**Special Note Regarding Forward Looking Statements**

Certain statements contained in this Form 10-Q, as well as other information provided from time to time by the Company or its employees, may contain forward looking statements that involve risks and uncertainties that could cause actual results to differ materially from those in the forward looking statements. The words anticipate, believe, estimate, expect, think, should and objective or similar expressions are intended to identify forward looking statements. All such forward looking statements are based on the Company's then current views and assumptions and involve risks and uncertainties that include, among other things:

the continued shift in the Company's business from lower cost, local read meters toward more expensive, value-added automatic meter reading (AMR) systems;

the success or failure of newer Company products, including the Orion® radio frequency AMR system, the absolute digital encoder (ADE ) and the Galaxy® fixed network AMR system;

changes in competitive pricing and bids in both the domestic and foreign marketplaces, and particularly in continued intense price competition on government bid contracts for lower cost, local read meters;

the actions (or lack thereof) of the Company's competitors;

changes in the Company's relationships with its alliance partners, primarily its alliance partners that provide AMR connectivity solutions, and particularly those that sell products that do or may compete with the Company's products;

changes in the general health of the United States and foreign economies, including, to some extent, housing starts in the United States and overall industrial activity;

increases in the cost and/or availability of needed raw materials and parts, including recent increases in the cost of brass castings as a result of increases in commodity prices, particularly for copper, at the supplier level and resin as a result of increases in petroleum and natural gas prices;

the ability of the Company to maximize the value of the remaining assets in its discontinued French operations;

the Company's expanded role as a prime contractor for providing complete AMR systems to governmental authorities, which brings with it added risks, including but not limited to, Company responsibility for subcontractor performance; additional costs and expenses if the Company and its subcontractors fail to meet the agreed-upon timetable with the governmental authority; and the Company's expanded warranty and performance obligations;

changes in foreign economic conditions, particularly currency fluctuations between the United States dollar and the euro;

the loss of certain single-source suppliers; and

changes in laws and regulations, particularly laws dealing with the use of lead (which can be used in the manufacture of certain meters incorporating brass housings) and Federal Communications Commission rules affecting the use and/or licensing of radio frequencies necessary for AMR products.

All of these factors are beyond the Company's control to varying degrees. Shareholders, potential investors and other readers are urged to consider these factors carefully in evaluating the forward looking statements and are cautioned not to place undue reliance on such forward looking statements. The forward looking statements made in this document are made only as of the date of this document and the Company assumes no obligation, and disclaims

any obligation, to update any such forward looking statements to reflect subsequent events or circumstances.

*See accompanying notes to consolidated condensed financial statements.*

**Table of Contents****BADGER METER, INC.****Notes to Unaudited Consolidated Condensed Financial Statements****Note 1 Basis of Presentation**

In the opinion of management, the accompanying unaudited consolidated condensed financial statements of Badger Meter, Inc. (the Company) contain all adjustments (consisting only of normal recurring accruals except as otherwise discussed) necessary to present fairly the Company's consolidated condensed financial position at June 30, 2007, results of operations for the three- and six-month periods ended June 30, 2007 and 2006, and cash flows for the six-month periods ended June 30, 2007 and 2006. The results of operations for any interim period are not necessarily indicative of the results to be expected for the full year.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Certain reclassifications have been made to the 2006 consolidated condensed financial statements to conform to the 2007 presentation due to the presentation of the Company's French operations as discontinued operations.

**Note 2 Additional Balance Sheet Information**

The consolidated condensed balance sheet at December 31, 2006 was derived from amounts included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006. Refer to the footnotes to the financial statements included in that report for a description of the Company's accounting policies and for additional details of the Company's financial condition. The details in those notes have not changed except as discussed below and as a result of normal adjustments in the interim.

