## Table of Contents

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 1 Accounting Policies, Management Judgments and Accounting Estimates

Consolidation: Irwin Financial Corporation and its subsidiaries (the Corporation) provide financial services throughout the United States (U.S.) and Canada. We are engaged in commercial banking, commercial finance and home equity lending. We are in the process of exiting the mortgage banking segment. Our direct and indirect subsidiaries include, Irwin Union Bank and Trust Company, Irwin Union Bank, F.S.B., Irwin Commercial Finance Corporation, Irwin Home Equity Corporation and Irwin Mortgage Corporation. Intercompany balances and transactions have been eliminated in consolidation. In the opinion of management, the financial statements reflect all material adjustments necessary for a fair presentation. The Corporation does not meet the criteria as primary beneficiary for our wholly-owned trusts holding our company-obligated mandatorily redeemable preferred securities established by Financial Accounting Standards Board (FASB) Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities. As a result, these trusts are not consolidated.

We are in the process of exiting the mortgage banking line of business. As a result, the financial statements and footnotes within this report have been reformatted to conform to the presentation required in Statement of Financial Accounting Standard (SFAS) 144, Accounting for the Impairment or Disposal of Long-Lived Assets for discontinued operations. Prior period results were reclassified to conform to this change in presentation. Certain of the balance sheet assets related to this line of business are being reported as assets held for sale. See Note 2 for additional information.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents Defined: For purposes of the statement of cash flows, we consider cash and due from banks to be cash equivalents.

Residual Interests: Residual interests are stated at fair value. Unrealized gains and losses are included in earnings. To obtain fair value of residual interests, quoted market prices would be used if available. However, quotes are generally not available for residual interests, so we estimate fair value based on the present value of expected cash flows using estimates of the key assumptions prepayment speeds, credit losses, forward yield curves, and discount rates commensurate with the risks involved that management believes market participants would use to value similar assets. Adjustments to carrying values are recorded as trading gains or losses.

Allowance for Loan and Lease Losses: The allowance for loan and lease losses is an estimate based on management s judgment applying the principles of SFAS 5, Accounting for Contingencies, SFAS 114, Accounting by Creditors for Impairment of a Loan, and SFAS 118, Accounting by Creditors for Impairment of a Loan Income Recognition and Disclosures. The allowance is maintained at a level we believe is adequate to absorb probable losses inherent in the loan and lease portfolio. We perform an assessment of the adequacy of the allowance on a quarterly basis.

Within the allowance, there are specific and expected loss components. The specific loss component is assessed for loans we believe to be impaired in accordance with SFAS 114. We have defined impairment as nonaccrual loans. For loans determined to be impaired, we measure the level of impairment by comparing the loan s carrying value to fair value using one of the following fair value measurement techniques: present value of expected future cash flows, observable market price, or fair value of the associated collateral. An allowance is established when the fair value implies a value that is lower than the carrying value of that loan. In addition to establishing allowance levels for specifically identified impaired loans, management determines an allowance for all other loans in the portfolio for which historical experience indicates that certain losses exist. These loans are segregated by major product type, and in some instances, by aging, with an estimated loss ratio applied against each product type and aging category. The loss ratio is generally based upon historic loss experience for each loan type as adjusted for certain environmental factors management believes to be relevant.

Servicing Assets: When we securitize or sell loans, we periodically retain the right to service the underlying loans sold. A portion of the cost basis of loans sold is allocated to this servicing asset based on its fair value relative to the loans sold and the servicing asset combined. We use a combination of observed pricing on similar, market-traded servicing rights and internal valuation models that

## Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

## Table of Contents

calculate the present value of future cash flows to determine the fair value of the servicing assets. These models are supplemented and calibrated to market prices using inputs from independent servicing brokers, industry surveys and valuation experts. In using this valuation method, we incorporate assumptions that we believe market participants would use in estimating future net servicing income, which include estimates of the cost of servicing per loan, the discount rate, float value, an inflation rate, ancillary income per loan, prepayment speeds, and default rates. Servicing assets are amortized over the estimated lives of the related loans in proportion to estimated net servicing income.

In determining servicing value impairment, the servicing portfolio is stratified into its predominant risk characteristics, principally by interest rate and product type. Each stratum is valued using market prices under comparable servicing sale contracts when available, or alternatively, using the same model as was used to originally determine the fair value at origination using current market assumptions. The calculated value is then compared with the book value of each stratum to determine the required reserve for impairment. The impairment reserve fluctuates as interest rates change and, therefore, no reasonable estimate can be made as to future increases or declines in impaired reserve levels. We also compare actual cash collections to projected cash collections and adjust our models as appropriate. In addition, we periodically have independent valuations performed on the portfolio.

Incentive Servicing Fees: For whole loan sales of certain home equity loans, in addition to our normal servicing fee, we have the right to an incentive servicing fee (ISF) that will provide cash payments to us if a pre-established return for the certificate holders and certain structure-specific loan credit and servicing performance metrics are met. These ISF arrangements are accounted for in accordance with SFAS 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. When ISF agreements are entered into simultaneously with the whole loan sales, the fair value of the ISFs is estimated and considered when determining the initial gain or loss on sale. That allocated fair value of the ISF is periodically evaluated for impairment and amortized in accordance with SFAS 140. Consistent with the treatment of all of the Corporation s servicing assets, ISFs are accounted for on a lower of cost or market (LOCOM) basis. Therefore, if the fair value of the ISFs in subsequent periods exceeds cost basis, then revenue is recognized as pre-established performance metrics are met and cash is due. When ISF agreements are entered into subsequent to the whole loan sale, these assets are assigned a zero value and revenue is recognized as pre-established performance metrics are met and cash is due.

Income Taxes: A consolidated tax return is filed for all eligible entities. In accordance with SFAS 109, deferred income taxes are computed using the liability method, which establishes a deferred tax asset or liability based on temporary differences between the tax basis of an asset or liability and the basis recorded in the financial statements.

Recent Accounting Developments: In December 2004, the FASB issued SFAS 123(R), Share-Based Payment, which revises SFAS 123, Accounting for Stock-Based Compensation. SFAS 123(R) supersedes APB Opinion 25, Accounting for Stock Issued to Employees, and amends SFAS 95, Statement of Cash Flows. This Statement requires that a public entity measure the cost of equity-based service awards based on the grant date fair value of the award. All share-based payments to employees, including grants of employee stock options, are required to be recognized in the income statement based on their fair value. We adopted this Statement on January 1, 2006. See Note 12 for further discussion.

In February 2006, the FASB issued SFAS 155, Accounting for Certain Hybrid Instruments. This standard permits fair value measurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation. This statement is effective for all financial instruments acquired or issued after the beginning of a fiscal year that begins after September 15, 2006. We do not believe this standard will have a material impact on our results of operations.

In March 2006, the FASB issued SFAS 156, Accounting for Servicing of Financial Assets, an amendment of FASB Statement No. 140. This statement requires that all separately recognized servicing assets and servicing liabilities be initially measured at fair value, if practicable. The statement permits, but does not require, the subsequent measurement of classes of servicing assets and servicing liabilities at fair value, to better align with the use of derivatives used to mitigate the inherent risks of these assets and liabilities. Offsetting changes in fair value are recognized through income. This statement is effective as of January 1, 2007. We have not yet determined which, if any, of our classes of servicing rights will be accounted for on a fair value basis for changes in fair value subsequent to the initial capitalization.

In July 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes an interpretation of SFAS No. 109. This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise s financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes . This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods,

## Table of Contents

disclosure, and transition. This Interpretation is effective for fiscal years beginning after December 15, 2006. We are currently evaluating this new Interpretation and have not yet determined the ultimate impact it will have on our results of operation.

In September 2006, the FASB issued SFAS 157, Fair Value Measurements. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We are currently evaluating this new statement and have not yet determined the ultimate impact it will have on our results of operation.

In September 2006, the FASB issued SFAS 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans. This statement was issued to improve communication around the funded status of defined benefit postretirement plans in a complete and understandable way. This statement requires employers to report the overfunded or underfunded status of their plans in the balance sheet rather than in the footnotes. This statement also requires an employer to recognize all transactions and events affecting the overfunded or underfunded status of a defined benefit postretirement plan in comprehensive income in the year in which they occur. This statement will require us to recognize the funded status of our defined benefit plan and provide certain required disclosures in our December 31, 2006 year-end report. The recognition of funded status will not impact our income statement, but will have an approximate $\$ 7$ million impact on our shareholders equity balance at December 31, 2006.

Reclassifications: Certain amounts in the 2005 consolidated financial statements have been reclassified to conform to the 2006 presentation and, as discussed in Note 2, certain accounts have been reclassified during 2006 due to discontinued operations treatment. These changes had no impact on previously reported net income or shareholders equity.

## Note 2 Discontinued Operations

On September 26, 2006, we completed the sale of the mortgage banking line of business origination operation including the majority of this segment s loans held for sale. Approximately $\$ 275$ million of loans held for sale and certain other assets and liabilities were sold resulting in a loss of $\$ 6.4$ million including disposition costs. We recognized $\$ 5.5$ million of these costs during the second quarter of 2006, while the remaining $\$ 0.9$ million was recognized during the third quarter. These losses are reflected in Loss from discontinued operations in the Consolidated Statement of Income. Loans and loans held for sale totaling $\$ 50$ million remain on our consolidated balance sheet and are classified as assets held for sale at September 30, 2006. These assets are carried at their fair value less costs to sell.

On September 29, 2006, we sold the majority of this segment s capitalized mortgage servicing rights. Mortgage servicing rights with an underlying unpaid principal balance of $\$ 17$ billion were sold to four unrelated parties resulting in a loss of $\$ 16.1$ million, which is reflected in Loss from discontinued operations in the Consolidated Statement of Income. The loss was partially offset by associated derivative gains of $\$ 11$ million. Mortgage servicing rights totaling $\$ 21$ million remain on our consolidated balance sheet and are classified as assets held for sale at September 30, 2006. These assets are carried at the lower of cost or fair value. As a result of these sales, we recorded $\$ 172$ million of receivables from these buyers. On October 27, 2006, we accepted bids for the segment s remaining servicing portfolio and expect to complete the transfer of these loans by early January 2007.

In addition to the losses discussed above, we also incurred losses in connection with contract termination costs and severance benefits. These losses were recorded in accordance with SFAS 146, Accounting for Costs Associated with Exit or Disposal Activities. We recognized $\$ 0.5$ million of these costs during the second quarter of 2006, while the remaining $\$ 7.4$ million was recognized during the third quarter. These losses are reflected in Loss from discontinued operations in the Consolidated Statement of Income.

In accordance with the provisions of SFAS 144, the results of operations of the mortgage banking line of business for the current and prior periods have been reported as discontinued operations. In addition, the majority of the assets and certain liabilities for this segment have been reclassified as held for sale in the consolidated balance sheet.

## Table of Contents

Results for this discontinued portion of our business are as follows:

|  | September <br> $\mathbf{3 0 ,}$ | December 31, |
| :--- | :---: | ---: |
|  | $\mathbf{2 0 0 6}$ | $\mathbf{2 0 0 5}$ |
| (Dollars in thousands) |  |  |
| Loans held for sale | 32,844 | 779,966 |
| Loans, net of allowance for loan loss | 16,244 | 20,359 |
| Net servicing asset | 20,967 | 261,309 |
| Other assets | 4,429 | 57,279 |
| Assets held for sale | $\$ 74,484$ | $\$$ |

The amounts in the table above do not exactly correspond with the amounts in our segment reporting of the mortgage banking line of business as certain items within the mortgage segment have not been and will not be eliminated from our continuing operations as contemplated in SFAS 144. These items include management fees and other allocations charged by the parent to the segment; the reinsurance subsidiary included in the segment; certain residual interests associated with loan sales to the Federal Home Loan Bank of Indianapolis; and earnouts associated with the 2005 divestiture of this segment s retail division. The tables below reflect the impact of these reclassified items on our quarterly financial information as disclosed in our previously filed 2006 Form 10-Qs. The as reclassified columns below reflects our current expectation about the ultimate disposition of the remaining elements of the mortgage banking segment.

Note 3 Restructuring

In the second quarter of 2006, we restructured the retail channel in our home equity line of business due to its higher origination costs and lower ratio of leads to loan closings as compared to the segment s broker and correspondent channels. We have reduced our number of employees in this home equity retail channel by $76 \%$.

The table below shows the expenses incurred and the income statement captions impacted as a result of this restructuring.

|  |  | Nine Months Ended September 30, 2006 <br> (Dollars in thousands) |
| :---: | :---: | :---: |
| Salaries | \$ | 3,596 |
| Other expense |  | 340 |
| Total | \$ | 3,936 |

## Table of Contents

## Note 4 Loans and Leases

Loans and leases are summarized as follows:

|  | September | December |
| :--- | :---: | ---: |
|  | $\mathbf{3 0 ,}$ | $\mathbf{3 1 ,}$ |
|  | $\mathbf{2 0 0 6}$ | $\mathbf{2 0 0 5}$ |
| Commercial, financial and agricultural | (Dollars in thousands) |  |
| Real estate-construction | $2,159,093$ | $\$ 2,016,228$ |
| Real estate-mortgage | 407,858 | 379,831 |
| Consumer | $1,509,338$ | $1,232,958$ |
| Commercial financing | 33,169 | 31,718 |
| Franchise financing | 612,890 | 462,413 |
| Domestic leasing | 283,042 | 237,968 |
| Canadian leasing | 365,494 | 313,581 |
| Unearned income | $(184,639)$ | $(125,474)$ |
| Franchise financing | $(40,433)$ | $(33,267)$ |
| Domestic leasing | $(44,677)$ | $(38,013)$ |
| Canadian leasing | $\$ 5,101,135$ | $\$$ |
| Total |  | $4,477,943$ |

## Note 5 Allowance for Loan and Lease Losses

Changes in the allowance for loan and lease losses are summarized below:

|  | September | December |
| :--- | :---: | :---: |
|  | $\mathbf{3 0 ,}$ | $\mathbf{3 1 ,}$ |
|  | $\mathbf{2 0 0 6}$ | $\mathbf{2 0 0 5}$ |
| Balance at beginning of year | (Dollars in thousands) |  |
| Provision for loan and lease losses | $\$ 59,223$ | $\$$ |
| Charge-offs | 25,154 | 43,441 |
| Recoveries | $(21,705)$ | $(27,307$ |
| Reduction due to reclassification or sale of loans | 7,995 | 8,960 |
| Foreign currency adjustment | $(172)$ | $(403)$ |
|  | 140 | 119 |
| Balance at end of period | $\$ 70,635$ | $\$$ |

## Note 6 Servicing Assets

Included in the consolidated balance sheet at September 30, 2006 and December 31, 2005 are $\$ 53$ million and $\$ 296$ million, respectively, of capitalized servicing assets. These amounts reflect the value of the right to service mortgage and home equity loans owned by other investors but serviced by us for them. As discussed in Note 2 above, we sold the majority of our capitalized servicing assets associated with our mortgage segment during the third quarter.

