after we became current with our reporting obligations under the Securities Exchange Act of 1934, as amended, we filed a Tender Offer Statement with the SEC. The tender offer extended an offer by us to holders of certain outstanding options to amend the exercise price on certain of their outstanding options. The purpose of the tender offer was to amend the exercise price on options to have the same price as the fair market value on the revised measurement dates that were identified during the investigation of our historical option grant practices. As part of this tender offer, we became obliged to pay a cash bonus of \$1.7 million, of which \$0.4 million was paid to Canadian employees in the three months ended March 31, 2008, and \$1.3 million was paid to U.S. employees in the three months ended March 31, 2009, to reimburse optionees who elected to participate in the tender offer for any increase in the exercise price of their options resulting from the amendment. The impact of the cash bonus, as recorded during the three months ended March 31, 2008, resulted in stock-based compensation expense of \$0.6 million and a decrease to additional paid-in capital of \$1.1 million. We will not recognize any further expense related to the tender offer.

The following table summarizes stock-based compensation expense recorded by condensed consolidated statements of income and comprehensive income line item (in thousands):

	Three Months Ended March 31,	
	2009	2008
Cost of net revenue service and support	\$ 611	\$ 202
Cost of net revenue subscription	220	98
Cost of net revenue product	340	144
Stock-based compensation expense included in cost of net revenue	1,171	444
Research and development	6,850	3,621
Sales and marketing	9,763	3,896

Edgar Filing: McAfee, Inc. - Form 10-Q

General and administrative	6,251	3,915
Stock-based compensation expense included in operating costs	22,864	11,432
Total stock-based compensation expense	24,035	11,876
Deferred tax benefit	(7,080)	(3,207)
Total stock-based compensation expense, net of tax	\$ 16,955	\$ 8,669

We had no stock based compensation costs capitalized as part of the cost of an asset.

At March 31, 2009, the estimated fair value of all unvested options, RSUs, RSAs, PSUs and ESPP grants that have not yet been recognized as stock-based compensation expense was \$162.6 million, net of expected forfeitures. We expect to recognize this amount over a weighted-average period of 2.4 years. This amount does not reflect stock-

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

based compensation expense relating to 0.6 million PSUs for which the performance criteria had not been set as of March 31, 2009.

4. Business Combinations***2009 Acquisition***

In January 2009, we acquired 100% of the outstanding shares of Endeavor Security, Inc. (Endeavor), an intrusion prevention and detection company, for \$2.5 million. The Endeavor purchase agreement provides for an earn-out payment totaling \$1.0 million contingent upon the achievement of certain Endeavor financial targets during the two-year period subsequent to the close of the acquisition. The fair value of the earn-out of \$0.7 million at acquisition has been accrued, for a total purchase price of \$3.2 million. We recorded \$1.4 million of goodwill, which is not deductible for tax purposes. The results of operations for Endeavor have been included in our results of operations since the date of acquisition.

The purchase agreement also provides for a total of \$2.0 million in bonus payments to certain employees contingent upon their continued employment for three years post-acquisition.

2008 Acquisitions

In 2008, we acquired 100% of the outstanding shares of ScanAlert, Inc. (ScanAlert) for \$54.9 million, 100% of the outstanding shares of Reconnex Corporation (Reconnex) for \$46.6 million and 100% of the outstanding shares of Secure Computing Corporation (Secure Computing) for \$490.1 million. The results of operations for these acquisitions have been included in our results of operations since their respective acquisition dates.

Our management determined the purchase price allocations for these acquisitions based on estimates of the fair values of the tangible and intangible assets acquired and liabilities assumed. These estimates were arrived at utilizing recognized valuation techniques. We are continuing to assess uncertain tax positions as well as continuing to assess measurement of certain deferred tax assets and liabilities of Secure Computing. In the three months ended March 31, 2009, we had no significant purchase price adjustments.

Pro forma results of operations have not been presented for ScanAlert because the effect of this acquisition was not material to our results of operations. The following unaudited pro forma financial information presents our combined results with Secure Computing and Reconnex as if the acquisitions had occurred at the beginning of 2008 (in thousands, except per share data):

	Three Months Ended March 31, 2008
Pro forma net revenue	\$ 421,809
Pro forma net loss	\$ (10,429)

Edgar Filing: McAfee, Inc. - Form 10-Q

Pro forma net loss per share	basic	\$	(0.06)
Pro forma net loss per share	diluted	\$	(0.06)
Shares used in per share calculation	basic		160,992
Shares used in per share calculation	diluted		160,992

The above unaudited pro forma financial information includes adjustments for amortization of identifiable intangible assets that were acquired, adjustments to interest income, adjustments for incremental stock-based compensation expense related to the unearned portion of Secure Computing's RSAs and RSUs assumed and converted, eliminations of intercompany transactions and related tax effects. The pro forma financial information excludes the effects of the SafeWord product line sold by Secure Computing in 2008, the effects of the in-process

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

research and development charge for Secure Computing that was expensed immediately upon acquisition and the effects of the goodwill impairment charge recorded by Secure Computing in 2008. No effect has been given to cost reductions or synergies in this presentation. In management's opinion, the unaudited pro forma combined results of operations are not indicative of the actual results that would have occurred had the acquisitions been consummated at the beginning of three months ended March 31, 2008, nor are they indicative of future operations of the combined companies.

5. Derivatives*Forward Exchange Contracts*

We conduct business globally. As a result, we are exposed to movements in foreign currency exchange rates. From time to time we enter into forward exchange contracts to reduce exposures associated with certain nonfunctional monetary assets and liabilities such as accounts receivable and accounts payable denominated in the Euro, British Pound, and Canadian Dollar. The forward contracts typically range from one to three months in original maturity. We recognize derivatives, which are included in other current assets and other accrued liabilities on the condensed consolidated balance sheet, at fair value. Both the remeasurement of the asset and liability and the change in value of the derivative are recognized in interest and other income on our condensed consolidated statements of income and comprehensive income. On the condensed consolidated statements of cash flows, the derivatives offset the increase or decrease in cash related to the underlying asset or liability. In general, we do not hedge anticipated foreign currency cash flows, nor do we enter into forward contracts for trading or speculative purposes.

The forward contracts do not qualify for hedge accounting and accordingly are marked to market at the end of each reporting period with any unrealized gain or loss being recognized in the statement of income as interest and other income.

Forward contracts outstanding are presented below (in thousands):

	March 31, 2009			December 31, 2008		
	Notional U.S. Dollar Equivalent	Asset Fair Value	Liability Fair Value	Notional U.S. Dollar Equivalent	Asset Fair Value	Liability Fair Value
Euro	\$ 33,275	\$ 27	\$ (555)	\$ 31,944	\$ 56	\$ (757)
British Pound	8,346	56	(1,820)	8,503	26	(1,659)
Canadian Dollar	2,856		(66)	2,954		(55)
	\$ 44,477	\$ 83	\$ (2,441)	\$ 43,401	\$ 82	\$ (2,471)

In the three months ended March 31, 2009 and 2008, we recorded a \$1.6 realized loss and a \$0.5 million realized gain, respectively, on derivatives. These amounts are recognized in interest and other income on our condensed consolidated statements of income and comprehensive income.

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. Goodwill and Other Intangible Assets**

Goodwill by geographic region is as follows (in thousands):

	December 31, 2008	Goodwill Acquired	Adjustments	Effects of Foreign Currency Exchange	March 31, 2009
North America	\$ 807,040	\$ 1,448	\$ (19)	\$ (251)	\$ 808,218
EMEA	253,748		(8)	(5,720)	248,020
Japan	35,607		(1)		35,606
Asia-Pacific (excluding Japan)	52,414		(1)		52,413
Latin America	20,807			251	21,058
Total	\$ 1,169,616	\$ 1,448	\$ (29)	\$ (5,720)	\$ 1,165,315

The goodwill acquired during the three months ended March 31, 2009 is due to the acquisition of Endeavor. The adjustments to goodwill are a result of purchase accounting adjustments for the Secure Computing acquisition.

The components of intangible assets are as follows (in thousands):

		March 31, 2009			December 31, 2008		
	Weighted Average Useful Life	Gross Carrying Amount	Accumulated Amortization (Including Effects of Foreign Currency Exchange)	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization (Including Effects of Foreign Currency Exchange)	Net Carrying Amount
Other intangible assets:							
Purchased technologies	4.1 years	\$ 385,129	\$ (193,868)	\$ 191,261	\$ 385,915	\$ (176,072)	\$ 209,843
Trademarks and patents	5.1 years	42,186	(35,905)	6,281	42,282	(35,639)	6,643
Customer base and other intangibles	5.5 years	180,832	(92,465)	88,367	182,282	(82,965)	99,317
		\$ 608,147	\$ (322,238)	\$ 285,909	\$ 610,479	\$ (294,676)	\$ 315,803

Edgar Filing: McAfee, Inc. - Form 10-Q

The aggregate amortization expenses for the intangible assets listed above totaled \$29.4 million and \$18.9 million in the three months ended March 31, 2009 and 2008, respectively.

Expected future intangible asset amortization expense as of March 31, 2009 is as follows (in thousands):

Fiscal years:	
Remainder of 2009	\$ 81,867
2010	93,402
2011	68,866
2012	31,559
2013	6,222
Thereafter	3,993
	\$ 285,909

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****7. Restructuring Charges**

We have initiated certain restructuring actions to reduce our cost structure and enable us to invest in certain strategic growth initiatives to enhance our competitive position.

During 2009 (the 2009 Restructuring), we continued our efforts to consolidate and took the following measures: (i) realigned our sales and marketing workforce and (ii) disposed of excess facilities.

During 2008 (the 2008 Restructuring), we took the following measures: (i) eliminated redundant positions related to the SafeBoot Holdings B.V. (SafeBoot) and Secure Computing acquisitions, (ii) realigned our sales force and (iii) realigned staffing across various departments.

During 2006 (the 2006 Restructuring), we took the following measures: (i) reduced our workforce and (ii) continued our efforts to consolidate and dispose of excess facilities. The remaining \$0.1 million of lease termination costs and severance and other benefits will be paid in 2009.

During 2004 and 2003 (the 2004 and 2003 Restructurings), we took the following measures: (i) reduced our workforce, (ii) consolidated and disposed of excess facilities, (iii) moved our European headquarters to Ireland and vacated a leased facility in Amsterdam, (iv) consolidated operations formerly housed in three leased facilities in Dallas, Texas into our regional headquarters facility in Plano, Texas, (v) relocated employees from the Santa Clara, California headquarters site to our Plano facility as part of the consolidation activities and (vi) sold our Sniffer and Magic product lines in 2004. During the three months ended March 31, 2009, we recorded a \$0.2 million decrease to the liability primarily related to changes in previous estimates of sublease income for the Santa Clara lease. We have a \$2.5 million accrual balance related to the 2004 and 2003 Restructurings, which will be paid through 2013.

Restructuring charges in the three months ended March 31, 2008 totaled \$0.1 million, consisting of \$2.5 million related to 2008 restructuring charges partially offset by a \$2.4 million revision related primarily to previous estimates of base rent and sublease income for the Santa Clara lease which was restructured in 2003, net of accretion.

Restructuring in the three months ended March 31, 2009 totaled \$5.1 million, consisting of \$2.9 million related to the 2009 Restructuring and a \$2.2 million additional accrual over the service period for our 2008 elimination of certain positions at Secure Computing.

2009 Restructuring

Activity and liability balances related to our 2009 restructuring are as follows (in thousands):

	Lease Termination Costs	Severance and Other Benefits	Total
Balance, January 1, 2009	\$	\$	\$

Edgar Filing: McAfee, Inc. - Form 10-Q

Restructuring accrual	190	2,666	2,856
Cash payments	(57)	(1,203)	(1,260)
Effects of foreign currency exchange		45	45
Balance, March 31, 2009	\$ 133	\$ 1,508	\$ 1,641

Of the total 2009 restructuring charge, \$1.5 million and \$1.4 million was recorded in EMEA and North America, respectively. Lease termination costs and severance and other benefits are expected to be paid through 2009.

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****2008 Restructuring***

Activity and liability balances related to our 2008 restructuring are as follows (in thousands):

	Lease Termination Costs	Severance and Other Benefits	Total
Balance, January 1, 2008	\$	\$	\$
Restructuring accrual	6,142	6,621	12,763
Cash payments		(5,419)	(5,419)
Adjustment to liability		(25)	(25)
Effects of foreign currency exchange		(2)	(2)
Accretion	29		29
Balance, December 31, 2008	6,171	1,175	7,346
Restructuring accrual		65	65
Cash payments	(833)	(557)	(1,390)
Adjustment to liability	598	2,273	2,871
Effects of foreign currency exchange	4	(7)	(3)
Accretion	77		77
Balance, March 31, 2009	\$ 6,017	\$ 2,949	\$ 8,966

Of the total 2009 restructuring charge for severance, \$0.2 million, and \$2.1 million was recorded in EMEA and North America, respectively. In 2008, the \$6.1 million accrual for lease termination costs was recorded on the opening balance sheet for Secure Computing for costs associated with permanently vacated facilities. In the three months ended March 31, 2009, we recorded a \$0.6 million purchase price adjustment for additional lease related costs associated with permanently vacated facilities. The 2009 accretion relates to these lease termination costs. Lease termination costs will be paid through 2015 and severance and other benefits will be paid in 2009.

8. Credit Facilities

On December 22, 2008, we entered into a credit agreement with a group of financial institutions (the Credit Facility). The Credit Facility provides for a \$100.0 million unsecured term loan and a \$100.0 million unsecured revolving credit facility with a \$25.0 million letter of credit sublimit. The Credit Facility also contains an expansion option permitting us to arrange up to an aggregate of \$200.0 million in additional commitments from existing lenders and/or new lenders at the lenders' discretion.

In January 2009, we borrowed \$100.0 million against the term loan in the Credit Facility. The principal together with any accrued interest on the term loan is due on December 22, 2009.

The credit facility, which is subject to certain quarterly financial covenants, terminates on December 22, 2011, on which date all outstanding principal of, together with accrued interest on, any revolving loans will be due. We may prepay the loans and terminate the commitments at any time, without premium or penalty, subject to reimbursement of certain costs in the case of eurocurrency loans.