**Warranty and After-Sale Costs**

The Company estimates and records provisions for warranties and other after-sale costs in the period the sale is reported. After-sale costs represent a variety of activities outside of the written warranty policy, such as investigation of unanticipated problems after the customer has installed the product, or analysis of water quality issues. Provision for warranty and after-sale costs are based upon historical experience of product failures together with any specific provision for known product problems. Changes in the Company's warranty and after-sale costs reserve for the six-month periods ended June 30, 2007 and 2006 are as follows:

(In thousands)	Balance at beginning of year	Net additions charged to earnings	Costs incurred	Balance at June 30
2007	\$2,954	\$ 173	\$(492)	\$2,635
2006	\$3,047	\$ 488	\$(689)	\$2,846

**Note 3 Employee Benefit Plans**

The Company maintains a non-contributory defined benefit pension plan for its domestic employees and a non-contributory postretirement plan that provides medical benefits for certain domestic retirees and eligible dependents. The following table sets forth the components of net periodic benefit cost for the three months ended June 30, 2007 and 2006 based on a September 30 measurement date:

**Table of Contents**

(In thousands)	Pension benefits		Other postretirement benefits	
	2007	2006	2007	2006
Service cost	\$ 496	\$ 485	\$ 49	\$ 56
Interest cost	629	595	105	122
Expected return on plan assets	(883)	(918)		
Amortization of prior service cost	(37)	(28)		(9)
Amortization of net loss	282	318	28	59
Net periodic benefit cost	\$ 487	\$ 452	\$ 182	\$ 228

The following table sets forth the components of net periodic benefit cost for the six months ended June 30, 2007 and 2006 based on a September 30 measurement date:

(In thousands)	Pension benefits		Other postretirement benefits	
	2007	2006	2007	2006
Service cost	\$ 992	\$ 970	\$ 98	\$ 113
Interest cost	1,258	1,190	210	243
Expected return on plan assets	(1,766)	(1,836)		
Amortization of prior service cost	(74)	(56)		(18)
Amortization of net loss	564	636	55	119
Net periodic benefit cost	\$ 974	\$ 904	\$ 363	\$ 457

The Company previously disclosed in its financial statements for the year ended December 31, 2006 that it did not expect to contribute funds to its pension plan in 2007. While the Company believes that it will not be required to make any such contributions in 2007, such belief is based upon the estimated return on plan assets as of the annual September 30 measurement date.

The Company also disclosed in its financial statements for the year ended December 31, 2006 that it estimated it would pay \$777,000 in other postretirement benefits in 2007 based on actuarial estimates. As of June 30, 2007, \$160,000 of such benefits were paid. The Company continues to believe that its estimated payments for the full year are reasonable based on prior years' experiences, but it is difficult to predict because cash payments can vary significantly depending on the timing of postretirement medical claims and the collection of the retiree's portion of the costs. Note that the amount of benefits paid in calendar year 2007 will not impact the expense for postretirement benefits for the current year.

**Note 4 Guarantees**

The Company guarantees the debt of the Badger Meter Officers' Voting Trust ( BMOVT ). Prior to July 2002, the BMOVT obtained loans from a bank on behalf of the officers of the Company to allow the officers to purchase shares of the Company's Common Stock. The officers' loan amounts are secured by the Company's shares that were purchased with the loans' proceeds. There have been no loans made to officers by the BMOVT since July 2002. The Company has guaranteed \$0.3 million and \$0.5 million of the BMOVT's debt at June 30, 2007 and December 31, 2006, respectively. The current loan matures in April 2008, at which time it is expected to be renewed. The fair market value of this guarantee at June 30, 2007 continues to be insignificant because the secured value of the shares exceeds the

loan amount. It is the Company's intention to eliminate the BMOVLT by December 31, 2010, because it no longer fulfills its original purpose of providing officers with loans to purchase Common Stock. The Company has no other off-balance sheet arrangements.

The Company guarantees the outstanding debt of the Badger Meter Employee Savings and Stock Ownership Plan (ESSOP) that is recorded in the current portion of long-term debt, offset by a similar amount of unearned compensation that has been recorded as a reduction of shareholders' equity. The loan amount is collateralized by shares of the Company's Common Stock. A payment of \$62,000 was made in the first quarter of 2007 that reduced the debt and the corresponding employee benefit stock balance included in shareholders' equity.

**Table of Contents****Note 5 Comprehensive Income (Loss)**

Comprehensive income for the three-month periods ended June 30, 2007 and 2006 was \$5.7 million and \$4.6 million, respectively. Comprehensive income for the six-month periods ended June 30, 2007 and 2006 was \$8.4 million and \$9.0 million, respectively.