## Table of Contents

Changes in our capitalized servicing assets, net of valuation allowance, are shown below:

|  | September | December |
| :--- | :---: | :---: |
|  | $\mathbf{3 0 ,}$ | $\mathbf{3 1 ,}$ |
|  | $\mathbf{2 0 0 6}$ | $\mathbf{2 0 0 5}$ |
| Beginning balance | (Dollars in thousands) |  |
| Additions | 295,754 | $\$$ |
| Amortization | 867,032 |  |
| Recovery of impairment | $(58,538)$ | $(100,322)$ |
| Reduction for servicing sales | 660 | 19,625 |
| Ending balance | $(266,411)$ | $(65,312)$ |
| Less servicing asset from discontinued operations | 52,984 | 295,754 |
| Mortgage servicing asset from continuing operations | 20,967 | 261,309 |
|  | $\$ 32,017$ | $\$$ |

We have established a valuation allowance to record servicing assets at their lower of cost or fair market value. Changes in the allowance are summarized below:

|  | $\begin{aligned} & \text { September } \\ & \text { 30, } \\ & 2006 \\ & \text { (Dollar: } \end{aligned}$ | tho | ember <br> 31, <br> 005 <br> nds) |
| :---: | :---: | :---: | :---: |
| Balance at beginning of year | \$ 27,243 | \$ | 54,134 |
| Recovery of impairment | (660) |  | $(19,625)$ |
| Reclass for sales of servicing and clean up calls | $(26,431)$ |  | (154) |
| Other than temporary impairment ${ }^{(1)}$ |  |  | $(7,112)$ |
| Balance at end of period | 152 |  | 27,243 |
| Less valuation allowance from discontinued operations |  |  | 26,091 |
| Valuation allowance from continuing operations | \$ 152 | \$ | 1,152 |
| (1) Other than temporary impairment was recorded to reflect our view that the originally recorded value of certain servicing rights and subsequent impairment |  |  |  |

associated with
those rights is
unlikely to be recovered in market value. There was no related direct impact on net income as this other than temporary impairment affected only balance sheet accounts..

## Note 7 Short-Term Borrowings

Short-term borrowings are summarized as follows:

## Table of Contents

We also have lines of credit available to fund loan originations and operations with variable rates ranging from $5.3 \%$ to $6.1 \%$ at September 30, 2006.

## Note 8 Collateralized Debt

We pledge or sell loans structured as secured financings at our home equity and commercial finance lines of business. Sale treatment is precluded on these transactions under SFAS 140 as we maintain effective control over the loans and leases securitized. This type of structure results in cash being received, debt being recorded, and the establishment of an allowance for credit losses. The notes associated with these transactions are collateralized by $\$ 1.2$ billion in home equity loans, home equity lines of credit, and leases. The principal and interest on these debt securities are paid using the cash flows from the underlying loans and leases. Accordingly, the timing of the principal payments on these debt securities is dependent on the payments received on the underlying collateral. The interest rates on the bonds are both fixed and floating. Collateralized debt is summarized as follows:

|  | Maturity | Weighted <br> Average <br> Interest <br> Rate at September <br> 30, <br> 2006 <br> (Dollars in | $\begin{aligned} & \text { September } \\ & \text { 30, } \\ & 2006 \\ & \text { Isands) } \end{aligned}$ |  | $\begin{gathered} \text { December } \\ \text { 31, } \\ 2005 \end{gathered}$ |

## Table of Contents

## Note 9 Long-term Debt

Other long-term debt totaled $\$ 234$ million at September 30, 2006, compared to $\$ 270$ million at December 31, 2005. The reduction of $\$ 15$ million in long-term debt relates to our call of trust preferred securities issued by IFC Capital Trust IV on July 25, 2006. On March 6 of this year we had a reduction in long-term debt of $\$ 53$ million related to our call of the convertible trust preferred securities issued by IFC Capital Trust III. As a result of this call, $39 \%$ of the preferred shareholders converted to $1,013,938$ shares of IFC common stock and $61 \%$ redeemed for cash. On March 31, 2006, we issued $\$ 31.5$ million of Capital Trust IX preferred securities to replace the redeemed shares. This debt which matures in 2036, has a rate of $6.69 \%$ for the first five years and then converts to a variable rate thereafter. We had obligations represented by subordinated debentures at September 30, 2006 totaling $\$ 204$ million with our wholly-owned trusts that were created for the purpose of issuing trust preferred securities. The subordinated debentures were the sole assets of the trusts at September 30, 2006. In accordance with FASB Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities (revised December 2003), we do not consolidate the wholly-owned trusts that issued the trust preferred securities. The subordinated debentures held by the trusts are disclosed on the balance sheet as other long-term debt. Depending on interest rate conditions and certain other factors, we may call and/or refinance Capital Trust V in the fourth quarter of 2006.

## Note 10 Employee Retirement Plans

Components of net periodic cost of pension benefit:

|  | Three Months Ended September 30, |  |  |  | Nine Months Ended September30, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 2006 |  | 2005 |  | 006 |  | 005 |

The effect of convertible shares was not included in this calculation for 2005 and 2006 because they were antidilutive.
At September 30, 2006 and 2005, 1,902,917 and 1,320,159 shares, respectively, related to stock options that were not included in the dilutive earnings per share calculation because they had exercise prices above the stock price as of the respective dates.

The Board of Directors of the Corporation has approved the repurchase of up to two million shares or up to $\$ 50$ million of common stock of the Corporation. The repurchases will occur from time to time based on market conditions, parent company cash flow, and the Corporation s current and future projections of capital position.

## Note 12 Equity Based Compensation

As of January 1, 2006, we adopted SFAS 123(R), Share-Based Payment, applying the modified prospective method. This statement requires all equity-based payments to employees, including grants of employee stock options, to be recognized as expense in the consolidated statement of income based on the grant date fair value of the award. Under the modified prospective method, we are required to record equity-based compensation expense for all awards granted after the date of adoption and for the unvested portion of previously granted awards outstanding as of the date of adoption. Prior year financial statements are not restated. The fair values of stock options granted were determined using a Black-Scholes options-pricing model.

We have an employee stock purchase plan for all qualified employees. The plan provides for employees to purchase common stock through payroll deduction at approximately $85 \%$ of the current market value. For the nine months ended September 30, 2006, $\$ 0.1$ million was expensed related to this plan.

## Table of Contents

We have restricted stock plans to compensate our Directors and employees with our common stock. The number of shares issued under these plans is based on the current market value of our common stock on date of issue. For the nine months ended September 30, 2006, $\$ 0.4$ million was expensed related to these plans.

At September 30, 2006, there was $\$ 0.9$ million of total unrecognized compensation expense to be recognized over a weighted average period of four years related to restricted stock. Activity in this plan is summarized as follows:
$\left.\begin{array}{lcc} & \begin{array}{c}\text { September } \\ \text { 30, 2006 } \\ \text { Weighted }\end{array} \\ \text { Number } \\ \text { of }\end{array} \quad \begin{array}{c}\text { average grant } \\ \text { date fair } \\ \text { value }\end{array}\right\}$

We have two stock option plans (established in 1997 and 1992) that provide for the issuance of $2,840,000$ shares of non-qualified and incentive stock options. In addition, the 2001 stock plan provides for the issuance of $4,000,000$ of non-qualified and incentive stock options, stock appreciation rights, restricted stock, and phantom stock units. An additional $2,000,000$ of stock appreciation rights may be granted under this plan. For all plans, the exercise price of each option, which has a ten-year life and will vest at $25 \%$ at grant and $25 \%$ at each anniversary date thereafter, is equal to the market price of our stock on the grant date. Compensation expense for these options is recognized on a straight-line basis over the vesting period. Outstanding stock options with exercise prices below the stock price have been considered as common stock equivalents in the computation of diluted earnings per share. During the nine months ended September 30, 2006, $\$ 1.4$ million was expensed related to these plans. At September 30, 2006, there was $\$ 2.4$ million of total unrecognized compensation expense to be recognized over a weighted average period of two years related to unvested stock options. We received $\$ 1.7$ million in proceeds related to stock options exercised during the nine months ended September 30, 2006 and realized a tax benefit of $\$ 0.9$ million related to these options.

We calculated the fair value of each option award on the date of grant using the Black-Scholes option pricing model using certain key assumptions. The weighted-average fair value of each option granted during the nine months ended September 30, 2006 and 2005 was $\$ 5.64$ and $\$ 6.93$, respectively. The total intrinsic value of options exercised during the nine months ended September 30, 2006 and 2005 was $\$ 1.7$ million and $\$ 1.2$ million, respectively. Expected life is estimated based on historical experience of employees exercise behavior. Expected volatility is primarily based on historical volatility levels. The risk-free rate is based on the U.S. Treasury rate with a maturity date corresponding to the options expected life.

The following assumptions were used for each respective period:

|  | Nine Months Ended <br> September |  |
| :--- | :---: | :---: |
|  | $\mathbf{3 0 ,}$ |  |
| Risk-free interest rates | $\mathbf{2 0 0 6}$ | $\mathbf{2 0 0 5}$ |
| Dividend yield | $4.93 \%$ | $3.94 \%$ |
| Expected volatility | $2.41 \%$ | $1.75 \%$ |
| Expected lives (in years) | $32 \%$ | $35 \%$ |

## Table of Contents

The following table summarizes all stock option transactions under Company Plans during the nine months ended September 30, 2006:

|  |  | average | Weighted average | Aggregate |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \begin{array}{c} \text { Number } \\ \text { of } \end{array} \\ & \text { Shares } \end{aligned}$ | exercise price | remaining contractual term | Intrinsic Value |

In 2005 and in prior years, we used the intrinsic value method to account for our plans under the recognition and measurement principles of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations. Therefore, except for costs related to restricted shares, we recognized no stock-based employee compensation cost in net income for any period prior to 2006, as all options granted under our plans had an exercise price equal to the market value of the underlying common stock on the date of grant.

## Table of Contents

Below is the pro forma earnings per share calculation as if we had applied the fair value recognition provisions of SFAS 123 Accounting for Stock-based Compensations to stock-based employee compensation in the prior period:

## Note 13 Industry Segment Information

We have three principal business segments that provide a broad range of financial services. The commercial banking line of business provides commercial banking services. The commercial finance line of business originates leases and loans against commercial equipment and real estate. The home equity lending line of business originates, purchases, sells and services home equity loans. As described in Note 2, we have recently exited the mortgage banking line of business. This segment, which we entered in 1981, is shown in the table below in the two columns labeled Mortgage Banking and Discontinued Operations. These two columns are not identical for reasons listed in footnote one below the tables on the next page. Our other segment primarily includes the parent company, our private equity portfolio and eliminations.

The accounting policies of each segment are the same as those described in Note 1 Accounting Policies, Management Judgments and Accounting Estimates. On the next page is a summary of each segment s revenues, net income, and assets for the periods indicated:

## Table of Contents

(1) The amounts reported as discontinued operations in the table above do not exactly correspond with the amounts in our segment reporting of the mortgage banking line of business as certain items within the mortgage segment have not been and will not be eliminated from our continuing operations as contemplated in SFAS 144.
These items include management fees and other allocations charged by the parent to the segment; the reinsurance subsidiary included in the segment; certain residual interests associated with loan sales to the Federal Home Loan Bank of Indianapolis; and earnouts associated with the 2005 divestiture of this segment s
retail division.
In addition, the assets held for sale category on the consolidated balance sheet does not agree with the mortgage bank s
total assets under segment reporting as certain assets are unlikely to be included in the future sale including, but not limited to, Federal Home Loan Bank of Indianapolis (FHLBI) stock , FHLBI lender risk account, accounts receivable and cash.

## Note 14 Commitments and Contingencies

Culpepper v. Inland Mortgage Corporation
On February 7, 2006, the United States District Court for the Northern District of Alabama dismissed this case, originally filed in April 1996, by granting the motions of Irwin Mortgage Corporation, our indirect subsidiary (formerly Inland Mortgage Corporation), to decertify the class and for summary judgment, and by denying the plaintiffs motion for summary judgment. The plaintiffs have filed a notice of appeal with the Court of Appeals for the 11th Circuit.

During the ten years this case has been pending, the plaintiffs obtained class action status for their complaint alleging Irwin Mortgage violated the federal Real Estate Settlement Procedures Act (RESPA) relating to Irwin Mortgage s payment of broker fees to mortgage brokers. In September 2001, the Court of Appeals for the 11th Circuit upheld the district court s certification of the class. However, in October 2001, the Department of Housing and Urban Development (HUD) issued a policy statement that explicitly disagreed with the 11th Circuit s interpretation of RESPA in upholding class certification. Subsequent to the HUD policy statement, the 11th Circuit decided a RESPA case similar to ours, concluding the trial court had abused its discretion in certifying the class. The 11th Circuit expressly recognized it was, in effect, overruling its previous decision upholding class certification in our case.

If the plaintiffs were to prevail on appeal and in a subsequent trial on the merits, Irwin Mortgage could be liable for RESPA damages that could be material to our financial position. However, Irwin Mortgage believes the 11th Circuit s RESPA ruling in the case similar to ours would support a decision in our case affirming the trial court in favor of Irwin Mortgage. We therefore have not established any reserves for this case.