Loans may be made in U.S. Dollars, Euros or other currencies agreed to by the lenders. Loans will bear interest at our election at the prime rate or at an adjusted LIBOR rate plus a margin (ranging from 2.00% to 2.50%) that varies with our consolidated leverage ratio (a eurocurrency loan). Interest on the loans is payable quarterly in arrears with respect to prime rate loans and at the end of an interest period (or at each three month interval in the case of loans with interest periods greater than three months) in the case of eurocurrency loans. Commitment fees range from 0.25% to 0.45% of the unused portion on the credit facility depending on our consolidated leverage ratio.

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In addition, we have a 14 million Euro credit facility with a bank (the Euro Credit Facility). The Euro Credit Facility is available on an offering basis, meaning that transactions under the Euro Credit Facility will be on such terms and conditions, including interest rate, maturity, representations, covenants and events of default, as mutually agreed between us and the bank at the time of each specific transaction. The Euro Credit Facility is intended to be used for short-term credit requirements, with terms of one year or less. The Euro Credit Facility can be canceled at any time. No balances were outstanding under the Euro Credit Facility as of March 31, 2009 and December 31, 2008.

9. Net Income Per Share

A reconciliation of the numerator and denominator of basic and diluted net income per share is provided as follows (in thousands, except per share amounts):

	Three Months Ended March 31,	
	2009	2008
Numerator basic and diluted net income	\$ 53,456	\$ 30,169
Denominator basic		
Basic weighted-average common stock outstanding	153,721	160,992
Denominator diluted		
Basic weighted-average common stock outstanding	153,721	160,992
Effect of dilutive securities:		
Options, RSUs, RSAs, PSUs and ESPP grants(1)	2,448	3,875
Diluted weighted-average shares	156,169	164,867
Net income per share basic	\$ 0.35	\$ 0.19
Net income per share diluted	\$ 0.34	\$ 0.18

(1) In the three months ended March 31, 2009 and 2008, 6.6 million and 4.6 million RSUs and options, respectively, were excluded from the calculation since the effect was anti-dilutive. In addition, we excluded 1.1 million and 1.2 million PSUs for the three months ended March 31, 2009 and 2008, respectively, because they are contingently issuable shares.

10. Income Taxes

Our consolidated provision for income taxes for the three months ended March 31, 2009 and 2008 was \$0.6 million and \$38.6 million, respectively, reflecting an effective tax rate of 1% and 56%, respectively. The effective tax rate for

the three months ended March 31, 2009 differs from the U.S. federal statutory rate (statutory rate) primarily due to the benefit of lower tax rates in certain foreign jurisdictions, as well as tax benefits recognized in the first quarter as a result of statute expirations in various jurisdictions. The effective tax rate for the three months ended March 31, 2008 differs from the statutory rate primarily as a result of certain acquisition integration activities, which resulted in an increase of 22 percentage points to our effective tax rate. In October of 2008, we were granted administrative relief by the U.S. Internal Revenue Service from the negative tax consequences associated with certain acquisition integration activities. As a result, we reversed the tax expense in the fourth quarter of 2008.

The earnings from our foreign operations in India are subject to a tax holiday. In May 2008, the Indian government extended the period through which the holiday would be effective to March 31, 2010. The tax holiday provides for zero percent taxation on certain classes of income and requires certain conditions to be met. We were in compliance with these conditions as of March 31, 2009.

Table of Contents

MCAFEE, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

We account for uncertainty in income taxes in accordance with FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109 (FIN 48). As a result, we apply a more-likely-than-not recognition threshold for all tax uncertainties. FIN 48 only allows the recognition of those tax benefits that have a greater than 50% likelihood of being sustained upon examination by the taxing authorities. We believe it is reasonably possible that, in the next 12 months, the amount of unrecognized tax benefits related to the resolution of federal, state and foreign matters could be reduced by \$6.5 million to \$9.6 million as audits close and statutes expire.

The U.S. Internal Revenue Service is presently conducting an examination of our federal income tax returns for the calendar years 2006 and 2007. We cannot reasonably determine if this examination will have a material impact on our financial statements. We concluded pre-filing discussions with the Dutch tax authorities with respect to the 2004 tax year in January 2009. As a result, a tax benefit of approximately \$2.2 million is reflected in the first quarter of 2009. In addition, the statute of limitations related to various domestic and foreign jurisdictions expired in the first quarter of 2009, resulting in a tax benefit of approximately \$9.1 million.

11. Business Segment Information

We have one business and operate in one industry. We develop, market, distribute and support computer and network security solutions for large enterprises, governments, and small and medium-sized business and consumer users, as well as resellers and distributors. Management measures operations based on our five operating segments: North America; EMEA; Japan; Asia-Pacific, excluding Japan; and Latin America. Our chief operating decision maker is our chief executive officer.

We market and sell anti-virus and security software, hardware and services through our geographic regions. These products and services are marketed and sold worldwide primarily through resellers, distributors, systems integrators, retailers, original equipment manufacturers, internet service providers and directly by us. In addition, we offer on our web site suites of online products and services personalized for the user based on the users' personal computer configuration, attached peripherals and resident software. We also offer managed security and availability applications to corporations and governments on the internet.

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Our chief operating decision maker evaluates performance based on income from operations, which includes only cost of revenue and selling expenses directly attributable to a sale. Historically, the measure of segment income from operations included the allocation of cost of revenues, research and development and certain sales and marketing expenses. We revised the segment information for the three months ended March 31, 2008 to conform to the 2009 presentation for comparative purposes. Summarized financial information concerning our net revenue and income from operations by geographic region is as follows (in thousands):

	Three Months Ended March 31,	
	2009	2008
Net revenue by region:		
North America	\$ 254,442	\$ 189,750
EMEA	120,619	122,248
Japan	35,509	27,019
Asia-Pacific, excluding Japan	20,603	18,036
Latin America	16,536	12,588
Net revenue	\$ 447,709	\$ 369,641
Income from operations by region:		
North America	\$ 189,234	\$ 143,794
EMEA	92,862	90,702
Japan	27,271	18,835
Asia-Pacific, excluding Japan	13,590	11,753
Latin America	12,457	8,764
Corporate and other	(283,644)	(220,601)
Income from operations	\$ 51,770	\$ 53,247

Corporate and other includes research and development expenses, cost of revenues and sales and marketing expenses not directly related to the sale of our products and services, general and administrative expenses, stock-based compensation, amortization of purchased technology and other intangibles and restructuring (benefit) charges. These expenses are not attributable to any specific geographic region and are not included in the segment measure of income from operations reviewed by our chief operating decision maker. The difference between income from operations and income before provision for income taxes is reflected on the face of our condensed consolidated statements of income and comprehensive income.

12. Litigation*Settled Cases*

In July 2006, the United States District Court for the Northern District of California consolidated several purported stockholder derivative suits as *In re McAfee, Inc. Derivative Litigation*, Master File No. 5:06CV03484 (JF) (the Consolidated Action). In September 2006, three identical lawsuits that had been filed in the Superior Court of the State of California, County of Santa Clara, were consolidated in that court (the State Action). The Consolidated Action and State Action asserted that we improperly backdated stock option grants for a period ending in May 2006. In December 2007, we reached a tentative settlement with the plaintiffs in both Actions. The Court preliminarily approved the settlement in October 2008 and granted final approval in February 2009. We paid \$13.8 million in the three months ended March 31, 2009 for this previously accrued settlement.

In the three months ended March 31, 2009, we recorded a benefit of \$6.5 million related to reimbursements from insurance for legal fees we incurred related to cost of defense incurred in connection with our stock option

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

investigation that commenced in May 2006. This benefit is reflected in the general and administrative line on our condensed consolidated statement of income.

Open Cases

While we cannot predict the likelihood of future claims or inquiries, we expect that new matters may be initiated against us from time to time. The results of claims, lawsuits and investigations also cannot be predicted, and it is possible that the ultimate resolution of these matters, individually and in the aggregate, may have a material adverse effect on our business, financial condition, results of operations or cash flows.

In December 2008, Information Protection and Authentication of Texas, LLC, (IPAT) filed a complaint in the Eastern District of Texas against us, alleging infringement of two IPAT patents. Although the patents relate to firewall technology, no specific McAfee products have been identified in the suit and no specific infringement allegations have yet been made. In January 2009, IPAT filed suit against many PC manufacturers in the Southern District of Florida alleging infringement of the same two patents.

In January 2007, a former executive filed an arbitration demand with the American Arbitration Association in Dallas, Texas, seeking the arbitration of claims associated with his employment; we have filed counterclaims. The arbitration hearing took place in March 2009 and we expect a final award by the arbitrator on or before June 30, 2009. Until the final award has been issued our liability, if any, cannot be reasonably estimated and, therefore, no provision has been recorded in our financial statements.

In June 2006, Finjan Software, Ltd. filed a complaint in the United States District Court for the District of Delaware against Secure Computing, alleging Webwasher Secure Content Management suite and CyberGuard TSP infringe three Finjan patents. In March 2008, a jury found that Secure Computing wilfully infringed certain claims of three Finjan patents and awarded \$9.2 million in damages. This was recorded as an assumed liability in the allocation of the purchase price for Secure Computing. We acquired Secure Computing in November 2008 and intend to vigorously challenge the verdict and Finjan's pending motions for an injunction and enhanced damages.

In July 2001, certain investment bank underwriters and McAfee, along with certain of our officers and directors were named in a putative class action for alleged violation of federal securities laws. (United States District Court for the Southern District of New York, *In re McAfee.com Corp. Initial Public Offering Securities Litigation*, 01 Civ.7034 (SAS). This is one of a number of cases challenging underwriting practices in the initial public offerings of more than 300 companies, coordinated for pretrial as *In re Initial Public Offering Securities Litigation*, 21 MC 92 (SAS). The McAfee complaint alleges improper underwriting activities not disclosed in registration statements for McAfee.com's IPO, and seeks unspecified damages. The parties have reached a global settlement, subject to court approval. Insurers will pay the full McAfee settlement share. Neither the Company nor its officer and director defendants will bear any financial liability. McAfee, its officers and directors were dismissed from the case through a tolling agreement, and such agreement is pending court approval. If the litigation continues, we believe we have meritorious defenses and plan to vigorously defend.

In addition, we are engaged in certain legal and administrative proceedings incidental to our normal business activities and believe that these matters will not have a material adverse effect on our financial position, results of operations or cash flows.

Table of Contents**MCAFEE, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****13. Warranty Accrual and Guarantees**

We offer a 90 day warranty on our hardware and software products and record a liability for the estimated future costs associated with warranty claims, which is based upon historical experience and our estimate of the level of future costs. A reconciliation of the change in our warranty obligation as of March 31, 2009 and December 31, 2008 follows (in thousands):

	Warranty Accrual
Balance, January 1, 2008	\$ 489
Additional accruals	4,236
Costs incurred during the period	(3,615)
Balance, December 31, 2008	1,110
Additional accruals	780
Costs incurred during the period	(799)
Balance, March 31, 2009	\$ 1,091

The following is a summary of certain guarantee and indemnification agreements as of March 31, 2009:

Under the terms of our software license agreements with our customers, we agree that in the event the software sold infringes upon any patent, copyright, trademark, or any other proprietary right of a third-party, we will indemnify our customer licensees against any loss, expense, or liability from any damages that may be awarded against our customer. We include this infringement indemnification in our software license agreements and selected managed service arrangements. In the event the customer cannot use the software or service due to infringement and we can not obtain the right to use, replace or modify the license or service in a commercially feasible manner so that it no longer infringes, then we may terminate the license and provide the customer a pro-rata refund of the fees paid by the customer for the infringing license or service. We have recorded no liability associated with this indemnification, as we are not aware of any pending or threatened infringement actions that are probable losses.

Under the terms of certain vendor agreements, in particular, vendors used as part of our managed services, we have agreed that in the event the service provided to the customer by the vendor on behalf of us infringes upon any patent, copyright, trademark, or any other proprietary right of a third-party, we will indemnify our vendor, against any loss, expense, or liability from any damages that may be awarded against our vendor. No maximum liability is stipulated in these vendor agreements. We have recorded no liability associated with this indemnification, as we are not aware of any pending or threatened infringement actions or claims that are probable losses. We believe the estimated fair value of these indemnification clauses is minimal.

Under the terms of our agreements to sell Magic in January 2004, Sniffer in July 2004, and McAfee Labs assets in December 2004, we agreed to indemnify the purchasers for any breach of representations or warranties in the agreement as well as for any liabilities related to the assets prior to sale that were not included in the purchaser assumed liabilities (undiscovered liabilities). Subject to limited exceptions, the maximum potential loss related to the indemnifications is \$10.0 million, \$200.0 million and \$1.5 million, respectively. To date, we have paid no amounts under the representations and warranties indemnifications and we have not recorded any accruals related to these agreements. We believe the estimated fair value of these indemnification clauses is minimal.

Table of Contents

MCAFEE, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As permitted under Delaware law, we have agreements whereby we indemnify our officers and directors for certain events or occurrences while the officer or director is, or was, serving at our request in such capacity. The maximum potential amount of future payments we could be required to make under these indemnification agreements is not limited; however, we have director and officer insurance coverage that reduces our exposure and may enable us to recover a portion or all of any future amounts paid. We believe we will prevail in these insurance coverage disputes.

Under the terms of the agreement entered into by Secure Computing in July 2008 to sell its SafeWord assets, we are obligated to indemnify the purchaser for any breach of representations or warranties in the agreement as well as for any liabilities related to the assets prior to sale that were not included in the purchaser assumed liabilities (undiscovered liabilities). Subject to limited exceptions, the maximum potential loss related to the indemnification is \$64.3 million. To date, we have paid no amounts under the representations and warranties indemnifications. We have not recorded any accruals related to this agreement. We believe the estimated fair value of these indemnification clauses is minimal.

If we believe a liability associated with any of the aforementioned indemnifications becomes probable and the amount of the liability is reasonably estimable or the minimum amount of a range of loss is reasonably estimable, then an appropriate liability will be established.