Components of accumulated other comprehensive loss are as follows:

(In thousands)	June 30, 2007	December 31, 2006
Cumulative foreign currency translation adjustment	\$ 1,648	\$ 1,658
Unrecognized pension and postretirement benefit plan liabilities	(13,320)	(13,699)
Accumulated other comprehensive loss	\$ (11,672)	\$ (12,041)

**Note 6 Discontinued French Operations**

At December 31, 2006, the Company discontinued its French operations due to past losses and the Company's evaluation that losses would continue in the future. Information about the Company's discontinued French operations is included in the Notes to Consolidated Financial Statements in the 2006 Annual Report on Form 10-K under the heading Note 3 Discontinued Operations. The Company has narrowed its estimate for the final cumulative charges for the liquidation of its French operations to an amount not to exceed \$6.2 million of after-tax charges. This revised estimate is on the lower end of the Company's previously disclosed range of \$6.0 million to \$8.0 million. At June 30, 2007, \$5.6 million of charges net of the income tax benefit were recognized, with the remaining expenses to be recognized in the second half of 2007 as the remaining assets are liquidated and liabilities are settled.

Revenues from the French operations for the three-month periods ended June 30, 2007 and 2006 were \$58,000 and \$3.6 million, respectively. Revenues from the French operations for the six-month periods ended June 30, 2007 and 2006 were \$1.9 million and \$6.6 million, respectively. Net losses from the French operations were \$0.3 million and \$1.0 million for the three-month periods ended June 30, 2007 and 2006, and net losses of \$0.1 million and \$2.0 million for the first half of 2007 and 2006, respectively.

The components of the assets and liabilities of discontinued operations included in the Consolidated Condensed Balance Sheets are as follows:

(In thousands)	June 30, 2007	December 31, 2006
Assets of discontinued operations:		
Cash	\$ 1,302	\$ 2,046
Receivables	728	1,201
Inventories		827
Prepaid expenses and other current assets	97	181
Net property, plant and equipment		2,375
Intangible assets, at cost less accumulated amortization		245
Total assets of discontinued operations	\$ 2,127	\$ 6,875
Liabilities of discontinued operations:		
Short-term debt	\$	\$ 3,275

Edgar Filing: BADGER METER INC - Form 10-Q

Payables	1,155	2,356
Accrued compensation and employee benefits	237	1,927
Warranty and after-sale costs		567
Income and other taxes	31	196
Total liabilities of discontinued operations	\$ 1,423	\$ 8,321

**Note 7 Income Taxes**

In June 2006, the FASB issued Financial Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48), which clarifies the accounting for uncertainty in income taxes recognized in a company's

## **Table of Contents**

financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute criteria for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, and various states and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years prior to 2002. The Company's policy is to recognize interest related to unrecognized tax benefits as interest expense and penalties as operating expenses. Accrued interest is \$0.1 million and there are no penalties accrued at June 30, 2007. The Company believes that it has appropriate support for the income tax positions taken and to be taken on its tax returns and that its accruals for tax liabilities are adequate for all open years based on an assessment of many factors including past experience and interpretations of tax law applied to the facts of each matter.

The Company adopted the provisions of FIN 48 on January 1, 2007. The adoption of FIN 48 did not impact the consolidated financial condition, results of operations or cash flows. At January 1, 2007, the Company had unrecognized tax benefits of \$6.5 million, which primarily related to uncertainty regarding the sustainability of certain deductions to be taken on the 2006 U.S. Federal income tax return related to the shutdown of the Company's French subsidiaries. To the extent these unrecognized tax benefits are ultimately recognized, they will impact the effective tax rate in a future period. The amount of unrecognized tax benefits increased \$0.1 million during the quarter ended June 30, 2007 related to tax positions taken in prior periods.

### **Note 8 Contingencies, Litigation and Commitments**

In the normal course of business, the Company is named in legal proceedings from time to time. There are currently no material legal proceedings pending with respect to the Company. The more significant legal proceedings are as follows.

The Company is subject to contingencies related to environmental laws and regulations. Currently, the Company is in the process of resolving matters relative to two landfill sites where it has been named as one of many potentially responsible parties. These sites are impacted by the Federal Comprehensive Environmental Response, Compensation and Liability Act and other environmental laws and regulations. At this time, the Company does not believe the ultimate resolution of these issues will have a material adverse effect on the Company's financial position or results of operations, either from a cash flow perspective or on the financial statements as a whole. This belief is based on the Company's assessment of its limited past involvement with these sites as well as the substantial involvement of other named third parties in these matters. However, due to the inherent uncertainties of such proceedings, the Company cannot predict the ultimate outcome of these matters. A future change in circumstances with respect to these specific matters or with respect to sites formerly or currently owned or operated by the Company, or with respect to off-site disposal locations used by the Company, could result in future costs to the Company and such amounts could be material.