## Silke v. Irwin Mortgage Corporation

In April 2003, our indirect subsidiary, Irwin Mortgage Corporation, was named as a defendant in a class action lawsuit filed in the Marion County, Indiana, Superior Court. The complaint alleges that Irwin Mortgage charged a document preparation fee in violation of Indiana law for services performed by clerical personnel in completing legal documents related to mortgage loans. Irwin Mortgage filed an answer on June 11, 2003 and a motion for summary
judgment on October 27, 2003. On June 18, 2004, the court certified a plaintiff class consisting of Indiana borrowers who were allegedly charged the fee by Irwin Mortgage any time after April 14, 1997. This date was later clarified by stipulation of the parties to be April 17, 1997. In November 2004, the court heard arguments on Irwin Mortgage s motion for summary judgment and plaintiffs motion seeking to send out class notice. On February 23, 2006, the Court ordered that class notice be mailed. On September 7, 2006, the court ordered one-time publication of class notice in Indiana newspapers. We are unable at this time to form a reasonable estimate of the amount of potential loss, if any, that Irwin Mortgage could suffer. We have not established any reserves for this case.

## Cohens v. Inland Mortgage Corporation

In October 2003, our indirect subsidiary, Irwin Mortgage Corporation (formerly Inland Mortgage Corporation), was named as a defendant, along with others, in an action filed in the Supreme Court of New York, County of Kings. The plaintiffs, a mother and two children, allege they were injured from lead contamination while living in premises allegedly owned by the defendants. The suit seeks approximately $\$ 41$ million in damages and alleges negligence, breach of implied warranty of habitability and fitness for intended use, loss of services and the cost of medical treatment. On September 15, 2005, Irwin Mortgage filed an answer and cross-claims seeking dismissal of the complaint. On October 13, 2006, Irwin Mortgage filed a motion for summary judgment. We are unable at this time to form a reasonable estimate of the amount of potential loss, if any, that Irwin Mortgage could suffer. We have not established any reserves for this case.

## Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

## Table of Contents

## Litigation in Connection with Loans Purchased from Community Bank of Northern Virginia

Our subsidiary, Irwin Union Bank and Trust Company, is a defendant in several actions in connection with loans Irwin Union Bank purchased from Community Bank of Northern Virginia (Community).

Hobson v. Irwin Union Bank and Trust Company was filed on July 30, 2004 in the United States District Court for the Northern District of Alabama. As amended on August 30, 2004, the Hobson complaint, seeks certification of both a plaintiffs and a defendants class, the plaintiffs class to consist of all persons who obtained loans from Community and whose loans were purchased by Irwin Union Bank. Hobson alleges that defendants violated the Truth-in-Lending Act (TILA), the Home Ownership and Equity Protection Act (HOEPA), the Real Estate Settlement Procedures Act (RESPA) and the Racketeer Influenced and Corrupt Organizations Act (RICO). On October 12, 2004, Irwin filed a motion to dismiss the Hobson claims as untimely filed and substantively defective.

Kossler v. Community Bank of Northern Virginia was originally filed in July 2002 in the United States District Court for the Western District of Pennsylvania. Irwin Union Bank and Trust was added as a defendant in December 2004. The Kossler complaint seeks certification of a plaintiffs class and seeks to void the mortgage loans as illegal contracts. Plaintiffs also seek recovery against Irwin for alleged RESPA violations and for conversion. On September 9, 2005, the Kossler plaintiffs filed a Third Amended Class Action Complaint. On October 21, 2005, Irwin filed a renewed motion seeking to dismiss the Kossler action.

The plaintiffs in Hobson and Kossler claim that Community was allegedly engaged in a lending arrangement involving the use of its charter by certain third parties who charged high fees that were not representative of the services rendered and not properly disclosed as to the amount or recipient of the fees. The loans in question are allegedly high cost/high interest loans under Section 32 of HOEPA. Plaintiffs also allege illegal kickbacks and fee splitting. In Hobson, the plaintiffs allege that Irwin was aware of Community s alleged arrangement when Irwin purchased the loans and that Irwin participated in a RICO enterprise and conspiracy related to the loans. Because Irwin bought the loans from Community, the Hobson plaintiffs are alleging that Irwin has assignee liability under HOEPA.

If the Hobson and Kossler plaintiffs are successful in establishing a class and prevailing at trial, possible RESPA remedies could include treble damages for each service for which there was an unearned fee, kickback or overvalued service. Other possible damages in Hobson could include TILA remedies, such as rescission, actual damages, statutory damages not to exceed the lesser of $\$ 500,000$ or $1 \%$ of the net worth of the creditor, and attorneys fees and costs; possible HOEPA remedies could include the refunding of all closing costs, finance charges and fees paid by the borrower; RICO remedies could include treble plaintiffs actually proved damages. In addition, the Hobson plaintiffs are seeking unspecified punitive damages. Under TILA, HOEPA, RESPA and RICO, statutory remedies include recovery of attorneys fees and costs. Other possible damages in Kossler could include the refunding of all origination fees paid by the plaintiffs.

Irwin Union Bank and Trust Company is also a defendant, along with Community, in two individual actions (Chatfield v. Irwin Union Bank and Trust Company, et al. and Ransom v. Irwin Union Bank and Trust Company, et al.) filed on September 9, 2004 in the Circuit Court of Frederick County, Maryland, involving mortgage loans Irwin Union Bank purchased from Community. On July 16, 2004, both of these lawsuits were removed to the United States District Court for the District of Maryland. The complaints allege that the plaintiffs did not receive disclosures required under HOEPA and TILA. The lawsuits also allege violations of Maryland law because the plaintiffs were allegedly charged or contracted for a prepayment penalty fee. Irwin believes the plaintiffs received the required disclosures and that Community, a Virginia-chartered bank, was permitted to charge prepayment fees to Maryland borrowers.

Under the loan purchase agreements between Irwin and Community, Irwin has the right to demand repurchase of the mortgage loans and to seek indemnification from Community for the claims in these lawsuits. On September 17, 2004, Irwin made a demand for indemnification and a defense to Hobson, Chatfield and Ransom. Community denied this request as premature.

In response to a motion by Irwin, the Judicial Panel On Multidistrict Litigation consolidated Hobson, Chatfield and Ransom with Kossler in the Western District of Pennsylvania for all pretrial proceedings. We have established a reserve for the Community litigation based upon SFAS 5 guidance and the advice of legal counsel.

Putkowski v. Irwin Home Equity Corporation and Irwin Union Bank and Trust Company
On August 12, 2005, our indirect subsidiary, Irwin Home Equity Corporation, and our direct subsidiary, Irwin Union Bank and Trust Company (collectively, Irwin ), were named as defendants in litigation seeking class action status in the United States District

## Table of Contents

Court for the Northern District of California for alleged violations of the Fair Credit Reporting Act. In response to Irwin s motion to dismiss filed on October 18, 2005, the court dismissed the plaintiffs complaint with prejudice on March 23, 2006. Plaintiffs filed an appeal in the U.S. Court of Appeals for the 9th Circuit on April 13, 2006. We have not established any reserves for this case.

## White v. Irwin Union Bank and Trust Company and Irwin Home Equity Corporation

On January 5, 2006, our direct subsidiary, Irwin Union Bank and Trust Company, and our indirect subsidiary, Irwin Home Equity Corporation, (collectively, Irwin ) were named as defendants in litigation in the Circuit Court for Baltimore City, Maryland. The plaintiffs allege that Irwin charged or caused plaintiffs to pay certain fees, costs and other charges that were excessive or illegal under Maryland law in connection with loans made to plaintiffs by Irwin. The plaintiffs seek certification of a class consisting of Maryland residents who received mortgage loans from Irwin secured by real property in the State of Maryland and who claim injury due to Irwin s lending practices. The plaintiffs are seeking damages under the Maryland Mortgage Lending Laws and the Maryland Consumer Protection Act for, among other things, relief from further interest payments on their loans, reimbursement of interest, charges, fees and costs already paid, including prepayment penalties paid by the class, and damages of three times the amount of all allegedly excessive or illegal charges paid, plus attorneys fees, expenses and costs. In the alternative, the plaintiffs seek arbitration as provided for in their mortgage notes. On February 17, 2006, Irwin filed a notice of removal and removed the case from state to federal court. On March 17th, 2006 the plaintiffs filed a motion to remand the action back to state court and also filed an amended complaint emphasizing the alleged state law basis for their claims. Irwin believes, however, that the plaintiffs state law claims are completely preempted by Section 27 of the FDIC Act. On April 24, 2006, the plaintiffs initiated a class arbitration with the American Arbitration Association (White v. Irwin Union Bank \& Trust, et al.). On October 13, 2006, the parties tentatively agreed to settle this matter for a nonmaterial amount.

We and our subsidiaries are from time to time engaged in various matters of litigation, including the matters described above, other assertions of improper or fraudulent loan practices or lending violations, and other matters, and we have a number of unresolved claims pending. In addition, as part of the ordinary course of business, we and our subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral, and foreclosure interests, that is incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, we believe that damages, if any, and other amounts relating to pending matters are not likely to be material to our consolidated financial position or results of operations, except as described above. Reserves are established for these various matters of litigation, when appropriate under SFAS 5, based in part upon the advice of legal counsel.

## Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations.

 About Forward-looking StatementsYou should read the following discussion in conjunction with our consolidated financial statements, footnotes, and tables. This discussion and other sections of this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and are including this statement for purposes of invoking these safe harbor provisions.

Forward-looking statements are based on management s expectations, estimates, projections, and assumptions. These statements involve inherent risks and uncertainties that are difficult to predict and are not guarantees of future performance. In addition, our past results of operations do not necessarily indicate our future results. Words that convey our beliefs, views, expectations, assumptions, estimates, forecasts, outlook and projections or similar language, or that indicate events we believe could, would, should, may or will occur (or might not occur) or are likely (or unlikely) to occur, and similar expressions, are intended to identify forward-looking statements. These may include, among other things, statements and assumptions about:
our projected revenues, earnings or earnings per share, as well as management s short-term and long-term performance goals;
projected trends or potential changes in our asset quality, loan delinquencies, charge-offs, reserves, asset valuations, capital ratios or financial performance measures;
our plans and strategies, including the expected results or impact of implementing such plans and strategies; potential litigation developments and the anticipated impact of potential outcomes of pending legal matters;

## Table of Contents

the anticipated effects on results of operations or financial condition from recent developments or events; and
any other projections or expressions that are not historical facts.
We qualify any forward-looking statements entirely by these cautionary factors.
Actual future results may differ materially from what is projected due to a variety of factors, including, but not limited to:
potential changes in direction, volatility and relative movement (basis risk) of interest rates, which may affect consumer demand for our products and the management and success of our interest rate risk management strategies;
staffing fluctuations in response to product demand or the implementation of corporate strategies that affect our work force;
the relative profitability of our lending operations;
the valuation and management of our portfolios, including the use of external and internal modeling assumptions we embed in the valuation of those portfolios and short-term swings in valuation of such portfolios due to quarter-end movements in secondary market interest rates, which are inherently volatile;
borrowers refinancing opportunities, which may affect the prepayment assumptions used in our valuation estimates and which may affect loan demand;
unanticipated deterioration in the credit quality of our loan and lease assets, including deterioration resulting from the effects of natural disasters;
unanticipated deterioration or changes in estimates of the carrying value of our other assets, including securities;
difficulties in delivering products to the secondary market as planned;
difficulties in expanding our businesses and obtaining funding sources as needed;
competition from other financial service providers for experienced managers as well as for customers;
changes in the value of companies in which we invest;
changes in variable compensation plans related to the performance and valuation of lines of business where we tie compensation systems to line-of-business performance;
unanticipated outcomes in litigation;
legislative or regulatory changes, including changes in tax laws or regulations, regulatory actions that impact our corporation or bank, changes in the interpretation of regulatory capital rules, other changes in regulatory rules, rights, or responsibilities of our bank or thrift, changes in consumer or commercial lending rules, disclosure rules, or rules affecting corporate governance, and the availability of resources to address these rules;
changes in applicable accounting policies or principles or their application to our business or final audit adjustments;
additional guidance and interpretation on accounting issues and details of the implementation of new accounting methods;
the final outcome and implications of the sale and discontinuance of operations for our conventional mortgage banking segment; or
governmental changes in monetary or fiscal policies.

## Table of Contents

We undertake no obligation to update publicly any of these statements in light of future events, except as required in subsequent reports we file with the Securities and Exchange Commission (SEC).

## Strategy

Our strategy is to position the Corporation as an interrelated group of specialized financial services companies serving niche markets of consumers and small businesses while optimizing the productivity of our capital. Our operational objectives are premised on simultaneously achieving three goals: creditworthiness, profitability and growth. We believe we must continually balance these goals in order to deliver long-term value to all of our stakeholders. We have developed a four-part strategy to meet these goals:

Identify market niches. We focus on product or market niches in financial services where our understanding of customer needs and ability to meet them creates added value that permits us not to have to compete primarily on price. We don $t$ believe it is necessary to be the largest or leading market share company in any of our product lines to earn an adequate risk-adjusted return, but we do believe it is important that we are viewed as a preferred provider in niche segments of those product offerings.

Hire exceptional management with niche expertise. We enter niches only when we have attracted senior managers who have proven track records in the niche for which they are responsible. Our structure allows the senior managers of each line of business to focus their efforts on understanding their customers and meeting the needs of the markets they serve. This structure also promotes accountability among managers of each enterprise. We attempt to create a mix of short-term and long-term incentives that provide these managers with the incentive to achieve creditworthy, profitable growth over the long term.

Diversify capital and earnings risk. We diversify our revenues and allocate our capital across complementary lines of business and across different regions as a key part of our risk management. For example, our commercial bank has a different profile of customers in the Midwest and Western states. These economies have performed differently over the past five years due to differences in local economies. These differences have affected demand and credit quality of our products. In addition, our home equity segment lends to consumers on a national basis, building a diversified portfolio where demand and credit quality fluctuate depending, in part, on local market conditions. Our customers businesses and needs are cyclical, but when combined in an appropriate mix, we believe they provide sources of diversification and opportunities for growth in a variety of economic conditions.