Table of Contents**Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations*****Forward-Looking Statements; Trademarks**

This Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are statements that look to future events and consist of, among other things, statements about our anticipated future income including the amount and mix of revenue among type of product, category of customer, geographic region and distribution method and our anticipated future expenses and tax rates. Forward-looking statements include our business strategies and objectives and include statements about the expected benefits of our strategic alliances and acquisitions, our plans for the integration of acquired businesses, our continued investment in complementary businesses, products and technologies, our expectations regarding product acceptance, product and pricing competition, continuation of our stock repurchase program, cash requirements and the amounts and uses of cash and working capital that we expect to generate, as well as statements involving trends in the security risk management market and statements including such words as may, believe, plan, expect, anticipate, could, estimate, predict, goals, continue, project, expressions or the negative of these terms or other comparable terminology. These forward-looking statements speak only as of the date of this Report on Form 10-Q and are subject to business and economic risks, uncertainties and assumptions that are difficult to predict, including those discussed in Risk Factors in Part II, Item 1A in this quarterly report and in Item 1, *Business*, Item 1A, *Risk Factors* and Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our annual report on Form 10-K for the fiscal year ended December 31, 2008. Therefore, our actual results may differ materially and adversely from those expressed in any forward-looking statements. We cannot assume responsibility for the accuracy and completeness of forward-looking statements, and we undertake no obligation to revise or update publicly any forward-looking statements for any reason.

This report includes registered trademarks and trade names of McAfee and other corporations. Trademarks or trade names owned by McAfee and/or its affiliates include, but are not limited to: McAfee, VirusScan, Total Protection, SafeBoot, and ScanAlert. Any other non-McAfee related products, registered and/or unregistered trademarks contained herein are only by reference and are the sole property of their respective owners.

The following discussion should be read in conjunction with the condensed consolidated financial statements and related notes included elsewhere in this report. The results shown herein are not necessarily indicative of the results to be expected for the full year or any future periods.

Overview and Executive Summary

We are the leading dedicated security technology company that secures systems and networks from known and unknown threats around the world. We empower home users, businesses, government agencies, service providers and our partners with the ability to block attacks, prevent disruptions, enforce policy and continuously track and improve their security and compliance. We apply business discipline and a pragmatic approach to security that is based on four principles of security risk management (identify and prioritize assets; determine acceptable risk; protect against threats; enforce and measure compliance). We incorporate some or all of these principles into our solutions. Our solutions protect systems and networks, blocking immediate threats while proactively providing protection from future threats.

Security has emerged as one of the most critical concerns facing businesses and consumers. Security breaches have risen dramatically in the past few years, fueled in part by the proliferation of mobile devices such as laptop computers, cell phones and smart phones with email and web-surfing capabilities. For corporations, the increasing frequency of security breaches has coincided with expanding regulatory compliance requirements relating to security and more specifically, to privacy. Failure to comply with these requirements, and with the requirements of internal security

policies and procedures, creates an additional level of enterprise risk. For consumers, the increasing frequency of online fraud and security concerns discourages customers from transacting online for example, visiting and purchasing from e-commerce sites, using online banking services and preparing taxes online. All of these trends point toward a growing demand for effective security solutions.

We have one business and operate in one industry, developing, marketing, distributing and supporting computer security solutions for large enterprises, governments, small and medium-sized businesses and consumers either directly or through a network of qualified distribution partners. We derive our revenue from three sources:

Table of Contents

(i) service and support revenue, which includes support and maintenance, training, consulting revenue; (ii) subscription revenue, which consists of revenue from customers who purchase licenses for products for the term of the subscription; and (iii) product revenue, which includes revenue from perpetual licenses (those with a one-time license fee) and hardware product sales. In the three months ended March 31, 2009, service and support revenue accounted for 51%, subscription revenue accounted for 41% and product revenue accounted for 8% of total net revenue, respectively.

Operating Results and Trends

We evaluate our consolidated financial performance utilizing a variety of indicators. Three of the primary indicators that we utilize to evaluate the growth and health of our business are total net revenue, operating income and net income.

Net Revenue. As discussed more fully below, our net revenue in the three months ended March 31, 2009 grew by \$78.1 million, or 21%, to \$447.7 million from \$369.6 million in the three months ended March 31, 2008. Our net revenue is directly impacted by corporate information technology, government and consumer spending levels. Net revenue from our 2008 acquisitions contributed \$47.1 million in the three months ended March 31, 2009. Changes in the U.S. Dollar compared to foreign currencies negatively impacted our revenue growth by \$14.8 million in the three months ended March 31, 2009 when compared to the three months ended March 31, 2008.

Operating Income. The \$1.5 million decrease in operating income in the three months ended March 31, 2009 compared to the three months ended March 31, 2008 was primarily attributable to the following factors: (i) amortization expense increased by \$10.5 million as a result of purchased technology and intangibles acquired in recent acquisitions, (ii) restructuring charges increased by \$5.0 million due to eliminating redundant positions from our Secure Computing acquisition and reorganization of our sales and marketing workforce and (iii) an increase in salaries and benefits due to an increase in headcount, primarily as a result of our Secure Computing acquisition. These decreases were offset largely by the overall growth of our company, including increased revenue and, to a lesser extent, increased operating costs.

Net Income. The \$23.3 million increase in net income in the three months ended March 31, 2009 compared to three months ended March 31, 2008 was primarily attributable to a decrease in our effective tax rate discussed more fully in *Provision for Income Taxes* below, offset by a \$10.9 million decrease in interest income attributable to lower yields and lower cash and marketable securities balances.

Acquisitions. We continue to focus our efforts on building a full line of system and network protection solutions and technologies that support our multi-platform strategy of personal computer, internet and mobile security solutions. In the fourth quarter of 2008, we acquired Secure Computing for \$490.1 million. With the Secure Computing acquisition, we plan to deliver the industry's most complete network security solution to organizations of all sizes. We expect that the acquisition of Secure Computing will have a dilutive impact in the remainder of 2009, primarily due to the amortization of intangibles.

Net Revenue by Product Groups and Customer Category. Transactions from our corporate business include the sale of product offerings intended for enterprise, mid-market and small business use. Net revenue from our corporate products increased \$59.6 million, or 28%, to \$276.0 million during the three months ended March 31, 2009 from \$216.4 million in the three months ended March 31, 2008. The year-over-year increase in revenue was due to a \$17.6 million increase in revenue from our end point solutions, which includes increased revenue from our system security solutions and new revenue from data encryption products integrated from our SafeBoot acquisition and a \$43.7 million increase in revenue from our network offerings, which includes new revenue integrated from our Secure Computing acquisition. These increases were offset in part by a \$1.7 million decrease in revenue from our

vulnerability and risk management offerings.

Table of Contents

Transactions from our consumer business include the sale of product offerings primarily intended for consumer use, as well as any revenue or activities associated with providing an overall safe consumer experience on the internet or cellular networks. Net revenue from our consumer security market increased \$18.5 million, or 12%, to \$171.7 million in the three months ended March 31, 2009 from \$153.2 million in the three months ended March 31, 2008. The increase in revenue from our consumer market in the three months ended March 31, 2009 was primarily attributable to our strengthening relationships with strategic channel partners, such as Acer, Dell, Sony Computer, and Toshiba.

Deferred Revenue. Our deferred revenue balance at March 31, 2009 decreased 2% to \$1,269.4 million, compared to \$1,293.1 million at December 31, 2008. The decrease was attributable to the strengthening of the U.S. Dollar compared to both the Euro and the Japanese Yen during the three months ended March 31, 2009, which negatively impacted our deferred revenue balance at March 31, 2009. On a local currency basis, our deferred revenue continued to increase as a result of growing sales of maintenance renewals from our expanding customer base and increased sales of subscription-based products. We receive up front payments for maintenance and subscriptions but we recognize revenue over the service or subscription term. Approximately 75 to 85% of our total net revenue during 2008 and the first quarter of 2009 came from prior-period deferred revenue. As with revenue, we believe that deferred revenue is a key indicator of the growth and health of our business.

Macro Economic Conditions. While we have recently experienced strong growth in revenue, economic conditions and financial markets have become increasingly negative, and national and global economies and financial markets have experienced a severe downturn stemming from a multitude of factors, including adverse credit conditions impacted by the sub-prime mortgage crisis, slower economic activity, concerns about inflation and deflation, fluctuating energy costs, decreased consumer confidence, reduced corporate profits and capital spending, adverse business conditions and liquidity concerns and other factors. Economic growth in the U.S. and many other countries slowed in the fourth quarter of 2007, remained slow for 2008 and the first quarter of 2009 and is expected to slow further or to recede in 2009 in the U.S. and abroad. The severity or length of time these economic and financial market conditions may persist is unknown. During challenging economic times and in tight credit markets, many customers may delay or reduce technology purchases. This could result in reductions in sales of our products, longer sales cycles, difficulties in collection of accounts receivable, slower adoption of new technologies and increased price competition. In the first quarter of 2009, we experienced delays in closing certain transactions that we anticipated would close during the quarter. In addition, weakness in the end-user market could negatively affect the cash flow of our distributors and resellers who could, in turn, delay paying their obligations to us. This would increase our credit risk exposure and cause delays in our recognition of revenue on future sales to these customers. Specific economic trends, such as declines in the demand for PCs, servers, and other computing devices, or softness in corporate information technology spending, could have a more direct impact on our business. Any of these events would likely harm our business, including decreasing our revenues, decreasing cash provided by operating activities and negatively impacting our liquidity.

Foreign Exchange Fluctuations. We are unable to predict the extent to which revenue in future periods will be impacted by changes in foreign exchange rates. If international sales become a greater portion of our total sales in the future, changes in foreign currency rates may have a potentially greater impact on our revenue and operating results. The Euro and Japanese Yen are the two predominant non-U.S. currencies that affect our financial statements. As the U.S. Dollar strengthens against foreign currencies, our revenues from transactions outside the U.S. and operating income may be negatively impacted. The U.S. Dollar has recently depreciated against the Japanese Yen. As the U.S. Dollar weakens against foreign currencies, our revenues may be positively impacted. During the three months ended March 31, 2009, on an average quarterly exchange basis, the U.S. Dollar strengthened against the Euro and weakened against the Yen compared to the three months ended March 31, 2008. Overall, the U.S. Dollar strengthening against the Euro had the most significant impact to our financial statements and this has resulted in a decrease in the revenue and expense amounts in certain foreign countries in our statements of income for the three months ended March 31, 2009 as compared to the same prior-year period.

Table of Contents**Critical Accounting Policies and Estimates**

We had no significant changes in our critical accounting policies and estimates during the three months ended March 31, 2009 as compared to the critical accounting policies and estimates disclosed in *Management's Discussion and Analysis of Financial Condition and Results of Operations* included in our annual report on Form 10-K for the year ended December 31, 2008.

Results of Operations***Net Revenue***

The following table sets forth, for the periods indicated, a year-over-year comparison of the key components of our net revenue:

	Three Months Ended		2009 vs. 2008	
	2009	2008	\$	%
	March 31,			
	(Dollars in thousands)			
Net revenue:				
Service and support	\$ 227,947	\$ 188,218	\$ 39,729	21%
Subscription	182,398	160,974	21,424	13
Product	37,364	20,449	16,915	83
Total net revenue	\$ 447,709	\$ 369,641	\$ 78,068	21%
Net revenue by geography:				
North America	\$ 254,442	\$ 189,750	\$ 64,692	34%
EMEA	120,619	122,248	(1,629)	(1)
Japan	35,509	27,019	8,490	31
Asia-Pacific, excluding Japan	20,603	18,036	2,567	14
Latin America	16,536	12,588	3,948	31
Total net revenue	\$ 447,709	\$ 369,641	\$ 78,068	21%
Net service and support revenue:				
Support and maintenance	\$ 206,862	\$ 175,941	\$ 30,921	18%
Consulting, training and other services	21,085	12,277	8,808	72
Total service and support revenue	\$ 227,947	\$ 188,218	\$ 39,729	21%
Net product revenue:				
Licenses	\$ 13,382	\$ 9,634	\$ 3,748	39%
Hardware	18,980	8,771	10,209	116
Retail and other	5,002	2,044	2,958	145
Total product revenue	\$ 37,364	\$ 20,449	\$ 16,915	83%

Our net revenue in a specific period is an aggregation of thousands of transactions ranging from high-volume, low-dollar transactions to high-dollar, multiple-element transactions that are individually negotiated. The impact of pricing and volume changes on revenue is complex as substantially all of our transactions contain multiple elements, primarily software licenses and post-contract support (PCS). Additionally, approximately 75 to 85% of our revenue in a specific period is derived from prior-period transactions for which revenue has been deferred and is being amortized into income over the period of the arrangement. Therefore, the impact of pricing and volume changes on revenue in a specific period results from transactions in multiple prior periods.

The increase in net revenue during the three months ended March 31, 2009 compared to the three months ended March 31, 2008 reflected (i) a \$59.6 million, or 28%, increase in our corporate business and (ii) an \$18.5 million, or 12%, increase in our consumer business.

Table of Contents

Net revenue from our corporate business increased during the three months ended March 31, 2009 compared to the three months ended March 31, 2008 primarily due to a \$43.7 million increase in revenues from our network protection offerings, which includes revenue from products integrated from our Secure Computing acquisition, and a \$17.6 million increase in revenues from our end point solutions, which includes revenue from data encryption products integrated from our SafeBoot acquisition. These increases were partially offset by a \$1.7 million decrease in our vulnerability and risk management offerings. During the three months ended March 31, 2009 compared to the three months ended March 31, 2008, we experienced an increase in both the number and size of larger transactions sold to customers through a solution selling approach, bundling multiple products and services into suite offerings, which positively impacted deferred revenue and will impact our revenue in future periods.

Net revenue from our consumer market increased during the three months ended March 31, 2009 compared to the three months ended March 31, 2008 primarily due to (i) online subscriber growth due partly to an increase in our customer base, (ii) increased online renewal subscriptions from both a larger customer base and (iii) increased up-sell to higher level suites with higher price points. We continued to strengthen our relationships with strategic channel partners, such as Acer, Dell, Sony Computer, and Toshiba.

Net Revenue by Geography

Net revenue outside of North America accounted for approximately 43% and 49% of net revenue in the three months ended March 31, 2009 and 2008, respectively. Net revenue from North America and EMEA has historically comprised between 80% and 90% of our total net revenue.

The increase in total net revenue in North America during the three months ended March 31, 2009 compared to the three months ended March 31, 2008 was primarily attributable to (i) a \$55.4 million increase in corporate revenue due to increased revenue from our network security offerings, which includes new revenue from products integrated from our Secure Computing acquisition and our end point solutions and (ii) a \$9.3 million increase in our consumer revenue. We also experienced an increase in U.S. government spending on our product offerings and larger transactions sold to customers through a solution selling approach.