Like other companies in recent years, the Company has been named as a defendant in numerous multi-party lawsuits alleging personal injury as a result of exposure to asbestos, manufactured by third parties, and integrated into a very limited number of the Company's industrial products. The Company is vigorously defending itself against these claims. Although it is not possible to predict the ultimate outcome of these matters, the Company does not believe the ultimate resolution of these issues will have a material adverse effect on the Company's financial position or results of operations, either from a cash flow perspective or on the financial statements as a whole. This belief is based in part on the number of cases that have been voluntarily dismissed and that have been initiated by claimants who have not demonstrated exposure to products manufactured or sold by the Company.

The Company has evaluated its worldwide operations to determine whether any risks and uncertainties exist that could severely impact its operations in the near term. The Company does not believe that there are any significant risks. However, the Company relies on single suppliers for certain castings and components in several of its product lines. Although alternate sources of supply exist for these items, loss of certain suppliers could temporarily disrupt operations in the short term. The Company attempts to mitigate these risks by working closely with key suppliers, purchasing minimal amounts from alternative suppliers and by purchasing business interruption insurance where

appropriate.

## **Table of Contents**

The Company reevaluates its exposures on a periodic basis and makes adjustments to reserves as appropriate.

In the second quarter of 2007, the Company entered into a \$9.1 million contract to construct a 120,000 square foot building in Nogales, Mexico to accommodate the transfer of production from a nearby leased facility and from other locations to meet future needs. At June 30, 2007, \$4.5 million was paid with the remaining amounts scheduled to be paid throughout the construction period pending milestones. Completion of the facility and transfer of production is expected to occur in the third quarter of 2008.

### **Note 9 Accounting Pronouncements**

In September 2006, the FASB issued Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, an amendment of FASB Statements No. 87, 88, 106 and 132(R) (SFAS 158). SFAS 158 requires employers that sponsor defined benefit pension and postretirement benefit plans to recognize previously unrecognized actuarial losses and prior service costs in the statement of financial position and to recognize future changes in these amounts in the year in which changes occur through comprehensive income. On December 31, 2006, the Company adopted the provisions of SFAS 158 by recognizing the funded status of its defined benefit pension and postretirement benefit plans in the statement of financial position based on the September 30, 2006 measurement date. Information about the Company's adoption of this statement is included in the Notes to Consolidated Financial Statements in the 2006 Annual Report on Form 10-K under the heading *Note 7 Employee Benefit Plans*. In addition, the Company will be required to measure the plan assets and benefit obligations as of the date of the year-end statement of financial position by December 31, 2008. The Company is currently evaluating the impact, if any, that the change in the measurement date will have on its consolidated financial position, results of operations and cash flows.

## **Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations**

### **Business Description and Overview**

The Company is a leading marketer and manufacturer of products using flow measurement and control technologies developed both internally and with other technology companies. Its products are used to measure and control the flow of liquids in a variety of applications. The Company's product lines fall into two general categories, utility and industrial. The utility category is comprised of two product lines, residential and commercial water meters (with various automatic meter reading (AMR) technology systems), which are generally sold to water utilities and constitute a majority of the Company's sales. Industrial product line sales comprise the remainder of the Company's sales and include automotive fluid meters, small precision valves, electromagnetic meters, impeller flow meters and industrial process meters (all with related accessories and instrumentation).

Residential and commercial water meters and related systems are classified as local (or manual) read meters or AMR products. Local read meters consist of a water meter and a register. With AMR meters, the register digitally encodes the mechanical reading and its radio frequency transmitter communicates the data to a computerized system that collects the data and sends it to specific utility computerized programs. Net sales and the corresponding net earnings depend on unit volume and mix of products, with the Company generally earning higher margins on residential AMR products (the impact of AMR on commercial products is not as significant given the higher sales prices of commercial meters). The Company sells AMR products of other companies as well as its own proprietary products, Orion® and the Galaxy® fixed network AMR system. Proprietary products generally have higher margins than the other AMR products. Net sales and the corresponding net earnings are therefore also dependent on the mix of AMR products between proprietary and non-proprietary products. Orion® is currently being sold as a walk-by/drive-by system, but also has the ability to connect with a variety of other technologies, such as power line carrier, broadband over power line, municipal WI-FI and radio frequency systems to allow for remote reading of the data. The Galaxy® fixed network AMR system was introduced in late 2005 and has had limited sales to date.