Reinvest in new opportunities. We reinvest on an ongoing basis in the development of new and existing opportunities. As a result of our attention to long-term value creation, we believe it is important at times to dampen short-term earnings growth by investing for future return. We are biased toward seeking new growth through organic expansion of existing lines of business. At times we will initiate a new line through a start-up, with highly qualified managers we select to focus on a single line of business. Over the past ten years, we have made only a few acquisitions. Those have typically not been in competitive bidding situations.
Consistent with this strategy and in light of the changing environment for conventional first mortgage loans, in the first quarter of 2006, we announced that we were examining our strategic alternatives for the mortgage banking line of business and have since sold the majority of the business. Over the past several years, we have been monitoring changes in the environment for mortgage banking that began to raise questions about the best strategic approach for the Corporation. These changes were influenced primarily by the increasing commoditization of conventional first mortgages. As margins shrunk, the environment required ever larger scale in production to be more price-competitive and to afford additional capital investments in technology and compliance systems. The relative size of IMC to the rest of the Corporation made it increasingly difficult to support growth at IMC to gain scale advantages while at the same time supporting the growth of our other three segments. In addition, the volatility of the value of mortgage servicing rights as well as production increased, as interest rates traded in a narrow range for a prolonged period of time. Our intent is to redeploy our capital to our other three lines of business, each of which we believe continues to represent a good fit with our corporate strategy, in combination with share repurchases.

We believe long-term growth and profitability will result from our endeavors to pursue consumer and commercial lending niches through our bank holding company structure, our experienced management, our diverse product and
geographic markets.

## Table of Contents

## Critical Accounting Policies

Accounting estimates are an integral part of our financial statements and are based upon our current judgments. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ from our current judgments or that our use of different assumptions could result in materially different estimates. Our Annual Report on Form 10-K for the year ended 2005 provides a description of the critical accounting policies we apply to material financial statement items, all of which require the use of accounting estimates and/or judgment.

## Consolidated Overview

As discussed below, the financial statements, footnotes, schedules and discussion within this report have been reformatted to conform to the presentation required for discontinued operations pursuant the sale of our mortgage banking line of business.

## Consolidated Income Statement Analysis

## Net Income from Continuing Operations

We recorded net income from continuing operations of $\$ 9.2$ million for the three months ended September 30, 2006, down from net income from continuing operations of $\$ 13.2$ million for the three months ended September 30, 2005. Net income per share (diluted) from continuing operations was $\$ 0.31$ for the quarter ended September 30, 2006, down from $\$ 0.46$ per share for the third quarter of 2005 . Return on equity was $6.8 \%$ for the three months ended September 30, 2006 and $10.4 \%$ for the same period in 2005 . For the year to date, we recorded net income from continuing operations of $\$ 26.9$ million or $\$ 0.90$ per diluted share. This represents decreases of $5 \%$ and $8 \%$ compared to the same periods in 2005 . Return on equity for continuing operations for the nine-month period ended September 30, 2006 was $6.8 \%$ compared with $7.5 \%$ during the same period a year earlier.

## Net Interest Income from Continuing Operations

Net interest income from continuing operations for the nine months ended September 30, 2006 totaled $\$ 191$ million, up $12 \%$ from the nine months of 2005 net interest income of $\$ 170$ million. Net interest margin for the nine months ended September 30, 2006 was $4.67 \%$ compared to $5.03 \%$ for the same period in 2005 . The decline in margin from 2005 to 2006 was due to our increasing cost of funds, which have risen at a faster pace than our yields on
loans, reflecting competitive conditions for both assets and liabilities.

## Table of Contents

The following table shows our daily average consolidated balance sheet, interest rates and yield at the dates indicated:

## Table of Contents

## Provision for Loan and Lease Losses from Continuing Operations

The consolidated provision for loan and lease losses for the three months ended September 30, 2006 was $\$ 9$ million, compared to $\$ 6$ million for the same period in 2005. Year to date, the provision for 2006 was $\$ 25$ million, compared to $\$ 18$ million in 2005. More information on this subject is contained in the section on credit risk.

## Noninterest Income from Continuing Operations

Noninterest income during the three months ended September 30, 2006 totaled $\$ 7$ million, compared to $\$ 14$ million for the same period of 2005. Noninterest income of $\$ 30$ million was recorded for the nine months ended September 30, 2006 and $\$ 51$ million for the same period in 2005. The decrease in 2006 versus 2005 related primarily to the home equity line of business where there were net losses from sale of loans of $\$ 2.4$ million in the nine months ended September 30, 2006 compared to gains of $\$ 16$ million during the same period in 2005. Details related to these fluctuations are discussed later in the home equity lending section of this document.

## Noninterest Expense from Continuing Operations

Noninterest expenses for the three and nine months ended September 30, 2006 totaled $\$ 51$ million and $\$ 155$ million, respectively, compared to $\$ 49$ million and $\$ 158$ million for the same periods in 2005. The decrease in consolidated noninterest expense during the nine months ended September 30, 2006 is primarily due to decreases in the home equity line of business, reflecting our decision to exit the retail distribution channel in April 2006. Details related to these fluctuations are discussed later in the home equity lending section of this document.
Income Tax Provision from Continuing Operations
Income tax provision for the three and nine months ended September 30, 2006 totaled $\$ 3.6$ million and $\$ 14.3$ million, respectively, compared to tax provision of $\$ 5.5$ million and $\$ 15.9$ million during the same periods in 2005. In 2006, our effective tax rate decreased to $34.8 \%$ year to date, compared to $36.1 \%$ for the same period in 2005. This decrease relates to a lower effective tax rate in Canada reflecting recent tax law changes, increased tax credits related to low income housing project investments, and the release of $\$ 0.9$ million in tax reserves in 2006 as we aligned our tax liability to a level commensurate with our currently identified exposures.

## Consolidated Balance Sheet Analysis

Total assets at September 30, 2006 were $\$ 6.0$ billion, down 10\% from December 31, 2005. Average assets for the first nine months of 2006 were $\$ 6.6$ billion, up $13 \%$ from the average assets for the year ended December 31, 2005. The growth in the consolidated average balance sheet primarily relates to increases in portfolio loans at the commercial banking and commercial finance lines of business. At September 30, 2006, $\$ 74$ million of assets from our mortgage banking line of business were reclassified to assets held for sale on our balance sheet pending the planned sale of these assets.

## Investment Securities

The following table shows the composition of our investment securities at the dates indicated:

|  | September | December |
| :--- | :---: | ---: |
|  | 30, | 31, |
|  | 2006 | 2005 |
| U.S. Treasury and government obligations | (Dollars in thousands) |  |
| Obligations of states and political subdivisions | 13,495 | $\$$ |
| Mortgage-backed securities | 3,545 | 12,571 |
| Other | 46,016 | 3,544 |
| Total | 68,906 | 28,331 |

## Table of Contents

## Loans Held For Sale

Loans held for sale totaled $\$ 176$ million at September 30, 2006, a decrease from a balance of $\$ 514$ million at December 31, 2005. The decrease occurred at our home equity lending line of business as a result of a $\$ 231$ million gain on sale securitization during June. The remainder of the decline relates to lower production, whole loan sales, financed securitizations and run off at this line of business.

## Loans and Leases

Our commercial loans and leases are originated throughout the United States and Canada. At September 30, 2006, $94 \%$ of our loan and lease portfolio was associated with our U.S. operations. We also extend credit to consumers throughout the United States through mortgages, installment loans and revolving credit arrangements. Loans by major category for the periods presented were as follows:

|  | September | December |
| :--- | :---: | ---: |
|  | $\mathbf{3 0 ,}$ | $\mathbf{3 1 ,}$ |
|  | $\mathbf{2 0 0 6}$ | $\mathbf{2 0 0 5}$ |
| Commercial, financial and agricultural | (Dollars in thousands) |  |
| Real estate-construction | $\$ 2,159,093$ | $\$ 2,016,228$ |

| Consumer | $1,509,338$ | $1,232,958$ |
| Commercial financing | 33,169 | 31,718 |
| Franchise financing | 612,890 | 462,413 |
| Domestic leasing | 283,042 | 237,968 |
| Canadian leasing | 365,494 | 313,581 |
| Unearned income | $(184,639)$ | $(125,474)$ |
| Franchise financing | $(40,433)$ | $(33,267)$ |
| Domestic leasing | $(44,677)$ | $(38,013)$ |
| Canadian leasing | $\$ 5,101,135$ | $\$$ |
|  |  | $4,477,943$ |

## Allowance for Loan and Lease Losses

Changes in the allowance for loan and lease losses are summarized below:

|  | September | December |
| :--- | :---: | :---: |
|  | $\mathbf{3 0 ,}$ | $\mathbf{3 1 ,}$ |
|  | $\mathbf{2 0 0 6}$ | $\mathbf{2 0 0 5}$ |
| (Dollars in thousands) |  |  |
| Balance at beginning of year | $\$ 59,223$ | $\$$ |
| Provision for loan and lease losses | 25,154 | 43,441 |
| Charge-offs | $(21,705)$ | $(27,307$ |
| Recoveries | 7,995 | 8,960 |
| Reduction due to reclassification or sale of loans | $(172)$ | $(403)$ |
| Foreign currency adjustment | 140 | 119 |
|  |  |  |
| Balance at end of period | $\$ 70,635$ | $\$$ |

## Deposits

Total deposits year to date ending September 30, 2006 averaged $\$ 4.0$ billion compared to deposits for the year 2005 that averaged $\$ 3.9$ billion. Demand deposits year to date of 2006 averaged $\$ 0.8$ billion, a $22 \%$ decrease over the

## Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

average balance for the year 2005 reflecting increased price competition. A significant portion of demand deposits is related to deposits at Irwin Union Bank and Trust Company that are associated with escrow accounts held on loans in the servicing portfolio at the mortgage banking line of business. At September 30, 2006, these escrow accounts were relatively unchanged from the $\$ 0.4$ billion at December 31, 2005.

## Table of Contents

Irwin Union Bank and Trust utilizes institutional broker-sourced deposits as funding to supplement deposits solicited through branches and other wholesale funding sources. At September 30, 2006, institutional broker-sourced deposits totaled $\$ 0.6$ billion, relatively unchanged from December 31, 2005.

## Short-Term Borrowings

Short-term borrowings for the nine months ended September 30, 2006 averaged $\$ 619$ million compared to an average of $\$ 421$ million for the year 2005. Short-term borrowings decreased to $\$ 264$ million at September 30, 2006, compared to $\$ 997$ million at December 31, 2005. The decrease in short-term borrowings at the end of the third quarter relative to year-end reflects $\$ 628$ million in securitized financings at the home equity lending line of business during 2006. Proceeds from these financings were used to pay down short term borrowings.

Federal Home Loan Bank borrowings averaged $\$ 333$ million for the quarter ended September 30, 2006, with an average rate of $4.87 \%$. At September 30, 2006 the balance was $\$ 264$ million at an interest rate of $5.09 \%$. The maximum outstanding during any month end during the nine months ending September 30, 2006 was $\$ 609$ million. Federal Funds borrowings averaged $\$ 212$ million for the quarter ended September 30, 2006, with an average rate of $4.28 \%$. There was no balance at September 30, 2006. The maximum outstanding during any month end year to date for 2006 was $\$ 280$ million.

Federal Home Loan Bank borrowings averaged $\$ 199$ million for the quarter ended December 31, 2005, with an average rate of $3.56 \%$. The balance at December 31, 2005 was $\$ 642$ million at an interest rate of $4.39 \%$. The maximum outstanding during any month end during 2005 was $\$ 642$ million. Federal Funds borrowings averaged $\$ 126$ million for the quarter ended December 31, 2005, with an average rate of $1.95 \%$. The balance at December 31, 2005 was $\$ 290$ million at an interest rate of $3.94 \%$. The maximum outstanding at any month end during 2005 was \$290 million.

## Collateralized Debt

Collateralized debt totaled $\$ 1.0$ billion at September 30, 2006, compared to $\$ 0.7$ billion at December 31, 2005. The increased debt relates to the securitization of portfolio loans at the home equity lending line of business during 2006, which is discussed in more detail in the Home Equity Lending section of this document. The securitization debt represents match-term funding for these loans and leases.

## Other Long-Term Debt

Other long-term debt totaled $\$ 234$ million at September 30, 2006, compared to $\$ 270$ million for December 31, 2005. On July 25, 2006, we had a $\$ 15$ million reduction in long-term debt related to our call of trust preferred securities issued by IFC Capital Trust IV. We incurred $\$ 1.2$ million in call premium expense in connection with this call. On March 6 of this year we had a reduction in long-term debt of $\$ 53$ million related to our call of the convertible trust preferred securities issued by IFC Capital Trust III. As a result of the call, $39 \%$ of the preferred shareholders converted to $1,013,938$ shares of IFC common stock and $61 \%$ redeemed for cash. On March 31, 2006, we issued $\$ 31.5$ million of Capital Trust IX preferred securities to replace the redeemed shares. We had obligations represented by subordinated debentures at September 30, 2006 totaling $\$ 204$ million with our wholly-owned trusts that were created for the purpose of issuing trust preferred securities. The subordinated debentures were the sole assets of the trusts at September 30, 2006. In accordance with FASB Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities (revised December 2003), we deconsolidated the wholly-owned trusts that issued the trust preferred securities. As a result, these securities are not consolidated on our balance sheet. Instead, the subordinated debentures held by the trusts are disclosed on the balance sheet as other long-term debt.

## Capital

Shareholders equity averaged $\$ 531$ million during the first nine months of 2006 , up $11 \%$ compared to the average for the year 2005. Shareholders equity balance of $\$ 523$ million at September 30, 2006 represented $\$ 17.56$ per common share, compared to $\$ 17.90$ per common share at December 31, 2005. We paid $\$ 3.3$ million and $\$ 9.8$ million in dividends for the three and nine months ended September 30, 2006, respectively, reflecting an increase of $\$ 0.01$ and $\$ 0.03$ per share, respectively, compared to a year ago. As mentioned above, on March 9, 2006, 1,013,938 shares of our common stock were issued upon conversion of trust preferred securities issued by IFC Capital Trust III. These additional shares added $\$ 20.2$ million to our equity base during the first quarter.