The decrease in net revenue in EMEA during the three months ended March 31, 2009 compared to the three months ended March 31, 2008 was attributable to the negative impact of the U.S. Dollar strengthening against the Euro, which resulted in an approximate \$19.0 million impact to EMEA net revenue in the three months ended March 31, 2009 compared to the three months ended March 31, 2008. Excluding the negative impact from the strengthening U.S. Dollar against the Euro, we continued to experience revenue growth in EMEA from both our corporate and consumer offerings.

Our Japan, Latin America and Asia-Pacific operations combined have historically comprised less than 20% of our total net revenue, and we expect this trend to continue. Net revenue from Japan was also positively impacted by the weakening U.S. Dollar against the Japanese Yen, which resulted in an approximate \$4.4 million contribution to Japan net revenue in the three months ended March 31, 2009 compared to the three months ended March 31, 2008.

Service and Support Revenue

The increase in service and support revenue in the three months ended March 31, 2009 compared to the three months ended March 31, 2008 was attributable to an increase in support and maintenance primarily due to amortization of previously deferred revenue from support arrangements and to an increase in sales of support renewals to existing and new customers. In addition, we have expanded our support offerings to include premium-level services. Revenue from consulting increased due to more consultants providing integration and implementation services.

Although we expect our service and support revenue to continue to increase, our growth rate and net revenue depend significantly on renewals of support arrangements as well as our ability to respond successfully to the pace of technological change and our ability to expand our customer base. If our renewal rate or our pace of new customer acquisition slows, our net revenue and operating results would be adversely affected.

Table of Contents*Subscription Revenue*

The increase in subscription revenue in the three months ended March 31, 2009 compared to the three months ended March 31, 2008 was attributable to (i) increases in our online subscription arrangements due to our continued relationships with strategic partners, such as Acer, Dell, Sony Computer and Toshiba (ii) increases in revenue from our McAfee Total Protection Service for small and mid-market businesses, (iii) increases in royalties from sales by our strategic channel partners and (iv) increases in subscriptions from our Secure Computing acquisition. Subscription revenue continues to be positively impacted by McAfee Consumer Suites, including McAfee VirusScan Plus, McAfee Internet Security, and McAfee Total Protection Solutions, as these suites utilize a subscription-based model.

Product Revenue

The increase in product revenue for the three months ended March 31, 2009, compared to the three months ended March 31, 2008, was attributable to (i) increased revenue from our network security solutions which have a higher hardware content and, therefore, more upfront revenue realization and (ii) increased revenue from our data protection solutions and upgrade initiatives related to our total protection solutions.

Cost of Net Revenue

The following table sets forth, for the periods indicated a comparison of cost of net revenue:

	Three Months Ended		2009 vs. 2008	
	2009	March 31, 2008	\$	%
	(Dollars in thousands)			
Cost of net revenue:				
Service and support	\$ 24,084	\$ 14,844	\$ 9,240	62%
Subscription	48,644	46,590	2,054	4
Product	20,934	14,942	5,992	40
Amortization of purchased technology	19,394	13,560	5,834	43
Total cost of net revenue	\$ 113,056	\$ 89,936	\$ 23,120	26%
Components of Gross margin:				
Service and support	\$ 203,863	\$ 173,374		
Subscription	133,754	114,384		
Product	16,430	5,507		
Amortization of purchased technology	(19,394)	(13,560)		
Total gross margin	\$ 334,653	\$ 279,705		
Total gross margin percentage	75%	76%		

Cost of Service and Support Revenue

Cost of service and support revenue consists principally of salaries, benefits and stock-based compensation related to employees, as well as expenses related to professional service subcontractors, customer and technical support, training and consulting services. The cost of service and support revenue increased for the three months ended March 31, 2009 compared to the three months ended March 31, 2008 due to increased professional services costs related to consulting services and increased costs related to customer and technical support. The cost of service and support revenue as a percentage of service and support revenue for the three months ended March 31, 2009 increased compared to the same period in 2008 due primarily to the addition of Secure Computing customer support, training and consulting personnel, mitigated in part by increased service contracts and support renewals.

Table of Contents

We anticipate the cost of service and support revenue will increase in absolute dollars driven primarily by additional growth in our consulting services, which provide end users with product design, user training, and deployment support and the expected impact related to the acquisition of Secure Computing.

Cost of Subscription Revenue

Cost of subscription revenue consists primarily of costs related to the sale of online subscription arrangements, the majority of which include revenue-share arrangements and royalties paid to our strategic partners, and the costs of media, manuals and packaging related to McAfee Consumer Suites, as these suites utilize a subscription-based model. The increase in subscription costs for the three months ended March 31, 2009 compared to the three months ended March 31, 2008 was primarily attributable to an increase in the volume of online subscription arrangements and revenue-share arrangements and royalties paid to our online strategic partners. The cost of subscription revenue as a percentage of subscription revenue decreased slightly for the three months ended March 31, 2009 compared to the same period in 2008 due to lower costs per transaction from sales originating with our strategic partners.

We anticipate that the cost of subscription revenue will increase in absolute dollars due to expected increased demand for our subscription-based products with associated royalty and revenue-sharing costs.

Cost of Product Revenue

Cost of product revenue consists primarily of the cost of media, manuals and packaging for products distributed through traditional channels and, with respect to hardware-based security products, the cost of computer platforms, other hardware and embedded third-party components and technologies. The cost of product revenue for the three months ended March 31, 2009 increased compared to the three months ended March 31, 2008 due primarily to additional product-related transactions related to the acquisition of Secure Computing. Cost of product revenue for the three months ended March 31, 2009 decreased as a percentage of product revenue compared to the same period in 2008, due primarily to increased margins on corporate revenue resulting from a shift in product mix to higher-margin network protection solutions from lower-margin hardware transactions.

We anticipate that cost of product revenue will increase in absolute dollars due to mix and size of certain enterprise-related transactions.

Amortization of Purchased Technology

The increase in amortization of purchased technology in the three months ended March 31, 2009 compared to the three months ended March 31, 2008 was driven by the acquisitions of Secure Computing in November 2008, Reconnex in August 2008, and ScanAlert in January 2008. Amortization for the purchased technology related to these acquisitions was \$7.8 million in the three months ended March 31, 2009.

We expect amortization of purchased technology to increase in absolute dollars as a result of our 2008 acquisitions when comparing 2009 to 2008.

Gross Margin

Our gross margins decreased slightly for the three months ended March 31, 2009 compared to the three months ended March 31, 2008 due mostly to increased cost of service and support revenue as a percentage of service and support revenue and increased amortization of purchased technology related to acquisitions made during 2008.

Gross margins may fluctuate in the future due to various factors, including the mix of products sold, upfront revenue realization, sales discounts, revenue-sharing and royalty arrangements, material and labor costs, warranty costs and amortization of purchased technology.

Stock-based Compensation Expense

Stock-based compensation expense consists of expense associated with all stock-based awards made to our employees and outside directors. Our stock-based awards include options, RSUs, RSAs, PSUs and ESPP grants.

We believe that continued investment in product development is critical to attaining our strategic objectives. We expect research and development expenses will increase in absolute dollars during the remainder of 2009.

Sales and Marketing

The following table sets forth, for the periods indicated, a comparison of our sales and marketing expenses:

	Three Months Ended		2009 vs. 2008	
	2009	March 31, 2008	\$	%
	(Dollars in thousands)			
Sales and marketing(1)	\$ 148,764	\$ 121,108	\$ 27,656	23%
Percentage of net revenue	33%	33%		

(1) Includes stock-based compensation expense of \$9,763 and \$3,896 in the three months ended March 31, 2009 and 2008, respectively.

Table of Contents

Sales and marketing expenses consist primarily of salary, commissions, stock-based compensation and benefits and costs associated with travel for sales and marketing personnel, advertising and promotions. The increase in sales and marketing expenses during the three months ended March 31, 2009 compared to the three months ended March 31, 2008 reflected (i) a \$19.8 million increase in salary and benefit expense, including commissions, for individuals performing sales and marketing activities due to an increase in headcount primarily from our Secure Computing acquisition, salary increases in April 2008 and increased commissions, (ii) a \$13.7 million increase related to agreements with certain PC OEM partners, (iii) a \$5.9 million increase in stock-based compensation expense and (iv) increases in various other expenses associated with sales and marketing activities, offset by (i) a \$9.3 million decrease due to the net impact of foreign exchange rates, primarily driven by the average U.S. Dollar exchange rate strengthening against the Euro during the three months ended March 31, 2009 compared to the three months ended March 31, 2008 and (ii) a \$5.5 million decrease in marketing and promotion expenses.

We anticipate that sales and marketing expenses will increase in absolute dollars primarily due to agreements with our strategic partners, primarily our PC OEM partners, where we have seen growth in volume and an increase in the number of partner agreements, our planned branding initiatives and our additional investment in sales capacity.

General and Administrative

The following table sets forth, for the periods indicated, a comparison of our general and administrative expenses:

	Three Months Ended		2009 vs. 2008	
	2009	March 31, 2008	\$	%
	(Dollars in thousands)			
General and administrative(1)	\$ 40,160	\$ 41,314	\$ (1,154)	(3)%
Percentage of net revenue	9%	11%		

(1) Includes stock-based compensation expense of \$6,251 and \$3,915 in the three months ended March 31, 2009 and 2008, respectively.

General and administrative expenses consist principally of salary, stock-based compensation and benefit costs for executive and administrative personnel, professional services and other general corporate activities. The decrease in general and administrative expenses during the three months ended March 31, 2009 compared to the three months ended March 31, 2008 reflected (i) \$12.2 million decrease in legal expense primarily due to a \$6.5 million reimbursement from an insurance carrier for legal fees incurred related to cost of defense incurred in connection with our stock option investigation that commenced in May 2006 and (ii) a \$3.3 million decrease due to the net impact of foreign exchange rates, primarily driven by the average U.S. Dollar exchange rate strengthening against the Euro during the three months ended March 31, 2009 compared to the three months ended March 31, 2008, offset by (i) a \$5.5 million benefit recognized in the three months ended March 31, 2008 related to the change in fair value of certain stock options subject to the provisions of EITF 00-19, *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*, (ii) a \$4.6 million increase in salary and benefit expense for individuals performing general and administrative activities due to an increase in headcount primarily from our Secure Computing acquisition and salary increases in April 2008 and (iii) increases in expense due to various other expenses associated with general and administrative activities.

We anticipate that general and administrative expenses will increase in absolute dollars during the remainder of 2009.

Table of Contents*Amortization of Intangibles*

The following table sets forth, for the periods indicated, a comparison of the amortization of intangibles:

	Three Months Ended		2009 vs. 2008	
	2009	2008	\$	%
	March 31,			
	(Dollars in thousands)			
Amortization of intangibles	\$ 9,995	\$ 5,340	\$ 4,655	87%

Intangibles consist of identifiable intangible assets such as trademarks and customer lists. The increase in amortization of intangibles was attributable to our 2008 and 2009 acquisitions, in which we acquired approximately \$68.8 million of intangible assets related to the Secure Computing, ScanAlert, Reconnex, and Endeavor acquisitions.

We expect amortization of intangibles to increase in absolute dollars during the remainder of 2009 when compared to 2008 as a result of our 2008 acquisitions.

Restructuring Charges

Restructuring charges in the three months ended March 31, 2009 totaled \$5.1 million, of which \$2.7 million related to the realignment of our sales and marketing workforce and \$2.2 million related to additional accrual over the service period for our 2008 elimination of certain positions at Secure Computing. Restructuring charges in the three months ended March 31, 2008 totaled \$0.1 million, of which \$2.5 million was related to the elimination of certain positions at SafeBoot that were redundant to positions at McAfee and the realignment of our sales force, offset by a \$2.4 million benefit related primarily to previous estimates of base rent and sublease income for the Santa Clara lease which was restructured in 2003 and 2004. See Note 7 to our condensed consolidated financial statements for a description of restructuring activities.

Interest and Other Income

The following table sets forth, for the periods indicated, a comparison of our interest and other income:

	Three Months Ended		2009 vs. 2008	
	2009	2008	\$	%
	March 31,			
	(Dollars in thousands)			
Interest and other income	\$ 2,811	\$ 13,035	\$ (10,224)	(78)%

Interest and other income includes interest earned on investments, as well as net foreign currency transaction gains or losses and net forward contract gains and losses. The decrease in interest income was primarily due to (i) a decrease in our average cash, cash equivalents and marketable securities of approximately \$596.9 million in the three months ended March 31, 2009 compared to the three months ended March 31, 2008 and (ii) a lower average rate of annualized return on our investments, from approximately 4% in the three months ended March 31, 2008 to less than 2% in the three months ended March 31, 2009.

We recorded net foreign currency transaction gains of \$1.3 million during the three months ended March 31, 2009 in our condensed consolidated statements of income and comprehensive income compared to a loss of \$0.9 million during the three months ended March 31, 2008.

We anticipate that interest and other income will decrease during 2009 as a result of lower cash balances in 2009 due to acquisitions and our stock repurchases during 2008, the declining interest rate environment and our shifting a large percentage of our investment portfolio to shorter-term and U.S. government and FDIC guaranteed investments which have lower yields.

Impairment of Marketable Securities

During the three months ended March 31, 2009, we recorded impairments on certain of our marketable securities of \$0.7 million. These securities have previously been impaired, have fair values significantly below par and had further declines in fair value in the three months ended March 31, 2009. We had no other-than-temporary

year in January 2009. A tax benefit of approximately \$2.2 million is reflected in the first quarter of 2009. In addition, the statute of limitations related to various domestic and foreign jurisdictions expired in the first quarter of 2009, resulting in a tax benefit of approximately \$9.1 million.

Recent Accounting Pronouncements

See Note 2 to the condensed consolidated financial statements.

Table of Contents**Acquisitions*****Secure Computing***

In November 2008, we acquired Secure Computing for \$490.1 million. With this acquisition, we plan to deliver the industry's most complete network security portfolio covering intrusion prevention, firewall, web security, email security and data protection, and network access control to organizations of all sizes. The results of operations for Secure Computing have been included in our results of operations since the date of acquisition.