There is a base level of annual business for utility products driven by replacement units and, to a much lesser extent, housing starts. Sales above the base level depend on conversions to AMR away from manual read meters. The Company believes that conversion from local read meters to AMR products can accelerate replacements of meters and result in growth, because it is estimated that only 20-25% of the U.S. water meter market has been converted to AMR. Badger Meter's strategy is to solve customers' metering needs with its proprietary meter reading systems or other systems available through alliances within the marketplace.

**Table of Contents**

The industrial products generally serve niche markets and have in the past utilized technology derived from utility products to serve industrial uses. As these markets evolve, these products are becoming more specialized to meet industrial flow measurement and communication protocol requirements. Serving these markets allows the Company to expand its technologies into other areas of flow measurement and control, as well as utilize existing capacity and spread fixed costs over a larger sales base.

**Business Trends**

At December 31, 2006, the Company discontinued its French operations due to past losses and the Company's evaluation that losses would continue in the future. The disposition of the French operations was completed via sale transactions in the second quarter of 2007. The Company now believes that this decision will result in total after-tax charges up to \$6.2 million as assets are liquidated and liabilities are settled, of which \$5.4 million was recognized in 2006 and \$0.2 million was recognized to date in 2007. The Company expects the remaining assets and liabilities to be settled in the second half of 2007. All results associated with the Company's French operations have been removed from continuing operations and are presented as results of discontinued operations. See the Notes to Consolidated Financial Statements in the 2006 Annual Report on Form 10-K under the heading "Note 3 Discontinued Operations" for further discussion. The remainder of the discussion in this section relates to continuing operations.

As noted above, the Company sells AMR products of other companies as well as its own proprietary product, Orion®. The Company currently has a distribution agreement under which it resells products produced by Itron, Inc. Prior to the Company's introduction of its own proprietary Orion® products, Itron® water utility-related products were a significant contributor to the Company's results. The Company's Orion® products directly compete with Itron® water AMR products and, in recent years, many of the Company's customers have selected Orion® products. As a result, the Company's 2005 annual sales of Itron® products decreased approximately 12%, while Orion® sales doubled compared to 2004. In 2006, sales of Itron® products decreased nearly 16% while Orion® sales increased 39% compared to 2005. For the first six months of 2007, Orion® sales were nearly 2.5 times greater than those of Itron® sales. The Company expects similar trends to continue, although it also believes that Itron® products will remain a significant component of utility sales. Decreases in sales of Itron® products have generally been offset by increases in sales of Orion® products, which produce a higher gross margin than Itron® products. As a result, the Company does not expect this trend to have a material negative impact on the Company's financial position or results of operations.

**Results of Operations Three Months Ended June 30, 2007**

Net sales for the three months ended June 30, 2007 increased \$3.3 million, or 5.7%, over the same period in 2006. The overall increase in net sales was driven primarily by increased sales of Orion® AMR products due to higher volumes and increased prices.

Residential and commercial water meter sales represented 80.6% of total sales in the second quarter of 2007 compared to 80.3% in the second quarter of 2006. These sales increased \$2.8 million to \$50.1 million compared to \$47.3 million in the same period in 2006 due to increased sales of units utilizing AMR technologies, offset somewhat by lower sales of local read and commercial meters. Notably, sales of the Company's proprietary AMR product, Orion®, increased nearly 56% over the amount sold in the second quarter of 2006. The increase in Orion® sales was somewhat offset by sales decreases in other AMR technologies, including Itron® products, which saw a nearly 30% decline in sales over the same period last year.

Industrial sales are affected by economic conditions, domestically and internationally, in each of the markets served by the various product lines. In total, industrial products represented 19.4% of total sales for the three months ended June 30, 2007 compared to 19.7% for the same period in 2006. Industrial sales increased \$0.6 million to \$12.1 million in the second quarter of 2007 compared to \$11.5 million in the second quarter of 2006. The increase in sales was the net impact of higher sales of automotive fluid meters and impeller meters offset by declines in electromagnetic meters and valves.