## Table of Contents

The following table sets forth our capital and regulatory capital ratios at the dates indicated:

|  |  | ptember <br> 30, <br> 2006 <br> (Dollars | OL | $\begin{aligned} & \text { December } \\ & 31, \\ & 2005 \\ & \text { sands) } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| Tier 1 capital | \$ | 694,534 | \$ | 675,316 |
| Tier 2 capital |  | 125,913 |  | 154,128 |
| Total risk-based capital | \$ | 820,447 | \$ | 829,444 |
| Risk-weighted assets |  | ,066,667 | \$ | 6,317,797 |
| Risk-based ratios: |  |  |  |  |
| Tier 1 capital |  | 11.5\% |  | 10.7\% |
| Total capital |  | 13.5 |  | 13.1 |
| Tier 1 leverage ratio |  | 10.8 |  | 10.3 |
| Ending shareholders equity to assets |  | 8.7 |  | 7.7 |
| Average shareholders equity to assets |  | 8.0 |  | 8.0 |

At September 30, 2006, our total risk-adjusted capital ratio was $13.5 \%$ exceeding our Board-established policy minimum target of $12.5 \%$. Our Board regularly reviews our risks, growth forecasts, and peer capitalization and changes minimum capital policies as conditions change. At December 31, 2005, our total risk-adjusted capital ratio was $13.1 \%$. Our ending equity to assets ratio at September 30, 2006 was $8.7 \%$ compared to $7.7 \%$ at December 31, 2005. Our Tier 1 capital totaled $\$ 695$ million as of September 30, 2006, or $11.5 \%$ of risk-weighted assets.

On August 7, 2006, our Board of Directors authorized management to undertake the repurchase of up to two million shares or up to $\$ 50$ million of common stock of the Corporation. We repurchased no shares in the third quarter as it was not until the end of the quarter that we had sold the majority of our mortgage segment assets. We intend to purchase shares from time to time, beginning in the fourth quarter of 2006 in amounts calibrated by our on-going assessment of excess capital and cash. Due to limitations under regulatory formula of dividends relative to historic earnings, we currently require approval from the Federal Reserve and the Indiana Department of Financial Institutions to receive dividends from Irwin Union Bank and Trust. The parent company does not hold excess cash, so our ability to execute our share repurchase program is largely dependent on receiving future dividends from our subsidiaries. We do not expect that our requests for dividends will be withheld, but if they are, we will be limited in our repurchase activities.

## Cash Flow Analysis

Our cash and cash equivalents decreased $\$ 24$ million during the first nine months of 2006, compared to an increase of $\$ 50$ million during the same period in 2005. Largely as a result of the sale of our mortgage segment assets, cash flows from operating activities provided $\$ 1.1$ billion in cash and cash equivalents in the nine months ended September 30, 2006 compared to the same period in 2005 when our operations used $\$ 0.6$ billion in cash and cash equivalents. Changes in loans held for sale impact cash flows from operations and are a normal and ordinary characteristic of our business. In a period in which loan sales exceed production such as we had in 2006, operating cash flows will increase.

## Earnings Outlook

We do not provide quantitative earnings guidance, as we do not believe it to be in the best interest of our long-term stakeholders. Our strategy is to seek opportunities for credit-worthy, profitable growth by serving niche markets while attempting to mitigate the impact of changes in interest rates and economic conditions on our credit retained portfolios. Prior to 2005, a meaningful amount of our earnings in many years came from our mortgage banking segment. In 2006, we decided to exit the mortgage banking line of business. Our opportunities in our other three segments continue to grow across the U.S. and, in our commercial finance segment, also in Canada. This growth will require capital and management focus. Further, we believe this growth will contribute in a meaningful way to the

## Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

Corporation s future success. Our focus in 2006 and beyond will be to grow these three segments in a credit-worthy, profitable manner. We believe our earnings in 2005 and 2006, particularly in mortgage and home equity lending were not indicative of the underlying potential of the Corporation and expect to be able to report substantially improved results in 2007 and subsequent years. In 2006, we are reporting the results of mortgage banking business as a discontinued operation.

## Table of Contents

## Earnings by Line of Business

Irwin Financial Corporation is composed of three principal lines of business and the discontinued mortgage banking segment The three segments of continuing operations are::

Commercial Banking
Commercial Finance
Home Equity Lending
As noted earlier, we are in the process of exiting our mortgage banking line of business. The segment is now reported on as a discontinued operation .

The following table summarizes our net income (loss) by line of business for the periods indicated:

investments at
September 30, 2006.

Overview
Our commercial banking line of business focuses on providing credit, cash management and personal banking products to small businesses and business owners. We offer commercial banking services through our banking subsidiaries, Irwin Union Bank and Trust Company, an Indiana state-chartered commercial bank, and Irwin Union Bank, F.S.B., a federal savings bank.

## Table of Contents

The following tables show the geographic composition of our commercial banking loans and our core deposits:

| Markets | $\begin{gathered} \text { September 30, } \\ 2006 \end{gathered}$ |  |  | $\begin{gathered} \text { December 31, } \\ 2005 \end{gathered}$ |  |  |

| Total | \$ 2,316,204 | 100.0\% | 3.3\% | \$ 2,490,063 | 100.0\% | 2.7\% |

## Net Income

Commercial banking net income totaled $\$ 8.3$ million during the third quarter of 2006 compared to $\$ 7.6$ million for the same period in 2005. Year-to-date net income totaled $\$ 22.9$ million in 2006 compared to net income of $\$ 18.7$ million in 2005.
Net Interest Income
The following table shows information about net interest income for our commercial banking line of business:

|  | Three Months Ended September 30, |  | Nine Months Ended September30, |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2006 | 2005 | 2006 |  | 2005 |
|  | (Dollars in thousands) |  |  |  |  |
| Net interest income | \$ 31,938 | \$ 28,639 | \$ 93,211 | \$ | 80,175 |
| Average interest earning assets | 2,964,055 | 2,967,687 | 3,055,665 |  | 2,824,579 |
| Net interest margin | 4.27\% | 3.83\% | 4.08\% |  | 3.80\% |

Net interest income was $\$ 32$ million for the third quarter of 2006, an increase of $12 \%$ over third quarter of 2005. Net interest income year to date in 2006 also improved $16 \%$ over the same period in 2005. The 2006 improvement in net interest income resulted primarily from an increase in our commercial banking loan portfolio as a result of growth and market expansion efforts. Net interest margin is computed by dividing net interest income by average interest earning assets. Net interest margin for the three months ended September 30, 2006 was $4.27 \%$, compared to $3.83 \%$ for the same period in 2005. Year-to-date net interest margin for 2006 was $4.08 \%$, compared to $3.80 \%$ for 2005 . The increase in 2006 margin reflects the redeployment of excess liquidity into loan assets in 2006, as compared to intra-company securities investments made in 2005.
Provision for Loan and Lease Losses
Provision for loan and lease losses increased to $\$ 4.5$ million year to date during 2006, compared to a provision of $\$ 3.9$ million during the same period in 2005. The increased provision relates primarily to portfolio growth. See further discussion in the Credit Quality section below.

## Table of Contents

## Noninterest Income

The following table shows the components of noninterest income for our commercial banking line of business:

|  | Three Months Ended September 30, |  | Nine Months Ended September 30, |  |
| :---: | :---: | :---: | :---: | :---: |
| Trust fees | \$ 478 | \$ 486 | \$ 1,456 | \$ 1,494 |
| Service charges on deposit accounts | 1,086 | 1,002 | 3,146 | 3,008 |
| Insurance commissions, fees and premiums | 368 | 354 | 1,527 | 1,314 |
| Gain from sales of loans | 822 | 956 | 1,834 | 2,380 |
| Loan servicing fees | 377 | 371 | 1,141 | 1,092 |
| Amortization of servicing assets | (297) | (354) | (832) | (981) |
| (Impairment) recovery of servicing assets | (6) | 345 | (6) | 248 |
| Brokerage fees | 329 | 376 | 989 | 980 |
| Derivative losses |  | (336) |  | (263) |
| Other | 1,534 | 1,242 | 4,298 | 3,357 |
| Total noninterest income | \$ 4,691 | \$ 4,442 | \$ 13,553 | \$ 12,629 |

Noninterest income during the three and nine months ended September 30, 2006 increased $6 \%$ and $7 \%$ over the same periods in 2005, respectively. The commercial banking line of business has a first mortgage servicing portfolio totaling $\$ 464$ million at September 30, 2006, principally a result of mortgage loan production in its south-central Indiana markets. Servicing rights related to this portfolio are carried on the balance sheet at the lower of cost or market, estimated at September 30, 2006 to be $\$ 4$ million.
Operating Expenses
The following table shows the components of operating expenses for our commercial banking line of business:

|  | Three Months Ended September 30, |  | Nine Months Ended September 30, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2006 | 2005 |  | 2006 |  | 2005 |
|  | (Dollars in thousands) |  |  |  |  |  |
| Salaries and employee benefits | \$ 13,806 | \$ 11,897 | \$ | 40,573 | \$ | 36,207 |
| Other expenses | 9,303 | 7,394 |  | 25,593 |  | 21,682 |
| Total operating expenses | \$ 23,109 | \$ 19,291 | \$ | 66,166 | \$ | 57,889 |
| Efficiency ratio | 63.1\% | 58.3\% |  | 62.0\% |  | 62.4\% |
| Number of employees at period end ${ }^{(1)}$ |  |  |  | 577 |  | 561 |

## (1) On a full time

equivalent basis.
Operating expenses for the three and nine months ended September 30, 2006 totaled $\$ 23$ million and $\$ 66$ million, an increase of $20 \%$ and $14 \%$ over the same periods in 2005 , respectively. The increase in operating expenses is primarily due to increased compensation-related costs and premises and equipment costs due to our recent office expansions and support staff.
Balance Sheet

Total assets at September 30, 2006 were $\$ 3.1$ billion compared to $\$ 3.2$ billion at December 31, 2005. Earning assets for the nine months ended September 30, 2006 averaged $\$ 3.1$ billion compared to $\$ 2.8$ billion for the same period in 2005. The most significant component of this increase in 2006 was loan growth. Core deposits for the third quarter of 2006 totaled $\$ 2.3$ billion, a decrease of $7 \%$ as compared to December 31, 2005, reflecting increased price competition and due to our decision to significantly reduce a funding source which due to contractual changes would otherwise need to be deemed a brokered deposit, thus diminishing its value to us.

## Table of Contents

## Credit Quality

The allowance for loan losses increased $\$ 1.9$ million from December 31, 2005 primarily related to loan growth. Nonperforming assets to total assets decreased in 2006 over 2005. Nonperforming loans are not significantly concentrated in any industry category. The following table shows information about our nonperforming assets in this line of business and our allowance for loan losses:

|  | September | December |  |
| :--- | :---: | :---: | :---: |
|  | $\mathbf{3 0 ,}$ | $\mathbf{3 1 ,}$ |  |

## Table of Contents

## Commercial Finance

The following table shows selected financial information for our commercial finance line of business for the periods indicated:

## Net Income

During the three months ended September 30, 2006, the commercial finance line of business recorded net income of $\$ 3.3$ million, compared to $\$ 2.5$ million for the same period in the prior year. Year to date, the commercial finance line of business earned $\$ 9.1$ million compared to $\$ 4.7$ million for the same period in the prior year. The 2006 improvement in earnings is attributable primarily to higher net interest income resulting from growth in the portfolio.

## Table of Contents

## Net Interest Income

The following table shows information about net interest income for our commercial finance line of business:

|  | Three Months Ended September 30, |  | Nine Months Ended September30, |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2006 | 2005 | 2006 | 2005 |
|  | (Dollars in thousands) |  |  |  |
| Net interest income | \$ 10,417 | \$ 8,959 | \$ 30,217 | \$ 24,499 |
| Average interest earning assets | 968,008 | 717,364 | 903,603 | 673,852 |
| Net interest margin | 4.27\% | 4.95\% | 4.47\% | 4.86\% |

Net interest income was $\$ 10$ million for the quarter ended September 30, 2006, an increase of $16 \%$ over 2005. Year to date net interest income was $\$ 30$ million, compared to $\$ 24$ million in 2005 . The improvement in net interest income resulted primarily from an increase in our commercial finance portfolio. The total loan and lease portfolio has increased to $\$ 992$ million at September 30, 2006, an increase of $21 \%$ over year-end 2005 and an increase of $31 \%$ over September 30, 2005. This line of business originated $\$ 147$ million and $\$ 432$ million in loans and leases during the third quarter and year-to-date 2006, compared to $\$ 119$ million and $\$ 313$ million during the same periods of 2005.

Net interest margin is computed by dividing net interest income by average interest earning assets. Net interest margin for the third quarter of 2006 was $4.27 \%$ compared to $4.95 \%$ in 2005 for the same period. The decrease in 2006 margin is due primarily to increases in cost of funds without offsetting increases in yields due to competitive pressures.

## Provision for Loan and Lease Losses

The provision for loan and lease losses decreased to $\$ 4.6$ million during the first nine months in 2006 compared to $\$ 4.8$ million for the same period in 2005. The decrease in the provision relates primarily to overall improvements in credit quality in the commercial finance portfolio.

## Noninterest Income

The following table shows the components of noninterest income for our commercial finance line of business:

|  | Three MonthsEnded September30, |  | Nine Months Ended September 30, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2006 | 2005 |  | 006 |  | 005 |
|  | (Dollars in thousands) |  |  |  |  |  |
| Gain from sales of loans | \$ 939 | \$ 1,530 | \$ | 2,191 | \$ | 2,313 |
| Derivative gains (losses), net | 26 | (227) |  | (192) |  | (533) |
| Other | 1,571 | 1,010 |  | 4,685 |  | 3,793 |
| Total noninterest income | \$ 2,536 | \$ 2,313 | \$ | 6,684 | \$ | 5,573 |

Noninterest income during the three months ended September 30, 2006 increased $10 \%$ over the same period in 2005. Year to date, noninterest income was $\$ 6.7$ million, compared to $\$ 5.6$ million in the same period of 2005. Included in noninterest income were gains from sales of whole loans that totaled $\$ 0.9$ million and $\$ 2.2$ million for the three and nine months ended September 30, 2006, respectively, compared to $\$ 1.5$ million and $\$ 2.3$ million during the same periods in 2005. Also included in noninterest income during the three and nine months ended September 30, 2006 were an interest rate derivative gain of $\$ 26$ thousand and an interest rate derivative loss of $\$ 0.2$ million, respectively, in our Canadian operation related to asset-liability mismatches in our funding of that operation, compared to derivative losses of $\$ 0.2$ million and $\$ 0.5$ million during the same periods in 2005.

## Table of Contents

## Operating Expenses

Operating expenses during the third quarter and year to date for 2006 totaled $\$ 6.1$ million and $\$ 17.7$ million, respectively, an increase of $12 \%$ and $3 \%$ over the same periods in 2005.