Liquidity and Capital Resources

	Three Months Ended	
	March 31,	
	2009	2008
	(In thousands)	
Net cash provided by operating activities	\$ 145,976	\$ 71,374
Net cash (used in) provided by investing activities	(119,977)	22,317
Net cash provided by (used in) financing activities	95,494	(63,978)

Overview

At March 31, 2009, our cash, cash equivalents and marketable securities totaled \$801.5 million. Our principal sources of liquidity were our existing cash, cash equivalents and short-term marketable securities of \$752.5 million, and our operating cash flows. Our principal uses of cash were operating costs, which consist primarily of employee-related expenses, such as compensation and benefits, as well as other general operating expenses and purchases of marketable securities.

During the three months ended March 31, 2009, we had proceeds of \$100.0 million from the draw down under an unsecured term loan, net income of \$53.5 million and \$7.8 million from proceeds from the issuance of common stock under our stock option and stock purchase plans. We used \$16.5 million to repurchase shares of common stock in connection with our obligation to holders of RSUs, RSAs and PSUs to withhold the number of shares required to satisfy the holders' tax liabilities in connection with the vesting of such shares, \$11.0 million for purchases of property and equipment and \$2.5 million for the acquisition of Endeavor.

During the three months ended March 31, 2008, we had net income of \$30.2 million and we received \$53.7 million from proceeds from the issuance of common stock under our stock option and stock purchase plans. We paid \$49.0 million, net of cash acquired, to purchase ScanAlert, Inc. and we paid \$6.0 million for direct acquisition costs accrued at December 31, 2007 for our acquisition of SafeBoot. In addition, we used \$127.2 million for repurchases of our common stock, including commissions, and \$10.5 million for purchases of property and equipment. Of the \$127.2 million used for stock repurchases, \$113.5 million was used for share repurchases in the open market and \$13.7 million was used to repurchase shares of common stock in connection with our obligation to holders of RSUs, RSAs and PSUs to withhold the number of shares required to satisfy the holders' tax liabilities in connection with the vesting of such shares.

We classify our investment portfolio as available-for-sale, and our investments are made with a policy of capital preservation and liquidity as the primary objectives. We generally hold investments in money market,

U.S. government fixed income, U.S. government agency fixed income, mortgage-backed and investment grade corporate fixed income securities to maturity; however, we may sell an investment at any time if the quality rating of the investment declines, the yield on the investment is no longer attractive or we are in need of cash. We expect to continue our investing activities, including holding investment securities of a short-term and long-term nature. During these challenging markets, we are investing new cash in instruments with short to medium-term maturities of highly-rated issuers, including U.S. government and FDIC guaranteed investments

On December 22, 2008, we entered into a credit agreement by and among us, certain of our subsidiaries as guarantors, the lenders from time to time party thereto and Bank of America, N.A., as administrative agent and letter of credit issuer (Credit Facility). The Credit Facility provides for a \$100.0 million unsecured term loan and a \$100.0 million unsecured revolving credit facility with a \$25.0 million letter of credit sublimit. The Credit Facility also contains an expansion option permitting us to arrange up to an aggregate of \$200.0 million in additional commitments from existing lenders and/or new lenders at the lenders discretion. We borrowed \$100.0 million under the term loan portion of the Credit Facility in January 2009.

Table of Contents

Our management continues to monitor the financial markets and general global economic conditions as a result of the recent distress in the financial markets. As we monitor market conditions, our liquidity position and strategic initiatives, we may seek either short-term or long-term financing from external credit sources in addition to the credit facilities discussed herein. Our ability to raise funds may be adversely affected by a number of factors, including factors beyond our control, such as the current weakness in the economic conditions in the markets in which we operate and into which we sell our products, and increased uncertainty in the financial, capital and credit markets. There can be no assurance that additional financing would be available on terms acceptable to us, if at all.

Our management plans to use our cash and cash equivalents for future operations and potential acquisitions. We may in the future repurchase our common stock on the open market. We believe that our cash and cash equivalent balances and cash that we generate over time from operations, along with amounts available for borrowing under the Credit Facility, will be sufficient to satisfy our anticipated cash needs for working capital and capital expenditures for at least the next 12 months and the foreseeable future.

Operating Activities

Net cash provided by operating activities in the three months ended March 31, 2009 was primarily the result of cash collections on accounts receivable and our net income of \$53.5 million. Net cash provided by operating activities in the three months ended March 31, 2008 was primarily the result of our net income of \$30.2 million and changes in working capital, including cash collections on accounts receivable. For the three months ended March 31, 2009, our primary working capital source was decreased accounts receivable primarily due to significant cash collections in the first quarter of the year due to a higher accounts receivable balance at December 31, 2008. Working capital uses of cash included decreased accrued taxes and other liabilities primarily due to payments of our derivative lawsuit settlement, taxes and commissions.

For the three months ended March 31, 2008, our primary working capital source was decreased accounts receivable, primarily due to decreased invoicing as compared to cash collections in the first quarter of the year. Our primary working capital use of cash was decreased accrued taxes and other liabilities primarily due to payment of certain amounts accrued at December 31, 2007 related to equity awards classified as liability awards as a result of modifications and decreases in income taxes payable.

Our cash and marketable securities balances are held in numerous locations throughout the world, including substantial amounts held outside the United States. As of March 31, 2009 and December 31, 2008, approximately \$402.4 million and \$364.5 million, respectively, were held outside the United States. We utilize a variety of tax planning and financing strategies to ensure that our worldwide cash is available in the locations in which it is needed.

We expect to meet our obligations as they become due through available cash, borrowings under the Credit Facility, and internally generated funds. We expect to continue generating positive working capital through our operations. However, we cannot predict whether current trends and conditions will continue or what the effect on our business might be from the competitive environment in which we operate. In addition, we currently cannot predict the outcome of the litigation described in Note 12 to the condensed consolidated financial statements.

Investing Activities

Net cash used in investing activities was \$120.0 million during the three months ended March 31, 2009 as compared to net cash provided by investing activities of \$22.3 million during the three months ended March 31, 2008.

During the three months ended March 31, 2009, the primary uses of cash in investing activities included \$106.5 million of net purchases of marketable securities, purchases of property and equipment and the acquisition of Endeavor.

Our cash used for acquisitions decreased to \$2.5 million for the three months ended March 31, 2009 compared to \$55.0 million for the three months ended March 31, 2008. During January 2009, we paid \$2.5 million, net of cash acquired, to purchase Endeavor. During January 2008, we paid \$49.0 million, net of cash acquired, to purchase ScanAlert and \$6.0 million for direct acquisition costs accrued at December 31, 2007 for our acquisition of SafeBoot.

Table of Contents

Our cash used for purchases of property and equipment increased to \$11.0 million for the three months ended March 31, 2009 compared to \$10.5 million for the three months ended March 31, 2008. The property and equipment purchased during the three months ended March 31, 2009 was primarily for upgrades of our existing systems and purchases of computers, equipment and software and for leasehold improvements at various offices. The property and equipment purchased during the three months ended March 31, 2008 was primarily for purchases of computers, equipment and software. We expect to continue to have capital expenditures at levels consistent with the prior year.

Financing Activities

Net cash provided by financing activities was \$95.5 million during the three months ended March 31, 2009 compared to net cash used in financing activities of \$64.0 million during the three months ended March 31, 2008. During the three months ended March 31, 2009, primary sources of cash provided by financing activities included \$100.0 million borrowed under the term loan portion of the Credit Facility and proceeds from the issuance of common stock under our stock option and stock purchase plans. During the three months ended March 31, 2009, we received proceeds of \$7.8 million compared to \$53.7 million during the three months ended March 31, 2008 from issuance of stock under such plans. During the three months ended March 31, 2009 and 2008, we used \$16.5 million and \$13.7 million, respectively, to repurchase shares of our common stock in connection with our obligation to holders of RSUs, RSAs and PSUs to withhold the number of shares required to satisfy the holders' tax liabilities in connection with the vesting of such shares. These shares were not part of the publicly announced repurchase program.

We had no repurchases of our common stock in the open market during the three months ended March 31, 2009. We used \$113.5 million for repurchases of our common stock in the open market during the three months ended March 31, 2008. Pursuant to a stock repurchase program that has been authorized by our board of directors, we may repurchase up to an additional \$250.3 million of our common stock in the open market or through privately negotiated transactions through July 2009, depending upon market conditions, share price and other factors.

While we expect to continue to receive proceeds from our stock option and stock purchase plans in future periods, the timing and amount of such proceeds are difficult to predict and are contingent on a number of factors including the type of equity awards grants to our employees, the price of our common stock, the number of employees participating in the plans and general market conditions.

Credit Facilities

In December 2008, we entered into a Credit Facility that provides for a \$100.0 million unsecured term loan and a \$100.0 million unsecured revolving credit facility with a \$25.0 million letter of credit sublimit. The Credit Facility also contains an expansion option permitting us to arrange up to an aggregate of \$200.0 million in additional commitments from existing lenders and/or new lenders.

The principal of, together with accrued interest on, the term loan is due on December 22, 2009. The revolving credit facility terminates on December 22, 2011, on which date all outstanding principal of, together with accrued interest on, any revolving loans will be due. We may prepay the loans and terminate the commitments at any time, without premium or penalty, subject to reimbursement of certain costs in the case of eurocurrency loans.

Loans may be made in U.S. Dollars, Euros or other currencies agreed to by the lenders. Loans will bear interest at our election at the prime rate or at an adjusted LIBOR rate plus a margin (ranging from 2% to 2.5%) that varies with our consolidated leverage ratio (a eurocurrency loan). Interest on the loans is payable quarterly in arrears with respect to prime rate loans and at the end of an interest period (or at each three month intervals in the case of loans with interest periods greater than three months) in the case of eurocurrency loans. In December 2008, we paid \$2.0 million of debt issuance costs related to the Credit Facility. Commitment fees range from 0.25% to 0.45% of the unused portion on

the credit facility depending on our consolidated leverage ratio. The Credit Facility contains financial covenants, measured at the end of each of our quarters, providing that our consolidated leverage ratio (as defined in the credit agreement) cannot exceed 2.0 to 1.0 and our consolidated interest coverage ratio (as defined in the credit agreement) cannot be less than 3.0 to 1.0. Additionally, the Credit Facility contains affirmative covenants, including covenants regarding the payment of taxes, maintenance of insurance, reporting requirements and compliance with applicable laws. The Credit Facility contains negative covenants, among other things, limiting

Table of Contents

our ability and our subsidiaries' ability to incur debt, liens, make acquisitions, make certain restricted payments and sell assets. The events of default under the Credit Facility include payment defaults, cross defaults with certain other indebtedness, breaches of covenants, judgment defaults, bankruptcy events and the occurrence of a change in control (as defined in the credit agreement). At March 31, 2009 and December 31, 2008, we had \$3.0 million of restricted cash deposited at one of our lenders. This amount will be reduced to \$1.5 million when the term loan is repaid in full. The deposit will be restricted until we have repaid the outstanding balance on the term loan and on the expiration of the revolving credit facility.

We borrowed \$100.0 million under the term loan portion of the Credit Facility in January 2009. No balances were outstanding under the Credit Facility as of December 31, 2008. At March 31, 2009 and December 31, 2008, we were in compliance with all covenants in the Credit Facility.

In addition, we have a 14.0 million Euro credit facility with a bank, (the Euro Credit Facility). The Euro Credit Facility is available on an offering basis, meaning that transactions under the Euro Credit Facility will be on such terms and conditions, including interest rate, maturity, representations, covenants and events of default, as mutually agreed between us and the bank at the time of each specific transaction. The Euro Credit Facility is intended to be used for short-term credit requirements, with terms of one year or less. The Euro Credit Facility can be canceled at any time. No balances were outstanding under the Euro Credit Facility as of March 31, 2009 or December 31, 2008.

Item 3. *Quantitative and Qualitative Disclosures about Market Risk*

Our market risks at March 31, 2009, are consistent with those discussed in Item 7A of our annual report on Form 10-K for the year ended December 31, 2008 filed with the SEC. During 2008, there were significant disruptions in the financial markets. A number of large financial institutions failed, were supported by the U.S. government or were merged into other organizations. The market disruption has resulted in a lack of liquidity in the credit markets and a decline in the market value of debt securities. As a result of these effects, in the three months ended March 31, 2009, we recorded additional impairment on previously impaired marketable securities totaling \$0.7 million for continued declines in fair value. We had no impairment of marketable securities in the three months ended March 31, 2008. We had a net unrealized gain of \$0.1 million on marketable securities at March 31, 2009, compared with a net unrealized gain of \$0.6 million at December 31, 2008.

Item 4. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and our chief financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) and concluded that our disclosure controls and procedures were effective as of March 31, 2009.

A control system, no matter how well conceived and operated, can provide only reasonable assurance that the objectives of the control system are met. Our management, including our chief executive officer and chief financial officer, does not expect that our disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues within our company have been detected. These inherent limitations include the reality that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. The design of any control system is also based, in part, upon certain assumptions about the likelihood of future events, and there can be no assurance that any

design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents

Changes in Internal Controls Over Financial Reporting

We have had no changes in our internal control over financial reporting during the three months ended March 31, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

Item 1. *Legal Proceedings*

Information with respect to this item is incorporated by reference to Note 12 to our condensed consolidated financial statements included in this Form 10-Q, which information is incorporated into this Part II, Item 1 by reference.

Item 1A. *Risk Factors*

Investing in our common stock involves a high degree of risk. Some but not all of the risks we face are described below. Any of the following risks could materially adversely affect our business, operating results, financial condition and cash flows and reduce the value of an investment in our common stock.

Adverse conditions in the national and global economies and financial markets may adversely affect our business and financial results.

National and global economies and financial markets have experienced a severe downturn stemming from a multitude of factors, including adverse credit conditions impacted by the sub-prime mortgage crisis, slower or receding economic activity, concerns about inflation and deflation, fluctuating energy costs, decreased consumer confidence, reduced corporate profits and capital spending, adverse business conditions and liquidity concerns and other factors. Economic growth in the U.S. and many other countries slowed or receded in the fourth quarter of 2008 and the first quarter of 2009. The severity or length of time these economic and financial market conditions may persist is unknown. During challenging economic times and in tight credit markets, many customers may delay or reduce technology purchases. This could result in reductions in sales of our products, longer sales cycles, difficulties in collection of accounts receivable, slower adoption of new technologies and increased price competition. In addition, weakness in the end-user market could negatively affect the cash flow of our distributors and resellers who could, in turn, delay paying their obligations to us. This would increase our credit risk exposure and cause delays in our recognition of revenue on future sales to these customers. Specific economic trends, such as declines in the demand for PCs, servers, and other computing devices, or softness in corporate information technology spending, could have a more direct impact on our business. Any of these events would likely harm our business, operating results, cash flows and financial condition.