Gross margins in total for the second quarter of 2007 were 36.2% compared to 35.0% in the second quarter of 2006. This increase in gross margin was due to the net increase in sales noted above, particularly the net increase in sales of Orion® AMR products, which carry higher margins. Price increases instituted in August 2006 to negate the effect of cost increases on purchased castings also contributed to the increase. The Company has announced additional price increases effective for the third quarter of 2007 to continue to recover increased costs of materials. Gross

margins were also affected by the net impact of higher

## **Table of Contents**

margins on automotive fluid meters and impeller meters offset by lower margins on electromagnetic meters and valves.

Selling, engineering and administration costs for the second quarter of 2007 were 21.1% as a percent of net sales compared to 20.2% for the same period in 2006. The increase in selling, engineering and administration costs as a percent of net sales is the result of higher legal fees associated with recent successfully completed litigation, higher employee incentives, increased reserves for uncollectible receivables and normal inflationary pressures, offset by continued cost containment efforts.

Interest expense was approximately the same in the second quarter of 2007 as in the same period in 2006. This is the net impact of lower debt levels, offset by increasing interest rates.

The effective tax rate for the second quarter of 2007 was 37.1% compared to 39.3% in the same period in the prior year. The lower effective tax rate is due in part to an increase in the deduction available to manufacturers for qualified production activities in 2007.

As a result of the above-mentioned items, earnings from continuing operations for the second quarter of 2007 were \$5.7 million compared to \$5.1 million in the second quarter of 2006. On a diluted basis, earnings per share from continuing operations were \$0.39 per share for the second quarter of 2007 compared to \$0.35 for the same period in 2006.

### **Results of Operations Six Months Ended June 30, 2007**

Net sales for the six months ended June 30, 2007 decreased \$2.0 million, or 1.7%, over the same period in 2006. The net decrease was driven by reduced sales of certain utility products in the first quarter of 2007, mitigated somewhat by increases in Orion® related products in the second quarter of 2007 and increases in certain industrial product sales.

Residential and commercial water meter net sales represented 78.8% of total sales for the first six months of 2007 compared to 80.9% for the same period in 2006. These sales decreased \$4.1 million to \$90.4 million from \$94.5 million in the same period in 2006. Sales of local read meters declined 8% while sales of meters with AMR technology declined approximately 2.3%. Sales of commercial meters declined nearly 6%. The sales decline is attributed to the timing of orders and longer selling cycles, particularly in the first quarter of the year. For the first six months of 2007, Itron® sales declined 30% while Orion® sales increased over 22% compared to the same period in 2006. The Orion® increase is a net effect of lower sales in the first quarter of the year and higher sales, as noted above, in the second quarter of 2007.

Industrial product net sales represented 21.2% of total sales for the first six months of 2007 compared with 19.1% for the same period in 2006. While the percentage increase is due in part to the decrease in utility products discussed above, these sales did increase 9.4% to \$24.4 million compared with \$22.3 million in the same period in 2006 due to a combination of both volume and price increases, particularly in automotive fluid meters and impeller meters.

Gross margins in total for the six months ended June 30, 2007 were 33.8% compared with 35.6% in the same period in 2006. Gross margins decreased between 2007 and 2006 due to the decline in sales and the effects of cost increases on purchased castings, as discussed above. This was offset somewhat by increased prices instituted in August 2006.

Selling, engineering and administration costs for the six months ended June 30, 2007 were 21.9% as a percent of net sales compared to 20.8% for the same period in 2006. The increase in selling, engineering and administration costs as a percent of net sales is the result of higher legal fees associated with recent successfully completed litigation, higher employee incentives, increased reserves for uncollectible receivables and normal inflationary pressures, offset by continued cost containment efforts.

Interest expense was approximately the same in the first half of 2007 as in the same period in 2006. This is the net impact of lower debt levels, offset by increasing interest rates.

The effective tax rate for the six months ended June 30, 2007 was 37.1% compared to 38.1% in the same period in the prior year. The lower effective tax rate is due in part to an increase in the deduction available to manufacturers for qualified production activities in 2007.

## **Table of Contents**

As a result of the above-mentioned items, earnings from continuing operations were \$8.2 million for the six months ended June 30, 2007 compared to \$10.3 million for the six months ended June 30, 2006. On a diluted basis, earnings per share from continuing operations were \$0.56 and \$0.72, respectively, for the same periods.