The following table shows the components of operating expenses for our commercial finance line of business:

| Three Months |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

## Credit Quality

The commercial finance line of business had nonperforming loans and leases at September 30, 2006 of $\$ 5.2$ million, compared to $\$ 3.7$ million as of December 31,2005 . Net charge-offs recorded by this line of business totaled $\$ 1.2$ million for the third quarter of 2006 , compared to $\$ 1.1$ million for the third quarter of 2005 . Net charge-offs year to date were $\$ 2.8$ million, down from the $\$ 3.9$ million net charge-offs recorded year to date in 2005 . We expect net charge-offs to increase as our franchise finance portfolio matures.

Our allowance for loan and lease losses at September 30, 2006 totaled $\$ 12.5$ million, representing $1.26 \%$ of loans and leases, compared to a balance at December 31, 2005 of $\$ 10.8$ million, or $1.32 \%$ of loans and leases.

The following table shows information about our nonperforming loans and leases in this line of business and our allowance for loan and lease losses:

Overview
Our home equity lending line of business originates, purchases, sells and services a variety of home equity lines of credit and fixed-rate home equity loan products nationwide. We market our home equity products (generally using second mortgage liens) through a combination of brokers, direct marketing, the Internet, and correspondent channels. We seek creditworthy homeowners who are active credit users.

## Table of Contents

We offer home equity loans with combined loan-to-value (CLTV) ratios of up to $125 \%$ of their collateral value. Home equity loans are priced using a proprietary model, taking into account, among other factors, the credit history of our customer and the relative loan-to-value (LTV) ratio of the loan at origination. For the nine-month period ended September 30, 2006, loans with loan-to-value ratios greater than $100 \%$ (high LTVs, or HLTVs) constituted $34 \%$ of our loan originations and $46 \%$ of our managed portfolio for this line of business. In an effort to manage portfolio concentration risk and to comply with existing banking regulations, we have policies in place governing the size of our investment in loans secured by real estate where the LTV is greater than $90 \%$.

For most of our home equity product offerings, we offer customers the choice to accept an early repayment fee in exchange for a lower interest rate. Approximately $68 \%$, or $\$ 1.1$ billion, of our home equity managed portfolio at September 30, 2006 was originated with early repayment fees, reflecting such customer choice.

Generally we either sell loans through whole loan sales or we fund these loans on balance sheet through warehouse lines or secured, term financings. During the second quarter, we executed a gain on sale securitization of certain high credit quality, but low coupon loans which were originated in 2005 . We securitized these loans as we did not expect that we could earn a sufficient return on capital by holding them on balance sheet. These loans are now off balance sheet, funded with match term liabilities and we hold a residual interest in the loans which we value at $\$ 2.8$ million or approximately 1.3 percent of the note balance of the underlying loans. We balance our loan portfolio growth objectives with cash flow and profit targets, as well as a desire to manage our capital accounts. In addition, regulated banks holding more than their total regulatory capital in certain mortgage exposures where the underlying loan to value exceeds $90 \%$ are subject to a higher level of regulatory scrutiny. This regulation factors into our sale decisions.

The following table provides a breakdown of our home equity lending managed portfolio by product type, outstanding principal balance and weighted average coupon as of September 30, 2006 and December 31, 2005:

## Table of Contents

## Net Income

Our home equity lending business recorded a net loss of $\$ 0.3$ million during the three months ended September 30, 2006 , compared to a net income for the same period in 2005 of $\$ 2.2$ million. Year to date income of $\$ 0.4$ million was recorded through September 30, 2006, compared to net income of $\$ 3.7$ million during the same period a year earlier. Net Revenue

Net revenue for the three and nine months ended September 30, 2006 totaled $\$ 19$ million and $\$ 66$ million, respectively, compared to net revenue for the same periods in 2005 of $\$ 28$ million and $\$ 86$ million. The decrease in revenues is primarily a result of lower gains from loan sales and higher provision for loans losses.

During the third quarter of 2006, our home equity lending business produced $\$ 254$ million of home equity loans, compared to $\$ 444$ million during the same period in 2005. The decline in volume principally reflects lower retail originations. During the second quarter, we restructured our retail channel significantly due to its higher origination costs and lower ratio of leads to loan closings as compared to the segment s broker and correspondent channels. The table below shows our originations by channel for the periods shown. Other principally includes loans originated in a co-marketing alliance with the segment s mortgage banking affiliate.

|  | Three Months Ended September 30, |  | Nine Months Ended September30, |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2006 | 2005 | 2006 | 2005 |
|  | 2006 (Dollars in thousands) 2005 |  |  |  |

| Percent correspondent | 21\% | 16\% | 26\% | 17\% |
| Percent retail loans | 11 | 41 | 17 | 38 |
| Percent brokered | 31 | 21 | 28 | 22 |
| Percent other | 37 | 22 | 29 | 23 |

Our home equity lending business had $\$ 1.4$ billion of net loans and loans held for sale at September 30, 2006 compared to $\$ 1.5$ billion at December 31, 2005. Included in the loan balance at September 30, 2006 were $\$ 908$ million of collateralized loans as part of secured financings.

The following table sets forth certain information regarding net revenue for the periods indicated:

| Net interest income | $\$ 25,215$ | $\$ 23,400$ | $\$$ | 71,807 | $\$$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Provision for loan losses | $(5,854)$ | $(3,113)$ |  | $(16,111)$ |  |
| Gain (loss) on sales of loans | 92 | 3,025 |  | $(9,665)$ |  |
| Loan servicing fees | 5,830 | 10,689 |  | $(2,445)$ | 15,863 |
| Amortization of servicing assets | $(5,040)$ | $(8,682)$ |  | $(17,034)$ | 29,732 |
| Recovery of servicing assets |  | 541 | 984 | $(22,272)$ |  |
| Derivative (losses) gains | $(2,788)$ | 268 | 3,053 | 905 |  |
| Other | 1,086 | 1,275 |  | 1,567 | 605 |
|  |  |  |  | 5,356 |  |
| Total net revenue | $\$ 18,541$ | $\$ 28,112$ | $\$$ | 65,845 | $\$$ |
|  |  |  |  |  | 85,549 |

Net interest income increased to $\$ 25$ million for the three months ended September 30, 2006, compared to $\$ 23$ million for the same period in 2005. Year-to-date net interest income for 2006 was $\$ 72$ million, compared to $\$ 65$ million for 2005. The increase in net interest income is primarily due to growth in our average loans and loans held for sale portfolios in 2006.

During the quarter, provision for loan losses increased to $\$ 5.9$ million in 2006, compared to $\$ 3.1$ million during the same period in 2005. Year-to-date provision for loan losses was $\$ 16.1$ million in 2006 compared to $\$ 9.7$ million in 2005. This increase relates primarily to the acquisition of seasoned loans during 2006 in conjunction with clean-up calls of previous asset-backed securitizations.

## Table of Contents

We completed whole loan sales during the third quarter of 2006 of $\$ 76$ million resulting in a gain on sale of loans of $\$ 0.1$ million, compared to $\$ 3.7$ million in gain on the sale of $\$ 151$ million of loans during the same period in 2005. The gain on sales of loans relative to the principal balance of loans sold decreased during 2006 compared to 2005 due to a greater proportion of lower margin first mortgage loans. Whole loan sales are cash sales for which we receive a premium, generally record a servicing asset, recognize any points and fees, and recognize any previously capitalized expenses relating to the sold loans at the time of sale. For certain sales, we have the right to an incentive servicing fee (ISF) that will provide cash payments to us once a pre-established return for the certificate holders and certain structure-specific loan credit and servicing performance metrics are met. At September 30, 2006, we were receiving incentive fees for three transactions that had met these performance metrics. During the third quarter of 2006, we collected $\$ 0.7$ million in cash from these ISFs, compared to $\$ 0.9$ million during the year-earlier period. Year to date, we received cash flows of $\$ 6.3$ million compared to $\$ 1.9$ million a year ago.

Loan servicing fees totaled $\$ 6$ million during the third quarter of 2006, compared to $\$ 11$ million from the same period in 2005. Year to date, loan servicing fees totaled $\$ 24$ million, compared to $\$ 30$ million during the same period in 2005. The servicing portfolio underlying the mortgage servicing asset on loans serviced for others declined from $\$ 1.7$ billion at September 30, 2005 to $\$ 1.4$ billion at September 30, 2006.

Amortization and impairment of servicing assets includes amortization expense and valuation adjustments relating to the carrying value of servicing assets. Our home equity lending business determines fair value of its servicing asset using discounted cash flows and assumptions as to estimated future servicing income and cost that we believe market participants would use to value similar assets. In addition, we periodically assess these modeled assumptions for reasonableness through independent third-party valuations. Servicing asset amortization net of impairment recovery totaled $\$ 16$ million year to date 2006, compared to $\$ 21$ million for the nine months ended September 30, 2005. Decreased amortization reflects runoff in our whole loan sale servicing portfolio.

We originate fixed rate loans that change in value as interest rates move. To limit the net effect of such price movements, we enter into derivative contracts. These contracts resulted in a $\$ 2.8$ million loss and $\$ 3.1$ million gain for the three and nine months ending September 30, 2006, respectively, compared to gains of $\$ 0.3$ million and $\$ 0.6$ million for the same periods in 2005. The third quarter derivative loss relates to a decrease in interest rates. Operating Expenses

The following table shows operating expenses for our home equity lending line of business for the periods indicated:

|  | Three Months Ended September 30, |  | Nine Months Ended September30, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2006 | 2005 |  | 2006 |  | 005 |
|  | (Dollars in thousands) |  |  |  |  |  |
| Salaries and employee benefits | \$ 11,247 | \$ 15,701 | \$ | 39,975 | \$ | 50,193 |
| Other | 7,763 | 8,671 |  | 25,227 |  | 29,074 |
| Total operating expenses | \$ 19,010 | \$ 24,372 | \$ | 65,202 | \$ | 79,267 |
| Number of employees at period end ${ }^{(1)}$ |  |  |  | 485 |  | 616 |

## (1) On a full time

equivalent basis.
Operating expenses were $\$ 19$ million and $\$ 65$ million for the three and nine months ended September 30, 2006, compared to $\$ 24$ million and $\$ 79$ million for the same periods in 2005. Included in the 2006 year-to-date operating expense numbers is a charge of $\$ 3.9$ million related to our restructuring of the retail channel as previously discussed. Home Equity Servicing

Our home equity lending business continues to service a majority of the loans it has securitized and sold. We earn a servicing fee of approximately 50 to 100 basis points of the outstanding principal balance of the loans securitized. The
total servicing portfolio was $\$ 3.0$ billion at September 30, 2006, $\$ 0.1$ billion less than December 31, 2005. For whole loans sold with servicing retained totaling $\$ 0.8$ billion at September 30, 2006 and $\$ 1.1$ billion at December 31, 2005, we capitalize servicing fees including rights to future early repayment fees. The servicing asset at September 30, 2006 was $\$ 28$ million, down from $\$ 31$ million at December 31, 2005 reflecting amortization in excess of new mortgage servicing right additions.

## Table of Contents

Our managed portfolio, representing that portion of the servicing portfolio on which we have retained credit risk, is separated into two categories: $\$ 1.4$ billion of loans originated and held on balance sheet either as loans held for investment or loans held for sale, and $\$ 0.2$ billion of loans and lines of credit securitized for which we retained a residual interest. In both cases, we retain credit and interest rate risk.

Where applicable, we have the opportunity to earn additional future servicing incentive fees. Included below in the category Credit Risk Sold, Potential Incentive Servicing Fee Retained Portfolio are $\$ 0.7$ billion of loans at September 30, 2006 and $\$ 1.0$ billion of loans at December 31, 2005 for which we have the opportunity to earn an incentive servicing fee. While the credit performance of these loans we have sold effects the valuation of the incentive servicing fee, we do not have direct credit risk in these pools.

The following table sets forth certain information for each of these portfolios.

## Table of Contents

## Mortgage Banking

We are exiting this segment and, therefore, have presented this segment as discontinued operations for all periods presented. The amounts for this segment in the table below do not exactly correspond with the amounts in the discontinued operations presentation in our consolidated statement of income as certain items within the mortgage segment have not been and will not be eliminated from our continuing operations as contemplated in SFAS 144. These items include management fees and other allocations charged by the parent to the segment; the reinsurance subsidiary included in the segment; certain residual interests associated with loan sales to the Federal Home Loan Bank of Indianapolis; and earnouts associated with the 2005 divestiture of this segment s retail division. In addition, the assets held for sale category on the consolidated balance sheet does not agree with the mortgage bank s total assets under segment reporting as certain assets have not been included in the sales that have been completed and are unlikely to be included in any future sales including, but not limited to, Federal Home Loan Bank of Indianapolis (FHLBI) stock, FHLBI lender risk account, accounts receivable and cash.

Total assets
Mortgage loans held for sale
Mortgage servicing assets
Accounts receivable

## Shareholder s equity

Three Months Ended
September 30, 20062005 (Dollars in thousands)

On September 26, 2006, we completed the sale of the mortgage banking line of business origination operation including the majority of this segment s loans held for sale. Approximately $\$ 275$ million of loans held for sale and certain other assets and liabilities were sold resulting in a loss of $\$ 6.4$ million including disposition costs. We recognized $\$ 5.5$ million of these costs during the second quarter of 2006, while the remaining $\$ 0.9$ million was recognized during the third quarter. These losses are reflected in Loss from discontinued operations in the Consolidated Statement of Income. Loans and loans held for sale totaling $\$ 50$ million remain on our consolidated balance sheet and are classified as assets held for sale at September 30, 2006. These assets are carried at their fair value less costs to sell.

On September 29, 2006, we sold the majority of this segment s capitalized mortgage servicing rights. Mortgage servicing rights with an underlying unpaid principal balance of $\$ 17$ billion were sold to four unrelated parties resulting in a loss of $\$ 16.1$ million which is reflected in Loss from discontinued operations in the Consolidated Statement of Income. The loss was partially offset by associated hedge gains of $\$ 11$ million. Mortgage servicing rights totaling

## Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

$\$ 21$ million remain on our consolidated balance sheet and are classified as assets held for sale at September 30, 2006. These assets are carried at their lower of cost or fair value. As a result of this sale, we recorded $\$ 172$ million of receivables from these buyers.

In addition to the losses discussed above, we also incurred losses in connection with contract termination costs and severance benefits. These losses were recorded in accordance with SFAS 146, Accounting for Costs Associated with Exit or Disposal Activities. We recognized $\$ 0.5$ million of these costs during the second quarter of 2006, while the remaining $\$ 7.4$ million was recognized during the third quarter. These losses are reflected in Loss from discontinued operations in the Consolidated Statement of Income.