We face intense competition and we expect competitive pressures to increase in the future. This competition could have a negative impact on our business and financial results.

The markets for our products are intensely competitive and we expect both product and pricing competition to increase. If our competitors gain market share in the markets for our products, our sales could grow more slowly or decline. Competitive pressures could also lead to increases in expenses such as advertising expenses, product rebates, product placement fees, and marketing funds provided to our channel partners.

Advantages of larger competitors. Our principal competitors in each of our product categories are described in *Business Competition* of our annual report on Form 10-K for the fiscal year ended December 31, 2008. Our competitors include some large enterprises such as Microsoft, Cisco Systems, Symantec, IBM and Google. Large

vendors of hardware or operating system software increasingly incorporate system and network protection functionality into their products, and enhance that functionality either through internal development or through strategic alliances or acquisitions. For example, Cisco recently announced an agreement with Trend Micro to embed internet security software on Cisco's Linksys wireless routers. Some of our competitors have longer operating histories, more extensive international operations, greater name recognition, larger technical staffs, established

Table of Contents

relationships with more distributors and hardware vendors, significantly greater product development and acquisition budgets, and/or greater financial, technical and marketing resources than we do.

Consumer business competition. More than 35% of our revenue comes from our consumer business. Our growth of this business relies on direct sales and sales through relationships with ISPs such as AOL, Cox and Comcast, and PC OEMs, such as Acer, Dell, Sony Computer and Toshiba. As competition in this market increases, we have and will continue to experience pricing pressures that could have a negative effect on our ability to sustain our revenue and market share growth. As our consumer business becomes increasingly more dependent upon the partner model, our retail businesses may continue to decline. Further, as penetration of the consumer anti-virus market through the ISP model increases, we expect that pricing and competitive pressures in this market will become even more acute.

Low-priced or free competitive products. Security protection is increasingly being offered by third parties at significant discounts to our prices or, in some cases is bundled for free. For example, Microsoft announced that beginning in 2009 it will offer in emerging markets a free anti-malware consumer product dubbed Morro. The widespread inclusion of lower-priced or free products that perform the same or similar functions as our products within computer hardware or other companies' software products could reduce the perceived need for our products or render our products unmarketable even if these incorporated products are inferior or more limited than our products. It is possible that a major competitor may offer a free anti-malware enterprise product. The expansion of these competitive trends could have a significant negative impact on our sales and financial results.

We also face competition from numerous smaller companies, shareware and freeware authors and open source projects that may develop competing products, as well as from future competitors, currently unknown to us, who may enter the markets because the barriers to entry are fairly low. Smaller and/or newer companies often compete aggressively on price.

We face product development risks due to rapid changes in our industry. Failure to keep pace with these changes could harm our business and financial results.

The markets for our products are characterized by rapid technological developments, continually-evolving industry trends and standards and ongoing changes in customer requirements. Our success depends on our ability to timely and effectively keep pace with these developments.

Keeping pace with industry changes. We must enhance and expand our product offerings to reflect industry trends, new technologies and new operating environments as they become increasingly important to customer deployments. For example, we must expand our offerings for virtual computer environments; we must continue to expand our security technologies for mobile environments to support a broader range of mobile devices such as mobile phones and personal digital assistants; we must develop products that are compatible with new or otherwise emerging operating systems, while remaining compatible with popular operating systems such as Linux, Sun's Solaris, UNIX, Macintosh OS_X, and Windows XP, NT and Vista; and we must continue to expand our business models beyond traditional software licensing and subscription models, specifically, software-as-a-service is becoming an increasingly important method and business model for the delivery of applications. We must also continuously work to ensure that our products meet changing industry certifications and standards. Failure to keep pace with any changes that are important to our customers could cause us to lose customers and could have a negative impact on our business and financial results.

Impact of product development delays or competitive announcements. Our ability to adapt to changes can be hampered by product development delays. We may experience delays in product development as we have at times in the past. Complex products like ours may contain undetected errors or version compatibility problems, particularly when first released, which could delay or adversely impact market acceptance. We may also experience delays or

unforeseen costs associated with integrating products we acquire with products we develop because we may be unfamiliar with errors or compatibility issues of products we did not develop ourselves. We may choose not to deliver a partially-developed product, thereby increasing our development costs without a corresponding benefit. This could negatively impact our business.

Table of Contents

If our products do not work properly, we could experience negative publicity, damage to our reputation, legal liability, declining sales and increased expenses.

Failure to protect against security breaches. Because of the complexity of our products, we have in the past found errors in versions of our products that were not detected before first introduced, or in new versions or enhancements, and we may find such errors in the future. Because of the complexity of the environments in which our products operate, our products may have errors or defects that customers identify after deployment. Failures, errors or defects in our products could result in security breaches or compliance violations for our customers, disruption or damage to their networks or other negative consequences and could result in negative publicity, damage to our reputation, declining sales, increased expenses and customer relation issues. Such failures could also result in product liability damage claims against us by our customers, even though our license agreements with our customers typically contain provisions designed to limit our exposure to potential product liability claims. Furthermore, the correction of defects could divert the attention of engineering personnel from our product development efforts. A major security breach at one of our customers that is attributable to or not preventable by our products could be very damaging to our business. Any actual or perceived breach of network or computer security at one of our customers, regardless of whether the breach is attributable to our products, could adversely affect the market's perception of our security products and our stock price.

False alarms. Our system protection software products have in the past, and these products and our intrusion protection products may at times in the future, falsely detect viruses or computer threats that do not actually exist. These false alarms, while typical in the security industry, would likely impair the perceived reliability of our products and may therefore adversely impact market acceptance of our products. In addition, we have in the past been subject to litigation claiming damages related to a false alarm, and similar claims may be made in the future.

Our email and web solutions (anti-spam, anti-spyware and safe search products) may falsely identify emails, programs or web sites as unwanted spam, potentially unwanted programs or unsafe. They may also fail to properly identify unwanted emails, programs or unsafe web sites, particularly because spam emails, spyware or malware are often designed to circumvent anti-spam or spyware products and to incorrectly identify legitimate web sites as unsafe. Parties whose emails or programs are incorrectly blocked by our products, or whose web sites are incorrectly identified as unsafe or as utilizing phishing techniques, may seek redress against us for labeling them as spammers or unsafe and/or for interfering with their businesses. In addition, false identification of emails or programs as unwanted spam or potentially unwanted programs may discourage potential customers from using or continuing to use these products.

Customer misuse of products. Our products may also not work properly if they are misused or abused by customers or non-customer third parties who obtain access and use of our products. These situations may arise where an organization uses our products in a manner that impacts their end users or employees' privacy or where our products are misappropriated to censor private access to the internet. Any of these situations could impact the perceived reliability of our products, result in negative press coverage, negatively affect our reputation and adversely impact our financial results.

We face risks associated with past and future acquisitions.

We may buy or make investments in complementary or competitive companies, products and technologies. We may not realize the anticipated benefits from these acquisitions. Future acquisitions could result in significant acquisition-related charges and dilution to our stockholders. In addition, we face a number of risks relating to our acquisitions, including the following, any of which could harm our ability to achieve the anticipated benefits of our past or future acquisitions.

Integration. Integration of an acquired company or technology is a complex, time consuming and expensive process. The successful integration of an acquisition requires, among other things, that we integrate and retain key management, sales, research and development and other personnel; integrate the acquired products into our product offerings from both an engineering and sales and marketing perspective; integrate and support pre-existing suppliers, distribution and customer relationships; coordinate research and development efforts; and consolidate duplicate facilities and functions and integrate back-office accounting, order processing and support functions.

Table of Contents

The geographic distance between the companies, the complexity of the technologies and operations being integrated and the disparate corporate cultures being combined may increase the difficulties of integrating an acquired company or technology. Management's focus on the integration of operations may distract attention from our day-to-day business and may disrupt key research and development, marketing or sales efforts. In addition, it is common in the technology industry for aggressive competitors to attract customers and recruit key employees away from companies during the integration phase of an acquisition. If integration of our acquired businesses or assets is not successful, we may experience adverse financial or competitive effects.

Internal controls, policies and procedures. Acquired companies or businesses are likely to have different standards, controls, contracts, procedures and policies, making it more difficult to implement and harmonize company-wide financial, accounting, billing, information and other systems. Acquisitions of privately held and/or non-US companies are particularly challenging because their prior practices in these areas may not meet the requirements of the Sarbanes-Oxley Act and public accounting standards.

Use of cash and securities. Our available cash and securities may be used to acquire or invest in companies or products. Moreover, when we acquire a company, we may have to incur or assume that company's liabilities, including liabilities that may not be fully known at the time of acquisition. To the extent we continue to make acquisitions, we will require additional cash and/or shares of our common stock as payment. The use of securities would cause dilution for our existing stockholders.

Key employees from acquired companies may be difficult to retain and assimilate. The success of many acquisitions depends to a great extent on our ability to retain key employees from the acquired company. This can be challenging, particularly in the highly competitive market for technical personnel. Retaining key executives for the long-term can also be difficult due to other opportunities available to them. It could be difficult, time consuming and expensive to replace any key management members or other critical personnel that do not accept employment with McAfee following the acquisition. In addition to retaining key employees, we must integrate them into our company, which can be difficult and costly. Changes in management or other critical personnel may be disruptive to our business and might also result in our loss of some unique skills and the departure of existing employees and/or customers.

Accounting charges. Acquisitions may result in substantial accounting charges for restructuring and other expenses, amortization of intangible assets and stock-based compensation expense, any of which could materially adversely affect our operating results.

Potential goodwill impairment. We perform an impairment analysis on our goodwill balances on an annual basis or whenever events occur that may indicate impairment. If the fair value of each of our reporting units is less than the carrying amount of the reporting unit, then we must write down goodwill to its estimated fair value. We cannot be certain that a future downturn in our business, changes in market conditions or a long-term decline in the quoted market price of our stock will not result in an impairment of goodwill and the recognition of resulting expenses in future periods, which could adversely affect our results of operations for those periods.

Establishment of VSOE. Following an acquisition, we may be required to defer the recognition of revenue that we receive from the sale of products that we acquired, or from the sale of a bundle of products that includes products that we acquired, if we have not established vendor specific objective evidence (VSOE) of the separate value of the acquired product. A delay in the recognition of revenue from sales of acquired products or bundles that include acquired products may cause fluctuations in our quarterly financial results and may adversely affect our operating margins. Similarly, companies that we acquire may operate with different cost and margin structures, which could further cause fluctuations in our operating results and adversely affect our operating margins. If our quarterly financial results or our predictions of future financial results fail to meet the expectations of securities analysts and investors, our stock price could be negatively affected.

Our international operations involve risks that could divert the time and attention of management, increase our expenses and otherwise adversely impact our business and financial results.

Our international operations increase our risks in several aspects of our business, including but not limited to risks relating to revenue, legal and compliance, currency exchange and interest rate, and general operating. Net

Table of Contents

revenue in our operating regions outside of North America represented 43% of total net revenue in the three months ended March 31, 2009 compared to 49% in the three months ended March 31, 2008. The risks associated with our continued focus on international operations could adversely affect our business and financial results.

Revenue risks. Revenue risks include, among others, longer payment cycles, greater difficulty in collecting accounts receivable, tariffs and other trade barriers, seasonality, currency fluctuations, and the high incidence of software piracy and fraud in some countries. The primary product development risk to our revenue is our ability to deliver new products in a timely manner and to successfully localize our products for a significant number of international markets in different languages.

Legal and compliance risks. We face a variety of legal and compliance risks. For example, international operations pose a compliance risk with the Foreign Corrupt Practices Act (FCPA). Some countries have a reputation for businesses to engage in prohibited practices with government officials to consummate transactions. Although we have implemented training along with policies and procedures designed to ensure compliance with this and similar laws, there can be no assurance that all employees and third-party intermediaries will comply with anti-corruption laws. Any such violation could have a material adverse effect on our business.

Another legal risk is that some of our computer security solutions incorporate encryption technology that is governed by U.S. export regulations. The cost of compliance with those regulations can affect our ability to sell certain products in certain markets and could have a material adverse effect on our international revenue and expense. If we, or our resellers, fail to comply with applicable laws and regulations, we may become subject to penalties and fines or restrictions that may adversely affect our business.

Other legal risks include international labor laws and our relationship with our employees and regional work councils; compliance with more stringent consumer protection and privacy laws; unexpected changes in regulatory requirements; and compliance with our code of conduct and other internal policies. Our principal tax risks are potentially adverse tax consequences due to foreign value-added taxes, restrictions on the repatriation of earnings and changes in tax laws.

Currency exchange and interest rate risks. A significant portion of our transactions outside of the U.S. are denominated in foreign currencies. We translate revenues and costs from these transactions into U.S. dollars for reporting purposes. As a result, our future operating results will continue to be subject to fluctuations in foreign currency rates. This combined with economic instability, such as higher interest rates in the U.S. and inflation, could reduce our customers' ability to obtain financing for software products, or could make our products more expensive or could increase our costs of doing business in certain countries. We recorded net foreign currency transaction gains of \$1.3 million during the three months ended March 31, 2009 in our condensed consolidated statements of income and comprehensive income versus a loss of \$0.9 million during the three months ended March 31, 2008. We may be positively or negatively affected by fluctuations in foreign currency rates in the future, especially if international sales continue to grow as a percentage of our total sales. Additionally, fluctuations in currency exchange rates will impact our deferred revenue balance, which is a key financial metric at each period end.

General operating risks. More general risks of international business operations include the increased costs of establishing, managing and coordinating the activities of geographically dispersed and culturally diverse operations (particularly sales and support and shared service centers) located on multiple continents in a wide range of time zones.

We face a number of risks related to our product sales through distributors and other third parties.

We sell substantially all of our products through third-party intermediaries such as distributors, value-added resellers, PC OEMs, ISPs and other distribution channel partners (referred to collectively as distributors). Reliance on third parties for distribution exposes us to a variety of risks, some of which are described below, that could have a material adverse impact on our business and financial results.