### **LIQUIDITY AND CAPITAL RESOURCES**

The main sources of liquidity for the Company are cash from operations and borrowing capacity. Cash provided by operations for the first six months of 2007 was \$10.6 million versus \$2.0 million for the same period in 2006. The increase was primarily the net effect of a receipt of refundable income taxes and changes in net working capital.

The increase in the receivables balance from \$29.3 million at December 31, 2006 to \$37.3 million at June 30, 2007 was due primarily to the timing of sales, and certain cash collections.

Inventories at June 30, 2007 increased to \$34.7 million from \$33.3 million at December 31, 2006 due primarily to the timing of orders as well as higher material costs.

Prepaid expenses and other current assets increased between December 31, 2006 and June 30, 2007 primarily due to the payment of certain calendar year insurance premiums that are expensed ratably over the policy period.

Net property, plant and equipment increased \$6.4 million since December 31, 2006. This is the result of \$9.9 million of capital expenditures, which included nearly \$5.0 million associated with the construction of a new plant in Mexico that is expected to be completed in 2008, offset by depreciation expense and disposals.

Short-term debt increased \$3.4 million at June 30, 2007 compared to \$15.1 million at December 31, 2006 due to working capital and capital expenditure needs. Long-term debt combined with the current portion of long-term debt decreased as a result of regularly scheduled payments. The Company's debt is unsecured and does not carry any financial covenants.

Payables increased to \$13.6 million at June 30, 2007 from \$10.6 million at December 31, 2006 primarily as a result of the increase in inventory and the timing of payments. Accrued compensation and employee benefits increased \$0.1 million since December 31, 2006 to \$6.3 million due to costs accrued for 2007 expenses to date, offset somewhat by payments of amounts accrued at December 31, 2006.

Income and other taxes increased to \$9.3 million at June 30, 2007 from \$0.6 million at December 31, 2006. At December 31, 2006, the Company recorded its net federal income tax position (refundable income tax net of the related reserves for uncertain tax positions) as a receivable. In the first quarter of 2007, the Company received payment of the refundable tax amounts and reclassified the reserve for uncertain tax positions to the income and other taxes liability in the Consolidated Condensed Balance Sheet.

Common Stock and capital in excess of par value both increased since December 31, 2006 due to new stock issued in connection with the exercise of stock options. Employee benefit stock decreased as a result of a payment made on the Employee Savings and Stock Ownership Plan loan during the first quarter of 2007.

Accumulated other comprehensive loss was \$11.6 million at June 30, 2007 compared to a \$12.0 million loss at December 31, 2006 primarily due to the amortization in the Statement of Operations of certain pension and postretirement amounts included in accumulated other comprehensive loss as required under SFAS 158.

Badger Meter's financial condition remains strong. The Company believes that its operating cash flows, available borrowing capacity, including \$36.7 million of unused credit lines, and its ability to raise capital provide adequate resources to fund ongoing operating requirements, future capital expenditures and development of new products. The Company continues to take advantage of its local commercial paper market and from time to time may convert short-term debt into long-term debt.

### **Other Matters**

There are currently no material legal proceedings pending with respect to the Company. The more significant legal proceedings are as follows.

## **Table of Contents**

The Company is subject to contingencies related to environmental laws and regulations. Currently, the Company is in the process of resolving matters relative to two landfill sites where it has been named as one of many potentially responsible parties. These sites are impacted by the Federal Comprehensive Environmental Response, Compensation and Liability Act and other environmental laws and regulations. At this time, the Company does not believe the ultimate resolution of these issues will have a material adverse effect on the Company's financial position or results of operations, either from a cash flow perspective or on the financial statements as a whole. This belief is based on the Company's assessment of its limited past involvement with these sites as well as the substantial involvement of other named third parties in these matters. However, due to the inherent uncertainties of such proceedings, the Company cannot predict the ultimate outcome of these matters. A future change in circumstances with respect to these specific matters or with respect to sites formerly or currently owned or operated by the Company, or with respect to off-site disposal locations used by the Company, could result in future costs to the Company and such amounts could be material.