## Table of Contents

## Parent and Other

Results at the parent company and other businesses totaled a net loss of $\$ 2.8$ million and $\$ 7.3$ million for the three and nine months ended September 30, 2006, compared to net income of $\$ 0.2$ million and a loss of $\$ 1.0$ million during the same periods in 2005. The comparative results in the third quarter of 2005 were positively affected by a release of $\$ 1.8$ million in tax reserves at the parent company to align our tax liability to a level commensurate with our currently identified tax exposures. The losses at the parent company primarily relate to operating and interest expenses in excess of management fees charged to the lines of business and interest income earned on intercompany loans. Included in the 2006 year-to-date loss at the parent are a $\$ 1.1$ million write-off of unamortized debt issuance costs associated with IFC Capital Trust III which was called during the first quarter and a $\$ 1.2$ million call premium associated with the call of IFC Capital Trust IV in the third quarter. Also included in the 2006 results for third quarter and year to date are $\$ 0.2$ million and $\$ 1.0$ million of stock option expense, respectively. Parent company operating results also include allocations to our subsidiaries of interest expense related to our interest-bearing capital obligations. During the nine month period ended September 30, 2006, we allocated $\$ 10$ million of these expenses to our subsidiaries, compared to $\$ 13$ million during the same period in 2005.

Each subsidiary pays taxes to the parent at the statutory rate. Subsidiaries also pay fees to us to cover direct and indirect services. In addition, certain services are provided from one subsidiary to another. Intercompany income and expenses are calculated on an arm s-length, external market basis and are eliminated in consolidation.

## Risk Management

We are engaged in businesses that involve the assumption of financial risks including:
Credit risk
Liquidity risk
Interest rate risk
Operational risk
Each line of business that assumes financial risk uses a formal process to manage this risk. In all cases, the objectives are to ensure that risk is contained within prudent levels and within Policy guidelines and limits established by our Board of Directors. In addition, we attempt to take risks only when we are adequately compensated for the level of risk assumed.

Our Chairman, Executive Vice President, Senior Vice Presidents (including the Chief Financial Officer), and Chief Risk Officer meet on a regularly-scheduled basis (or more frequently as appropriate) as an Enterprise-wide Risk Management Committee (ERMC), reporting to the Board of Directors Audit and Risk Management Committee. Our Chief Risk Officer, who reports directly to the Audit and Risk Management Committee, chairs the ERMC.

Each of our principal risks is managed directly at the line of business level, with oversight and, when appropriate, standardization provided by the ERMC and its subcommittees. The ERMC and its subcommittees oversee all aspects of our financial, credit, and operational risks. The ERMC provides senior-level review and enhancement of line manager risk processes and oversight of our risk reporting, surveillance and model parameter changes. Given the on-going growth in the scope of the Corporation and heightened industry and regulatory focus around interest rate, credit, and operational (including compliance) risks, the Board, having reviewed and evaluated results of Internal Audit, Risk Management, and regulatory reports, has encouraged management to continue to improve our risk management systems by, among other things increasing staff and resources in its enterprise risk management department. The costs of these resources are reflected in current period earnings and we expect additional increases in these costs in 2007.

## Credit Risk

The assumption of credit risk is a key source of our earnings, however, the credit risk in our loan portfolios has the most potential for a significant effect on our consolidated financial performance. Each of our segments has a Chief Credit Officer with expertise specific to the product line and manages credit risk through various combinations of the use of lending policies, credit analysis and approval procedures, periodic loan reviews, servicing activities, and/or
personal contact with borrowers. Commercial loans over a certain size, depending on the loan type and structure, are reviewed by a loan committee prior to approval. We perform independent loan review across the Corporation through a function that reports directly to the Chief Risk Officer.

## Table of Contents

The allowance for loan and lease losses is an estimate based on our judgment applying the principles of SFAS 5, Accounting for Contingencies, SFAS 114, Accounting by Creditors for Impairment of a Loan, and SFAS 118, Accounting by Creditors for Impairment of a Loan Income Recognition and Disclosures. The allowance is maintained at a level we believe is adequate to absorb probable losses inherent in the loan and lease portfolio. We perform an assessment of the adequacy of the allowance at the segment level no less frequently than on a quarterly basis and through review by a subcommittee of the ERMC.

Within the allowance, there are specific and expected loss components. The specific loss component is based on a regular analysis of all loans over a fixed-dollar amount where the internal credit rating is at or below a predetermined classification. From this analysis we determine the loans that we believe to be impaired in accordance with SFAS 114. Management has defined impaired as nonaccrual loans. For loans determined to be impaired, we measure the level of impairment by comparing the loan s carrying value using one of the following fair value measurement techniques: present value of expected future cash flows, observable market price, or fair value of the associated collateral. An allowance is established when the estimate of fair value of the loan implies a value that is lower than carrying value. In addition to establishing allowance levels for specifically identified higher risk graded or high delinquency loans, management determines an allowance for all other loans in the portfolio for which historical or projected experience indicates that certain losses will occur. These loans are segregated by major product type, and in some instances, by aging, with an estimated loss ratio or migration pattern applied against each product type and aging category. For portfolios that are too new to have adequate historical experience on which to base a loss estimate, we use estimates derived from industry experience and management s judgment. The loss ratio or migration patterns are generally based upon historic loss experience or historic rate migration behaviors, respectively, for each loan type adjusted for certain environmental factors management believes to be relevant.

Net charge-offs for the three months ended September 30, 2006 were $\$ 5$ million, or $0.4 \%$ of average loans, compared to $\$ 3$ million, or $0.3 \%$ of average loans during the same period in 2005. Year-to-date net charge-offs were $\$ 14$ million, compared to $\$ 8$ million during the same period in 2005. At September 30, 2006, the allowance for loan and lease losses was $\$ 70.6$ million or $1.4 \%$ of outstanding loans and leases, up from $\$ 59.2$ million or $1.3 \%$ at December 31, 2005. The increase in charge-offs and allowance is primarily a result of portfolio growth and seasoning in our home equity business.

Total nonperforming loans and leases at September 30, 2006, were $\$ 33$ million, compared to $\$ 37$ million at December 31, 2005. Nonperforming loans and leases as a percent of total loans and leases at September 30, 2006 were $0.7 \%$, unchanged from December 31, 2005. We also include in our nonperforming assets category nonperforming loans held for sale at the mortgage banking and home equity lending lines of business that are not guaranteed, which increased to $\$ 5.9$ million at September 30, 2006 compared to $\$ 1.0$ million at December 31, 2005. Other real estate (OREO) we owned totaled $\$ 13$ million at September 30, 2006, down from $\$ 15$ million at December 31, 2005, reflecting decreases in our home equity segment. Total nonperforming assets, including OREO, at September 30, 2006 were $\$ 52$ million, or $0.9 \%$ of total assets compared to nonperforming assets at December 31, 2005, of $\$ 54$ million, or $0.8 \%$ of total assets.

## Table of Contents

The following table shows information about our nonperforming assets at the dates shown:

|  | September <br> 30, <br> 2006 <br> (Dollar | th | mber <br> 1, <br> 05 <br> nds) |

## Table of Contents

## Liquidity Risk

Liquidity is the availability of funds to meet the daily requirements of our business. For financial institutions, demand for funds results principally from extensions of credit, withdrawal of deposits, and maturity of other funding liabilities. Liquidity is provided through deposits and short-term and long-term borrowings, by asset maturities or sales, and through equity capital.

The objectives of liquidity management are to ensure that funds will be available to meet current and future demands and that funds are available at a reasonable cost. Since loan assets are less marketable than securities and, therefore, need less volatile liability funding, the ratio of total loans to total deposits is a traditional measure of liquidity for banks and bank holding companies. At September 30, 2006, the ratio of loans (which excludes loans held for sale) to total deposits was $135 \%$. We permanently fund a significant portion of our loans with secured financings. The ratio of loans to total deposits after reducing loans for those funded with secured financings was $104 \%$.

Since 2002, home equity loan securitizations have generally been retained on-balance sheet. As a result, both the securitized assets and the funding from these on balance sheet securitizations are now reflected on the balance sheet. From a liquidity perspective, the securitizations provide matched-term funding for the life of the loans making up the securitizations, unless we choose to utilize a clean-up call provision to terminate the securitization funding early. A clean-up call is optional at the master servicer s discretion. It can typically be made once outstanding loan balances in the securitization fall below $10 \%$ of the original loan balance in the securitization. Bond principal payments are dependent upon principal collections on the underlying loans. Prepayment speeds can affect the timing and amount of loan principal payments.

Deposits consist of three primary types: non-maturity transaction account deposits, certificates of deposit (CDs), and escrow account deposits. Core deposits include total deposits less jumbo CDs, brokered CDs, public funds and mortgage escrow deposits, although the escrow deposits exhibit core-like maturity characteristics. Core deposits totaled $\$ 2.3$ billion at September 30, 2006, down from $\$ 2.5$ billion at December 31, 2005.

Non-maturity transaction account deposits are generated by our commercial banking line of business and include deposits placed into checking, savings, money market and other types of deposit accounts by our customers. These types of deposits have no contractual maturity date and may be withdrawn at any time. While these balances fluctuate daily, a large percentage typically remains for much longer. At September 30, 2006, these deposit types totaled $\$ 1.6$ billion, a decrease of $\$ 0.5$ billion from December 31, 2005. We monitor overall deposit balances daily with particular attention given to larger accounts that have the potential for larger daily fluctuations and which are at greater risk to be withdrawn should there be an industry-wide or bank-specific event that might cause uninsured depositors to be concerned about the safety of their deposits. On a monthly basis, we model the expected impact on liquidity from moderate and severe liquidity stress scenarios as one of our tools to help ensure that our liquidity is sufficient.

CDs differ from non-contractual maturity accounts in that they do have contractual maturity dates. We issue CDs both directly to customers and through brokers. CDs issued directly to customers totaled $\$ 0.5$ billion at September 30, 2006, an increase of $\$ 0.1$ billion from December 31, 2005. Brokered CDs are typically considered to have higher liquidity (renewal) risk than CDs issued directly to customers, since brokered CDs are often done in large blocks and since a direct relationship does not exist with the depositor. In recognition of this, we manage the size and maturity structure of brokered CDs closely. For example, the maturities of brokered CDs are laddered to mitigate liquidity risk. CDs issued through brokers totaled $\$ 0.6$ billion at September 30, 2006, and had an average remaining life of 17 months, as compared to $\$ 0.6$ billion outstanding with a 13 month average remaining life at December 31, 2005.

Escrow account deposits are related to the servicing of our originated first mortgage loans. When a first mortgage borrower makes a monthly mortgage payment, consisting of interest and principal due on the loan and often a real estate tax and insurance portion, we hold the payment on a non-interest earning basis, except where otherwise required by law, until the payment is remitted to the current owner of the loan or the proper tax authority and insurance carrier. Escrow deposits may also include proceeds from the payoff of loans in our servicing portfolio prior to the transmission of those proceeds to investors. At September 30, 2006 these escrow balances totaled $\$ 0.4$ billion, unchanged from December 31, 2005. As mentioned earlier in this report, we sold the majority of our mortgage servicing rights in the third quarter; however, we will retain the related escrows until their transfer dates, which are
expected to be in the fourth quarter and early January 2007.
Short-term borrowings consist of borrowings from several sources. One of our largest borrowing sources is the Federal Home Loan Bank of Indianapolis (FHLBI). We utilize their collateralized borrowing programs to help fund qualifying first mortgage, home equity and commercial real estate loans. As of September 30, 2006, FHLBI borrowings outstanding totaled $\$ 0.3$ billion, a decrease of

## Table of Contents

$\$ 0.3$ billion from December 31, 2005. We had sufficient collateral pledged to FHLBI at September 30, 2006 to borrow an additional $\$ 0.4$ billion, if needed.

In addition to borrowings from the FHLBI, we use other lines of credit as needed. At September 30, 2006, the amount of short-term borrowings outstanding on our major credit lines and the total amount of the borrowing lines were as follows:

Warehouse lines of credit to fund primarily home equity loans: none outstanding on a $\$ 300$ million borrowing facility, of which $\$ 150$ million is committed

Lines of credit with correspondent banks, including fed funds lines: none outstanding out of $\$ 225$ million available but not committed

Fed funds lines with non-correspondent banks in which none were outstanding
Warehouse lines of credit and conduits to fund Canadian sourced small ticket leases: $\$ 223$ million outstanding on $\$ 349$ million of borrowing facilities

## Interest Rate Risk

Because all of our assets are not perfectly match-funded with like-term liabilities, our earnings are affected by interest rate changes. Interest rate risk is measured by the sensitivity of both net interest income and fair market value of net interest sensitive assets to changes in interest rates.

Our corporate-level asset-liability management committee (ALMC) oversees the interest rate risk profile of all of our lines of business. It is supported by ALMCs at each of our lines of business and monitors the repricing structure of assets, liabilities and off-balance sheet items. It uses a financial simulation model to measure the potential change in market value of all interest-sensitive assets and liabilities and also the potential change in earnings resulting from changes in interest rates. We incorporate many factors into the financial model, including prepayment speeds, prepayment fee income, deposit rate forecasts for non-maturity transaction accounts, caps and floors that exist on some variable rate instruments, embedded optionality and a comprehensive mark-to-market valuation process. We reevaluate risk measures and assumptions regularly, enhance modeling tools as needed, and, on an approximately annual schedule, have the model validated by internal audit or an out-sourced provider under internal audit s direction.

Our lines of business assume interest rate risk in the form of repricing structure mismatches between their loans and leases and funding sources. We manage this risk by adjusting the duration of their interest sensitive liabilities and through the use of hedging via financial derivatives.