Limited control over timing of product delivery. We have limited control over the timing of the delivery of our products to customers by third-party distributors. We generally do not require our resellers and OEM partners to meet minimum sales volumes, so their sales may vary significantly from period to period. For example, the volume of our products shipped by our OEM partners depends on the volume of computers shipped by the PC OEMs, which

Table of Contents

is outside of our control. These factors can make it difficult for us to forecast our revenue accurately and they also can cause our revenue to fluctuate unpredictably.

Competitive aspects of distributor relationships. Our distributors may sell other vendors' products that compete with our products. Although we offer our distributors incentives to focus on sales of our products, they often give greater priority to products of our competitors, for a variety of reasons. In order to maximize sales of our products rather than those of our competitors, we must effectively support these partners with, among other things, appropriate financial incentives to encourage them to invest in sales tools, such as online sales and technical training and product collateral needed to support their customers and prospects. If we do not properly support our partners, they may focus more on our competitors' products, and their sales of our products would decline.

Our PC OEM partners are also in a position to exert competitive pricing pressure. Competition for OEMs' business continues to increase, and it gives the OEMs leverage to demand lower product prices from us in order to secure their business. Even if we negotiate what we believe are favorable pricing terms when we first establish a relationship with an OEM, at the time of the renewal of the agreement, we may be required to renegotiate our agreement with them on less favorable terms. Lower net prices for our products would adversely impact our operating margins.

Reliance on a small number of distributors. A significant portion of our net revenue is attributable to a fairly small number of distributors. Our top ten distributors represented 35% and 37% of our net revenue in the three months ended March 31, 2009 and March 31, 2008, respectively. Reliance on a relatively small number of third parties for a significant portion of our distribution exposes us to significant risks to net revenue and net income if our relationship with one or more of our key distributors is terminated for any reason.

Risk of loss of distributors. We invest significant time, money and resources to establish and maintain relationships with our distributors, but we have no assurance that any particular relationship will continue for any specific period of time. The agreements we have with our distributors can generally be terminated by either party without cause with no or minimal notice or penalties. If any significant distributor terminates its agreement with us, we could experience a significant interruption in the distribution of our products and our revenue could decline. We could also lose the benefit of our investment of time, money and resources in the distributor relationship.

Although a distributor can terminate its relationship with us for any reason, one factor that may lead to termination is a divergence of our business interests and those of our distributors and potential conflicts of interest. For example, our acquisition activity has resulted in the termination of distributor relationships that no longer fit with the distributors' business priorities. Future acquisition activity could cause similar termination of, or disruption in, our distributor relationships, which could adversely impact our revenue.

Credit risk. Some of our distributors may experience financial difficulties, which could adversely impact our collection of accounts receivable. Our allowance for doubtful accounts was approximately \$4.8 million as of March 31, 2009. We regularly review the collectability and credit-worthiness of our distributors to determine an appropriate allowance for doubtful accounts. Our uncollectible accounts could exceed our current or future allowances, which could adversely impact our financial results.

We also face legal and compliance risks with respect to our use of third party intermediaries operating outside the United States. As described above in *Our international operations involve risks that could divert the time and attention of management, increase our expenses and otherwise adversely impact our business and financial results*, any violations by such third party intermediaries of FCPA or similar laws could have a material adverse effect on our business.

We face numerous risks relating to the enforceability of our intellectual property rights and our use of third-party intellectual property, many of which could result in the loss of our intellectual property rights as well as other material adverse impacts on our business and financial results and condition.

Limited protection of our intellectual property rights against potential infringers. We rely on a combination of contractual rights, trademarks, trade secrets, patents and copyrights to establish and protect proprietary rights in our technology. However, the steps we have taken to protect our proprietary technology may not deter its misuse, theft or misappropriation. Competitors may independently develop technologies or products that are substantially

Table of Contents

equivalent or superior to our products or that inappropriately incorporate our proprietary technology into their products. Competitors may hire our former employees who may misappropriate our proprietary technology. We are aware that a number of users of our security products have not paid license, technical support, or subscription fees to us. Certain jurisdictions may not provide adequate legal infrastructure for effective protection of our intellectual property rights. Changing legal interpretations of liability for unauthorized use of our software or lessened sensitivity by corporate, government or institutional users to refraining from intellectual property piracy or other infringements of intellectual property could also harm our business.

Frequency, expense and risks of intellectual property litigation in the network and system security market. Litigation may be necessary to enforce and protect our trade secrets, patents and other intellectual property rights. Similarly, we may be required to defend against claimed infringement by others.

The security technology industry has increasingly been subject to patent and other intellectual property rights litigation, particularly from special purpose entities that seek to monetize their intellectual property rights by asserting claims against others. We expect this trend to continue and that in the future as we become a larger and more profitable company, we can expect this trend to accelerate and that we will be required to defend against this type of litigation. The litigation process is subject to inherent uncertainties, so we may not prevail in litigation matters regardless of the merits of our position. In addition to the expense and distraction associated with litigation, adverse determinations could cause us to lose our proprietary rights, prevent us from manufacturing or selling our products, require us to obtain licenses to patents or other intellectual property rights that our products are alleged to infringe (licenses may not be available on reasonable commercial terms or at all), and subject us to significant liabilities.

If we acquire technology to include in our products from third parties, our exposure to infringement actions may increase because we must rely upon these third parties to verify the origin and ownership of such technology. Similarly, we face exposure to infringement actions if we hire software engineers who were previously employed by competitors and those employees inadvertently or deliberately incorporate proprietary technology of our competitors into our products despite efforts by our competitors and us to prevent such infringement.

Litigation may be necessary to enforce and protect our trade secrets, patents and other intellectual property rights.

Potential risks of using open source software. Like many other software companies, we use and distribute open source software in order to expedite development of new products. Open source software is generally licensed by its authors or other third parties under open source licenses, including, for example, the GNU General Public License. These license terms may be ambiguous, in many instances have not been interpreted by the courts and could be interpreted in a manner that results in unanticipated obligations regarding our products. Depending upon how the open source software is deployed by our developers, we could be required to offer our products that use the open source software for no cost, or make available the source code for modifications or derivative works. Any of these obligations could have an adverse impact on our intellectual property rights and revenue from products incorporating the open source software.

Our use of open source code could also result in us developing and selling products that infringe third-party intellectual property rights. It may be difficult for us to accurately determine the developers of the open source code and whether the code incorporates proprietary software. We have processes and controls in place that are designed to address these risks and concerns, including a review process for screening requests from our development organizations for the use of open source. However, we cannot be sure that all open source is submitted for approval prior to use in our products.

We also have processes and controls in place to review the use of open source in the products developed by companies that we acquire. Despite having conducted appropriate due diligence prior to completing the acquisition, products or

technologies that we acquire may nonetheless include open source software that was not identified during the initial due diligence. Our ability to commercialize products or technologies of acquired companies that incorporate open source software or to otherwise fully realize the anticipated benefits of any acquisition may be restricted for the reasons described in the preceding two paragraphs.

Table of Contents

Pending or future litigation could have a material adverse impact on our results of operation, financial condition and liquidity.

In addition to intellectual property litigation, from time to time, we have been, and may be in the future, subject to other litigation including stockholder derivative actions or actions brought by current or former employees. If we continue to make acquisitions in the future, we are more likely to be subject to acquisition related shareholder derivative actions. Where we can make a reasonable estimate of the liability relating to pending litigation and determine that an adverse liability resulting from such litigation is probable, we record a related liability. As additional information becomes available, we assess the potential liability and revise estimates as appropriate. However, because of the inherent uncertainties relating to litigation, the amount of our estimates could be wrong. In addition to the related cost and use of cash, pending or future litigation could cause the diversion of management's attention. Managing, defending and indemnity obligations related to these actions have caused significant diversion of management's and the board of directors' time and resulted in material expense to us. See Note 12 to the condensed consolidated financial statements for additional information with respect to currently pending legal matters.

Our financial results can fluctuate significantly, making it difficult for us to accurately estimate operating results.

Impact of fluctuations. Over the years our revenue, gross margins and operating results have fluctuated significantly from quarter to quarter and from year to year, and we expect this to continue in the future. Thus, our operating results for prior periods may not be effective predictors of our future performance. These fluctuations make it difficult for us to accurately forecast operating results. We try to adjust expenses based in part on our expectations regarding future revenue, but in the short term expenses are relatively fixed. This makes it difficult for us to adjust our expenses in time to compensate for any unexpected revenue shortfall in a given period.

Volatility in our quarterly financial results may make it more difficult for us to raise capital in the future or pursue acquisitions that involve issuances of our stock. If our quarterly financial results or our predictions of future financial results fail to meet the expectations of securities analysts and investors, our stock price could be negatively affected.

Factors that may cause our revenue, gross margins and other operating results to fluctuate significantly from period to period, include, but are not limited to, the following:

Establishment of VSOE. We may in the future sell products for which we have not established VSOE and would be required to delay the recognition of revenue. A delay in the recognition of revenue from sales of products may cause fluctuations in our quarterly financial results and may adversely affect our operating margins.

Timing of product orders. A significant portion of our revenue in any quarter comes from previously deferred revenue, which is a somewhat predictable component of our quarterly revenue. However, a meaningful part of revenue depends on contracts entered into or orders booked and shipped in the current quarter. Typically we generate the most orders in the last month of each quarter. Some customers believe they can enhance their bargaining power by waiting until the end of our quarter to place their order. Also, personnel limitations and system processing constraints could adversely impact our ability to process the large number of orders that typically occur near the end of a quarter. Any failure or delay in closing significant new orders in a given quarter could have a material adverse impact on our results for that quarter.

Reliability and timeliness of expense data. We increasingly rely upon third-party manufacturers to manufacture our hardware-based products; therefore, our reliance on their ability to provide us with timely and accurate product cost information exposes us to risk, negatively impacting our ability to accurately and timely report our operating results.

Issues relating to third-party distribution, manufacturing and fulfillment relationships. We rely heavily on third parties to manufacture and distribute our products. Any changes in the performance of these relationships can impact our operating results. Changes in our supply chain could result in product fulfillment delays that contribute to fluctuations in operating results from period to period. We have in the past and may in the future make changes in our product delivery network, which may disrupt our ability to timely and efficiently meet our product delivery

Table of Contents

commitments, particularly at the end of a quarter. As a result, we may experience increased costs in the short term as temporary delivery solutions are implemented to address unanticipated delays in product delivery. In addition, product delivery delays may negatively impact our ability to recognize revenue if shipments are delayed at the end of a quarter.

Product mix. Another source of fluctuations in our operating results and, in particular, gross profit margins, is the mix of products we sell and services we offer, including the mix between corporate versus consumer products; hardware-based compared to software-based products; perpetual licenses versus subscription licenses; and maintenance and support services compared to consulting services or product revenue. Product mix can impact operating expenses as well as the amount of revenue and the timing of revenue recognition, so our profitability can fluctuate significantly.

Timing of new products and customers. The timing of the introduction and adoption of new products, product upgrades or updates can have a significant impact on revenue from period to period. For example, revenue tends to be higher in periods shortly after we introduce new products compared to periods without new products. Our revenue may decline after new product introductions by competitors. In addition, the volume, size, and terms of new customer licenses can cause fluctuations in our revenue.

Additional cash and non-cash sources of fluctuations. A number of other factors that are peripheral to our core business operations also contribute to variability in our operating results. These include, but are not limited to, expenses related to our acquisition and disposition activities, stock-based compensation expense, unanticipated costs associated with litigation or investigations, costs related to Sarbanes-Oxley compliance efforts, costs and charges related to certain extraordinary events such as restructurings, substantial declines in estimated values of long-lived assets below the value at which they are reflected in our financial statements, and changes in generally accepted accounting principles, such as increased use of fair value measures and the potential requirement that U.S. registrants prepare financial statements in accordance with International Financial Reporting Standards (IFRS) and changes in tax laws.

Material weaknesses in our internal control and financial reporting environment may impact the accuracy, completeness and timeliness of our external financial reporting.

Section 404 of the Sarbanes-Oxley Act requires that management report annually on the effectiveness of our internal control over financial reporting and identify any material weaknesses in our internal control and financial reporting environment. If management identifies any material weaknesses, their correction could require remedial measures which could be costly and time-consuming. In addition, the presence of material weaknesses could result in financial statement errors which in turn could require us to restate our operating results. This in turn could damage investor confidence in the accuracy and completeness of our financial reports, which could affect our stock price and potentially subject us to litigation.

Our strategic alliances and our relationships with manufacturing partners expose us to a range of business risks and uncertainties that could have a material adverse impact on our business and financial results.

Uncertainty of realizing anticipated benefit of strategic alliances. We have entered into strategic alliances with numerous third parties to support our future growth plans. For example, these relationships may include technology licensing, joint technology development and integration, research cooperation, co-marketing activities and sell-through arrangements. We face a number of risks relating to our strategic alliances, including those described below. These risks may prevent us from realizing the desired benefits from our strategic alliances on a timely basis or at all, which could have a negative impact on our business and financial results.

Challenges relating to integrated products from strategic alliances. Strategic alliances require significant coordination between the parties involved, particularly if an alliance requires that we integrate their products with our products. This could involve significant time and expenditure by our technical staff and the technical staff of our strategic partner. The integration of products from different companies may be more difficult than we anticipate, and the risk of integration difficulties, incompatible products and undetected programming errors or defects may be higher than that normally associated with new products. The marketing and sale of products that result from strategic alliances might also be more difficult than that normally associated with new products. Sales and

Table of Contents

marketing personnel may require special training, as the new products may be more complex than our other products.

We invest significant time, money and resources to establish and maintain relationships with our strategic partners, but we have no assurance that any particular relationship will continue for any specific period of time. Generally, our strategic alliance agreements are terminable without cause with no or minimal notice or penalties. If we lose a significant strategic partner, we could lose the benefit of our investment of time, money and resources in the relationship. In addition, we could be required to incur significant expenses to develop a new strategic alliance or to determine and implement an alternative plan to pursue the opportunity that we targeted with the former partner.