Like other companies in recent years, the Company has been named as a defendant in numerous multi-party lawsuits alleging personal injury as a result of exposure to asbestos, manufactured by third parties, and integrated into a very limited number of the Company's industrial products. The Company is vigorously defending itself against these claims. Although it is not possible to predict the ultimate outcome of these matters, the Company does not believe the ultimate resolution of these issues will have a material adverse effect on the Company's financial position or results of operations, either from a cash flow perspective or on the financial statements as a whole. This belief is based in part on the number of cases that have been voluntarily dismissed and that have been initiated by claimants who have not demonstrated exposure to products manufactured or sold by the Company.

No other risks or uncertainties were identified that could have a material impact on operations and no long-lived assets have become permanently impaired in value.

### **Accounting Change**

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48), on January 1, 2007. See Note 7 to the Notes to Unaudited Consolidated Condensed Financial Statements in this Form 10-Q for information regarding this accounting change.

### **Off-Balance Sheet Arrangements and Contractual Obligations**

The Company's off-balance sheet arrangements and contractual obligations are discussed in Part II, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations under the headings Off-Balance Sheet Arrangements and Contractual Obligations in the Company's Annual Report on Form 10-K for the year ended December 31, 2006, and have not materially changed since that report was filed except as follows.

As of June 30, 2007, the Company's expected payment for significant contractual obligations now includes approximately \$6.6 million of liability for unrecognized tax benefits associated with the adoption of Financial Accounting Standards Board Interpretation No. 48 (FIN 48). The Company cannot make a reasonably reliable estimate of the period of cash settlement for the liability for unrecognized tax benefits.

In the second quarter of 2007, the Company entered into a \$9.1 million contract to construct a 120,000 square foot building in Nogales, Mexico to accommodate the transfer of production from a nearby leased facility and from other locations to meet future needs. At June 30, 2007, \$4.5 million was paid with the remaining amounts scheduled to be paid throughout the construction period pending milestones. Completion of the facility and transfer of production is expected to occur in the third quarter of 2008.

### **Item 3 Quantitative and Qualitative Disclosures about Market Risk**

The Company's quantitative and qualitative disclosures about market risk are included in Part II, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations under the heading Market Risks in the Company's Annual Report on Form 10-K for the year ended December 31, 2006, and have not materially changed since that report was filed.

### **Item 4 Controls and Procedures**

Evaluation of Disclosure Controls and Procedures

**Table of Contents**

In accordance with Rule 13a-15(b) of the Securities Exchange Act of 1934 (the Exchange Act), the Company's management evaluated, with the participation of the Company's Chairman, President and Chief Executive Officer and the Company's Senior Vice President - Finance, Chief Financial Officer and Treasurer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the quarter ended June 30, 2007. Based upon their evaluation of these disclosure controls and procedures, the Company's Chairman, President and Chief Executive Officer and the Company's Senior Vice President - Finance, Chief Financial Officer and Treasurer concluded that the Company's disclosure controls and procedures were effective as of the end of the quarter ended June 30, 2007 to ensure that material information relating to the Company, including its consolidated subsidiaries, was made known to management by others within those entities as appropriate to allow timely decisions regarding disclosure, particularly during the period in which this Quarterly Report on Form 10-Q was being prepared.

**Changes in Internal Control over Financial Reporting**

There was no change in the Company's internal control over financial reporting that occurred during the quarter ended June 30, 2007, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

**Part II Other Information****Item 4 Submission of Matters to a Vote of Security Holders**

At the Company's Annual Meeting of Shareholders held on April 27, 2007, the following individuals were elected to the Board of Directors:

Directors elected to three-year terms expiring at the 2010 Annual Meeting:

	Votes FOR	Votes WITHHELD	Not Voted
Kenneth P. Manning	11,255,863	137,381	2,816,264
John J. Stollenwerk	11,252,295	140,949	2,816,264

Directors continuing in office with terms expiring at the 2008 Annual Meeting:

Ronald H. Dix

Thomas J. Fischer

Richard A. Meeusen

Directors continuing in office with terms expiring at the 2009 Annual Meeting:

Ulice Payne, Jr.

Andrew J. Policano

Steven J. Smith

At the Company's Annual Meeting of Shareholders held on April 27, 2007, shareholders approved the 2007 Director Stock Grant Plan by the vote set forth below:

FOR	AGAINST	ABSTAIN	BROKER NON-VOTES
7,601,931	1,204,978	83,269	2,503,066