Our mortgage, commercial banking and home equity lines of business all assume interest rate risk by holding mortgage servicing rights (MSRs). These assets are recorded at the lower of cost or fair market value. Among other items, a key determinant to the value of MSRs is the prevailing level of interest rates. The primary exposure to interest rates is the risk that rates will decline, possibly increasing prepayment speeds on loans and decreasing the value of MSRs. Some offsets to these exposures exist in the form of strong production operations, selective sales of servicing rights and the use of financial instruments to manage the economic performance of the assets. We have not early-adopted SFAS 156, Accounting for Servicing of Financial Assets. Since there are accounting timing differences between the recognition of gains or losses on financial derivatives and the realization of economic gains or losses on certain offsetting exposures (e.g., strong production operations), our decision on the degree to which we manage risk with derivative instruments to insulate against short-term price volatility depends on a variety of factors. The following factors apply principally to our mortgage banking MSRs, which we were hedging in the third quarter up to the point we accepted bids to sell them at known prices. Going forward, we do not expect the hedging of remaining MSRs to be a material item. These factors include:
the type of risk we are trying to mitigate;
offsetting factors elsewhere in the Corporation;
the level of current capital above our target minimums;
time remaining in the quarter (i.e., days until quarter end);

## Table of Contents

current level of derivative gain or loss relative to accounting and economic basis;
basis risk: the degree to which the interest rates underlying our derivative instruments might not move parallel to the interest rate driving our asset valuation;
convexity: the degree to which asset values, or risk management derivative instrument values, do not change in a linear fashion as interest rates change;
volatility: the level of volatility in market interest rates and the related impact on our asset values and derivatives instrument values; and
planned sales of mortgage servicing rights.
When considering hedging strategies for first mortgage MSRs, we attempt to optimize the following mix of competing goals:

1. provide adequate hedge coverage for falling rates;
2. minimize premium costs to establish hedge positions;
3. provide a moderate amount of net impairment recapture if interest rates rise;
4. when near or above the MSR LOCOM cap, maintain an acceptable range over which interest rates may rise without causing hedge losses to significantly exceed accounting gains.
Pursuit of the last goal may result in the economic value of MSR increasing without offsetting hedge losses. However, in order to capture this economic value in earnings, MSR sales must occur.

The following tables reflect our estimate of the present value of interest sensitive assets, liabilities, and off-balance sheet items at September 30, 2006 for continuing operations. In addition to showing the estimated fair market value at current rates, they also provide estimates of the fair market values of interest sensitive items based upon a hypothetical instantaneous move both up and down 100 and 200 basis points in the entire yield curve.

The first table is an economic analysis showing the present value impact of changes in interest rates, assuming a comprehensive mark-to-market environment. The second table is an accounting analysis showing the same net present value impact, adjusted for expected GAAP treatment. Neither analysis takes into account the book values of the noninterest sensitive assets and liabilities (such as cash, accounts receivable, and fixed assets), the values of which are not directly determined by interest rates.

The analyses are based on discounted cash flows over the remaining estimated lives of the financial instruments. The interest rate sensitivities apply only to transactions booked as of September 30, 2006, although certain accounts are normalized whereby the three- or nine-month average balance is included rather than the quarter-end balance in order to avoid having the analysis skewed by a significant increase or decrease to an account balance at quarter end.

The tables that follow should be used with caution.
The net asset value sensitivities do not necessarily represent the changes in the lines of business net asset value that would actually occur under the given interest rate scenarios, as sensitivities do not reflect changes in value of the companies as a going concern, nor consider potential rebalancing or other management actions that might be taken in the future under asset/liability management as interest rates change.

The information in the tables below both as of September 30, 2006 and June 30, 2006 exclude the interest rate sensitivity of our first mortgage subsidiary due to our recent sale of substantially all its interest-sensitive assets and its status as a discontinued operation. Note that these tables only include the market values and sensitivities of interest-sensitive assets and liabilities.

## Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

The tables below show modeled changes in interest rates for individual asset classes. Asset classes in our portfolio have interest rate sensitivity tied to different underlying indices or instruments. While the rate sensitivity of individual asset classes presented below is our best estimate of changes in value due to interest rate changes, the total potential change figures are subject to basis risk between value changes of individual assets and liabilities which have not been included in the model.

## Table of Contents

Few of the asset classes shown react to interest rate changes in a linear fashion. That is, the point estimates we have made at Current and $+/ 2 \%$ and $+/ 1 \%$ are appropriate estimates at those amounts of rate change, but it m not be accurate to interpolate linearly between those points. This is most evident in products that contain optionality in payment timing or pricing such as mortgage servicing or nonmaturity transaction deposits.

Finally, the tables show theoretical outcomes for dramatic changes in interest rates which do not consider potential rebalancing or repositioning of hedges.

## Economic Value Change Method

| Present Value at September 30, 2006 <br> Change in Interest Rates of: |  |  |  |  |  |
| :--- | :--- | :---: | :--- | :---: | :---: |

## Table of Contents

enterprise-wide oversight of compliance, reports to the Chief Risk Officer (CRO), who in turn reports to the Audit and Risk Management Committee of our Board of Directors. We have developed risk and control summaries for our key business processes. Line of business and corporate-level managers use these summaries to assist in identifying operational and other risks for the purpose of monitoring and strengthening internal and disclosure controls. Our Chief Executive Officer, Chief Financial Officer and Board of Directors, as well as the Boards of our subsidiaries, use the risk summaries to assist in overseeing and assessing the adequacy of our internal and disclosure controls, including the adequacy of our controls over financial reporting as required by section 404 of the Sarbanes Oxley Act and Federal Deposit Insurance Corporation Improvement Act. Given the on-going growth of the scope of the Corporation and heightened industry and regulatory focus around operational and compliance risks, the Board has encouraged management to continue to improve our risk management systems by, among other things, increasing staff and resources in its enterprise-wide risk management department. The costs of these resources are reflected in current period earnings and we expect additional increases in these costs in 2007.

# Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q 

## Table of Contents

## Regulatory Environment

The banking business is highly regulated. Failure to comply with these regulations could result in substantial monetary or other damages that could be material to our financial position. Statutes and regulations may change in the future. We cannot predict what effect these changes, if made, will have on our operations. It should be noted that the supervision, regulation and examination of banks and thrifts by regulatory agencies are intended primarily for the protection of depositors and other customers rather than shareholders of these institutions.

We are registered as a bank holding company with the Board of Governors of the Federal Reserve System under the Bank Holding Company Act of 1956, as amended, and the related regulations. We are subject to regulation, supervision and examination by the Federal Reserve, and as part of this process we must file reports and additional information with the Federal Reserve. Our federal savings bank subsidiary is subject to regulation, supervision and examination by the Office of Thrift Supervision. The regulation, supervision and examinations occur at the local, state and federal levels and involve, but are not limited to, minimum capital requirements, consumer protection, community reinvestment, and deposit insurance.

## Off-Balance Sheet Instruments

In the normal course of our business as a provider of financial services, we are party to certain financial instruments with off-balance sheet risk to meet the financial needs of our customers. These financial instruments include loan commitments and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized on the consolidated balance sheet. We follow the same credit policies in making commitments and contractual obligations as we do for our on-balance sheet instruments.

Our exposure to credit loss, in the form of nonperformance by the counterparty on commitments to extend credit and standby letters of credit, is represented by the contractual amount of those instruments. Collateral pledged for standby letters of credit and commitments varies but may include accounts receivable; inventory; property, plant, and equipment; and residential real estate. Total outstanding commitments to extend credit at September 30, 2006 and December 31, 2005, respectively, were $\$ 1.0$ billion and $\$ 1.1$ billion. We had $\$ 25$ million and $\$ 20$ million in irrevocable standby letters of credit outstanding at September 30, 2006 and December 31, 2005, respectively.

## Derivative Financial Instruments

Financial derivatives are used as part of the overall asset/liability risk management process. We use certain derivative instruments that do not qualify for hedge accounting treatment under SFAS 133. These derivatives are classified as other assets and other liabilities and marked to market on the income statement. While we do not seek Generally Accepted Accounting Principles (GAAP) hedge accounting treatment for the assets and liabilities that these instruments are hedging, the economic purpose of these instruments is to manage the risk inherent in existing exposures to either interest rate risk or foreign currency risk.

We have interest rate swaps that have a notional amount (which does not represent the amount of risk) of $\$ 103$ million to hedge fixed rate certificate of deposits. We recognized a loss in derivative gains (losses) of $\$ 0.6$ million and $\$ 0.1$ million for the nine months ended September 30, 2006 and 2005, respectively, related to these swaps. Under the terms of these swap agreements, we receive a fixed rate of interest and pay a floating rate of interest based upon one, three, or nine-month LIBOR.

We own foreign currency forward contracts to protect the U.S. dollar value of intercompany loans made to Irwin Commercial Finance Canada Corporation that are denominated in Canadian dollars. We had a notional amount of $\$ 63$ million in forward contracts outstanding as of September 30, 2006. For the nine months ending September 30, 2006 and 2005, we recognized losses of $\$ 1.1$ million and $\$ 1.5$ million, respectively. These contracts are marked-to-market with gains and losses included in derivative gains (losses) on the consolidated income statements. We recognized a foreign currency transaction gain on the intercompany loans of $\$ 1.8$ million and $\$ 1.7$ million, respectively, for the nine months ended September 30, 2006 and 2005.

In our home equity business, we enter into Eurodollar futures contracts to protect the value of the loans against increasing interest rates from the time of origination until the time a loan is sold or delivered into a securitization funding source. At September 30, 2006, a notional amount of $\$ 1.6$ billion of Eurodollar futures was outstanding. We also have a $\$ 191$ million amortizing interest rate cap to protect the interest rate exposure created by the 2006-1 and 2006-2 securitizations in which floating rate notes are funding fixed rate home equity loans. These contracts are
marked-to-market with gains and losses included in derivative gains (losses) on the

## Table of Contents

consolidated income statements. The gain on these activities for the nine months ending September 30, 2006 and 2005, respectively, totaled $\$ 3.0$ million and $\$ 0.6$ million.

Also in our home equity business, we have a $\$ 33$ million amortizing interest rate swap in which we pay a fixed rate of interest and receive a floating rate. The purpose of the swap is to manage interest rate risk exposure created by the 2005-1 securitization in which floating rate notes are funding fixed rate home equity loans. The notional value of the swap amortizes at a pace that is consistent with the expected paydown speed of the floating rate notes (including prepayment speed estimates), although the actual note paydowns will vary depending upon actual prepayment speeds. This swap is accounted for as a cashflow hedge in accordance with FAS 133, with the changes in the fair value of the effective portion of the hedge reported as a component of equity and $\$ 0.5$ million was amortized through interest expense during the matching periods.

We enter into commitments to originate home equity loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on loans intended to be sold are considered to be derivatives. We record changes in the fair value of these commitments based upon the current secondary market value of securities with similar characteristics. For the nine months ended September 30, 2006, $\$ 0.1$ million was recorded in
Gain from sale of loans. At September 30, 2006, we had a notional amount of rate lock commitments outstanding totaling $\$ 69$ million. Notional amounts do not represent the amount of risk.

We deliver Canadian dollar fixed rate leases into a commercial paper conduit. To lessen the repricing mismatch between fixed rate CAD-denominated leases and floating rate CAD commercial paper, a series of amortizing CAD interest rate swaps have been executed. As of September 30, 2006, the commercial paper conduit was providing $\$ 184$ million of variable rate funding. In total, our interest rate swaps were effectively converting $\$ 180$ million of this funding to a fixed interest rate. The losses on these swaps for the nine months ended September 30, 2006 and 2005 were $\$ 0.2$ million and $\$ 0.1$ million, respectively.

## Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The quantitative and qualitative disclosures about market risk are reported in the Interest Rate Risk section of Item 2, Management s Discussion and Analysis of Financial Condition and Results of Operations found on pages 54 through 57.

## Item 4. Controls and Procedures.

Disclosure Controls and Procedures As of the end of the period covered by this report, the Corporation carried out an evaluation as required by Rule 13a-15(b) or 15d-15(b) of the Securities Exchange Act of 1934 ( Exchange Act ), under the supervision and with the participation of management, including the Chief Executive Officer ( CEO ) and the Chief Financial Officer ( CFO ), of the effectiveness of the Corporation s disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e) or 15d-15(e). Based on this evaluation, the CEO and the CFO have concluded that the Corporation s disclosure controls and procedures were effective as of September 30, 2006.

Internal Control Over Financial Reporting In connection with the evaluation performed by management with the participation of the CEO and the CFO as required by Exchange Act Rule 13a-15(d) or 15d-15(d), there were no changes in the Corporation s internal control over financial reporting as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) that occurred during the quarter ended September 30, 2006 that have materially affected, or are reasonably likely to materially affect, the Corporation s internal control over financial reporting.

## PART II. Other Information.

## Item 1. Legal Proceedings.

Since the time we filed our Report on Form 10-Q for the quarter ended June 30, 2006, we experienced developments as noted in the litigation described below. For a full description of the litigation, see Note 14, Commitments and Contingencies, in the Notes to Consolidated Financial Statements, Part I, Item 1, of this Report.

Silke v. Irwin Mortgage Corporation (suit filed in April 2003 in the Marion County, Indiana, Superior Court seeking class action status and alleging our indirect subsidiary, Irwin Mortgage Corporation, charged a document preparation fee in violation of Indiana law).

Developments: On September 7, 2006, the court ordered one-time publication of class notice in Indiana newspapers.

## Table of Contents

Cohens v. Inland Mortgage Corporation (suit filed in October 2003 in the Supreme Court of New York, County of Kings, against our indirect subsidiary, Irwin Mortgage Corporation (formerly Inland Mortgage Corporation) and others, alleging lead contamination from premises allegedly owned by defendants).

Developments: On October 13, 2006, Irwin Mortgage filed a motion for summary judgment.
White v. Irwin Union Bank and Trust Company and Irwin Home Equity Corporation (suit filed on January 5, 2006 seeking class action status against our direct subsidiary, Irwin Union Bank and Trust Company, and our indirect subsidiary, Irwin Home Equity Corporation, in the Circuit Court for Baltimore City, Maryland, alleging violations of the Maryland Mortgage Lending Laws and the Maryland Consumer Protection Act).

Developments: On October 13, 2006, the parties tentatively agreed to settle this matter for a nonmaterial amount.

We and our subsidiaries are from time to time engaged in various matters of litigation, including the matters described above, other assertions of improper or fraudulent loan practices or lending violations, and other matters, and we have a number of unresolved claims pending. In addition, as part of the ordinary course of business, we and our subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral, and foreclosure interests, that is incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, we believe that damages, if any, and other amounts relating to pending matters are not likely to be material to our consolidated financial position or results of operations, except as described above. Reserves are established for these various matters of litigation, when appropriate under SFAS 5, based in part upon the advice of legal counsel.