Less control of the manufacturing process and outcome with third party manufacturing relationships. We rely on a limited number of third parties to manufacture some of our hardware-based network protection and system protection products. We expect the number of our hardware-based products and our reliance on third-party manufacturers to increase as we continue to expand these types of solutions. We also rely on third parties to replicate and package our boxed software products. This reliance on third parties involves a number of risks that could have a negative impact on our business and financial results. These risks include, but are not limited to, lack of control over the quality and timing of the manufacturing process, limited control over the cost of manufacturing, and the potential absence or unavailability of adequate manufacturing capacity.

Risk of inadequate capacity with third party manufacturing relationships. If any of our third-party manufacturers fails for any reason to manufacture products of acceptable quality, in required volumes, and in a cost-effective and timely manner, it could be costly as well as disruptive to product shipments. We might be required to seek additional manufacturing capacity, which might not be available on commercially reasonable terms or at all. Even if additional capacity was available, the process of qualifying a new vendor could be lengthy and could cause significant delays in product shipments and could strain partner and customer relationships. In addition, supply disruptions or cost increases could increase our costs of goods sold and negatively impact our financial performance. Our risk is relatively greater in situations where our hardware products contain critical components supplied by a single or a limited number of third parties. Any significant shortage of components could lead to cancellations of customer orders or delays in placement of orders, which would adversely impact revenue.

Risk of hardware obsolescence with third party manufacturing relationships. Hardware-based products may face greater obsolescence risks than software products. We could incur losses or other charges in disposing of obsolete hardware inventory. In addition, to the extent that our third-party manufacturers upgrade or otherwise alter their manufacturing processes, our hardware-based products could face supply constraints or risks associated with the transition of hardware-based products to new platforms. This could increase the risk of losses or other charges associated with obsolete inventory.

Our global operations may expose us to tax risk.

We are generally required to account for taxes in each jurisdiction in which we operate. This process may require us to make assumptions, interpretations and judgments with respect to the meaning and application of promulgated tax laws and related administrative and judicial interpretations. The positions that we take and our interpretations of the tax laws may differ from the positions and interpretations of the tax authorities in the jurisdictions in which we operate. We are presently under examination in many jurisdictions, including notably the U.S., California, and Germany. An adverse outcome in one or more of these ongoing examinations, or in any future examinations that may occur, could have a significant negative impact on our cash position and net income. Although we have established reserves for these examination contingencies, there can be no assurance that the reserves will be sufficient to cover our ultimate liabilities.

Our provision for income taxes is subject to volatility and can be adversely affected by a variety of factors, including but not limited to changes in tax laws and regulations (including various current proposals related to U.S. taxation of non-U.S. income) and accounting principles (including accounting for uncertain tax positions), or interpretations of those changes. Significant judgment is required to determine the recognition and measurement attributes prescribed in FASB Interpretation No. 48, *Accounting for Income Taxes* (FIN 48). In addition, FIN 48 applies to all income tax positions, including the potential recovery of previously paid taxes, which if settled unfavorably could adversely impact our provision for income taxes or recorded goodwill.

Table of Contents

Critical personnel may be difficult to attract, assimilate and retain.

Our success depends in large part on our ability to attract and retain senior management personnel, as well as technically qualified and highly-skilled sales, consulting, technical, finance and marketing personnel. Other than members of executive management who have at will employment agreements, our employees are not typically subject to an employment agreement or non-competition agreement. It could be difficult, time consuming and expensive to locate, replace and integrate any key management member or other critical personnel. Changes in management or other critical personnel may be disruptive to our business and might also result in our loss of unique skills and the departure of existing employees and/or customers.

Other personnel related issues that we may encounter include:

Competition for personnel; need for competitive pay packages. Competition for qualified individuals in our industry is intense and we must provide competitive compensation packages, including equity awards. Increases in shares available for issuance under our equity incentive plans require stockholder approval, and there may be times, as we have seen in the past, where we may not obtain the necessary approval. Current adverse economic conditions could adversely affect our ability to attract and retain qualified individuals. If we are unable to attract and retain qualified individuals, our ability to compete in the markets for our products could be adversely affected, which would have a negative impact on our business and financial results.

Risks relating to senior management changes and new hires. From 2006 to 2008, we experienced significant changes in our senior management team as a number of officers resigned or were terminated and several key management positions were vacant for a significant period of time. We may continue to experience changes in senior management going forward.

We continue to hire in key areas and have added a number of new employees in connection with our acquisitions. For new employees, including senior management, there may be reduced levels of productivity as it takes time for new hires to be trained or otherwise assimilated into the company.

Increased customer demands on our technical support services may adversely affect our relationships with our customers and negatively impact our financial results.

We offer technical support services with many of our products. We may be unable to respond quickly enough to accommodate short-term increases in customer demand for support services. We also may be unable to modify the format of our support services to compete with changes in support services provided by competitors or successfully integrate support for our customers. Further customer demand for these services, without corresponding revenue, could increase costs and adversely affect our operating results.

We have outsourced a substantial portion of our worldwide consumer support functions to third-party service providers. If these companies experience financial difficulties, service disruptions, do not maintain sufficiently skilled workers and resources to satisfy our contracts, or otherwise fail to perform at a sufficient level under these contracts, the level of support services to our customers may be significantly disrupted, which could materially harm our relationships with these customers.

We face risks related to customer outsourcing to system integrators.

Some of our customers have outsourced the management of their information technology departments to large system integrators. If this trend continues, our established customer relationships could be disrupted and our products could be displaced by alternative system and network protection solutions offered by system integrators that do not bundle

our solutions. Significant product displacements could negatively impact our revenue and have a material adverse effect on our business.

Table of Contents

If we fail to effectively upgrade or modify our information technology system, we may not be able to accurately report our financial results or prevent fraud.

We may experience difficulties in transitioning to new or upgraded information technology systems and in applying maintenance patches to existing systems, including loss of data and decreases in productivity as personnel become familiar with new, upgraded or modified systems. Our management information systems will require modification and refinement as we grow and as our business needs change, which could prolong the difficulties we experience with systems transitions, and we may not always employ the most effective systems for our purposes. If we experience difficulties in implementing new or upgraded information systems or experience significant system failures, or if we are unable to successfully modify our management information systems and respond to changes in our business needs, our operating results could be harmed or we may fail to meet our reporting obligations. We may also experience similar results if we have difficulty applying routine maintenance patches to existing systems in a timely manner.

Computer hackers may damage our products, services and systems.

Due to our high profile in the network and system protection market, we have been a target of computer hackers who have, among other things, created viruses to sabotage or otherwise attack our products and services, including our various web sites. For example, we have seen the spread of viruses, or worms, that intentionally delete anti-virus and firewall software. Similarly, hackers may attempt to penetrate our network security and misappropriate proprietary information or cause interruptions of our internal systems and services. Also, a number of web sites have been subject to denial of service attacks, where a web site is bombarded with information requests eventually causing the web site to overload, resulting in a delay or disruption of service. If successful, any of these events could damage users or our own computer systems. In addition, since we do not control disk duplication by distributors or our independent agents, media containing our software may be infected with viruses.

Business interruptions may impede our operations and the operations of our customers.

We are continually updating or modifying our accounting and other internal and external facing business systems. Modifications of these types of systems are often disruptive to business and may cause us to incur higher costs than we anticipate. Failure to properly manage this process could materially harm our business operations.

In addition, we and our customers face a number of potential business interruption risks that are beyond our respective control. Natural disasters or other events could interrupt our business or the business of our customers, and each of us is reliant on external infrastructure that may be antiquated. Our corporate headquarters in California is located near a major earthquake fault. The potential impact of a major earthquake on our facilities, infrastructure and overall operations is not known, but could be quite severe. Despite business interruption and disaster recovery programs that have been implemented, an earthquake could seriously disrupt our entire business process. We are largely uninsured for losses and business disruptions caused by an earthquake and other natural disasters.

Our investment portfolio is subject to volatility, losses and liquidity limitations. Continued negative conditions in the global credit markets could impair the value of or limit our access to our investments.

Investment income has been a significant component of our net income. The ability to achieve our investment objectives is affected by many factors, some of which are beyond our control. We invest our cash, cash equivalents and marketable securities in a variety of investment vehicles in a number of countries with and in the custody of financial institutions with high credit ratings. While our investment policy and strategy attempt to manage interest rate risk, limit credit risk, and only invest in what we view as very high-quality debt securities, the outlook for our investment holdings is dependent on general economic conditions, interest rate trends and volatility in the financial

marketplace, which can all affect the income that we receive, the value of our investments, and our ability to sell them. Current economic conditions have had widespread negative effects on the financial markets and global economies. During these challenging markets, we are investing new cash in instruments with short to medium-term

Table of Contents

maturities of highly-rated issuers, including U.S. government and FDIC guaranteed investments. We do not hold any sub-prime mortgages, auction rate securities or structured investment vehicles.

The outlook for our investment income is dependent on the amount of any share repurchases or acquisitions that we effect and the amount of cash flows from operations that are available for investment. Our investment income is also affected by the yield on our investments and our recent shift to a larger percentage of our investment portfolio to shorter-term and U.S. government and FDIC guaranteed investments. This shift may negatively impact our income from our investment portfolio in light of declining yields. Any significant decline in our investment income or the value of our investments could have an adverse effect on our results of operations or financial condition.

During 2008, we recorded an other-than-temporary impairment charge of \$18.5 million related to marketable securities. During the three months ended March 31, 2009, we recorded additional impairment on previously impaired marketable securities totaling \$0.7 million. We believe that our investment securities are carried at fair value. However, over time the economic and market environment may provide additional insight regarding the fair value of certain securities which could change our judgment regarding impairment. This could result in realized losses relating to other-than-temporary declines being charged against future income. Given the current market conditions involved, there is continuing risk that further declines in fair value may occur and additional impairments may be charged to income in future periods, resulting in realized losses.

Most of our cash and investments held outside the U.S. are subject to fluctuations in currency exchange rates. A repatriation of these non-U.S. investment holdings to the U.S. under current law could be subject to foreign and U.S. federal income and withholding taxes, less any applicable foreign tax credits. These tax limitations, local regulations and potential further capital market turmoil could limit our ability to utilize these offshore funds.

Our historical stock option granting practices have resulted in, and could continue to result in, continued or new litigation, regulatory proceedings, government enforcement actions and remedial actions, all of which have had, and could in the future have, a negative impact on our business and financial results.

Shortly after we announced an internal investigation of our historical stock option granting practices in May 2006, both the SEC and the United States Department of Justice (DOJ) commenced investigations of our stock option practices. We have historically been engaged in discussions with and have provided information to the SEC regarding certain of our prior period consolidated financial statements. The resolution of the SEC inquiry into our historical stock option granting practices could require us to file additional restatements of our prior consolidated financial statements or require that we take other actions not presently contemplated.

As part of the remedial actions we have taken in connection with the investigation and restatement of our consolidated financial statements, we terminated certain employees, including former executive officers. We are involved in litigation and other legal proceedings in connection with one such termination. Any future legal proceedings could require additional management time and additional expense, and may require us to make settlement or other related payments in the future. See Note 12 to our condensed consolidated financial statements for more details about ongoing legal proceedings.

We cannot predict the outcome of the pending government inquiries or other lawsuits, and we may face additional government inquiries and other legal proceedings. Any such litigation, government inquiry or other legal proceeding could require us to devote significant management time and to incur significant accounting, legal, and other expenses and could adversely affect our financial condition and results of operations.

Our stock price has been volatile and is likely to remain volatile.

During 2008 and through April 30, 2009, our stock price was highly volatile, ranging from a high of \$40.97 to a low of \$24.72. On April 30, 2009, our stock's closing price was \$37.54. Announcements, business developments, such as material acquisitions or dispositions, litigation developments and our ability to meet the expectations of

Table of Contents

investors with respect to our operating and financial results, may contribute to current and future stock price volatility. In addition, third-party announcements such as those made by our partners and competitors may contribute to current and future stock price volatility. For example, future announcements by major competitors related to consumer and corporate security solutions may contribute to future volatility in our stock price. Certain types of investors may choose not to invest in stocks with this level of stock price volatility.

Our stock price may also experience volatility that is completely unrelated to our performance or that of the security industry. During 2008 through January 2009, the major U.S. and international stock markets have been extremely volatile. Fluctuations in these broad market indices can impact our stock price regardless of our performance.

Our charter documents and Delaware law may impede or discourage a takeover, which could lower our stock price.

Under our certificate of incorporation, our board of directors has the authority to issue up to 5.0 million shares of preferred stock and to determine the price, rights, preferences, privileges and restrictions, including voting rights, of those shares without any further vote or action by our stockholders. The issuance of preferred stock could have the effect of making it more difficult for a third party to acquire a majority of our outstanding voting stock and could have the effect of discouraging a change of control of the company or changes in management.

Delaware law and other provisions of our certificate of incorporation and bylaws could also delay or make a merger, tender offer or proxy contest involving us or changes in our board of directors and management more difficult. For example, any stockholder wishing to make a stockholder proposal (including director nominations) at our 2010 annual meeting must meet the qualifications and follow the procedures specified under both the Securities Exchange Act of 1934 and our bylaws. In addition, we have a classified board of directors; however, our board of directors will be declassified over the three year period ending with our annual meeting of stockholders in 2012.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds***Common Stock Repurchases**

In January 2008, our board of directors authorized the repurchase of up to \$750.0 million of our common stock from time to time in the open market or through privately negotiated transactions through July 2009, depending upon market conditions, share price and other factors. During the three months ended on March 31, 2009, we repurchased approximately 0.6 million shares of our common stock for approximately \$16.5 million in connection with our obligation to holders of RSUs, RSAs and PSUs to withhold the number of shares required to satisfy the holders' tax liabilities in connection with the vesting of such shares. These shares were not part of the publicly announced repurchase program.

The table below sets forth all repurchases by us of our common stock during the three months ended March 31, 2009:

			Approximate Dollar Value of Shares
Total Number of Shares	Average Price Paid	Total Number of Shares Purchased as Part of Publicly Announced Plan or	That May Yet Be Purchased Under Our Stock Repurchase

Period	Purchased	Per Share	Repurchase Program	Program
			(in thousands, except price per share)	
January 1, 2009 through January 31, 2009	763	\$ 30.60	\$	250,290
February 1, 2009 through February 28, 2009	213,726	30.13		250,290
March 1, 2009 through March 31, 2009	349,430	28.73		250,290
Total	563,919	\$ 29.27
